Bulletin of The University of Nebraska

ANNUAL CATALOG

OF THE

COLLEGE OF MEDICINE

ANNOUNCEMENT 1920-21

Published by the University

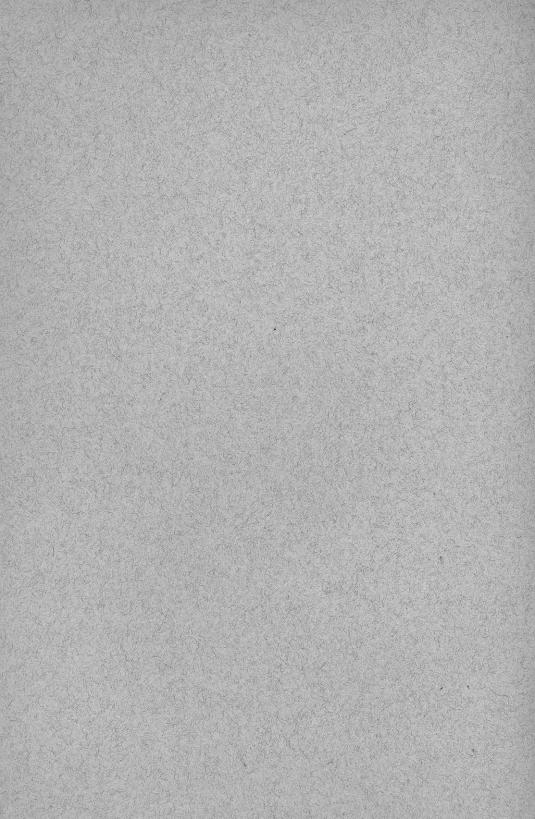

August 2, 1920

LINCOLN, NEBRASKA

The Bulletin of the University of Nebraska is published monthly in February, semi-monthly in March and December, semi-weekly in April, trimonthly in August, and monthly in May and November of each year by the University of Nebraska. Entered at the Post-Office at Lincoln, Nebraska, as second-class matter under Act of Congress July 16, 1894.

Acceptance for mailing at special rate postage provided for in Section 1103, Act of October 3, 1917, authorized July 18, 1918.

THE BOARD OF REGENTS

Members 1920	Term Expires
HON. JOHN ESCHLEMAN MILLER, President,	Lincoln1921
HON. EDWARD PROVOST BROWN, Davey	
HON. PHILIP LOUIS HALL, Lincoln	
HON. HARRY DeWITT LANDIS, Seward	
HON. FRANK WOODHULL JUDSON, Omaha	
HON. JOHN ROBINSON WEBSTER, Omaha	
James Stuart Dales, Secretary.	

COMMITTEES OF THE BOARD OF REGENTS

Executive—Messrs. Miller, Brown, Judson. Finance—Messrs. Hall, Webster, Landis. Property—Messrs. Webster, Miller, Hall. Industrial Education—Messrs. Landis, Judson, Brown. Medical Education—Messrs. Judson, Hall, Landis. Organization—Messrs. Miller, Brown, Webster.

OFFICERS OF ADMINISTRATION AND INSTRUCTION

The University

Samuel Avery, Ph.D., LL.D., Chancellor of the University. James Thomas Lees, Ph.D., Provost of the University. Florence Irwin McGahey, A.B., Registrar and University Publisher.

(Secretary of the Faculties.)

The College

Irving Samuel Cutter, Dean

John Franklin Allen, M.D., Clinical Assistant in Medicine.

William Nance Anderson, B.Sc., M.D., Assistant Professor of Physical Diagnosis.

Carl Hardin Ballard, M.D., Instructor in X-ray Diagnosis.

John Monroe Banister, A.B., M.D., Assistant Professor of Tropical and Military Medicine.

Elmer William Bantin, B.Sc., M.D., Clinical Assistant in Pediatrics.
 Harry Bauguess, B.Sc., M.D., Assistant Instructor in Biochemistry.
 Rodney Waldo Bliss, B.Sc., M.D., Assistant Professor of Medicine.
 Edson Lowell Bridges, M.D., Assistant Professor of Clinical Medicine.

Willson Orton Bridges, M.D., Professor Emeritus of Medicine.

Alfred Jerome Brown, A.B., M.D., Assistant Professor of Surgery.

William Frederick Callfas, C.M., M.D., Instructor in Clinical Otology.

Burton Whitford Christie, B.Sc., M.D., Assistant Professor of Pediatrics.

Frank Matthew Conlin, M.D., Instructor in Medicine.

- Leroy Crummer, B.Sc., M.D., Professor of Medicine. (Chairman of Department.)
- Irving Samuel Cutter, B.Sc., M.D., Professor of Biochemistry. (Chairman of Department.)
- Byron Bennett Davis, A.B., M.D., Professor of the Principles of Surgery and Clinical Surgery.
- Edwin Davis, A.B., M.D., Professor of Urology. (Chairman of Department.)

Harold E. Eggers, B.Sc., M.D., Professor of Pathology and Bacteriology. (Chairman of Department.)

- Harold Gifford, B.Sc., M.D., Professor of Ophthalmology and Otology. (Chairman of Department.)
- Sanford R. Gifford, A.B., M.D., Instructor in Ophthalmology.
- James Samuel Goetz, M.D., Assistant Professor of Therapeutics.
- Abe Greenberg, B.Sc., M.D., Clinical Assistant in Surgery.
- August Ernest Guenther, Ph.D., Professor of Physiology and Pharmacology. (Chairman of Department.)
- Lynn Thompson Hall, B.Sc., M.D., Clinical Assistant in Medicine.
- Howard Brownlee Hamilton, M.D., Assistant Professor of Pediatrics. Vincent C. Hascall, LL.B., Instructor in Medical Jurisprudence.
- Robert Russell Hollister, A.B., M.D., Assistant Professor of Surgery. Charles Aaron Hull, M.D., Instructor in Surgery.
- John C. Iwerson, M.D., Clinical Assistant in Pediatrics.
- Charles Stanton James, M.D., Clinical Assistant in Ophthalmology.
 Aldis Adelbert Johnson, Ph.B., M.D., Assistant Professor of Neurology.
- August Frederick Jonas, M.D., Professor of Surgery. (Chairman of Department.)
- J. Jay Keegan, A.M., M.D., Assistant Professor of Pathology.

Charles Rex Kennedy, M.D., Professor of Clinical Surgery.

Archibald Roy Knode, M.D., Instructor in Ophthalmology.

James Thomas Lees, Ph.D., (Ex-Officio).

Henry Bassett Lemere, M.D., Instructor in Opthalmology and Otology.

- Adolph Bernard Lindquest, A.B., M.D., Clinical Assistant in Opthalmology and Otology.
- John Prentiss Lord, M.D., Professor of Orthopedic Surgery. (Chairman of Department.)

¹John C. Lyman, A.B., M.D., Instructor in Anatomy.

Rufus A. Lyman, A.M., M.D., Dean of the College of Pharmacy. Adviser to Pre-medical students.

Harry Monroe McClanahan, A.M., M.D., Professor of Pediatrics. (Chairman of Department.)

Otis Wallace Martin, B.Sc., M.D., Clinical Assistant in Urology.

William Forsyth Milroy, M.D., Professor of Clinical Medicine.

George Mogridge, M.D., Lecturer on Arrested Development of the Mind, Glenwood, Iowa.

John Clyde Moore, Jr., B.Sc., M.D., Assistant Professor of Pediatrics. John Tennyson Myers, A.B., M.S., Assistant Professor of Bacteriology.

Frederick W. Niehaus, B.Sc., M.D., Clinical Assistant in Medicine.

John Rudolph Nilsson, M.D., Instructor in Surgery.

Donald R. Owen, B.Sc., M.D., Clinical Assistant in Medicine.

Frank Styles Owen, M.D., Professor of Laryngology and Rhinology. (Chairman of Department.)

James McDowell Patton, A.M., M.D., Associate Professor of Ophthalmology.

Amos W. Peters, A.M., Ph.D., Professor of Biochemistry.

Charles Whitney Pollard, A.B., M.D., Professor of Obstetrics and Gynecology. (Chairman of Department.)

John Beekman Potts, M.D., Instructor in Laryngology.

Charles William McCorkle Poynter, B.Sc., M.D., Professor of Anatomy. (Chairman of Department.)

George Pratt, B.Sc., M.D., Instructor in Medicine.

Daniel T. Quigley, M.D., Instructor in Surgical Pathology.

Charles O'Neill Rich, B.Sc., M.D., Instructor in Surgery.

Clyde Augustus Roeder, M.D., Instructor in Surgery.

William Lytle Ross, Jr., B.Sc., M.D., Clinical Assistant in Urology.

Clarence Rubendall, B.Sc., M.D., Clinical Assistant in Laryngology and Rhinology.

Abraham S. Rubnitz, B.Sc., M.D., Clinical Assistant in Pediatrics. Carl Frederick Rusche, B.Sc., M.D., Assistant Instructor in Physiology.

Earl C. Sage, B.Sc., M.D., Instructor in Obstetrics.

Alfred Schalek, A.M., M.D., Professor of Dermatology and Syphilology. (Chairman of Department.)

Albert Schneider, M.D., Ph.D., Associate Professor of Pharmacology. Robert D. Schrock, A.B., M.D., Instructor in Orthopedic Surgery.

Andrew Bartholomew Somers, M.D., Professor Emeritus of Obstetrics. Robert James Stearns, M.D., Clinical Assistant in Urology.

Arthur Charles Stokes, B.Sc., M.D., Professor of Clinical and Experimental Surgery.

¹Resigned.

John Edwards Summers, M.D., Professor of Clinical Surgery.

Willis Harvey Taylor, B.Sc., M.D., Instructor in Obstetrics.

Amos Thomas, LL.B., Instructor in Medical Jurisprudence.

Kenneth Levi Thompson, B.Sc., M.D., Clinical Assistant in Surgery.

Charles Creighton Tomlinson, M.D., Instructor in Dermatology.

Solon Rodney Towne, A.M., M.D., Professor Emeritus of Hygiene.

Chester Hill Waters, B.Sc., M.D., Instructor in Gynecology.

Joseph A. Weinberg, B. Sc., M.D., Assistant Instructor in Pathology. William Penaluna Wherry, M.D., Instructor in Laryngology and Rhin-

ology.

Harrison Alonzo Wigton, B.Sc., M.D., Instructor in Nervous and Mental Diseases.

William Albert Willard, Ph.D., Professor of Anatomy.

Harriet Wilson, A.B., Librarian of Medical College Library.

G. Alexander Young, M.D., Professor of Nervous and Mental Diseases. (Chairman of Department.)

COMMITTEES OF THE FACULTY

- Advanced Standing and Delinquency—Dr. Poynter (Chairman), Dr. Willard, Dr. Keegan.
- Clinical Teaching—Dr. Cutter (Chairman), Dr. Stokes, Dr. W. O. Bridges.
- Course of Study, Catalog and Schedule—Dr. Guenther (Chairman), Dr. Peters, Mr. Myers.
- Scholarships and Research Prizes—Dr. Gifford (Chairman), Dr. J. E. Summers, Dr. Milroy.
- Student Activities-Dr. Pollard (Chairman), Dr. Christie, Dr. Anderson.

Convocations-Dr. Bliss (Chairman), Dr. Patton, Dr. Lord.

Library—Dr. Crummer (Chairman), Dr. Brown, Dr. Guenther, Dr. Potts.

Summer Session-Dr. Willard (Chairman), Dr. Anderson, Dr. Kennedy.

Graduate Work-Dr. Eggers (Chairman), Dr. Poynter, Dr. Peters.

Dispensary—Dr. Johnson (Chairman), Dr. E. L. Bridges, Dr. Kennedy.

Publications-Dr. Brown (Chairman), Dr. Patton, Dr. Rich.

University Hospital—Dr. B. B. Davis (*Chairman*), Dr. Crummer, Dr. H. Gifford, Dr. F. S. Owen, The Dean.

- Teaching of Surgery-Dr. Jonas (Chairman), Dr. J. E. Summers, Dr. B. B. Davis, Dr. Stokes.
- Staff Clinics-Dr. Young (Chairman), Dr. Hamilton, Dr. Patton, Dr. Jonas.

COLLEGE OF MEDICINE

General Information

The University of Nebraska College of Medicine was established in 1903, and since that time it has made rapid advancement. Today it stands among the leading medical colleges of the country in the character of its training of future practicing physicians.

The state legislatures during the past few years have appropriated approximately half a million dollars for the erection of laboratory buildings which are now completed and amply provided with up-todate equipment. The University Hospital, on the Medical campus, strictly for teaching purposes, contains a hundred and thirty beds available for clinical teaching in various services. (See plan of buildings, following page 24.)

Standing

The College of Medicine meets the requirements of the most exacting state examining and licensing boards. Its diploma grants the holder all privileges accorded to graduates of any medical college in the United States. The Royal College of Physicians and Surgeons in England has added the University of Nebraska to the short list of American institutions whose Graduates in Medicine, may on production of the required certificate of study, be admitted to the final examination before the Examining Board in Medicine, Surgery and Midwifery. This places the graduates on the same basis as graduates of the best English colleges.

Methods of Instruction

The course of study in medicine covers six years of thirty-six weeks each. During the first four years those laboratory sciences are pursued which form the basis for the clinical studies of the last two. The objective method is followed in laboratories and clinical instruction, with constant reference to the facts acquired from earlier laboratory work. Emphasis is placed on the individual effort of each student, of whom independent and thoro work is required.

The College affords ample opportunity for thoro instruction. The moderate size of the classes insures close contact between students and instructors. This is of the utmost importance for an exact knowledge of the fundamental branches. The clinical work, in sections, brings the individual student close to the clinical instructors, and affords him an opportunity to study each case at close range, as well as to secure an unusual amount of bedside instruction.

Students are urged to add to their preparation an additional year taken as internes in some hospital, or spent in some laboratory. On completion of this year's work such students may secure a second degree—Doctor of Medicine **cum laude**.

ADMISSION TO THE UNIVERSITY

Credentials which are accepted toward admission to the University become the property of the University and are kept permanently in the files. All credentials must be filed with the Registrar. They should be mailed at least two months before the beginning of any semester or session to insure prompt attention. Attention to this request will save applicants much inconvenience.

Admission to the University is gained only thru matriculation in one of the ten colleges, (the school of Fine Arts is included in the college).

Admission may be (1) to freshman standing, (2) to advanced standing, and (3) as adult special students.

The requirements for admission to each of the colleges vary only in a small degree except in the case of the College of Law, the College of Medicine, and the Teachers College. Students in the Teachers College are also matriculated in some other College of the University which grants the bachelor's degree.

For full admission to freshman standing applicants must present 30 entrance points, for conditional admission a minimum of 28 entrance points. (An entrance point indicates the work of five recitations a week, of 40 to 50 minutes each, for at least eighteen weeks. In laboratory courses an entrance point indicates three recitations and two double periods of laboratory work each week for at least eighteen weeks. In laboratory courses without recitation, an entrance point is the equivalent of fifteen single periods each week.)

Students admitted conditionally must remove the conditions at the earliest possible opportunity. Degrees will not be granted until such conditions are removed.

Advanced credit, in addition to that presented when admission is granted, to be accepted must be submitted for approval within one year from date of matriculation.

Admission by Certificate

Admission may be had by certificate (a) from the secondary schools on the accredited list of the University and (b) from the secondary schools which are members of the North Central Association of Colleges and Secondary Schools, and of Accrediting Associations of equal rank.

Applicants, who are graduates from secondary schools accredited to the University, must file their "entrance cards" with the Registrar or indicate the name of the school and the year of graduation when applying for admission.

Applicants, who are not graduates from secondary schools accredited to the University must secure and file with the Registrar an officially certified record showing the length of time of attendance. the length of each course in weeks, the number of recitations per week, the length of recitations and the grade secured, and also a recommendation from the Superintendent or Principal that the applicant be admitted before graduation.

Applicants from secondary schools which are members of the North Central Association of Colleges and Secondary Schools, and of Accrediting Associations of equal rank must secure and file with the Registrar an officially certified record showing the length of time of attendance, the length of each course in weeks, the number of recitations per week, the length of recitations and the grade secured, and also whether or not the applicant is a graduate. Graduates of the University Preparatory Course of the School of Agriculture are admitted to full freshman standing in the College of Agriculture.

Admission by Examination

All applicants, other than those mentioned above, for admission to the University are required to take entrance examinations. The High School Inspector holds such examinations during the entire week in which registration occurs.

Entrance Subjects

For admission to freshman standing credit in the following subjects to the amount indicated must be presented:

Required Subjects	Points
English (a)	4
Language (foreign) (b)	10
Language (foreign) (b)	10
History (European)	
Science (laboratory) (c)	
Elective Subjects	
Other subjects taught in an approved manner in an accredite	ed
secondary school	

(a)	English—This requirement effective Sept. 1, 1922.	will	be	increased	to	six	(6)	points	for	all	colleges,

(b) Language and mathematics

Total

College of Agriculture—Ten points of foreign language and mathematics are recommended with a minimum of four points in either, but, additional English, history or laboratory science may be offered in place of foreign language. College of Arts and Sciences—Ten points of foreign languages and mathema-

....30

Conge of Arts and Sciences—ten points of foreign languages and mathematics are required with a minimum of four points in either. In the Academic-Medical course Greek or Latin is recommended.
College of Engineering—Three points algebra and two points geometry are required. Additional English, history or laboratory sciences may be offered in place of foreign language.

College of Law-Same as for the College of Arts and Sciences, (except that in addition thirty college hours of academic work are required).

College of Business Administration—Same as for the College of Agriculture. College of Dentistry—Same as for the College of Arts and Sciences. College of Medicine—Same as for the College of Arts and Sciences, except that

College of Medicine—Same as for the College of Arts and Sciences, except that Greek or Latin is recommended, (and in addition sixty college hours of aca-demic work, including chemistry 12 hours, four of which shall be organic; physics 8 hours; zoology 8 hours and English 6 hours.)
College of Pharmacy—Ten points of foreign language and mathematics are re-quired, with a minimum of four points in either.
Teachers College—Same as for the College of Agriculture or the College of Arts and Sciences, (and in addition twenty four college hours of academic work).

(c) Science

For entrance to the College of Agriculture both physics and chemistry are de-sirable, but either a full year of physics or of chemistry should be offered. Students offering only a half year of either cannot continue their study in the College without registering for the elementary course.

Admission to Advanced Standing

Applicants for admission from other universities or colleges must file with the Registrar (1) a letter of honorable dismissal; (2) an officially certified statement of the college work already accomplished showing the length of time in attendance, the length of each course in weeks, the number of recitations or lectures per week, the length of recitation or lecture, the amount of time per week in laboratory courses and the grade secured; (3) an officially certified record of the secondary school work satisfying the admission requirements of that College of the University which they seek to enter.

Full credit is given for work completed at institutions which maintain standards of admission and graduation equal to those of this University. Credits submitted from schools that do not have such standards are scaled or adjusted in proportion to the character and standing of such institutions. In every instance, however, the student must complete in residence, in the senior year, and in the college in which he is registered, at least thirty of the 125 hours for graduation.

Advanced credit, in addition to that presented when admission is granted, to be accepted must be submitted for approval within one year from date of matriculation.

Admission as "Adult Special" Students

Persons at least 21 years of age who cannot fulfill the regular admission requirements for freshman standing, but who present an equivalent academic training, or who have otherwise acquired adequate preparation for collegiate courses, may be admitted to the University as "Adult Specials". Such admission shall be approved by the Dean of the College which applicant desires to enter. Adult specials are subject to the same regulations as regular students in respect to military science or physical training or eventual graduation requirements.

Admission to the Medical College Proper

For admission to the College of Medicine proper, applicants must present sixty hours of college work, representing an attendance at an approved college for two college sessions each consisting of at least thirty semester hours, extending thru two years of thirty-two weeks each, and in addition, thirty entrance points. The subjects included in two years of college work shall be in accordance with the following schedule:

Required Subjects	Semester Hours
Chemistry	
Four hours of which shall be organic Chemistry.	
Physics	
Biology (only 4 hours may be Botany)	
English	6

Electives

A modern foreign language, advanced zoology, psychology, algebra and trigonometry, or additional chemistry.

For medical entrance a credit hour is defined as follows:

A credit hour is the equivalent of one hour of recitation, quiz or lecture per week for one semester or two hours of laboratory work per week for one semester.

Credit Requirements

A student shall complete in residence and in the senior year at least thirty-six of the two hundred hours required for graduation.

In accordance with the recommendation of the Association of American Medical Colleges, the College of Medicine does not grant any time credit toward the M.D. degree to holders of a bachelor's degree; this means that the total time spent by each student taking his medical degree must include as a minimum four years of registration in a medical college.

The granting of subject credit is at the discretion of the chairman of each department, subject to the meeting of such conditions or the passing of such examinations as he may with reason impose. Admission to any class does not necessarily carry with it credit in all work previously done by the class, since the chairman of any department has the right to demand satisfactory evidence of the completion of previous work in that subject equal to that required of the student of this College, and in case the work is not equal to such requirement the deficiency stands against the student as a "condition" till removed.

Advanced credit, in addition to that presented when admission is granted, to be accepted must be submitted for approval within one year from date of matriculation.

Combined Academic and Medical Courses COURSE LEADING TO THE DEGREES OF B. SC. AND M. D.

By the use of the laboratory subjects of the third and fourth years of the medical course as electives in his collegiate course the student is enabled to receive, at the end of four years, the degree of Bachelor of Science and at the end of six years that of Doctor of Medicine. This, however, can only be accomplished by following exactly the course as outlined below, substitution being permitted rarely and under conditions where insistence upon the strict enforcement of the requirements would cause evident injustice. Any student failing to meet these requirements can secure his B. Sc. degree only by meeting the group requirements of the College of Arts and Sciences.

SUGGESTED SEQUENCE OF SUBJECTS PRE-MEDICAL COURSE

COURSE LEADING TO THE DEGREES OF A. B. AND M. D.

A student registering for the degree of Bachelor of Arts may arrange a course similar to the course leading to the degrees of B. Sc. and M. D. by the same use of his electives, but seven years are necessary to meet the requirements for the Bachelor of Arts degree and to secure, at the same time, the scientific training required for the degree in medicine.

A student entering this University from another in which is offered a six-year combined course substantially equivalent to the one here outlined, may be registered in this course, on presentation of properly authenticated credentials showing the satisfactory completion of all requirements of the institution from which he comes.

Registration

Certain days at the beginning of each semester are allowed for registration. To promote prompt registration, a fee of \$3.00 is charged any student who, unless excused by the Dean, seeks to register outside of these days. A fee of \$1.00 is charged for re-registration when made necessary by the student's fault. Any change whatever in a registration once made is regarded as a re-registration. A student taking the college work required for entrance to the College of Medicine matriculates and registers in the College of Arts and Sciences until the necessary amount of college work is completed. A student taking the combined six-year course for the degrees of Bachelor of Science and Doctor of Medicine matriculates and registers only in the College of Arts and Sciences during the first two years of his work. He continues to register in the College of Arts and Sciences during the next two years, or until he receives his B. Sc. degree; but he must also matriculate and register in the College of Medicine at the beginning of the third year's work and must register regularly thereafter in the College of Medicine. If he is a candidate for the A.B. degree. he must begin to register also in the College of Medicine not later than the beginning of the fourth year of his course, as at least four year's registration in a college of medicine is required of all who receive the M. D. degree. No regular student is registered for less than twelve (12) hours a semester without the Dean's permission, nor under any conditions for more than eighteen (18) hours. No student may add any subject to his schedule or drop from it any subject for which he has been regularly registered, without written permission from the Dean. Students cannot attend classes for which they are not registered and credit is not granted for studies pursued without registration. Any change in a student's residence must be immediately reported to the Dean.

REQUIREMENTS FOR THE SATISFACTORY COMPLETION OF A COURSE

The completion of a course is determined by the instructor in charge of the subject thru examination and other records of a student's work. To pass in a course a student must comply with the following requirements:

1. He must have attended at least 80 per cent of the scheduled lecture and recitation appointments in the course, and 85 per cent of all scheduled laboratory hours.

2. He must receive a final grade of at least 70 per cent in third and fourth year subjects, and at least 75 per cent in fifth and sixth year subjects.

A course, which for a good reason has not been completed, may, if of passing grade, be marked incomplete, "I". This "I" must be removed within one year otherwise the "I" becomes a condition, "C".

Removal of Delinquencies

A student who does not pass a course, provided the final grade is not below 60 per cent is "conditioned" in that course and is entitled to a re-examination at the next supplementary examination period which occurs in the registration week of the following September.

Participation in the supplementary September examinations for the removal of conditions is governed as follows:

(1) Students must appear before the chairman of the delinquency committee at the beginning of the summer session immediately preceding the supplementary examination and register in the conditioned subjects which shall be plainly marked "conditioned" and the delinquency in credit hours indicated.

(2) The supplementary September examination can be taken only after the completion of a definite and assigned amount of laboratory, lecture, quiz or library work, fixed by the instructor under whom the condition was incurred.

(3) With the permission of the instructor in charge, acceptable vacation courses may be attended in this college or at other institutions.

(4) The summer registration fee for work done at the College of Medicine, University of Nebraska shall be \$5.00 per credit hour.

If a student falls below 60 per cent, or if he does not pass the supplementary examination he is "failed" in the course, and shall not have the privilege of a re-examination until after repeating the course in which he failed.

No student coming from another school will be allowed any privileges in this school which would have been denied him in the school which he leaves.

Absence or Withdrawal

The Dean of the College of Medicine is the Adviser of all students in the College of Medicine. He has a consultation hour, when students may call seeking advice touching their work. A leave of absence for a short time may be granted a student by the Dean of his College. This is merely a justification for absence and not an excuse from any work. If a student in good and honorable standing finds it necessary to withdraw from the University before the close of a semester, the Dean grants him permission to do so. If he is in good standing and is not a minor he is given honorable dismissal from the University at his own request; if a minor, at the request of his parents or guardian.

REQUIREMENTS FOR GRADUATION

The degree of Doctor of Medicine is granted only under the following conditions:

1. The candidate must be at least twenty-one years of age.

2. He must possess a good moral reputation.

3. He must have complied with all the requirements of admission.

4. He must have pursued the study of medicine for at least four years and must have passed the necessary examinations and have received credit for at least four full years of instruction at medical colleges in good standing. The last year he must have taken in this institution.

GRADUATE WORK

Graduate work of two types is offered in the College of Medicine.

(1) Advanced study and research in one or more of the laboratory departments by students holding baccalaureate degrees from this institution or from some other university or college. Such study may lead to the degree of Master of Arts or of Doctor of Philosophy and may be carried at the same time in a lengthened period of residence as part work in the regular medical schedule. The departments offering this work are included in the Graduate College of the University, the general requirements of which must be met by all candidates for these degrees.

(2) Work of a clinical character by graduates in Medicine serving interneships or by graduates in Medicine working under direct faculty supervision. Such work may lead to the degree of Doctor of Medicine **cum laude** under the following conditions laid down by the faculty of the College of Medicine. The candidate must apply at the beginning of his interneship or at least one year before he expects to come up

16

for such degree; his work shall consist of original clinical data or experimental work together with general reading and critical survey of the literature bearing on his special subject, and shall be embodied in a typewritten thesis which, if accepted, shall be deposited in the Medical College library; the subject and preliminary outline of the work shall be approved by the faculty committee on graduate study, and throughout the year the work shall be under the supervision of two advisers appointed by the committee with the condition that one shall be a member of the laboratory faculty and the other (if candidate is an interne) the chief of staff of the hospital in which interne is serving; the final acceptance of the thesis shall be by unanimous vote of the faculty and only after its recommendation by the advisory committee and after an opportunity for its inspection by all members of the faculty.

FEES

All fees excepting the diploma fee are payable in advance, to the secretary of the College. No fees can be refunded to a student after the beginning of the fourth week from the date of his registration, save for causes beyond the student's control; in the latter case the refund can only be made upon written application to the Dean. The application must state the reason and be presented at the time of withdrawal from a course or the college. The scheduled fees in the College of Medicine are as follows.

Matriculation fee (charged once only for each	1
degree)	\$5
Diploma fee	5
Diploma fee, absentia, additional	10
Diploma, "cum laude," fee	10

No person can be recommended for a degree until he has paid all fees, including the fee for the diploma.

THIRD YEAR

Tuition, first semester	\$65.00
Tuition, second semester	60.00
Breakage fee	10.00

FOURTH YEAR

Tuition, first semester	\$60.00
Tuition, second semester	
Breakage fee	10.00

FIFTH YEAR

Tuition, first semester	
Tuition, second semester	55.00
Breakage fee	10.00

SIXTH YEAR

	Tuition,	first	semester	\$55.00	
	Tuition,	secon	d semester	55.00	
• 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	Breakage	e fee.		10.00	
(Unuse	d portion	of bre	eakage fee is returnable.)		

For elective courses requiring laboratory space, apparatus and material, an extra fee is charged. This fee is by agreement between the student and the chairman of the department, and is based on the amount of material required. Special course fees or the fees of students taking part-time work is pro-rated on the basis of the number of hours of work. In no case is the fee more than fifteen cents for each hour of work. The minimum fee, however, is \$10.00. Breakage in the laboratory and damage to the College property is charged to the individual or class responsible. In case the responsibility for the damage cannot be placed it is charged to the class pro-rata.

EXPENSES

Board may be obtained in the vicinity of the College building at an average of \$6.00 per week. Comfortable rooms for individuals cost from \$8.00 to \$15.00 a month. Students rooming together may by this means obtain comfortable rooming quarters at approximately \$7.00 per month each. The total expense of the student for the school year, exclusive of books and instruments, including all fees, is between \$385 and \$650. Many students expend more than this, some expend much less. Students should provide an allowance of \$50 per annum for books and instruments.

The Young Men's Christian Association offers to students in the College of Medicine special season tickets at a very small cost, granting the privileges of the Association Building. In a city the size of Omaha there are many opportunities for the students to defray a part of their expenses. The College of Medicine does not, however, guarantee employment. Thru the Young Men's Christian Association, the Omaha Chamber of Commerce and other agencies, employment is obtained for a certain number of students.

GENERAL AND DEPARTMENTAL STATEMENTS

The ground floor of the north laboratory building, with large locker room and steel locker for each student, adjoins a lounging room and a room provided with shower baths. Women students have an attractive rest room with cloak rooms. This floor also accommodates the anatomy preparation rooms, room-size incubator and refrigerator.

Direct current for arc lights for photomicrography and the projection lanterns is provided by a motor generator installed in the engine room.

LABORATORY FACILITIES

Anatomy—The department of Anatomy occupies the third and fourth floors of the north laboratory building. 'The rooms are well lighted and ventilated. The "unit room" system—each unit accommodating eight students—has been adopted as being superior to that of a large common dissecting room. The State Anatomical law provides ample material for dissection. In the laboratory for microscopical anatomy individual desks, lockers, reagents, etc., are at the student's command, as are also excellent collections of histological and embryological material, models, charts, journals, etc.

Biochemistry—This department, located on the fourth floor of the south laboratory, is amply equipped with the most modern scientific apparatus. It also has special research laboratories equipped with calorimeter, thermostat, automatic burettes, electric stoves, etc. A balance room and rooms for combustion, calorimetric and Kjeldahl work may also be mentioned.

Pharmacology—Experimental pharmacology occupies the second floor, south laboratory building. The chemical and pharmaceutical work of the student is carried on in this laboratory. The department's equipment includes private laboratories for experimental work.

Pathology—This department occupies all of the second floor, north laboratory building, and has two large teaching laboratories for bacteriology and general pathology of the fourth year and for clinical and special pathology of the fifth year. Ample facilities, such as microscopes and other apparatus, are provided for each student.

Physiology—The main physiology laboratory in the south laboratory building accommodates forty students in each section, and separate tables with lockers are provided for each pair of students. The room for mammalian experimentation accommodates thirty-two students. For research work and special experiments several additional rooms provide abundant space. The work shop, the instrument room, and the photographic room are all provided with every working convenience.

CLINICAL FACILITIES

The University Hospital—The establishment of this hospital on the Medical campus makes possible the closest correlation between clinical and laboratory teaching. The hospital, thoroly modern in every respect, contains 130 beds thus amply providing for the care of a great

variety of cases. The control of the hospital rests wholly with the Board of Regents and it is administered by the College of Medicine.

The University Free Dispensary—is located on the first floor of the south laboratory building. Separate services, each having its own rooms and equipment, are provided in internal medicine; surgery; eye, ear, nose and throat; pediatrics; gynecology; obstetrics; dermatology and genito-urinary diseases. There is also an out-patient department, which answers many calls from the Visiting Nurses' Association and the Associated Charities of Omaha. Over 12,000 dispensary cases were cared for during 1919.

The Child's Saving Institute—This institution containing seventy beds, erected on a portion of the Medical campus, lies directly across the street from the south laboratory building. Valuable clinics in infant feeding and the nutritional diseases of childhood are afforded by the institute.

Extra Mural Hospitals—Clinical teaching is scheduled at the Nebraska Methodist Hospital and at the Clarkson Memorial Hospital. The Methodist Hospital is a modern fire-proof structure of two hundred and fifty beds and is well equipped with laboratories, clinic rooms, etc. The Clarkson Memorial Hospital, of eighty beds, a thoroughly modern institution, affords high grade instruction in selected cases. Additional available hospitals are the Wise Memorial, Douglas County, Immanuel and City Emergency.

Hospital Appointments—Graduates of the College of Medicine are afforded a wide choice in the selection of interneships. Approximately twenty interneships are available in the Omaha hospitals above mentioned. For several years past, practically every graduate of the College of Medicine has served an interneship of at least one year. Interneships have been secured in several of the hospitals of New York City, Philadelphia, Buffalo, Pittsburg, Detroit, Cincinnati, Los Angeles, Kansas City, etc. The demand for internes is greater than the College has ever been able to supply.

ADDITIONAL INFORMATION

Public Health—The College of Medicine stands ready to supply expert advice in co-operation with the state and local departments of health on the general health conditions within the state. Members of the faculty of the College of Medicine will respond whenever possible for addresses on medical subjects of general interest. These addresses are available for Teachers' Associations, Women's Club meetings and the like.

The University College of Medicine is keenly alive to the possibilities which lie within the general theme "Conservation of Public Health" and every effort is made to bring important advances along the lines of better living before the people.

Bulletins on Public Health—The Conservation of Public Health Series is issued quarterly by the College of Medicine. Titles of the bulletins so far issued are as follows:

Number 1. Hints on Home Nursing for Babies.

- Number 2. Everyday Facts about Tuberculosis, Typhoid, and Cancer.
- Number 3. Hygiene of the Child-Colds, Whooping-cough, Measles.

Number 4. Hygiene of the Child-Eyes, Ears, Nose.

Number 5. Hygiene of the Child-Scarlet Fever, Diphtheria.

Number 6. "Spanish" Influenza.

Copies of these bulletins will be sent to any address upon request. The College of Medicine Library-The Medical College Library re presents one of the strongest and most distinctive features of the Medical School. Ideally located in a cool, and quiet wing of the hospital building and within easy access from the various laboratories it stands as a vital, common interest to the laboratory and clinical branches of medical instruction. The library equipment is modern in every respect. Accessions, cataloging and indexing are in charge of a competent, expert librarian. The 16,000 bound volumes and more than 10,000 unbound pamphlets, reprints and theses are the result of purchases and acquisitions extending over a period of more than half a century and represent the mature judgment, as to valuable medical literature, of many specialists. There has thus been built up, not only a very valuable research library, but one which offers students abundant opportunities for additional reading and study. One hundred and thirty standard, scientific periodicals are on the regular subscription list.

Incidental to its ordinary functions the library has, in recent years, laid emphasis on the acquisition of material of historic interest, including books and surgical instruments. The library recently acquired over one hundred and fifty rare etchings, copper plate engravings, lithographs, etc., of the great men who were the master minds in medicine. Incorporated within the library of the College of Medicine are 2000 volumes of the Omaha-Douglas County Medical Society and 1500 volumes of the State Medical Society.

The University Library, in Lincoln, containing over 140,000 volumes is freely accessible to students and faculty in Omaha. Books may be withdrawn at any time upon demand. Likewise thru the Medical College librarian it is possible for short periods to draw upon

the resources of the John Crerar Library of Chicago or the Surgeon General's Library at Washington. The State Library of 75,000 volumes at the State Capitol and the Nebraska State Historical Society Library of 65,000 volumes include valuable medical works in certain lines; series of public documents such as reports of state boards of health and of state hospitals and other institutions.

The Alumni Association of the University of Nebraska College of Medicine maintains an active organization with headquarters in Omaha. The Association numbers about five hundred members.

Medical Student Fraternities. Nu Sigma Nu, Phi Rho Sigma, Phi Chi and Phi Beta Pi have active chapters and each maintains a chapter house.

The Medical Sorority is Nu Sigma Phi.

Alpha Omega Alpha. Nebraska Alpha Chapter of Alpha Omega Alpha, the medical honorary fraternity, is located at the University of Nebraska College of Medicine. Election to membership in this society occurs at the end of the first semester, sixth year, and is based upon the scholarship record of the last four years of the medical course.

Medical History Scciety A student society, open to members of the Junior and Senior classes, meets bi-weekly for the study of the history of medicine.

Pre-Medical Society. A large pre-medical society has existed for a number of years among the students in the pre-medical courses at Lincoln. This society meets monthly for an informal evening at which time addresses are made by members of the faculty. Usually some member of the clinical faculty from Omaha is in attendance.

Museum—The pathological museum of the College of Medicine contains about 2500 specimens. Nearly every variety of pathological lesion is represented and fresh material is regularly received from the affiliated hospitals. From the autopsies performed by the staff, averaging one hundred per year, much valuable material is obtained. The museum is an important and necessary adjunct to the teaching of pathology and of clinical medicine.

The anatomical museum consisting of models, charts and mounted specimens, is housed in the quarters of the department of anatomy, where it is readily accessible to the students of the department.

Journal Club—The members of the Laboratory Staff conduct a Journal Club.

Student Loan Fund—This is a private foundation to aid students to complete their college work in residence at the University—a private enterprise administered by the Board of Regents. The present donors are John A. Waddell of Kansas City, Mo.; John R. Webster of Omaha; William G. Whitmore of Valley, Nebr., \$1,000 each, and Mrs. A. E. Carter of New York City, \$500. For further information apply at the Secretary's office.

Scholarships—Scholarships are awarded in the various departments in return for students' assistance. Applications for scholarship should be made to the Dean or Chairmen of departments.

Jetur Riggs Conkling and Jennie Hanscom Conkling Foundation.— The will of the late Clementine C. Conkling provides for the creation of a Trust to be known as the "Jetur Riggs Conkling and Jennie Hanscom Conkling Foundation," the income of which shall be used by the Regents of the University of Nebraska in providing scholarships for deserving medical students. Scholarships may be awarded only afterthe close of the students' first year in the Medical School.

Under the stipulations of the Trust, students who have completed the freshman medical year in good standing may apply for a scholarship. Scholarships will not exceed the sum of two-hundred dollars per year. Applications for scholarships should be addressed to the Dean.

COURSE OF STUDY

The course of study outlined is constructed in accordance with the recommendations of the Council on Medical Education of the American Medical Association and of the Association of American Medical Colleges. The experience of the best medical colleges of the country, has been freely utilized. Logical sequence, relative stress and attention devoted to studies, with economy of the students' time and energy, have been carefully weighed and considered.

DISPENSARY AND CLINICAL CLERKSHIPS

During the fifth and sixth years, students in small groups are assigned, in rotation, to dispensary and clinical clerkship services according to the following schedule,—

	Α	В	С	D	Е	F	G	Η	I	J	K
19.2	1	2	3	4	5	6	7	8	9	10	11
	2	3	4	5	6	7	8	9	10	11	1
	3	4	5	6	7	8	9	10	111	1	2
	4	5	6	7	8	9	10	11	1	2	3

In the assignment scheme the numerals represent student groups while the letters represent the various services. Each service is of one month's duration and one of the following eleven,—A=Medicine at Dispensary; B=Medicine at Hospital; C=Surgery at Dispensary; D=Surgery at Hospital; E=Gynecology; F=Pediatrics and Nervous and Mental Diseases; G=Eye, Ear, Nose and Throat; H=Urology; I=Laboratory; J=Drugs; and K=Receiving and Out-calls.

SUMMARY OF COURSES OF THE THIRD, FOURTH, FIFTH AND SIXTH YEARS

THIRD YEAR First Semester

Course	Character	Total Hours	Hours* Credit
Anatomy 1	Gross Dissection	270	9.7
Anatomy 4a	Histology	100	3.6
Pathology 1	Bacteriology	130	4.7
Total	hours of semester.	500	
Total	credit hours	18	

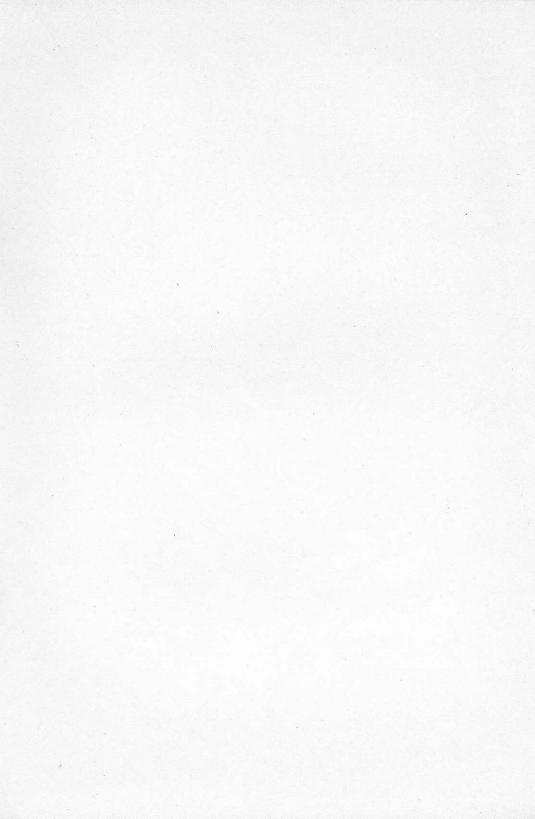

Second Semester

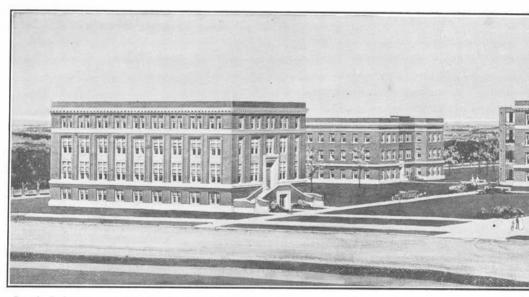

C	ourse	Character	Total Hours	Credit Hours
Anatomy	2	Gross Dissection	190	7
		Organology	120	4
Anatomy	5	Neurology	100	3.6
		Embryology	90	3.4
1 Constant	Total hor	irs of semester	500	
	Total cre	dit hours	18	
	Total hou	irs of third year	1000	

FOURTH YEAR First Semester

Course	Character	Total Hours	Credit Hours
Physiology 1 & 2		285	9
Bio-chemistry 1 & 2		200	7
Pathology 2		50	2
Total hours	of semester		
Total credit	hours		

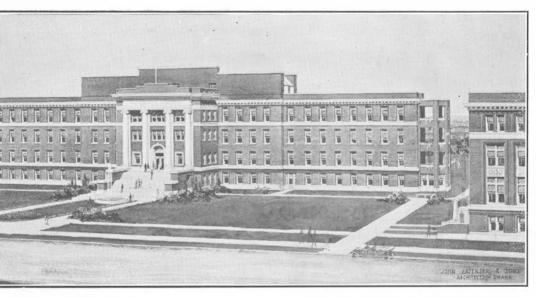

*A "credit hour" is given for each one hour recitation or lecture which presupposes two hours of preparation, or for the equivalent of a three hour laboratory period during each of the 17 weeks of a semester.

South Laboratory Building occupied by Bio-Chemistry-Physiology-Pharmacology and Dispensary. Proposed Nurses' Home

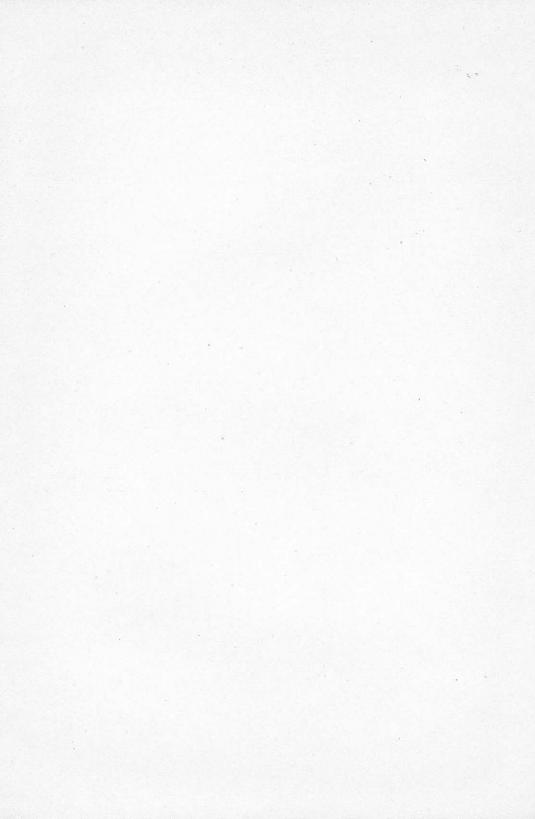

The University Hospital contains one hundred thirty beds in ward group units ment is provided with modern equipment. The operating suite is on the fifth floo ment. Wide porches both to the north and south provide out-door accommodations for the comfort and safety of the patients. The University Hospital is entirely u rated in connection with the College of Medicine.

University Hospital

North Laboratory Building occupied by Anatomy-Pathology and Bacteriology

f sixteen beds each and adequate isolation rooms. A commodious pathological departwith north light and is connected with recovery rooms and a complete X-ray departor over fifty patients. The hospital is a complete teaching unit with every convenience her the control and government of the Board of Regents of the University and is ope-

ANATOMY

Professors Poynter (Chairman), Willard, Doctor Lyman and Assistants

In this department instruction is given in gross anatomy, histology, embryology and neurology. The work of the department extends thru the third year.

All instruction is based on laboratory work carried out under the supervision of the staff. Lectures covering subjects of broad morphological significance are given before the entire class but for the discussion of details, in conjunction with laboratory work, the class is subdivided into small groups. Every effort is made to correlate the work in gross and microscopic anatomy.

1, 2. Gross Anatomy—Study of the human body with complete dissection in the laboratory. The work is so arranged as to insure proficiency in technique as well as a proper understanding of the subject. Lectures, conferences and laboratory, 460 hours.

3. Embryology—Brief survey of the fundamental facts of vertebrate development and their application to the problems of human morphogenesis and histogenesis. The work on general development

ANATOMY

Professors Poynter (Chairman), Willard, Doctor Lyman and Assistants

In this department instruction is given in gross anatomy, histology, embryology and neurology. The work of the department extends thru the third year.

All instruction is based on laboratory work carried out under the supervision of the staff. Lectures covering subjects of broad morphological significance are given before the entire class but for the discussion of details, in conjunction with laboratory work, the class is subdivided into small groups. Every effort is made to correlate the work in gross and microscopic anatomy.

1, 2. Gross Anatomy—Study of the human body with complete dissection in the laboratory. The work is so arranged as to insure proficiency in technique as well as a proper understanding of the subject. Lectures, conferences and laboratory, 460 hours.

3. Embryology—Brief survey of the fundamental facts of vertebrate development and their application to the problems of human morphogenesis and histogenesis. The work on general development

is based on the study of the chick and pig; in organology this material is largely supplemented with human tissues. Recitations, lectures and laboratory—90 hours.

4a and b. Histology and Organology—Miscroscopic analysis of the gross structure of the body. Study of normal human material supplemented by various other mammalian tissues. The relation between structure and function is constantly emphasized. An individual loan collection is furnished each student. Lectures, quizzes and laboratory—220 hours.

5. Neurology—Study of the gross and microscopic anatomy of the central nervous system. Dissections of the human brain, study of miscroscopic sections and reconstructions of the principal functional paths. The lectures aim to develop those features which are not susceptible of laboratory demonstration and which have a direct bearing on the later work of the curriculum. Lectures and laboratory -100 hours.

6. Graduate Courses—Facilities are available for research on special problems within the field of the department, such work leading to graduate degrees under the rules of the Graduate College of the University.

Note—All elective courses must be specially arranged for; time and credit to be arranged for at time of registration.

BIOCHEMISTRY

Professors Cutter (Chairman), Peters, Dr. Bauguess and Assistants

Courses 1 and 2 aim to equip the student with the necessary technique for the application of chemistry to clinical medicine as well as to acquaint him with the elementary facts of biological chemistry. The advanced courses provide for special study and research in the application of biochemical methods and principles to the problems of both practical and scientific medicine. Special attention will be given to problems of chemical pathology as they can be approached by the method and technique of physical chemistry including especially the applications of colloid chemistry.

The courses of the department are designed:

A. To give a fundamental training in biological (physiological) chemistry in the regular curriculum of the medical student.

B. To afford means for students of biological chemistry, not candidates for the degree of medicine, to obtain the necessary credits for the degrees of A.M. or Ph.D. All students who are candidates for a degree are expected to take courses 1 and 2 unless the content of these courses has been covered elsewhere in an acceptable manner. C. To offer the facilities of the laboratory to physicians and students, whether medical or non-medical, for special work on selected topics or methods in biochemistry, independently of the requirements for a degree.

1. Physical and Biological Chemistry—Biochemical substances and processes and their chemical and physiological relations to medicine. Work presupposes preparation in analytical and organic chemistry. First semester, fourth year, first six weeks, four conferences per week. Laboratory. Total 72 hours.

2. Biological Chemistry—Course 1 continued. Tissues, foods, nutrition and metabolism, both normal and pathological. Quantitative and micro-chemical methods used. Assigned individual chemical problems on the human or animal body. First semester, fourth year, following eleven weeks, four conferences per week. Laboratory. Total 132 hours.

3. Special Topics in Chemical Pathology—Laboratory and conference work on special topics or methods selected to meet the needs of physicians and advanced students. Hospital cases and normal individuals are experimentally studied with reference to both normal and pathological chemical conditions of blood, urine and metabolism. Hours and topics to be arranged individually.

4. Research in Physical, Biological or Pathological Chemistry— Hours and subjects of investigation to be arranged individually.

4a. A specific experimental problem comprised in the above topics.

4b. A descriptive and conference course on colloid chemistry.

DERMATOLOGY AND SYPHILOLOGY

Professor Schalek (Chairman), Doctor Tomlinson.

A thoro foundation in dermatology and syphilology is laid by lectures, quizzes and demonstrations. At the University Dispensary the students are brought in personal contact with patients of whom they take entire care under the supervision of the attending physician. A large and carefully selected collection of plates and photographs is available for lantern use.

1. Dermatology—Lantern demonstrations of the various skin lesions, together with lectures and recitations upon their etiology, pathology and treatment. Total 34 hours. First semester, sixth year.

2. Dermatology and Syphilology—A weekly clinic at the University or Douglas County Hospital. Demonstration of patients, discussion of treatment. Total 17 hours. Second semester, sixth year.

3. Dermatology and Syphilology—Examination of patients and treatment by students under supervision of attending physician, at University Dispensary. First semester, fifth and sixth year.

4. Dermatology and Syphilology—Course 3 continued. Second semester, fifth and sixth year.

GYNECOLOGY AND OBSTETRICS

Professor Pollard (Chairman), Doctors Waters, Taylor and Sage.

The instruction in diseases of women consists largely of practical demonstrations. The dispensary clinic, held at the University Free Dispensary, is regarded as a most important part of the clinical teaching. It is in these clinics that the student is trained in clinical diagnosis and where he may best be instructed in principles of The University Hospital affords abundant opportunity treatment. for the assignment of obstetric cases to members of the sixth year class under direction. During such attendance the student is excused from other College exercises. Under direction and in presence of the professor or one of his assistants, he makes examination, both by abdominal and vaginal palpation, suggests diagnosis, studies the progress of labor and in case operative procedure is necessary, witnesses and assists at operations. Clinics are held at which students are taught antepartum diagnosis, physiological and pathological pregnancy, and shown cases of interest that may be under observation at the time. Written reports of all clinical work are required and each student must have reported twelve cases of confinement before coming up for graduation.

1. The Physiology of Pregnancy, Labor and the Puerperium— Hygiene and conduct of pregnancy, normal labor and puerperium and the physiology and the care of the new-born child. Total 24 hours. Second semester, fourth year.

2. Pathology of Pregnancy, Labor, Puerperium and of New-born Child—Total 34 hours. First semester, fifth year.

3. Pathology of Pregnancy, Labor, Puerperium and of New-born Child—Course 2 continued. Total 34 hours. Second semester, fifth year.

4. Obstetrics—The hemorrhages, antepartum, intrapartum and postpartum. The toxemias. Review of use of forceps with special applications. Total 34 hours. First semester, sixth year.

5. Gynecology—The subject is covered by didactic lectures and recitations. These are supplemented by lantern demonstrations, instruments, casts and pathological specimens. Total 17 hours. First semester, fifth year. 6. Gynecology—Course 5 continued. Total 17 hours. Second semester, fifth year.

7 a-b. Gynecology—Dispensary, where small groups of students are permitted to examine patients and to apply local treatment. First semester of fifth and sixth years.

8 a-b. Dispensary—Second semester of fifth and sixth years.

INTERNAL MEDICINE

Professors Crummer (Chairman), W. O. Bridges, and Milroy, Assistant Professors Bliss, Banister, Bridges, and Anderson, Doctors

Conlin, Hall, Pratt, Allen, and Niehaus.

1. Physical Diagnosis-(See Physiology 3.)

2. Principles of Medicine—A recitation course upon the general symptomatology of disease. Total 34 hours. Second semester, fourth year.

3. Physical Diagnosis—Physical signs in disease, and their clinical demonstration on cases taken from dispensary and hospital wards. Two hours clinic, (10b) one hour quiz. Total 51 hours. First semester, fifth year.

4. Physical Diagnosis—3 continued. Two hours clinic, (12b). Total 34 hours. Second semester, fifth year.

5a. Internal Medicine-2 continued. Total 34 hours. First semester, fifth year.

5b. Internal Medicine—5a continued. Total 34 hours. First semester, fifth year.

5c. Internal Medicine—Clinic. See 10a. Two hours. Total 34 hours. First semester, fifth year.

6a. Internal Medicine—5a continued. Total 34 hours. Second semester, fifth year.

6b. Internal Medicine-5b continued. Total 34 hours. Second semester, fifth year.

6c. Internal Medicine-Clinic. See 12a. Total 34 hours. Second semester, fifth year.

7. Military Medicine—Distribution, etiology, diagnosis, and treatment of such tropical diseases as are of practical importance to American physicians. The endemiology and epidemiology of such diseases with the general and special sanitary measures adapted to the prevention, control and suppression of the same. Two hours lecture. Total 34 hours. First semester, sixth year.

8. Military Medicine-7 continued. Two hours lecture. Total 34 hours. Second semester, sixth year.

9. Medical Conference and Life Insurance Examinations—The nature and growth of life insurance; elementary principles of life insurance; duties and responsibilities of examiners; influence of different diseases, heredity, occupation and habits on expectancy of life; proper technic in examining applicants for life insurance. One hour. Total 17 hours. Second semester, sixth year.

10. Internal Medicine Clinics-First semester. Fifth year.

- a. University Hospital. Two hours. Total 34 hours.
- b. University Hospital. Two hours. Total 34 hours.
- f. Dispensary and Clinical Clerk Service.

11. Internal Medicine Clinics-First semester. Sixth year.

- c. University and Methodist Hospitals. Total 34 hours.
- d. University Hospital. Total 34 hours.
- f. Dispensary and Clinical Clerk Service.
- 12. Internal Medicine Clinics-Second semester. Fifth year.
 - a. University Hospital. Total 34 hours.
 - b. University or Douglas County Hospitals. Total 34 hours.
 - f. Dispensary and Clinical Clerk Service.
- 13. Internal Medicine Clinics-Second semester. Sixth year.
 - c. University Hospital. Total 34 hours.
 - d. University Hospital. Total 34 hours.
 - f. Dispensary and Clinical Clerk Service.

14. Review Course—A course covering a general review of Medicine. Use of outlines, case reports, histories, etc., with thoro correlation with pathology. Total 34 hours. Second semester, sixth year.

All clinics are held in University Hospital unless otherwise noted.

LARYNGOLOGY AND RHINOLOGY

Professor Owen (Chairman), Doctors Potts, Wherry and Rubendall.

1. Physiology and Appearance of Nose, Throat and Larynx— Examination of each with special reference to the normal. Use of instruments. One hour lecture and demonstration. Total 17 hours. First semester, fifth year.

2. Diseases of the Nose, Throat and Larynx with pathology, diagnosis and treatment. One hour lecture. Total 17 hours. Second semester, fifth year.

3. Diseases of Nose and Throat—One and one-half hours clinic. First semester, fifth year in sections.

4. Diseases of Nose and Throat—One and one-half hours clinic. Second semester, fifth year in sections.

5. Dispensary—Services of one month. First semester, fifth and sixth years.

6. Dispensary—Course 5 continued. Second semester, fifth and sixth years.

MEDICAL JURISPRUDENCE

Mr. Thomas

1. Medical Jurisprudence—Physicians' contracts, general medicolegal relations. Expert testimony. Malpractice. Injuries and deaths. Identity, and survivorship. Sexual relations. Quarantine, sanitation. Medical legislation. Seventeen lectures. Second semester, sixth year.

NERVOUS AND MENTAL DISEASES

Professor Young (Chairman), Assistant Professor Johnson, Doctors Wigton and Mogridge.

The course in nervous and mental diseases which extends thruout the junior and senior years, aims primarily at giving the student the ability to make a comprehensive neurological or psychiatric examination of any patient. This is held to be of essential importance and implies a working knowledge of the anatomy and physiology of the nervous system and of the symptoms resulting from pathological conditions affecting the principal centers and tracts. Secondarily, thru the rich clinical material of the University Hospital and the psychiatric ward of the Douglas County Hospital it gives ample opportunity for first hand contact with cases illustrative of the chief types of organic and functional nervous diseases and of the psychoses.

1. Neurology—Lectures and quiz-lectures covering method of case taking, etiology, pathology, symptomatology and treatment of the organic and functional nervous diseases. 17 hours. First semester, fifth year.

2. Neurology—Course 1 continued. 17 hours. Second semester, fifth year.

3. Psychiatry—Lectures and quiz-lectures on the psychoses and feeble-minded states; etiology, symptomatology and treatment. 17 hours. First semester, fifth year.

4. Psychiatry—Course 3 continued. 17 hours. Second semester, fifth year.

5. Clinics at University Hospital and Psychiatric Ward of Douglas County Hospital—Case histories presented by students at clinics; demonstration of neurological and psychiatric disease entities; discussion and quizzes on diagnosis and treatment. Seventeen two hour periods. First semester, sixth year.

6. Clinics—Course 5 continued. Seventeen two hour periods. Second semester, sixth year.

7. Dispensary—Out-patient clinic. Histories taken and cases worked up by students assigned to individual patients. First semester, sixth year.

8. Dispensary-Course 7 continued. Second semester, sixth year.

OPHTHALMOLOGY AND OTOLOGY

Professor Gifford (Chairman), Associate Professor Patton, Doctors Lemere, Lindquest, Knode, Callfas, James and S. Gifford.

1. Ophthalmology—General examination of the eye with special reference to the normal. Principles of refraction with practical exercises in groups at dispensary. Use of opthalmoscope, etc., with practical demonstrations. One hour lecture. Total 6 hours. Second semester, fourth year.

2. Ophthalmology—Diseases of the eye, symptomatology and diagnosis. Lecture and quiz. Total 21 hours. First semester, fifth year,

3. Otology—Special diagnostic methods with use of instruments. Non-surgical diseases of the ear. Total 12 hours. Second half, first semester, fifth year.

4. Diseases of the Eye and Ear—Lectures and clinics at University and Methodist Hospitals. Cases followed by clinical clerks on service. Treatment and diagnosis. Two hours. Total 34 hours. First semester, sixth year.

5. Operative Course on Animal Eyes—Elective. One hour. Second semester, sixth year.

6. Ophthalmoscopy—Course designed to meet demands of ophthalmoscopic diagnosis in internal medicine. 12 hours. Elective for sixth year students.

8. Dispensary-Fifth and sixth years.

ORTHOPEDIC SURGERY

Professor Lord (Chairman), Doctor Schrock

1. Orthopedic Surgery—Diseases of bones and joints, synovial membranes and bursae. Congenital, acquired and disease producing deformities. Prevention of deformities and dystrophies with principles of treatment. Illustrated by photographs, slides, etc. One hour. Total 17 hours. First semester, sixth year.

34

2. Orthopedic Surgery—Two hour clinic and quiz. University Hospital: Total 34 hours. Second semester, sixth year.

PATHOLOGY AND BACTERIOLOGY

Professor Eggers (*Chairman*), Assistant Professors Keegan and Myers, Dr. Weinberg.

1. Medical Bacteriology—A lecture and laboratory course on the cultural characteristics, pathogenic properties, etc., of bacteria in general, with special reference to those of importance in disease. Total 130 hours. First semester, third year.

2. Medical Bacteriology—1 continued. Lecture and laboratory course on the principles of infection and immunity. Total 50 hours. First semester, fourth year.

3. General Pathology—A lecture and laboratory course on the study of general disease processes. It comprises: a study of the general principles of pathology; a study of disease processes in detail, in class room and laboratory. 140 hours laboratory, 80 hours class work. Second semester, fourth year.

4. Special and Clinical Pathology—A study of the effects of pathological processes affecting organs and systems. Supplemented by a study of clinical laboratory procedures, as illustrating the manifestations of these processes on the clinical side. 80 hours laboratory, 50 hours class work. First semester, fifth year.

5. Public Health—A course in public health and sanitation, with especial reference to the problems and methods of this work, as applied both to urban and rural conditions. 34 hours class work. Second semester, sixth year.

6. Special Work and Research—Work for specially qualified students, either in advanced routine laboratory procedures, or in special problems.

PEDIATRICS

Professor McClanahan (Chairman), Assistant Professors Christie, Hamilton and Moore, Doctors Iwerson, Bantin and Rubnitz.

1. Physical Diagnosis—Growth and development, diseases of cir-

culation. Second semester, fourth year. 17 hours.

2. Communicable Diseases—First semester, fifth year. 34 hours. 3. Infant Feeding—Nutrition—Diseases of Metabolism. Second semester, fifth year. 34 hours.

4. (a) Diseases of Nervous System. First semester, sixth year. 8 hours.

(b) Tuberculosis—First semester, sixth year. 8 hours.

3. Surgical Anatomy—One hour. Total 17 hours. First semester, fifth year.

4. Surgical Anatomy—Course 3 continued. One hour. Total 17 hours. Second semester, fifth year.

5. Fractures and Dislocations—A lecture, quiz and demonstration course on fractures and dislocations. X-ray diagnosis with application of bandages and casts. Two hours. Total 34 hours. First semester, sixth year.

6. Fractures and Dislocations—Course 5 continued. Practical work in application of plaster casts. Two hours. Total 34 hours. Second semester, sixth year.

7b. Surgical Pathology—Lectures and clinic. Special emphasis on non-operable growths. Second semester, sixth year. Total 34 hours.

8. Experimental Surgery—Principles of surgical technic, asepsis, preparation of supplies for operation, use of instruments, preparation of patients for operation, and care of patients after operation. Operations done on animals with the same care as on human beings. One hour lecture, two hours in operating room. Total 51 hours. Second semester, fifth year.

9. Surgical Clinics-First semester, fifth year.

a. University Hospital. Three hours. Total 251/2 hours.

b. University Hosiptal. Three hours. Total 251/2 hours.

g. Dispensary Service.

10. Surgical Clinics-First semester, sixth year.

c. University Hospital. Four hours. Total 68 hours.

g. Dispensary and Clinical Clerk Service.

11. Surgical Clinics-Second semester, fifth year.

a. University Hospital. Three hours. Total 251/2 hours.

b. University Hospital. Three hours. Total 251/2 hours.

c. Extra-mural Hospital. Two hours. Total 34 hours.

g. Dispensary Service.

12. Surgical Clinics-Second semester, sixth year.

d. University Hospital. Four hours. Total 68 hours.

g. Dispensary and Clinical Clerk Service.

All surgical clinics are held at University Hospital unless otherwise noted.

38

THERAPEUTICS

Assistant Professor Goetz (Chairman), Associate Professor Schneider, Doctor Ballard.

The courses of this department follow directly those offered by the department of Pharmacology. The following courses are offered with the object of fixing the practical application of pharmacological reasoning.

1. Clinical Therapeutics—Necessity of definite plans of treatment based upon logical reasoning shown in the more important diseases. Direct application of all forms of therapeutic aid. In clinics special attention paid to analyzing cases for therapeutic indications. Two hours recitation. Total 34 hours. Second semester, fifth year.

2. Clinical Therapeutics—1 continued. Total 34 hours. First semester, sixth year.

3. X-ray Diagnosis and Therapeutics—Lectures, demonstrations with practical reading of plates, fluoroscopic examinations and treatments. Ten hours lecture. First semester, sixth year.

4. Therapeutic Clinic—See Clinic 10a, Internal Medicine. First semester, fifth year.

5. Therapeutic Clinic—See Clinic 10b, Internal Medicine. Second semester, fifth year.

UROLOGY

Professor Edwin Davis (Chairman), Doctors Stearns, Martin and Ross.

2. Weekly lecture, one hour, devoted to anatomy and pathology of urological tract. Second semester, fifth year. Total 17 hours.

4. Dispensary—Four hours each week in dispensary clinic devoted to acute urological conditions. Second semester, fifth year. Total 34 hours.

5. Weekly clinic, one hour, devoted to diagnosis and surgery of diseases of the urological tract. First semester, sixth year. Total 17 hours.

6. Elective course limited to six. Urological cases in the wards are assigned to the students for diagnosis. Instruction in laboratory methods, cystoscopy, and ureteral catheterization.

a. First semester, sixth year.

b. Second semester, sixth year.

7. Dispensary—Four hours each week in dispensary devoted to acute urological conditions. First semester, sixth year. Total 34 hours.
