MANUFACTURING CHEMISTS, Importers and Jobbers for the 68 years of its existence, the Meyer Brothers Drug Company represents in its personnel and in its institution the greatest industry of its kind in the world.

WITH 68 YEARS PROVED INTEGRITY as the basis of its character—and 68 years service as the foundation of its wonderful growth—the Meyer Brothers Drug Company embodies in its service the entire progress of the Chemical World, and embraces in its manufacture and distribution the whole development of the modern drug store—drugs, chemicals and sundries of first quality of every conceivable character.

THE RED DIAMOND

backed by three test tubes of science—with its legend “Quality Certified by Test”—immediately identifies the great Meyer Institution with the one ideal that has constantly been its guiding principle—the perfection of purity-drug quality.

Bring to the notice of the Pharmacists of Nebraska the following list of seasonable pharmaceutical goods of our manufacture, which we guarantee in every respect to conform to all lawful requirements.

Dionin Compound Expectorant
Each fluid ounce contains:
Dionin (Morphine derivative) $\frac{1}{4}$ grain.
Ammonium Chloride C. P. 8 gr.
Combined with Sam-Palmetto,
Eucalyptus, Tolu, Glycerin and
Aromatics.
Dose: 1 to 2 teaspoonfuls as directed.

Elixir Buchu Juniper and Potassium Acetate.
Each fluid ounce represents:
Buchu48 grains
Juniper Berries.....16 grains
Potassium Acetate.....12 grains

Chlor-Anodyne
Each fluid ounce contains:
Morphine Hydrochloride.....27 gr.
Tinct. Cannabis India 46 minims
Hydrocyanic Acid Dilute9 minims
Chloroform46 minims
Oil Peppermint.....17½ minims
Tinct. Capsicum.....17½ minims
Anodyne and anti-spasmodic.
Efficient in Colic, Cholera Morbus, Neuralgia, Spasmodic pains, etc.

Solidified Liniment.
Composed of Camphor, Oleo-Resin, Capsicum, Turpentine, Oil Red Thyme, Oil Juniper Berries, Oil Eucalyptus and Pure Hydrocarbon Oil. Solidified with Wax. Warming, soothing and anodyne.
Directions: Apply freely, and rub until absorbed.

Elixir Digitalin Compound
Each fluid ounce contains:
Digitalin German.....8-100 grain
Nitroglycerine8-100 grain
Strychnine Sulphate.....8-50 gr in
Either white or red. A reliable heart tonic and stimulant.

Syrup Euphorbia Compound.
Each fluid ounce represents:
Chloroform2 min.
Tr. Euphorbia (20%).....120 min.
Syrup Squill.....180 min.
Wine Ipecac.....30 M
Jamaica Dogwood.....16 gr.
Menthol1 gr.
Syrup Tolu.....Q. S.
Sedative, Antispasmodic, Expectorant.
Dose: 1 teaspoonful as required.

Bucal-Diuretic.
A combination of Buchu, Couch Grass and other Remedial agents, whose virtues are well known as uric acid solvents. It affords relief in all irritated and catarrhal conditions of the bladder, incontinence of urine, gravel, acute and chronic rheumatism, cystitis, enuresis and gout. It promotes activity of the kidneys and bladder, relieving inflammation of the mucous tissues, thereby giving strength and tone to the entire urinary tract.

Elixir Incontinence.
Each fluid ounce represents:
Ergotin Borjeau.....2 grains
Strychnine Sulphate.....8-200 grs.
Atropine Sulphate.....8-100grs.
Rhus Aromaticus.....40 grains
Used in urinary disorders.

Neo-Tonga-Sal.
This preparation contains Sodium Salicylate, Tonga Barks, Black Cohosh, Pilocarpus and Colchicum Root with Aromatics.
ANTIRHEUMATIC
Dose: 1 to 2 teaspoonfuls in water every 2 hours until pain ceases, then before meals and on retiring.

Elixir Phosphate Iron, Quinine and Strychnine No. 1
Each fluid ounce contains:
Strychnine8-60 grains
Iron Phosphate.....16 grains
Quinine2 grains
Nerve tonic. Serviceable in all relaxed states of the system, restores the blood and is anti-malarial in its tendencies. In all forms of debility it will be found a safe and reliable stimulant.

Elixir Terpin Hydrate. WITH CODEINE
Each fluid ounce contains:
Codeine Sulphate.....1 grain
Terpin Hydrate.....8 grains
Average Dose: One teaspoonful as indicated.

Alkaline Antiseptic Solution (Color Red)
Containing Thymol Eucalyptal, Oil of Peppermint and Oil Gaultheria combined with Sodium Borate, Sodium Benzoate and Potassium Bicarbonate.

Antiseptic Solution.
This solution contains the essential antiseptic properties of Thymol, Eucalyptol and Oils of Gaultheria, Peppermint and Thyme, combined with Benzoic and Boric Acids.
Uses: Antiseptic, internal and external.

Aromatic Castor Oil. (White or Ruby)
98 per cent Pure Castor Oil. An agreeable taste and odor. Either white or ruby. Also Cinnamon flavor. An agreeable and palatable Castor Oil, that the most delicate taste will not disprove.

Cordial, Beef and Iron.
Contains the nutritive constituents of 16 grains Extract of Beef combined with 16 minims Tinct. Citro-Chloride Iron in each ounce. Indicated in the treatment of impaired nutrition, impoverished blood, and all forms of general debility.

Elixir Terpin Hydrate AND HEROIN MODIFIED
Each fluid ounce contains:
Heroin1 grain
Terpin Hydrate.....8 grains
Average Dose: One teaspoonful as indicated.

Syrup Tolu Compound.
Each fluid ounce represents:
Chloroform4 min.
Heroin1 grain
Cannabis Indica.....7½ grains
Tartar Emetic.....1 grain
Iobelia7½ grains
Syrup Tolu.....Q. S.
Expectant and Bronchial Sedative.
Dose: Adults, 1 to 2 teaspoonfuls.

Syrup White Pine Compound
Each fluid ounce represents:
Chloroform4 Min.
Morphine Sulphate.....3-16 Grain
White Pine Bark.....30 grains
Cherry Bark.....30 grains
Sanguinaria3½ grains
Balm Gilead Buds.....4 grains
Spikenard4 grains
Sassafras2 grains
A pleasant soothing and effective Cough Syrup. A valuable remedy in Colds, Bronchial disturbances, Soreness of Throat, Hoarseness, Loss of Voice or Vocal Tone.

Directions: For adults, 1 teaspoonful every two or three hours. For children, three to twelve months, 5 to 10 drops; two to four years, 1-4 teaspoonful; six to eight years, ½ teaspoonful.

Glycero-Gentian Tonic.
This preparation is composed of Gentian, Taraxacum with Phosphoric Acid and Carminatives. A popular stomachic and bitter tonic.

Strychno-Phos Compound.
Each fluid ounce contains:
Iron Pyrophosphate Scale 20 grs.
Strychnine8-100 gral s
Acid Phosphoric Dilute.....40 min.

Valerianum Compound
This preparation contains Cramp Bark, Sculleap, Wild-Yam and Cassia with Aromatics.
Antispasmodic, Uterine Sedative.
Dose—½ to 2 teaspoonfuls in one-half glass hot water as directed.

Special Announcement

Rather than discontinue the publication of the Year Book this year, owing to the unusual conditions, we have tried to be more conservative of space than herefore and hope that our action will be justified. x x x x

COLLEGE of PHARMACY

Greetings

The Year Book

of the

College of Pharmacy

of the

University of Nebraska

Published Annually by the Students
of the College of
Pharmacy

...

In presenting this, the Ninth Year Book of the University of Nebraska, College of Pharmacy, we have tried to portray our school in all its different aspects; to record the activities of our fellow students; to tell of the droll happenings in class-rooms and porch; to mention the amusing eccentricities of classmates and teachers; to preserve forever the joys of your college days, so that in years to come as you turn over these pages you may be carried back in thought to your college days with their many happy memories.

Sincerely,

THE EDITOR.

UNIVERSITY OF NEBRASKA

COLLEGE of PHARMACY

Elsie B. Day

UNIVERSITY OF NEBRASKA

Dedication

To Elsie B. Day, whom we honor as professor and friend, whose constant support has made possible the development of the College of Pharmacy, we, dedicate this book and assure her that the service she rendered to the College will be remembered by all.

COLLEGE of PHARMACY

UN

UNIVERSITY OF NEBRASKA

20

Greetings from Dr. Lyman

In previous editions of the Year Book will be found historical resumes and plans which have been outlined for the development of the College of Pharmacy. In the resumes the historical facts are recorded and need not be repeated.

The University of Nebraska was one of the first institutions to make the requirements to enter the College of Pharmacy the same as those of the other colleges of the University. All state universities are now on the same basis. These institutions are also laying plans to make in the near future, the four-year college course the minimum amount of training necessary for a pharmaceutical degree. At the 1920 meeting of the American Conference of Pharmaceutical Faculties held at Washington, D. C., it was decided by the Conference Schools to drop all two year courses in pharmacy in 1925 and the feeling was expressed that all three year courses should be abandoned two or three years later. This sign of progress is also reflected in recent legislation throughout the United States. Many states have formed laws requiring graduation from a reputable College of Pharmacy as a preliminary to the taking of an examination for the practice of pharmacy and a number of states have laws permitting students who have completed a four year course in pharmacy to become licensed in the state without having store experience. The Nebraska legislature of 1919 created such a law and it becomes effective December 31st, 1920. Such a law is a very influential educational factor and will tend to increase the number of years spent by the student in preparation for his calling.

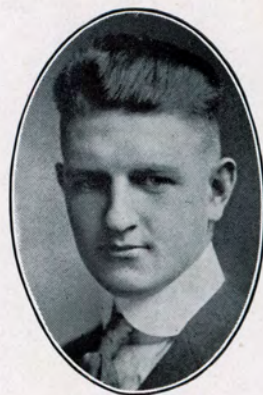

An important practical addition to the work of this college was the establishment of the Student Health Service in the building of the College of Pharmacy. A pharmaceutical dispensary has been located in the building, where the students have the opportunity of compounding hundreds of prescriptions annually. While giving instruction for the purpose of improving the service of retail pharmacy, the College of Pharmacy will continue to interest itself with those problems of an investigative nature which are necessary for the advancement of professional and scientific Pharmacy.

COLLEGE of PHARMACY

To the members of the faculty of the College of Pharmacy, who have spared no effort and energy, to make us efficient and conscientious students and representatives of our chosen profession, we acknowledge our great indebtedness and gratitude to them. Their influence far transcends this professional development. They have been vital factors in molding our characters and in determining our destiny as respected members of a community, as worthy residents of our state, and as constructive citizens of this nation, and as a vital part of the great social and cosmic world. May these few pages ever remind us to contribute something to the progress and advancement of the human race.

The Pharmaceutical Society

The Pharmaceutical Society, a student organization, was started in the College of Pharmacy, shortly after the college was established in the University of Nebraska.

The Society is composed of all the pharmacy students and is a means of carrying on social affairs and any business which concerns the pharmacy students.

The past two years showed a considerable decrease in the number of students in nearly all colleges, due to the patriotic call for everyone to serve their country during the World War; however the spirit of good fellowship, and willingness to keep up the activities in the College of Pharmacy, were brought about through this organization, in spite of the rather limited membership.

This year has been a big one in the College of Pharmacy, the number of students being the largest ever enrolled, and under such conditions the society has been a great advantage to the students in becoming acquainted among themselves and made possible such activities as the society saw fit to carry on.

The publication of the Year Book of the College of Pharmacy is one of the interesting customs carried out by the society. Pharmacy Week, which formerly occurred the first week in May, of each year, was not observed this year on account of the absence of Dean Lyman and Dr. Schneider, who were representatives from the College of Pharmacy, University of Nebraska to the Pharmacopia Convention held in Washington, D. C. at this time. Although the week was not formally observed, one of the accustomed events of this week, was held later, the Annual Banquet at the Lincoln which was enjoyed very much by all. In place of any special convocation or talks by prominent men in our profession, from out over the State, we listened in Seminar to excellent reports on the proceedings of the U. S. P. convention.

Each year there are those who leave the College, after having completed their course, regretting that their College joys are ended, but they take with them pleasant and lasting memories of their instructors, associates, and closest friends, they made in the Society during their life in the College of Pharmacy.

Phi Delta Chi

Phi Delta Chi is the oldest professional pharmaceutical fraternity in the United States. It was founded at Ann Arbor, Michigan, in 1883, by a group of students under the leadership of the late Dean Prescott, then Dean of the College of Pharmacy of the University of Michigan. From a local organization it has grown to a national fraternity with chapters in nearly every large University in the United States.

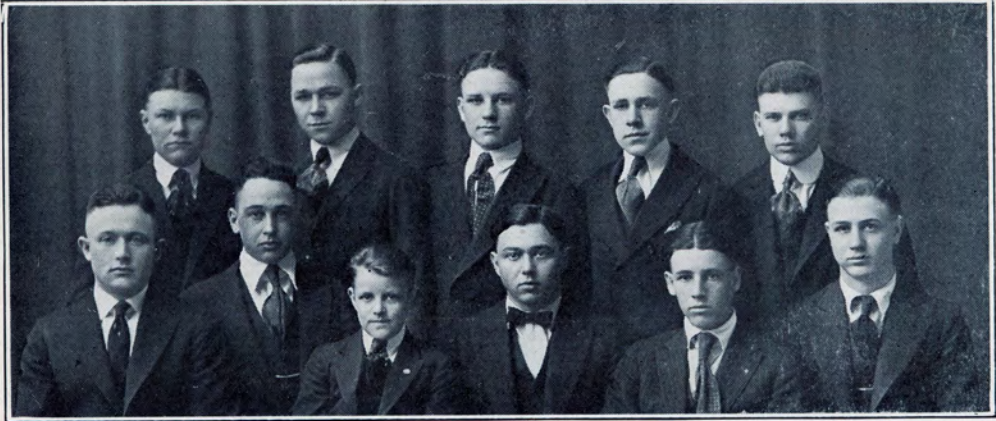

The aim of the founders in organizing a professional fraternity among pharmacy and chemistry students, was to raise the standards of Pharmacy and Chemistry thru scholarship and co-operation and to promote good fellowship among the students.

The local chapter, Pi, was granted its charter March 22, 1912.

The year 1920 finds Pi Chapter with a membership of twenty-three active members and twelve honorary and faculty members, consisting of professors of Pharmacy, Chemistry and prominent druggists and chemists of the state.

Gamma Epsilon of Kappa Psi

Kappa Psi is the oldest and largest professional fraternity in America that admits to its membership, students of Pharmacy and Medicine.

The function of this organization is to promote the advancement of the sciences of Pharmacy and Medicine and the good fellowship of the students in the institutions where they are taught.

Gamma Epsilon Chapter of Kappa Psi was installed, March 20, 1920 by thirteen members of Beta Nu Chapter of the Creighton University College of Pharmacy.

Although Kappa Psi is in its infancy at Nebraska the eleven members who were instrumental in its organization are very optimistic for its future.

Student Health Service

The Student Health Service is one of the University of Nebraska's new ventures for the year 1919-1920. The need of a Student Health Service has long been recognized. The Department for this year has not been extensive, but the service performed and popularity of the system has been gratifying to everyone who has observed its inauguration and been interested in the welfare of the student body. The department has not been solely a place where medicines were dispensed, but a place where any student could go for advice, relative to health, efficiency of body and mind. Such advice often has been invaluable to the person served and no statistics could show its value in this connection alone. It is desired that the service will be considered as a privilege of every student.

Miss Irene Dykama, R. N., has spent the entire day at the Dispensary and has proved popular with the student body on account of her interest and helpfulness.

Dr. Inez Phlbrick has taken a deep interest in the girls especially, and the attendance has grown rapidly under her care.

Dr. Adin H. Webb has met the boys as one of them, being a former student and a graduate of the University of Nebraska. He knows some of the problems of student life here as well as some of their medical needs.

The past year there have been 3011 calls from University men exclusive of the regularly scheduled examinations of students, while from the University women there have been 1351 calls, exclusive of examinations.

The Student Health Service will grow in popularity, equipment and service.

Drug Plant Culture in Nebraska

The small drug plant garden located on the University grounds, between the museum building and Nebraska Hall, has already attracted considerable attention and has been given a niche in botanical literature by virtue of being anonymously published (photographically) in a report by W. W. Stockberger of the Bureau of Plant Industry, entitled, Production of Drug Plant Crops in the United States (Yearbook of the Department of Agriculture for 1917.)

Since the establishment of this garden, a number of medicinal plants have been tried out with more or less success, notably *Atropa belladonna*, *Digitalis purpurea*, *Datura stramonium*, *Mentha viridis*, *M. piperita*, *Hyoscyamus niger*, *Melissa officinalis*, *Althaea officinalis*, *Thymus vulgaris*, and others. Belladonna appears to survive the severe winters of Nebraska, however further field experiments are necessary to determine more accurately the resistance to cold. The slender leaved *Digitalis lutea* survives the winter very well and the preliminary biological assays would indicate that it is fully as active as the official species (*D. purpurea*). Attempts will be made to obtain seeds of *Digitalis ferruginea* which is said to be the most active species of all.

It is very desirable to extend the experimental work in drug plant culture as follows:

1. Enlarge the garden on the university campus by adding thereto certain areas which are now devoted to lawn purposes. The grass walks now in place should be converted into gravel walks, and the whole scheme should be changed from the formal to the landscape, combining the decorative idea with the utilitarian, as far as possible.

2. A seed propagating house is an essential to the experiments. This should be available to students for the purpose of making seed germination tests.

3. A plat of ground (about two acres) has been set aside near the main building of the University Farm for the purpose of making commercial experiments. This year it is intended to try out Belladonna, Henbane, Castor bean and Mint. These commercial try outs may be continued for a number of years before satisfactory conclusion can be arrived at.

The aims and purposes of the drug plant gardens and the commercial proving grounds at the University farm, are two-fold. The plants under cultivation are to be utilized for purposes of class instruction, to the students in the College of Pharmacy, incidentally also to students in other departments of the University, as the College of medicine and the college of agriculture; and to add to the agricultural resources of the state. Very incidentally, the campus garden should also serve as a decoration to the university grounds. In order that the plan as above very briefly outlined, may be carried out successfully, an adequate fund and special facilities are required.

TEE HEE
AIN'T THAT
FUNNY?
THERE, I DONE
IT AGAIN
. TEE HEE !

THE DRUGGIST'S CAR

A druggist owned a touring car;
To ride in it was fun.
He backed into a wall one day;
Bill \$1\$3.61.

He took a turn across a bridge,
Another car did see;
Put on the brakes, but skidded on—
Bill \$14.23.

His wife, she used a humble Ford,
And drove it through a fence;
She took it to a "Liz" garage,
Bill only 30 cents.

He had a hurry call to town,
He rammed a crossing gate;
Next day the railroad stung him for:
Just \$20.98.

He made a run with his touring car,
The speed was something great;
A suddn turn with a loop the loop,
Bill \$30.68.

He ran the car one season,
Then figured the expense
And sold it to a junkman,
For 87 cents.

QUESTIONS AND ANSWERS

Dear Editor:

I am in love with a little girl, but we live so far apart it is always late when I get home. What shall I do?—Floyd Pickering.

Answer—You might aske her to move closer to you.

Dear Editor:—

Everybody thinks I use rouge, and I don't. What shall I tell them when they kid me?—Miss Maude Ernst.

Answer—I would suggest that you tell them to go to - - Alaska.

Dear Editor:

Miss Malick wants a ten minutes' talk with me. I don't know what for. What shall I do about it?—Gillett.

Answer—Don't worry, I am sure that you can run the faster.

"I am delighted to meet you," said the father of the college student, shaking hands warmly with the professor. "My son took algebra from you last year, you know."

"Pardon me," said the professor, "he was exposed to it, but he did not take it."

The car was cheap and made of tin,
It rattled like a crate;
'Twas one that came with chewing gum
In 1908.

He thought the gasoline was out,
And lit a match to see;
For medicine and doctor,
Bill \$20.23.

He ran into a 'hawg' one day,
To see if 'twere alive;
It were until he hit it,
Bill \$20.55.

Twelve miles from home a storm came
on,
The druggist raved and tore;
He tried to jump a ten-foot ditch,
Bill \$60.34.

He took his best girl for a ride,
She thought the car was great;
He tried to drive with just one hand,
Bill \$14.98.

If you must have a touring car
Just leave it by the door,
Then all the folks will know for sure,
It's yours and so's the store.

MEN'S 1920 STYLES

BY NEAL R. O'HARA

The Male Fashion Experts' Congress, which has just adjourned in Chicago, took seven days to discover what every married woman knows—that there is no change in men's pockets this season. The fashion sharks' decree simply means the standardized hip pocket has made good and is re-elected. And the suit of clothes you got last summer is O. K. this summer unless the moths have made it into an eighteen-hole golf course or an eight-course meal.

The natty dresser will wear a coat of good material, reinforced with prescriptions. The coat should have two buttons that can be pressed—one for ice water and the other for vichy. There should be two pockets—one for gloves and the other for cloves. The real Boob Rummell should have more highballs than moth balls in his pocket this year.

For the Wall street boys the sweatshop cooks have deserted a suit of fleeced lamb's wool, with large checks included in the fancy trimmings. A wise broker can afford to be measured for one of these suits two or three times a day, using his own tape. The big advantage in lamb's suitings is that they can be cleaned so often and yet look the same every time they come back from the loan sharks.

For the politicians the cloak and suit trade are offering running pants with campaign buttons. The running pants are with reservations or rush seats, as the customer desires.

The bank messengers this year will wear traveling suits as usual.

Who's Who

My name is Edward Villars Bogue. I am the Prize student of the College, and I admit it. I am also quite a politician, having elected myself to Student Council because there was no competition, Kappa Psi, and almost forgot Phi Gamma Delta.

My name is Lawrence Kinney. My father runs the biggest store in Lexington, Nebr. I also worked in Kansas City, so you see I am not so dizzy as I act. I never have been known to crib, my singing only brought stale contributions once and for some unknown reason, I made an 8 o'clock several times this year.

My name is Redford, Helena, but in spite of this name I have not met Achilles yet. Although some of the students are quite young, I feel that it is only safe to have my mother chaperone me. My greatest satisfaction in the last fifty years was how I beat Jensen in the state board.

Laboratory Work FOR A REGISTERED PHARMACIST

THE EDITOR

The fools are not all dead—Nope
 Here's proof if you will heed it.
 I'm fool enough to write this dope,
 And you're fool enough to read it.

To shave your face and brush your hair,
 And then your Sunday clothes to wear,
 That's preparation.
 And then upon the car to ride—
 A mile or two to walk beside—
 That's transportation.
 And then before the door to smile,
 And think you'll stay a good long while
 That's expectation.
 And then to find her not at home—
 That's thunderation.

If a body see a body,
 Flunking on a quiz
 If a body help a body,
 Is it teacher's biz?

A school annual is a great invention.
 The school gets all the fame;
 The printers get all the money
 And the staff gets all the blame.

Fortier took a drink one day,
 But now he drinks no more;
 For what he thought was H₂O
 Was H₂SO₄.

Mr. Jensen—How many are working
 on your staff, Mr. Colson?
 W. C. C.—Oh, I should say about a
 sixth of them.

Miss Day: Mr. Kolterman, how would
 you make "Lotio Flavor."

Kolterman: Yellow wash is made by
 putting the lavaa in the water and shak-
 ing it up. There is an emulsion formed
 which is white and looks soapy.

Bogue: Let me borrow your "Guide
 to The Organic Drugs of the U. S. P."
 Kinney: Oh, no! It is my best friend
 I can't part with it.

Judge—"Where did the automobile hit
 you?"

Rastus—"Well, judge, if I'd been car-
 rying a license number it would have
 been busted to a thousand pieces."

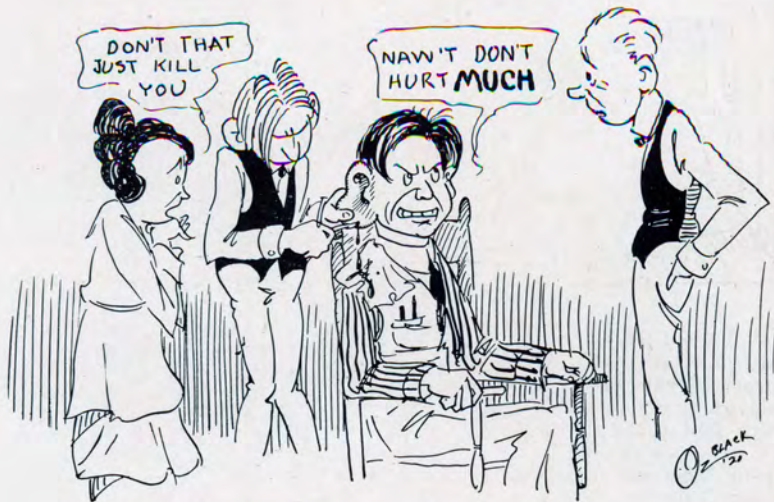

Father—What made you flunk in Ma-
 teria Medica?

Son—A case of unpreparedness, Dad.

A green little Freshman in a green little
 way,
 Some chemicals mixed just for fun one
 day;
 And the green little grasses now ten-
 derly wave,
 O'er the green little Freshman's green
 little grave.

PHYSIOLOGY STUDE'S DREAM

The Lighter Side O'Life

"Moses had indigestion like you have, mother," announced little Freddie Walden at the Sunday dinner table.

"Why, what makes you think so?" questioned his mother.

"Because our Sunday-school teacher said: 'God gave Moses two tablets.'"

"Hey, Moike, and phwat do ye t'ink of those new sanitary drinkin' cups?"

"Sure, Pat, and soon we'll have to spit on our hands wid one eye droper."

Marriage is called a game because it's played around a diamond.

"I heard to-day that your son was an undertaker. I thought you told me he was a physician."

"Not at all."

"I don't like to contradict, but I'm positive you did say so."

"You misunderstand me. I said he followed the medical profession."

The druggist has a life of care,
He likes it.

He seldom tastes the pure, fresh air,
But likes it.

He'll work all day and half the night,
The hours he keeps give one a fright,
But don't you try to set him right,
He fights it.

Observing an unfamiliar shrub by a country roadside, a student of botany stopped to make an examination.

"Are you acquainted with this flower," he asked of a passing boy.

"Yep," the boy answered.

"To what family do you think it belongs?"

Indicating a near-by house with a pudgy thumb, the boy answered: "Hig-ginses."

Mr. Henpeck—"Is my wife going out, Jane?"

Jane—"Yessir."

Mr. Henpeck—"Do you know if I am going with her?"

"He knows all the best people in town."

"Why doesn't he associate with them, then?"

"They know him."

PLEASANT THERAPEUTICS

"Let me kiss those tears away," he begged, tenderly.

She fell into his arms, and he was busy for the next few minutes. And yet the tears flowed on.

"Can nothing stop them?" he asked breathlessly.

"No," she murmured; "it's hay fever, you know. But you go on with the treatment."—Judge.

" 1999 "

KINNEY PASSES THE STATE BOARD :

I LIKE IT

Tobacco is a dirty weed.
 I like it.
 It satisfies no normal need,
 I like it.
 It makes you thin, it makes you lean,
 It takes the hair right off your bean,
 It's the darndest stuff I've ever seen,
 I like it.

"Our product is thoroughly tested before leaving the factory. No man can sell stuff to-day that has not been tested."

"We manage to sell our product without testing it."

"That's odd. What do you sell?"
 "Dynamite."

He failed in Botany, flunked in Chem;
 They heard him softly hiss.
 I'd like to find the man who said
 That ignorance is bliss.

OBLIGING SPRING

"Hail! Hail!"
 I heard a poet sing,
 "Thy charms unveil!
 Hail Gentle Spring!"
 And "Gent'e Spring"
 Her charms unveiled
 And hailed and hailed
 And hailed and hailed!

"How is it that Arthur never takes you to the theater nowadays?" queried Marie.
 "Well, you see," her friend replied, "one evening it rained, and we sat in the parlor."
 "Yes?"

"Well, ever since that we—Oh, I don't know; but don't you think that theaters are an awful bore?"

One afternoon Leonard Gillette walked into a drug store and stated to the clerk his need—a man's comb. "Do you want a narrow man's comb?" "No," said Gillette, with the utmost gravity. "What I desire is a comb for a stout man with celluloid teeth."

IDEAS FOR AUTOMOBILISTS

If you are thirsty, the chauffeur has a license, and besides there is a spring beneath the car.

If in need of excitement, just lean over the side of the car and watch the tool box.

If troubled with a cold, put the hood over your head and the muffler around your neck.

If you own a Ford, the rattle will amuse the baby at any time.

If you are tired of driving, let the axle drive for you. Remember the automobile is also tired.

The Ford was a'ways a noisy machine. Even the wheel spoke.

The front of the car is heavier than the rear. That makes the tail light.

The automobile is a fine machine for a politician; the mud guards prevent mud-slinging.

If you have no matches, simply throw your cigar out of the car and watch it light.

The power of an auto truck is not measured by "truck horse power."

If you feel flush and wish to b'ow yourself, the horn is handy.

Have you seen "Mag" Neta? Oh bosch!

Greetings

from

Fink's Pharmacy

Holdrege, Nebr.

A loyal friend of the College of Pharmacy and one to whom we owe deepest appreciation for his hearty co-operation.

To Our Advertisers . . .

Just a word of appreciation to the advertisers who have so generously helped to support the Pharmacy Annual this year. If it were not for their "ads" which they have given us, the Annual would not be able to exist. They are glad to be able to help us. What do we owe them? You have many calls to spend your money with these advertisers. When you do, remember these advertisers and boost for them.

The College of Pharmacy
of the
UNIVERSITY OF NEBRASKA

Offers unusual opportunities for the study of Pharmacy.

These opportunities are:

1. The environment of one of America's greatest universities.
2. Unexcelled library and laboratory facilities.
3. One of America's best drug plant gardens.
4. The association of students who have energy and ability to produce a book of the type of this Annual.

Two, three and four year courses are offered. Work in Pharmacy is given in the summer session.

HIGH SCHOOL SENIORS

Graduation Day brings you to the turning of the ways. You must choose—perhaps you have already chosen—the path into the future that will lead you surely to your goal in life.

Does your ambition point toward a professional or business career? Do you wish to become an educator, a scientist, an agricultural expert? Do you intend to prepare yourself for life's keen competition by thorough special training in ANY line?

If you do, then the time, the money, the effort involved in a University course will count as little in comparison with the advantages it will give you all through life in efficiency, in sure knowledge, in the ability to make the most of the opportunities the years are sure to bring.

Your State University, the alma mater of thousands of Nebraska's illustrious sons and daughters, offers you a well-rounded education in your chosen vocation together with the splendid experiences and fellowships of College life.

For your leisure hours, there are the athletic field, the debating societies, music, dramatics, class politics—a host of pleasant and worth-while activities.

Literature describing the University and its manifold activities has been especially prepared for distribution to 1920 Seniors. It will be of help to you in making your plans for the future. Address the Registrar—
