PUBLISHED BY THE UNIVERSITY AT LINCOLN

Issued monthly in January and September; semimonthly in February, March, July and August; three times a month in April, May and June. Entered at the Postoffice at Lincoln 1, Nebraska, as second-class matter under act of Congress, August 24, 1912.

## THE UNIVERSITY OF NEBRASKA

The University of Nebraska was chartered by an act of the state legislature on February 15, 1869. It is the state's major institution of higher learning. Its "general government" is vested by the Constitution of Nebraska in an elected board of six regents, each serving for a six-year term and each representing one of what were formerly the six congressional districts (now generally referred to as regential districts).

The University now consists of a Junior Division; ten colleges—Agriculture, Arts and Sciences, Business Administration, Dentistry, Engineering, Graduate, Law, Medicine, Pharmacy, and Teachers; four schools—Fine Arts, Social Work (graduate), Journalism, and Nursing; and the two Divisions of Conservation and Survey and University Extension. A Summer School is maintained each summer.

Nebraska like other states enjoys the privileges of close cooperation with the federal government. The University is recognized under provisions of the Land Grant Act of 1862 and numerous subsequent acts related thereto. Funds made available by these acts supplement state funds authorized by the Nebraska Legislature for the support of the University, and are under the supervision of the Board of Regents.

The University has attained an enviable position among the nation's most highly recognized institutions of higher learning. It holds full membership in the Association of American Universities of which there are but 34 member institutions. It is also privileged to claim membership in the Association of Land Grant Colleges, the National Association of State Universities, the Association of American Colleges, the Association of American Universities, and the North Central Association of Colleges and Secondary Schools. Its various subdivisions have been equally well recognized. Students and graduates of the University are admitted to all collegiate institutions and their credits are accepted without question.

Students from practically every state in the union and many foreign countries were matriculated in the University during the past year. With approximately 10,000 students of collegiate rank in full-time attendance and approximately 20,000 enrolled in all classifications, and a faculty of more than 500, the University of Nebraska ranks among the first twenty-five universities and colleges in size in the United States.

## SCHOOL OF NURSING

The University of Nebraska School of Nursing was established in October, 1917, by The Board of Regents of the University of Nebraska as a part of the College of Medicine. The immediate administration of the School of Nursing is provided through The Director and the faculty.

The objectives of the School of Nursing are:

1. To provide a professional program of instruction and experience which will prepare the individual nurse to give skillfull, sympathetic, and intelligent nursing care;
2. To educate nurses who will have an appreciation of their responsibility to community health needs and an understanding of the social factors affecting health;
3. To develop in the individual nurse a desire for personal and professional growth and a feeling of professional responsibility.

### Facilities for Instruction and Practice in Nursing

The facilities for instruction and practice in nursing include the classrooms and the laboratories of the School of Nursing and the College of Medicine; the library of the College of Medicine; the wards of the University Hospital; the clinics of the University Dispensary; the Douglas County Hospital for contagious diseases for nursing experience; the Bishop Clarkson Memorial and Lutheran Hospitals for psychiatric experience in nursing.

Instruction in the various subjects outlined in the School of Nursing Curriculum is given by members of the School of Nursing faculty and the faculty of the College of Medicine.

**The University Hospital.**—The University Hospital, where the clinical experience of the students is obtained, is located on the campus of the College of Medicine. The faculty of the College of Medicine constitutes the staff of the hospital, with the result that the clinical instruction in each department is under the direction of specialists. It has a capacity of 209 beds, is general in character, and accommodates an active service in all of its departments. The service includes facilities for clinical instruction and ward practice in medicine, surgery, obstetrics, gynecology, orthopedics, pediatrics, psychiatry and neurology, pathology, radiology, urology, and in eye, ear, nose, and throat conditions.

The operating-room service, which averages about 200 operations a month, provides a valuable experience for the students in surgical technic. The admitting rooms and diet kitchens are also utilized for the instruction and experience of the students.

**The University Dispensary.**—The University Dispensary is used for the care of ambulatory patients. It offers varied clinical experience in all branches of medicine and surgery, in pediatrics, obstetrics, and psychiatry. There are also separate clinics for well babies, and classes for mothers. There is an out-call service which provides for general medical treatment, for the delivery of patients in the home, and in its problems, cooperates with the Visiting Nurse Association and other welfare agencies of the city. The School is utilizing more and more the clinical opportunities of this department as it increasingly emphasizes the social and economic aspects of disease and of health education.

**Library.**—The library of the College of Medicine, located in a wing of the hospital, contains more than 54,000 bound volumes and more than

25,000 pamphlets and reprints devoted to the subjects of medicine and nursing, and more than 460 standard medical and nursing periodicals. Provision is made for the addition to the library of important books, pamphlets, and periodicals, devoted not only to subjects of special interest in nursing, but to allied subjects, such as the social sciences, psychology, and education.

Books may be withdrawn at any time upon demand from the University Library at Lincoln, containing 400,000 volumes, and the Omaha Public Library.

### Residence

Conkling Hall, is the residence of the students of the School of Nursing and is located on the medical college campus. It is equipped with class and demonstration rooms, a kitchenette, laundry, and sewing rooms for the use of the students, and well-appointed reception rooms. A large gymnasium provides a place for indoor athletics and recreation. Tennis courts afford an opportunity for outdoor activity.

The social and recreational programs are planned and directed by the Social Activities Committee. These activities include picnics, informal teas, dances, class and all-school parties, literary programs, a choral club, and gymnastic activities. The Alumnae Association and members of the Woman's Faculty Club also assist in making the social and home life attractive.

### Alumnae Association

The University of Nebraska School of Nursing Alumnae Association was organized at the first annual banquet held on May 21, 1921, by the graduates of the classes of 1920 and 1921. The present membership numbers 350.

A Student Loan Fund was established in 1927. This fund is available, upon application to the Committee on Student Loans, to worthy junior and senior students in the School of Nursing. Individual applications are considered up to one hundred dollars. In 1939 the use of the Loan Fund was extended to graduates who may apply for aid up to two hundred dollars.

The Myra Tucker Library was established in 1946 to honor Miss Tucker who had resigned as Assistant Director of the School of Nursing following twenty-nine years' service. The Tucker Library is located on the first floor of Conkling Hall where it is easily accessible, both from the foyer and the dormitory proper. The purpose of this library is to provide reading material for student nurses, chiefly for recreation and relaxation. Current periodicals and books are added to the collection at regular intervals.

In 1947 the Charlotte Burgess Graduate Scholarship was established as a fitting tribute to Miss Burgess, founder and director of the School of Nursing for twenty-nine years. This scholarship of one hundred dollars, awarded at the annual banquet and homecoming of the alumnae association, is given to a graduate who is outstanding in professional interest and scholarship, in social and professional activities, and in her promise of professional growth. The first award of this scholarship was made on May 24, 1947.

*The Nurse Reporter*, official publication of the Alumnae Association, is issued quarterly to all active members. Other activities of the Alumnae Association include an Endowed Bed established in 1932; the selection

of the school cape in 1933; the furnishing of a room in the Children's Hospital to honor Miss Josephine Chamberlin in 1946; the establishment and the maintenance of the Graduate Lounge located in Conkling Hall.

### Student Health Service

The Student and Personnel Health Service, maintained by the College of Medicine, has supervision of the students' health. The Health Service is available for medical treatment of minor illnesses, medical advice, and health conferences. Students more seriously ill are cared for at the University Hospital, without charge, for a reasonable length of time.

All entering students are required to pass satisfactorily a physical examination, are given a yearly examination thereafter, and a final examination before leaving the school. During the preclinical term all students are immunized against small pox, typhoid fever, diphtheria, tetanus, and scarlet fever. Tuberculin tests are given on admission and yearly thereafter. Pre-entrance medical and dental records are required of all applicants.

### Requirements for Admission

**General.**—Application blanks for admission may be obtained by writing to the Director of the School of Nursing, University Hospital, Omaha 5, Nebraska. Classes are admitted once a year, at the beginning of the Fall Semester of the University of Nebraska.

Applications and transcripts of record should be on file in the office of the Director of the School of Nursing at least one month before the opening of the semester for which admission is desired. Upon receipt of all forms and transcripts required for admission to the School of Nursing, the Committee on Admissions will consider the credentials of each applicant before final acceptance. Pre-entrance tests are required of each applicant before the Committee on Admissions decides concerning the acceptability of individual applicants.

Applicants for admission to the School of Nursing must give evidence of sound physical and mental health, and good character. They must be at least 18 and not more than 30 years of age.

Registration with the Department of Public Instruction is required of all students entering schools of nursing in Nebraska in order that they may be eligible for examination and licensure on the completion of their courses. Blanks for this purpose will be supplied to applicants.

Students are not accepted as transfers from other schools of nursing.

Students are admitted to the School of Nursing (a) as candidates for the degree of Graduate Nurse, (b) as candidates for the degrees of Bachelor of Science in Nursing and Graduate Nurse.

**Five-Year Program.**—The five-year combined curriculum in arts and sciences and nursing is planned to give the student an introduction to the general cultural subjects which are considered fundamental in any college course—English, history, foreign languages, a good foundation in the sciences, and, accordingly, to provide a broader background for the increasingly exacting demands on the nursing profession.

Students who register for the combined nursing and arts and sciences course must present the same entrance requirements as are required by the College of Arts and Sciences. (See Requirements for Admission.)

Two years of this program, preferably the first two, are taken in the College of Arts and Sciences, during which the student is required to

complete a minimum program of 68 semester hours. The remaining three years are spent in the School of Nursing and are devoted to courses of theory and practice as outlined in the three-year nursing program. Elective and special courses in theory and practice may be arranged for students in the senior year.

##### Third, Fourth, and Fifth Years Professional Courses

**Three-Year Program.**—Applicants for admission to the School of Nursing must meet the entrance requirements of the College of Arts and Sciences.

Graduates of accredited high schools may have full admission to freshman standing with 12 properly selected entrance units completed in the senior high school (grades 10, 11, 12) or with 15 entrance units on the four-year high school basis.

<sup>1</sup> This requirement is met if Hist. 9, 10 are carried in the second year.

<sup>2</sup> Recommended electives: English literature, sociology, psychology, economics, art, chemistry.

<sup>3</sup> Physical Education requirement equivalent to two years or four semesters.

Six units from the senior high school shall be in the fields of English, foreign language, mathematics, natural sciences, and the social studies, with a minimum of two units in English, two in mathematics (one each of algebra and geometry or an equivalent combination of general mathematics, algebra and geometry), and two in a foreign language. One unit of foreign language and one unit of mathematics completed below grade 10, while not counting toward the six units in the five fields mentioned above, may be used in fulfilling the specific requirements in these fields.

Ideally, it is recommended that applicants present the following units of credit, a sequence of courses to include: 4 units of English, 2 units of a foreign language, 1 unit of algebra, 1 unit of geometry, 1 to 2 units of chemistry, physics or biology, and 2 units of social science.

An entrance unit indicates the work of five recitations a week, of 40 to 50 minutes each, for at least 36 weeks. In laboratory courses an entrance unit indicates three recitations and two double periods of laboratory work each week for at least 36 weeks. In laboratory courses without recitation, an entrance unit is the equivalent of 15 single periods each week.

Preference is given to applicants who ranked in the upper fourth of their high school classes and who present credentials for at least one year of acceptable college work.

**Psychological Tests.**—The Bureau of Instructional Research, University of Nebraska, gives a battery of tests to all entering students during registration week. Scores are used for guidance purposes throughout the course. The battery includes the following: (1) scholastic aptitude test, (2) English classification test, (3) reading test, (4) general mathematics, (5) study skills, (6) Strong's Vocational Interest.

**Professional Program.**—The professional curriculum covers a period of 36 months. It is divided into a preclinical period of 18 weeks, and a clinical period of 29 months, exclusive of vacations. The program is so planned as to give the student a good understanding of the basic sciences and of the principles and technics underlying good nursing care.

During the preclinical term the student spends the major portion of her time in the classrooms and laboratories of the College of Medicine and of the School of Nursing, where she receives instruction in the basic sciences and in the theory and practice of nursing. The program is designed to provide such instruction as will give the student skill in nursing technics and some of the fundamental principles upon which nursing depends, before she is given the care of patients.

The clinical period is devoted to instruction and experience in relation to nursing in medicine, surgery, pediatrics, nursery school methods, orthopedics, gynecology, obstetrics, psychiatry and neurology, urology, and in eye, ear, nose, and throat conditions. Experience is also given in the diet kitchens, operating rooms, admitting and out-patient departments. Practice assignments in the hospital include experience in each of the related clinics of the out-patient department.

The student spends a total of 8 to 9 weeks at different stages of her experience in the out-patient department studying the problems of health service to the ambulatory patient and the prevention of illness in the home and in the community. In the senior year the experience includes observation and assistance, under supervision, in the out-patient prenatal, postnatal and infant welfare clinics, and in the related field work which includes home deliveries.

The application of the principles of nursing is made in the various hospital wards and in the out-patient department, through classwork, supervised practice, informal discussions, clinics, conferences, and written case reports. Throughout the course, emphasis is placed on the prevention of disease by means of effective health teaching.

High school students who successfully complete this three-year program may matriculate in the two-year academic program of the five-year course and on its completion receive the Bachelor of Science degree.

The curriculum has an estimated credit of 57 academic semester hours. One credit hour is granted for each 18 hours of lecture and for each 36 hours of laboratory.

## Grades and Continuation in the School

Successful completion of each semester's program is determined by the quality of the student's daily work, and by examinations given at the end of each course.

Passing grade in the School of Nursing is 4 (70). A grade of "I" is given when work is of passing grade, but, for good reason, has not been completed on time. An "I" must be removed within 3 months unless special extension of time is granted. A grade of "F" in any subject may be removed only by repeating the course.

Because of the complicated schedules of theory and clinical experience, irregular class schedules for students can be arranged only by special permission of the faculty. Before a student is allowed to advance from one semester to the next, subjects which are pre-requisites to the following semester's work must be satisfactorily completed.

The faculty of the School of Nursing reserves the right to recommend, at any time, the withdrawal of a student whose personality, health, conduct, or scholastic standing make it inadvisable for her to remain in the School of Nursing.

### Expenses

(Approximately \$40.00 the first year.)			
Uniforms.....			Approximately \$65.00
(Payable \$45.00 on entrance, the remainder at the end of six months.)			
School cape (optional).....			\$25.00
Special Examinations .....			\$ 1.00

The Tuition and Medical Service fees may be paid in six equal amounts, \$48 and \$3 at the beginning of each semester.

**Refunds.**—Fees will not be refunded for any reason.

**Nonresident Students.**—All students not residents of Nebraska and who come from states which charge residents of Nebraska a non-resident fee must pay a nonresident fee. The fee charged shall not be less "than the fee charged to residents of Nebraska for a similar course of study in a corresponding institution by the state in which such a nonresident has his home." The exact amount will be determined when application for entrance to the University is made to the Registrar. Students coming from states in which no nonresident fee is charged to residents of Nebraska will not be required to pay the nonresident fee.

The following rules have been adopted by the Board of Regents:

1. In accordance with statutory provisions, all students not domiciled in Nebraska are required to pay the nonresident fees. These entering the state to attend a state school, or within one year prior to matriculation, are presumed to be nonresidents and the burden of overcoming this statutory presumption is upon them. Ordinarily this will not be satisfied by a mere declaration, while attending school, of intent to reside in Nebraska.

2. One desiring exemption shall make a verified application therefor upon a blank to be secured from the Comptroller's office and approved by the committee on exemptions. All information called for by the form shall be given in full. When duly verified, the application shall be filed in the Comptroller's office.

3. Students who are charged the nonresident fee by the Registrar, and who claim exemption, must file their application for exemption in the Comptroller's office on or before the end of the ninth week of the semester for which the fee is charged; in the case of summer sessions, before the end of the third week of the term for which the fee is charged. For failure after due notice to file such application on said date, the fee becomes automatically assessed to the student.

4. In all cases the burden is upon the applicant to make a showing

sufficient to justify the requested exemption. While personal hearings will not be granted as of right, the committee will summon the applicant for a personal interview in all cases where it is of the opinion that such an interview will aid the proper disposition of the case.

It should be noted that no provision is made for exempting students from this fee on account of financial need or of scholarship. Students coming from outside the state therefore should be prepared to pay the fee throughout their University career.

#### **Special Regulations**

**Marriage.**—Applicants to the School of Nursing will be limited to unmarried women. Student nurses who marry before the completion of their training will be asked to withdraw from the School of Nursing, except those women who are married within the last three months prior to their graduation and who have previously secured the written consent to marry from their parents or guardian and the Director of the School of Nursing.

**Uniforms.**—Student nurse uniforms are distinctive articles of dress prescribed by the Director of the School of Nursing, and are the property of the School of Nursing. The uniform will be worn in the manner prescribed and under the conditions specified by the Director of the School of Nursing. If a student leaves the School of Nursing before the uniforms are received from the manufacturer, she shall be entitled to a refund that equals three-fourths of the rental money paid for the use of the uniform. Student nurses who leave the School of Nursing at the end of the pre-clinical period or at the time when she has worn the uniform for several months shall be entitled to a refund that equals one-half of the rental sum paid upon return of the uniform. No refunds will be allowed after students have begun clinical training. In all cases the uniforms will remain the property of the School of Nursing.

**Vacation and Absence.**—Ten weeks' vacation is granted during the three years. Vacations are given during the months of June, July, and August. A few additional days are given preclinical students during the Thanksgiving and Christmas holidays.

Time lost through illness and all time lost for any other cause is made up.

#### **Requirements for Graduation**

**Five-Year Students.**—The degree of Bachelor of Science and the degree of Graduate Nurse will be granted by The Board of Regents of the University of Nebraska to students who have completed satisfactorily the requirements as outlined in the Five-Year Combined Academic and Professional Program.

**Three-Year Students.**—The degree of Graduate Nurse will be granted by The Board of Regents of the University of Nebraska to students who have completed satisfactorily the requirements as outlined in the Three-Year Professional Program.

#### **State Registration**

The School is registered in the State of Nebraska. Upon the successful completion of the course, graduates of the School will be eligible to take the examinations for registration in Nebraska. As registered nurses, they are eligible for registration in any state with which Nebraska has reciprocity, are eligible for membership in the alumnae association, district, state, and national organizations, and in the American Red Cross Nursing Service.

## Courses of Instruction

Course numbers in parentheses following the sub-title indicate numbers under which courses were offered in 1946-47.

### Biological and Physical Sciences

**1. Anatomy.**—This course is designed to give students a fundamental knowledge of the structure of the human body. Lectures, laboratory, autopsy demonstrations, microscopic slides, models, and museum specimens are used in the study. 54 hours. Dr. Latta, Dr. Holyoke, Staff.

**2. Physiology.**—A study of the functions of the normal human body. Lectures and demonstrations. 54 hours. Dr. McIntyre, Staff.

**3. Microbiology.**—Deals with the fundamental principles of microbiology, with special emphasis on the common pathogenic organisms, the sources and modes of infection, and methods of prevention of the common infectious diseases. Laboratory work includes bacteriological technic, with emphasis on practical problems of sepsis, disinfection, and isolation. Lectures, demonstrations, laboratory. 72 hours. Dr. Gunderson, Dr. Allen.

**4. Chemistry.**—A study of the fundamental principles of inorganic and organic chemistry and the application of these principles to physiology, nutrition, pharmacology, and the clinical subjects in nursing. Lectures, laboratory. 54 hours. Dr. Morgulis, Dr. Jacobi, Staff.

### Medical Science

**1. Pharmacology I.**—A course designed to familiarize the student with the terms, symbols, systems and methods used in weighing and measuring drugs; the methods of preparing solutions and of calculating and preparing dosages; the principles of handling and administering medications. Lectures, demonstrations, and laboratory. 36 hours. Miss Breen.

**2. Pharmacology II.**—This course is designed to continue the study of drugs with emphasis on the nature, action, therapeutic uses, toxicology, precautions in administration, and the effects to be desired. Lectures. 36 hours. Dr. McIntyre, Staff.

**3. Introduction to Medical Science.**—A general survey of the field of medical science planned to interpret the changes occurring in organs and tissues during the transition from health to illness; to describe the scientific methods used in attacking the problems of disease; to emphasize the importance of preventive medicine; and to stress the role of the nurse as a health teacher. This course precedes or parallels the study of specific medical and surgical diseases. Lectures, demonstrations. 42 hours. Dr. Tollman, Dr. Hunt.

### Social Sciences

**1. Social Psychology.**—Lectures and class discussions dealing with the underlying principles of human conduct, and with the application of the laws and principles of psychology to nursing problems. Lectures. 36 hours. Miss Williams.

**2. Applied Sociology.**—This course is designed to give the student an understanding of social problems and behavior, and of social control with practical application to nursing. Lectures. 36 hours.

**3. Professional Adjustments I.**—This course is designed to aid the student in becoming oriented to the profession of nursing. Emphasis is given to personal and group relationships in nursing and to the problems of adjustment the student has in regard to the hospital environment. Lectures. 18 hours. Miss Kyle.

**4. Social Problems in Nursing.**—The aims of this course are to interpret to the student the environmental background of the patient, the conditions under which he lives and works, and the relation of these factors to social and health care. Field work, under supervision, gives the student contact with the community agencies, their activities and methods. Lectures, discussions, conferences, and field trips. 18 hours. Miss Braun, Special Lecturers.

**5. Professional Adjustments II.**—A course for the advanced student to acquaint her with the main branches of nursing and the opportunities available in the profession; a discussion of the professional organizations and their significance; trends in nursing. 24 hours. Miss Kyle, Special Lecturers.

**57. History of Nursing.**—A study of nursing from ancient times through its different stages of development to its present status. Lectures and discussions. 36 hours. Miss Warner.

### Public Health

**1. Personal Health.**—Lectures, conferences, which emphasize the laws of hygiene and health ideals, the opportunities and obligations of the nurse as a teacher of health. Lectures. 18 hours.

**52. Sanitation and Community Hygiene.**—Discussion of the various factors which affect the health of the community, such as sanitary control of water and food supplies, disposal of wastes, control of communicable disease, industrial hygiene, sanitation of houses and public buildings. Lectures, field trips. 18 hours.

### Nutrition

**1. Nutrition, Foods and Cookery.**—Designed to give the student a fundamental understanding of foods, their composition, preparation, digestion, and metabolism in relation to satisfying the nutritional requirements of normal individuals at various ages. Lectures, laboratory. 54 hours. Miss Sprague, Staff.

**2. Diet Therapy.**—A course concerned with the application of the principles of nutrition to therapy. Experience is given in the preparation of selected food items required in modification of the normal diet to meet therapeutic needs. 18 hours. Miss Sprague, Staff.

### Nursing Arts

**1. Nursing Arts I.**—An introduction to the arts and technics of nursing with emphasis on the fundamental principles underlying the procedures carried out while giving care to the patients. Lectures, demonstrations, and conferences with supervised practice are used to acquaint the student with the necessary skills, attitudes, and procedures involved in the care of a patient. 108 hours. Miss Richmond, Miss Williams.

**2. Nursing Arts II.**—Presentation of the more advanced technics and skills used in the care of a patient. 36 hours. Miss Richmond, Miss Williams.

### Medicine

**2. Medical Nursing I (General Medicine 2, 4).**—A course of lectures, discussions, clinics and demonstrations presenting specific medical diseases including their etiology, clinical manifestations, therapeutic procedures and preventive measures. Consideration is given to the individual, physical, and emotional needs of the patients and to the social and economic aspects of health and disease. Guidance is given in the development of understanding attitudes and skills which serve as the foundation of the care of the medical patient, including the geriatric patient. 60 hours. Dr. Greene, Dr. MacQuiddy, Dr. Conlin, and Miss Breen.

**52. Medical Nursing II (Medicine 52, 54, and 56).**—A course developed to study the highly communicable diseases, venereal disease, tuberculosis and dermatological conditions. Emphasis is placed on the etiology, symptoms, possible complications and sequelae, mode of transmission and treatment, prevention and early recognition of the diseases. The importance of nursing care is stressed and special consideration is given to the public health aspects involved in the care of patients with these conditions. The course is supplemented with classes, clinics, and demonstrations at the Douglas County Hospital where students affiliate for clinical experience in communicable disease nursing. 54 hours. Dr. E. Bantin, Dr. Cameron, and Miss Breen.

**58. Medical Nursing III (Medicine 58, 60).**—Symptoms, causes, and preventive aspects of neurological conditions. The principles of nursing care of the neurological patient are emphasized. Lectures, demonstrations, clinics. 18 hours. Dr. Wigton, Miss Breen.

**Practice of Nursing in Medicine.**—Supervised practice on the medical wards, with emphasis upon types of patients that require the more skilled nursing care. Clinics, ward conferences, case studies, and experience records. First and second years. Staff.

### Surgery

**2. Surgical Nursing I (Surgery 2, 4, 5, 6).**—Lectures, clinics, and demonstrations designed to give the student an understanding of the etiology, symptoms and treat-

ment of common surgical conditions and those involving the genito-urinary tract and the central nervous system. Instruction is also given which will assist the student in acquiring the knowledge necessary for intelligent and skilled nursing care to surgical patients. 72 hours. Dr. Herbert Davis, Dr. Owens, Dr. Keegan, Miss Warner.

**3. Surgical Nursing II (Operating Room Technic).**—Lectures and demonstrations in operating procedures and the principles of surgical asepsis. 18 hours. Miss John-dreau, and assistants.

**53. Surgical Nursing III (Surgery 53, 58).**—Lectures, clinics, and demonstrations dealing with special surgical conditions related to orthopedics and to conditions of the eyes, ears, nose and throat. The etiology, symptoms, treatment and nursing care are stressed. 60 hours. Dr. Bach and staff, Dr. Gifford, Dr. Rubendall, Dr. Calvin Davis, and Miss Warner.

**59. Emergency Nursing and First Aid.**—The Standard Red Cross First Aid course. Classes, demonstrations, and practice. 20 hours. Miss Breen.

**Practice of Nursing in Surgery.**—Bedside clinics, conferences, case studies, and discussions to correlate principles and practice in the nursing care of surgical patients. First and second years.

**Practice of Nursing in Surgical Specialties.**—Clinics, demonstrations, excursions, and lectures by specialists are used in aiding the student in the application of fundamentals of surgical nursing as related to specific surgical conditions and diseases. Study of such private and public organizations and institutions as those furthering the care of the orthopedic, the blind, and the deaf child serves to broaden the student's understanding of community health problems.

## Obstetrics and Gynecology

**51. Gynecology (Obstetrics and Gynecology 51).**—Anatomy and physiology of the pelvic organs; pathology of the pelvis; symptoms and treatment of gynecological conditions, infections, tumors, obstetrical injuries, and functional disorders; care of patients before and after operations. Lectures and clinics, ward conferences, case studies. 10 hours. Dr. McGoogan, Miss Koons.

**52. Obstetrics.**—Lectures and clinics dealing with the anatomy and physiology of the pelvis; physiology of pregnancy, of labor, and of the puerperium; management of labor; obstetric emergencies and complications; care of the newborn; social aspects of obstetrical work. 18 hours. Dr. Sage and staff.

**53.
