SERIES LVIII

AUGUST 15, 1953

NUMBER 17

PUBLISHED BY THE UNIVERSITY AT LINCOLN

Issued 3 times a month in January, February, April; 4 times a month in March; semi-monthly in May and monthly in July and August. Entered at the Postoffice in Lincoln 1, Nebraska, as second-class matter under act of Congress, August 24, 1912.

NEBRASKA'S NIGHTINGALES ...

Nursing is as old as mankind. But the professional nurse, who first appeared during this past century, is something new in the panorama of human history. Today's women in white have inherited a glorious tradition of truly great women who grace the pages of history.

Since October of 1917, the University of Nebraska School of Nursing has been doing its part in providing professional training for modern counterparts of Florence Nightingale, Clara Barton, Edith Cavel, and countless others who have contributed their lives towards developing nursing from its early characterization as a household art to the very pinnacle of precision professionalism upon which it stands today.

Hundreds of "Nebraska Nightingales" have emerged from the University's School of Nursing since those fading days of the First World War. And they have gone forth to spread their spiritual and material gains throughout the land, characterized by their heightened perception of service to humanity and fortified with professional strength that can be obtained only from a nursing curriculum with the highest prestige.

NEW DEGREE PROGRAM

The University of Nebraska School of Nursing announces the opening of a four-year program leading to the degree of Bachelor of Science in Nursing. This new degree program will replace the present three-year diploma curriculum and provide graduates with the Diploma in Nursing as well as Bachelor of Science degree.

National accreditation requires that students within a school of nursing be taught on a basis of similar backgrounds. Teaching high school and college students in the same class is not considered conducive to the best in educational procedures. To maintain both programs adequately, a larger staff or double teaching loads for the present staff would be necessary. Since neither is practical nor possible, and with records showing that a majority of nursing students in school have one or more years of college, the four-year program leading to a Bachelor of Science degree seems the most logical approach to nursing education.

Haskell Morris, A.B., M.D., Instructor in Internal Medicine, Director of Student Health Service.

J. R. Schenken, B.S., M.D., Professor of Pathology and Bacteriology.

SCHOOL OF NURSING

The University of Nebraska School of Nursing was established in October, 1917, by The Board of Regents of the University of Nebraska as a part of the College of Medicine. The immediate administration of the School of Nursing is provided through the Director and the faculty.

PURPOSES OF THE SCHOOL

- 1. To provide carefully selected young women with a professional program of instruction and experience that will stimulate their critical thinking and enable them as individual nurses to give skillful and sympathetic nursing care.
- 2. To develop cultured and socially responsible young women with the ideals and attributes of the professional person.
- 3. To develop a sense of responsibility toward the health needs of the community and an understanding of the social factor in sickness and in health.
- 4. To stimulate interest in special fields of graduate preparation leading to positions of leadership in nursing.

FACILITIES FOR INSTRUCTION AND PRACTICE IN NURSING

The facilities for instruction and practice in nursing include the classrooms and the laboratories of the School of Nursing and the College of Medicine; the library of the College of Medicine; the wards of the University Hospital; the clinics of the University Dispensary; the Douglas County Hospital for experience in communicable disease nursing; and the Nebraska Psychiatric Unit for experience in psychiatric nursing.

Instruction in the various subjects outlined in the School of Nursing Curriculum is given by members of the School of Nursing faculty and the faculty of the College of Medicine.

The University Hospital.—The University Hospital, where the clinical experience of the students is obtained, is located on the campus of the College of Medicine. The faculty of the College of Medicine constitutes the staff of the hospital, with the result that the clinical instruction in each department is under the direction of specialists. It has a capacity of 219 beds, is general in character, and accommodates an active service in all of its departments. The service includes facilities for clinical instruction and ward practice in medicine, surgery, obstetrics, gynecology, orthopedics, pediatrics, psychiatry and neurology, pathology, radiology, urology, and in eye, ear, nose, and throat conditions.

The operating-room service, which averages about 200 operations a month, provides a valuable experience for the students in surgical technic. The admitting rooms and diet kitchens are also utilized for the instruction and experience of the students.

The University Dispensary.—The University Dispensary is used for the care of ambulatory patients. It offers varied clinical experience in all branches of medicine and surgery, in pediatrics, obstetrics, and psychiatry. There are also separate clinics for well babies, and classes for mothers. There is an out-call service which provides for general medical treatment, and cooperates with the Visiting Nurse Association and other welfare agencies of the city. The School is utilizing more and more the clinical opportunities of this department as it increasingly emphasizes the social and economic aspects of disease and of health education.

000

Library.—The library of the College of Medicine, located in a wing of the hospital, contains more than 56,000 bound volumes and more than 25,000 pamphlets and reprints devoted to the subjects of medicine and nursing, and more than 460 standard medical and nursing periodicals. Provision is made for the addition to the library of important books, pamphlets, and periodicals, devoted not only to subjects of special interest in nursing, but also to allied subjects, such as the social sciences, psychology, and education.

Books may be withdrawn at any time upon demand from the University Library at Lincoln, containing 400,000 volumes, and from the Omaha Public Library.

RESIDENCE

Conkling Hall is the residence of the students of the School of Nursing and is located on the medical college campus. It is equipped with class and demonstration rooms, a kitchenette, laundry, and sewing rooms for the use of the students, and well-appointed reception rooms. A large gymnasium provides a place for indoor athletics and recreation.

The social and recreational programs are planned and directed by the Social Activities Committee. These activities include picnics, informal teas, dances, class and all-school parties, literary programs, a choral club, and gymnastic activities. The Alumnae Association and members of the Woman's Faculty Club also assist in making the social and home life attractive.

ALUMNAE ASSOCIATION

The University of Nebraska School of Nursing Alumnae Association was organized at the first annual banquet held on May 21, 1921, by the graduates of the classes of 1920 and 1921. The present membership numbers 359.

A Student Loan Fund was established in 1927. This fund is available, upon application to the Committee on Student Loans, to deserving junior and senior students in the School of Nursing. Individual applications are considered up to one hundred dollars. In 1939 the use of the Loan Fund was extended to graduates, who may apply for aid up to two hundred dollars.

The Myra Tucker Library was established in 1946 to honor Miss Tucker who had resigned as Assistant Director of the School of Nursing following twenty-nine years' service. The Tucker Library is located on the first floor of Conkling Hall, where it is easily accessible both from the foyer and the dormitory proper. The purpose of this library is to provide reading material for student nurses, chiefly for recreation and relaxation. Current periodicals and books are added to the collection at regular intervals.

In 1947 the Charlotte Burgess Graduate Scholarship was established as a fitting tribute to Miss Burgess, founder and director of the School of Nursing for twenty-nine years. This scholarship of one hundred dollars, awarded at the annual banquet and homecoming of the Alumnae Association, is given to a graduate who is outstanding in professional interest and scholarship, in social and professional activities, and in her promise of professional growth. The first award of this scholarship was made on May 24, 1947.

The Nurse Reporter, official publication of the Alumnae Association, is issued quarterly to all active members. Other activities of the Alumnae Association include an Endowed Bed established in 1932; the selection

000

000

of the school cape in 1933; the furnishing of a room in the Children's Hospital to honor Miss Josephine Chamberlin in 1946; the establishment and the maintenance of the Graduate Lounge located in Conkling Hall.

STUDENT AND PERSONNEL HEALTH SERVICE

The Student and Personnel Health Service, maintained by the College of Medicine, has supervision of the students' health. The Health Service is available for medical treatment of minor illnesses, medical advice, and health conferences. Students more seriously ill are cared for at the University Hospital except in instances where an illness requires hospitalization beyond thirty days. In such instances the student may be required to share expenses. In the event of continued illness, her nursing education may be temporarily or permanently terminated. The hospital is not responsible for any pathological conditions contracted by the student while serving in the various departments.

Dental work (with the exception of orthodontics, or third molar extraction) is included in the Student Health Service fee; however, students are expected to pay for the cost of their materials.

All entering students are required to pass satisfactorily a physical examination, are given a yearly examination thereafter, and a final examination before leaving the school. Students are immunized for Smallpox, Typhoid Fever, and Diphtheria-Tetanus after admission to the school. Mantoux tests may be given on admission and thereafter as indicated.

PROFESSIONAL PROGRAM

Admission Requirements.—Applicants for admission to the School of Nursing must meet the entrance requirements of the University of Nebraska.

Graduates of accredited high schools should present twelve units from senior high schools (grades 10, 11, 12) or fifteen units from four-year high schools (conditional admission may be allowed with eleven units completed in senior high school or fourteen units from a four-year high school). An entrance unit indicates the work of five recitations a week, of forty to fifty minutes each, for at least thirty-six weeks. In laboratory courses an entrance unit indicates three recitations a week and two double periods of laboratory each week.

It is recommended that applicants present the following units of credit and sequence of high-school courses to include:

English	units
Foreign Language	
Algebra 1	unit
Geometry or General Mathematics 1	unit
Social Science	
Natural Sciences	units
(Chemistry, Physics, Biology)	

Electives to complete required number of units.

Applicants to the School of Nursing must complete one full year at the University of Nebraska or other accredited college, during which time certain specified first-year requirements must be fulfilled. Since not all colleges offer all of the required courses in the first year of the nursing program, it is urgently recommended that the applicant select a college in which she will be able to complete her basic preparation without the need later to remove deficiencies.

000

OLIO

Applications and transcripts of high school and college records should be on file in the office of the Director of the School of Nursing at least one month before the opening of the first semester of the college year. Application forms may be obtained by writing to the Director of the University of Nebraska School of Nursing, 42nd and Dewey Avenue, Omaha 5, Nebraska.

All applicants will be required to take the National League for Nursing Prenursing and Guidance Test, at an individual cost of five dollars (\$5.00), payable upon making application to take the test. The test is given under the direction of qualified psychologists at specified times and places, and confidential reports of test results are sent to the Director of the School of Nursing. The reports are then evaluated by the Committee on Admissions as a part of the applicant's admission credentials, and are also utilized in counseling the student throughout the nursing course.

Upon receipt of all forms and transcripts, and after the applicant has taken the necessary pretests, the Committee on Admissions will consider the credentials of each individual before final acceptance. Upon acceptance, the applicant becomes a candidate for both (a) the diploma of Graduate Nurse, and (b) the degree of Bachelor of Science in Nursing.

Transfer students from other schools of nursing are accepted only after the approval of the Board of Nursing Education and Nurse Registration, and of the Committee on Admissions of the University of Nebraska School of Nursing.

COLLEGIATE PROGRAM

Four-Year Degree Program

000

The four-year program leading to the degree of Bachelor of Science in Nursing requires four calendar years. During the two semesters and summer of the first year, the student enrolls in the University of Nebraska or other accredited college offering the required courses, and completes the prescribed first year of the nursing curriculum as follows:

*English Composition	6	hours
*General Chemistry	5	hours
(Chemistry 1 at University of Nebraska)		
*Biology or Zoology	6	hours
(Biology 1 and 2, or Zoology 1 and 2 at University		
of Nebraska)		
*Foods and Nutrition	6	hours
(Home Economics 41 and 42 at University of Nebraska)		
*Principles of Sociology	3	hours
(Sociology 53 at University of Nebraska)		
*History	6	hours
(History 1 and 2, History of European Civilization, or		
History 7 and 8, English History, at University of Nebraska)		
Speech	3	hours
Physical Education	2	hours
Electives	3	hours
(Additional Sociology is recommended.)	-	926.2009 V (1977)
Total	0	hours

^{*} Essential to the professional curriculum. Must be taken before coming to the Omaha campus.

At the beginning of the second calendar year the student begins her professional curriculum on the College of Medicine campus in Omaha. The student nurse will then have sophomore standing, provided she has completed at least thirty (30) hours of the required courses as outlined above. During the three years on the Omaha campus the following curriculum will be followed:

Degree Program for Graduate Nurses from other Schools of Nursing. Candidates for the Baccalaureate Degree in Nursing from Schools of Nursing other than the University of Nebraska School of Nursing will be considered upon presentation of satisfactory credits and upon completion of at least one year in residence at the University of Nebraska.

Graduate nurses presenting credits from Schools of Nursing affiliated with the University of Nebraska and from other University Schools will be allowed not more than 45 credits toward a degree. Candidates from other schools of nursing will be allowed not more than 32 credits. Each transcript for all such candidates will be evaluated by a committee of the University of Nebraska School of Nursing.

GRADES AND CONTINUATION IN THE SCHOOL

000

Successful completion of each semester's program is determined by the quality of the student's daily work, and by examinations given at the end of each course.

Passing grade in the School of Nursing is 4 (70). A grade of "I" is given when work is of passing grade, but, for good reason, has not been completed on time. An "I" must be removed within three months unless special extension of time is granted. A grade of "F" in any subject may be removed only by repeating the course.

Because of the complicated schedules of theory and clinical experience, irregular class schedules for students can be arranged only by special permission of the faculty. Before a student is allowed to advance from one semester to the next, subjects which are prerequisites to the following semester's work must have been satisfactorily completed.

The faculty of the School of Nursing reserves the right to recommend, at any time, the withdrawal of a student whose personality, health, conduct, or scholastic standing make it inadvisable for her to remain in the School of Nursing.

EXPENSES

Tuition: Effective Sept., 1953, a single blanket fee of \$75.00 per semester is charged each student, resident or nonresident. Those students at present in their second and third year of nursing will continue to pay a blanket fee of \$65.00 per semester until completion of their three years. This fee includes matriculation, registration, medical service, laboratory, library, diploma and course fees. The fee does not include the cost of uniforms, books, nor the miscellaneous fees listed below:

Miscellaneous Fees: (Additional to blanket fee of \$75.00)

Late registration, minimum \$	3.00
For each additional week after classes begin	1.00
Transcript (one copy free)	1.00
Original and one carbon	1.25
Degree in absentia	10.00
Special examination, each course	1.00
Books, for three (3) years, approximately	90.00
Uniforms, approximately	90.00

The Board of Regents has recently authorized a \$50.00 uniform allowance to each regularly registered student nurse while in her first semester at the School of Nursing. Additional costs of uniforms must be paid by the student nurse.

School Cape (optional) 30.00 No charge is made for Board, Room, and Uniform Laundry.

Checks on personal accounts will be received only when written for the exact amount of the fees. Remittance by mail should be by draft, money order, or cashier's check. Do not send coin or money except by registered mail. It is impossible to trace money lost in the mail, and University officials cannot be held responsible for such loss.

SPECIAL REGULATIONS

Marriage.—Applicants to the School of Nursing will be limited to unmarried women. Student nurses who marry before the completion of their course will be asked to withdraw from the School of Nursing, except those women who are married within the last six months prior to their graduation and who have previously secured the written consent to marry from their parents or guardian and from the Director of the School of Nursing.

Uniforms.—Student nurse uniforms are distinctive articles of dress prescribed by the School of Nursing, and are the property of the School. The uniform will be worn in the manner prescribed and under the conditions specified by the Director of the School of Nursing.

Vacation and Absence.—During the college year vacations correspond to the scheduled college vacations. During the three years on the College of Medicine campus, ten weeks of vacation are granted: four in the first year; three in the second year; three in the third year. Twentyone days of sick leave are allowed during these three years. All illness days in excess of twenty-one, as well as all absent days, must be made up at the end of the course.

14

000

REQUIREMENTS FOR GRADUATION

The degree of Bachelor of Science in Nursing will be granted by the Board of Regents of the University of Nebraska to students who have satisfactorily completed the requirements as outlined in the Four-Year Combined Academic and Professional Program.

STATE REGISTRATION

The School is approved by the Board of Nursing Education and Nurse Registration. Upon successful completion of the course, graduates of the School are eligible to take the examinations for registration in Nebraska. As registered nurses they are eligible for registration in any state with which Nebraska has reciprocity, and are also eligible for membership in the Alumnae Association, district, state, and national organizations, and in the American National Red Cross. Before a graduate nurse may become a registered nurse, she must be twenty-one years of age, as well as successfully pass the State Board examinations.

NATIONAL ACCREDITATION

The School of Nursing is temporarily accredited by the Accrediting Service of the National League for Nursing. As national accreditation is a relatively recent movement in nursing, the School is currently working toward full accreditation, as are the majority of schools in the United States.

0=0

COURSES OF INSTRUCTION

Biological and Physical Sciences

1. Anatomy (66 hrs) Dr. Latta, Staff

Lectures, laboratory, autopsy demonstrations, microscopic slides, models, and museum specimens are used in the study

This course is designed to give students a fundamental knowledge of the structure of the human body.

2. Physiology (66 hrs) Dr. McIntyre, Staff Lectures and demonstrations

A study of the functions of the normal human body.

3. Microbiology (66 hrs) Dr. Gunderson, Staff

Lectures, demonstrations, laboratory

Deals with the fundamental principles of microbiology, with special emphasis on the common pathogenic organisms, the sources and modes of infection, and methods of prevention of the common infectious diseases. Laboratory work includes bacteriological technic, with emphasis on practical problems of asepsis, disinfection, and isolation.

4. Chemistry (84 hrs) Dr. Morgulis, Dr. Wilder, Staff

Lectures, laboratory

A study of the fundamental principles of inorganic and organic chemistry and the application of these principles to physiology, nutrition, pharmacology, and the clinical subjects in nursing.

Humanities

ENGLISH

21. Types of British and American Literature (3 cr)

Prereq English 2 or 7

Introductory course. Designed to develop a sense of values and an appreciation of the best in literature. Literary elements and principles, with assisted study of the essay, biography and fiction.

22. Types of British and American Literature (3 cr)

Prereq English 2 or 7

Emphasis upon drama and poetry.

EDUCATIONAL PSYCHOLOGY

61. Human Development and Behavior (3 cr)

A survey of the development of the human personality from infancy through childhood, adolescence, and later life, those factors which promote or retard learning and the progressive adjustment of the individual to his school work, to his community, and to society in general. Systematic study throughout the term of at least one individual child or adolescent. Study and use of mental ability tests, achievement tests, and other measures and evaluative procedures as they become pertinent.

62. Human Development and Behavior (3 cr) Educational Psychology 61 continued and including a study of the effects of alcohol and narcotics.

SOCIOLOGY

161. Social Organization and Disorganization (3 cr)

Detailed analysis of processes of disorganization in society, with some attention to the contrasting processes by which social structures are formed and perpetuated. Illustrative treatment of the principal "problem" areas in contemporary society.

Medicine

2. Medical Nursing I (60 hrs) Dr. Moody, Staff, Miss Williams

A course of lectures, discussions, clinics and demonstration presenting specific medical diseases including their etiology, clinical manifestations, therapeutic procedures and preventive measures. Consideration is given to the individual, physical, and emotional needs of the patients and to the social and economic aspects of health and disease. Guidance is given in the development of understanding attitudes and skills which serve as the foundation of the care of the medical patient, including the geriatric patient.

52. Medical Nursing II (18 hrs) Dr. Cameron, Miss Williams

A course developed to study the venereal disease, tuberculosis and dermatological conditions. Emphasis is placed on the etiology, symptoms, possible complications and sequelae, mode of transmission and treatment, prevention and early recognition of the diseases. The importance of nursing care is stressed and special consideration is given to the public health aspects involved in the care of patients with these conditions.

58. Medical Nursing III (18 hrs) Staff, Miss Williams Lectures, demonstrations, clinics Symptoms, causes, and preventive aspects of neurological conditions. The principles of nursing care of the neurological patient are emphasized.

59. Medical Nursing IV (60 hrs) (Medicine 52) A course for the study of highly communicable disease. Classes and experience are given at the Douglas County Hospital in the communicable disease unit. Practice of Nursing in Medicine Staff

Supervised practice on the medical wards, with emphasis upon types of patients that require the more skilled nursing care. Clinics, ward conferences, case studies, and experience records. First and second years.

Medical Science

1. Pharmacology I (36 hrs) Miss Williams

Lectures, demonstrations, and laboratory A course designed to familiarize the student with the terms, symbols, systems and methods used in weighing and measuring drugs; the methods of preparing solutions and of calculating and preparing dosages; the principles of handling and administering medications.

2. Pharmacology II (36 hrs) Dr. McIntyre, Staff

Lectures

This course is designed to continue the study of drugs with emphasis on the nature, action, therapeutic uses, toxicology, precautions in administration, and the effects to be desired.

3. Introduction to Medical Science (30 hrs) Dr. Schenkent, Staff

Lectures, demonstrations

A general survey of the field of medical science planned to interpret the changes occurring in organs and tissues during the transition from health to illness; to describe the scientific methods used in attacking the problems of disease; to emphasize the importance of preventive medicine; and to stress the role of the nurse as a health teacher. This course precedes or parallels the study of specific medical and surgical diseases.

Nursing Arts

1. Nursing Arts I (124 hrs) Miss Cook, Staff

Lectures, demonstrations, conferences and supervised practice are used to acquaint the students with the necessary attitudes and skills involved

An introduction to nursing to help the student develop attitudes and skills basic to all nursing; to understand the scientific reasons for performing procedures; to guide the student in understanding the patient as an individual and to assist in developing awareness of the nurses' role in health teaching and conservation.

 Nursing Arts II (58 hrs) Miss Cook, Staff Presentation of the more advanced technics and skills.

Nutrition

2. Diet Therapy (30 hrs) Miss Spragg, Staff A course concerned with the application of the principles of nutrition to therapy. Experience is given in the preparation of selected food items required in modification of the normal diet to meet therapeutic needs.

Obstetrics and Gynecology

51. Gynecology (18 hrs) Dr. McGoogan, Staff, Miss Koons

Lectures and clinics, ward conferences, case studies

Anatomy and physiology of the pelvic organs; pathology of the pelvis; symptoms and treatment of gynecological conditions, infections, tumors, obstetrical injuries, and functional disorders; care of patients before and after operations.

52. Obstetrics (24 hrs) Dr. McGoogan, Staff

Lectures and clinics dealing with the anatomy and physiology of the pelvis; physiology of pregnancy, of labor, and of the puerperium; management of labor; obstetric emergencies and complications; care of the newborn; social aspects of obstetrical work.

53. Principles of Nursing in Obstetrics (48 hrs) Miss Koons

Classes, clinics, case reports with demonstrations of obstetric procedures adapted to the home as well as to the hospital including prenatal, labor, delivery and postpartum care in normal, operative and complicated labors. Principles of the care of full-term and premature infants. Nursing care of patients with gynecological conditions is also given.

Practice of Nursing in Obstetrics

Practical experience in the care of patients during prenatal, labor and postpartum periods and the care of the newborn baby. Supervised practice in the delivery rooms, nursery and wards. Experience in the prenatal and postnatal clinics of the out-patient department. Home visits and home deliveries.

Practice of Nursing in Gynecology

Experience in assisting with gynecological examinations and in the practice of technics specific to the nursing of gynecological patients. Emphasis on psychological and adjustment aspects of gynecological conditions.

Out-Patient Department

Experience in prenatal, postnatal, and infant welfare clinics; assisting in prenatal and gynecological examinations; home visits in prenatal, postnatal, and infant welfare work; assisting under supervision with home deliveries. Clinics, case studies, and conferences.

Orientation

3. Professional Adjustments I (18 hrs) Miss Kyle and Miss Alspach Lectures

This course is designed to aid the student in becoming oriented to the profession of nursing. Emphasis is given to personal and group relationships in nursing and to the problems of adjustment the student has in regard to the hospital environment.

51. Professional Adjustments II (24 hrs) Miss Kyle, Special Lecturers

A course for the advanced student to acquaint her with the main branches of nursing and the opportunities available in the profession; a discussion of the professional organizations and their significance; trends in nursing.

57. History of Nursing (36 hrs) Miss Warner

Lectures and discussions

A study of nursing from ancient times through its different stages of development to its present status.

Pediatrics

51. Pediatrics (36 hrs) Dr. Johr, Miss Bornemeier, Staff

Lectures and clinics dealing with the development and care of the normal child; principles of child hygiene; disease of infancy and childhood; principles of feeding in health and disease.

53. Principles of Nursing in Pediatrics (36 hrs) Miss Bornemeier

Classes, demonstrations, clinics, case studies, and conferences dealing with the nursing care of infants and older children. Laboratory demonstrations and practice in the preparation of formulae and children's diet. A study of the means of maintaining and improving child health through understanding children and their emotional, social, mental, and physical development. Emphasis is placed on the public health aspects, technics of child management.

Practice of Nursing in Pediatrics

Practical experience in the nursing care of infants and children, including practice in the formula room, nursery, and dispensary clinics. Practice, clinics, conferences, case studies, and experience records.

Psychiatry

101. Psychiatry (40 hrs) Staff

Lectures, demonstrations and clinics dealing with the various types of mental and nervous disorders.

103. Principles of Nursing in Psychiatry (50 hrs) Mrs. Scholder, Staff

Classes, clinics, case reports, and conferences dealing with the nursing care of mentally ill patients and the means of prevention.

- **Practice of Nursing in Psychiatry**
- Practical application of the principles of nursing in relation to mental conditions in the Nebraska Psychiatric Unit of the University of Nebraska.

Public Health

1. Personal and Community Health (30 hrs) Mrs. Schaefer Lectures

Lectures, conferences, which emphasize the laws of hygiene and health ideals, the opportunities and obligations of the nurse as a teacher of health.

Surgery

- 2. Surgical Nursing I (72 hrs) Dr. Herbert Davis, Dr. Finlayson, Miss Warner Lectures, clinics, and demonstrations designed to give the student an understanding of the etiology, symptoms and treatment of common surgical conditions and those involving the genito-urinary tract and the central nervous system. Instruction is also given which will assist the student in acquiring the knowledge necessary for intelligent and skilled nursing care to surgical patients.
- **3. Surgical Nursing II** (18 hrs) Miss Uren, and assistants Lectures and demonstrations Operating procedures and the principles of surgical asepsis.

53. Surgical Nursing III (60 hrs) Dr. Hamsa and Staff, Dr. Gifford, Dr. Calvin Davis, Miss Warner

Lectures, clinics, and demonstrations dealing with special surgical conditions related to orthopedics and to conditions of the eyes, ears, nose and throat. The etiology, symptoms, treatment and nursing care are stressed.

Practice of Nursing in Surgery

Bedside clinics, conferences, case studies, and discussions to correlate principles and practice in the nursing care of surgical patients. First and second years. **Practice of Nursing in Surgical Specialties**

Clinics, demonstrations, excursions, and lectures by specialists are used in aiding the student in the application of fundamentals of surgical nursing as related to specific surgical conditions and diseases. Study of such private and public organizations and institutions as those furthering the care of the orthopedic, the blind, and the deaf child serves to broaden the student's understanding of community health problems.

The Florence Nightingale Pledge

I solemnly pledge myself before God and in the presence of this assembly to pass my life in purity and to practice my profession faithfully. I will abstain from whatever is deleterious and mischievious, and will not take or knowingly administer any harmful drug. I will do all in my power to maintain and elevate the standard of my profession and will hold in confidence all personal matters committed to my keeping and all family affairs coming to my knowledge in the practice of my calling. With loyalty will I endeavor to aid the physician in his work, and devote myself to the welfare of those committed to my care.
