CORRECTIONS REFERRING TO FEES

Page 11, paragraph 3: “Upon receipt of notice that an application has been accepted for entrance to the College of Medicine, he is required to send a deposit of $25.00 to be applied to matriculation and as part of payment of the tuition fee of the first term at the time of registration, or to be forfeited if the applicant fails to register in the College of Medicine by June 15.”

Page 14, “Fees” should read:

Medical Service, each semester $3.00

Page 15, add to paragraph 9: “Effective June 1, 1942, microscopes may be rented at the rate of $15.00 each per year, under rules and regulations to be formulated by the faculty and the Dean of the College of Medicine.”
Calendar 1942–1943

1942 Summer School

June 8 to July 15  
Short Session

June 8 to July 31  
Long Session

First Semester 1942–1943

Sept. 9–19, Wednesday to Saturday  
Medical examinations
Sept. 17, Thursday, 9 a.m.  
Convocation, entering students
Sept. 17, 18, 19, Thursday, Friday, Saturday  
Guidance and validation examinations, new students
Sept. 18, Friday  
Chancellor's reception to students
Sept. 21, 22, 23, Monday, Tuesday, Wednesday  
General registration, including changes in spring registration
Sept. 24–Oct. 3, Thursday to Saturday noon  
Registration, Graduate College
Sept. 24, Thursday  
First semester classes begin
Sept. 24, Thursday, 4 p.m.  
Freshman Convocation
Sept. 25, Friday  
Registration, College of Medicine
Sept. 28, Monday  
College of Medicine classes begin
Oct. 24, Saturday  
First scholastic reports
Nov. 11, Wednesday, 10 a.m. to 12 noon  
Armistice holiday
Nov. 25–30, Wednesday noon to 8 a.m. Monday  
Thanksgiving vacation
Dec. 5, Saturday  
Second scholastic reports
Dec. 13, Sunday  
Christmas Oratorio
Dec. 23–Jan. 4, Wednesday noon to 8 a.m. Monday  
Christmas vacation
Jan. 11–16, Monday to Saturday noon  
General registration, second semester, for students attending first semester
Jan. 25–30, Monday to Saturday  
First semester examinations

Second Semester 1942–1943

Jan. 26–27, Tuesday and Wednesday  
Guidance and validation examinations, new students
Jan. 29, Friday  
General registration, new students
Feb. 1–6, Monday to Saturday noon  
Registration, Graduate College
Feb. 1, Monday  
Second semester classes begin
Feb. 15, Monday  
Charter Day
March 6, Saturday  
First scholastic reports
April 10, Saturday  
Second scholastic reports
April 20, Tuesday  
Honors Convocation
May 1, Saturday  
Premedical Day
May 3–8, Monday to Saturday  
Registration for fall semester, students attending second semester
May 17–22, Monday to Saturday  
Second semester examinations
May 22, Saturday  
Alumni Day
May 28, Sunday  
Baccalaureate sermon
May 24, Monday  
Seventy-second annual commencement

1943 Summer School

June 7 to July 14  
Short Session

June 7 to July 30  
Long Session

* Subject to change during the War Emergency.
The College of Medicine and School of Nursing are situated at the University Hospital, in Omaha, at 42nd street and Dewey avenue. All the buildings are modern, the oldest, North Laboratory, having been erected in 1912.
THE UNIVERSITY OF NEBRASKA

The University of Nebraska was chartered by an act of the state legislature on February 15, 1869. It is the state's major institution of higher learning. Its "general government" is vested by the Constitution of Nebraska in an elected board of six regents, each serving for a six-year term and each representing one of what were formerly the six congressional districts (now generally referred to as regential districts).

The University now consists of a Junior Division; ten colleges—Agriculture, Arts and Sciences, Business Administration, Dentistry, Engineering, Graduate, Law, Medicine, Pharmacy, and Teachers; four schools—Fine Arts, Social Work (graduate), Journalism, and Nursing; and the two Divisions of Conservation and Survey and University Extension. A Summer School is maintained for eight weeks each summer.

Nebraska like other states enjoys the privileges of close cooperation with the federal government. The University is recognized under provisions of the Land Grant Act of 1862 and numerous subsequent acts related thereto. Funds made available by these acts supplement state funds authorized by the Nebraska Legislature for the support of the University, and are under the supervision of the Board of Regents.

The University has attained an enviable position among the nation's most highly recognized institutions of higher learning. It holds full membership in the Association of American Universities of which there are but 33 member institutions. It is also privileged to claim membership in the Association of Land Grant Colleges, the National Association of State Universities, the Association of American Colleges, the Association of American Universities, and the North Central Association of Colleges and Secondary Schools while its various subdivisions have been equally well recognized. Students and graduates of the University are admitted to all collegiate institutions and their credits are accepted without question.

Students from no less than 46 states and some 10 foreign countries were matriculated in the University during the past year. With approximately 6,500 students of collegiate rank in full-time attendance and approximately 12,000 enrolled in all classifications, and a faculty of more than 400, the University of Nebraska ranks twenty-sixth in size in the United States and twelfth among state universities.
ADMINISTRATION

The Board of Regents

Term Expires

ROBERT W. DEVOE, Lincoln ............................................. January 1943
WILLIAM E. REED, Omaha ................................................... January 1943
FRANK M. JOHNSON, Lexington, President .......................... January 1945
STANLEY D. LONG, Grand Island ....................................... January 1945
CHARLES Y. THOMPSON, West Point .................................. January 1947
MARION A. SHAW, David City ............................................. January 1947
LORING ELLIS GUNDERSON, Lincoln, Corporation Secretary

The University

CHAUNCEY SAMUEL BOUCHER, Ph.D., LL.D., Chancellor of the University.
CHARLES WILLIAM McCORKLE POYNTER, B.Sc., M.D., Dean of the College of Medicine.
GEORGE WALTER ROSENLOF, Ph.D., Registrar, University Examiner, and Director of Admissions. (Secretary of the Faculties.)
THEOS JEFFERSON THOMPSON, Ph.D., LL.D., Dean of Student Affairs.
VERNA HYDER BOYLES, A.B., Dean of Women.

COLLEGE OF MEDICINE

Degrees of Doctor of Medicine, Bachelor of Science in Medicine, Bachelor of Science in Nursing, and Graduate Nurse.

DEPARTMENT OF ANATOMY
  J. S. Latta, Chairman

DEPARTMENT OF BIOCHEMISTRY
  S. Morgulis, Chairman

DEPARTMENT OF DERMATOLOGY AND SYPHILIOLOGY
  C. C. Tomlinson, Chairman

DEPARTMENT OF INTERNAL MEDICINE
  R. W. Bliss, Chairman

DEPARTMENT OF MEDICAL JURISPRUDENCE

DEPARTMENT OF NEURO-PSYCHIATRY
  G. A. Young Sr., Chairman

DEPARTMENT OF OBSTETRICS AND GYNECOLOGY
  E. C. Sage, Chairman

DEPARTMENT OF OPHTHALMOLOGY
  W. H. Stokes, Chairman

DEPARTMENT OF ORTHOPEDIC SURGERY
  R. D. Schrock, Chairman

DEPARTMENT OF OTORHINOLARYNGOLOGY
  W. P. Wherry, Chairman

DEPARTMENT OF PATHOLOGY AND BACTERIOLOGY
  H. E. Eggers, Chairman

DEPARTMENT OF PEDIATRICS
  J. A. Henske, Chairman

DEPARTMENT OF PHYSIOLOGY AND PHARMACOLOGY
  A. R. McIntyre, Chairman

DEPARTMENT OF RADIOLOGY AND PHYSICAL THERAPY
  H. B. Hunt, Chairman

DEPARTMENT OF SURGERY
  J. J. Keegan, Chairman

DEPARTMENT OF UROLOGY
  E. Davis, Chairman
PAYSON STONE ADAMS, B.Sc. in Med., M.D., Instructor in Urology.
JOHN FRANKLIN ALLEN, B.Sc., M.D., Professor of Clinical Medicine.
MAINE C. ANDERSEN, M.D., Assistant Professor of Medicine.
HARLEY ERIC ANDERSON, B.Sc. in Med., M.D., Instructor in Obstetrics.
CHARLES PRESTON BAKER, M.A., M.D., Instructor in Pathology and Bacteriology.
CLARENCE FREDERICK BANTIN, B.Sc., M.D., Instructor in Pediatrics.
ELMER WILLIAM BANTIN, B.Sc., M.D., Instructor in Pediatrics.
FRANCIS J. BEAN, A.B., M.D., Assistant Superintendent of Hospital and Assistant Professor of Medicine.
MEYER BEBER, Ph.D., M.D., Instructor in Internal Medicine.
ABRAM ELTING BENNETT, B.Sc., M.D., Assistant Professor of Neuro-Psychiatry.
ARTHUR LAWRENCE BENNETT, Ph.D., M.D., Professor of Physiology and Pharmacology.
GORDON NEWALL BEST, B.Sc., M.D., Instructor in Medicine.
RUSSELL ROLLAND BEST, B.Sc., M.D., Assistant Professor of Anatomy and Associate Professor of Surgery.
JAMES DEWEY BISGARD, A.B., M.D., Assistant Professor of Surgery.
RODNEY WALDO BLISS, A.B., M.D., Professor of Medicine. (Chairman of Department of Internal Medicine.)
JOHN GRIERSON BRAZER, A.B., M.D., Instructor in Medicine.
ALFRED JEROME BROWN, A.B., M.D., Professor of Surgery.
WILLIS E. BROWN, M.Sc., M.D., Assistant Professor of Obstetrics and Gynecology.
WILLIAM FREDERICK CALLFAS, C.M., M.D., Professor of Otorhinolaryngology.
OLIN JAMES CAMERON, M.S., M.D., Assistant Professor of Dermatology and Syphilology.
PAUL T. CASH, M.D., Instructor in Neuro-Psychiatry.
WALDRON ALVIN CASSIDY, A.B., M.D., Assistant Professor of Otorhinolaryngology and Consultant for Bronchoscopy.
GEORGE LEONARD CLARK, B.Sc., M.D., Instructor in Pediatrics.
MILDRED JOHNSON CLARK, M.D., Clinical Assistant in Obstetrics.
AUGUSTUS DAVID CLOYD, A.B., M.D., Instructor in Internal Medicine.
ROBERT MARSHALL COLLINS, B.Sc. in Med., M.D., Instructor in Obstetrics and Gynecology.
FRANK MATTHEW CONLIN, M.D., Professor of Clinical Medicine.
EDWIN DAVIS, B.A., M.D., Professor of Urology. (Chairman of Department.)
HERBERT HAYWOOD DAVIS, A.B., M.D., Associate Professor of Surgery.
JOHN CALVIN DAVIS JR., A.B., M.D., Assistant Professor of Otorhinolaryngology.
CARMELO DISTEFANO, B.Sc., M.D., Clinical Assistant in Urology.
FRANK LOWELL DUNN, A.M., M.D., Assistant Professor of Clinical Physiology and Associate Professor of Internal Medicine.
HAROLD EVERETT EGGERS, A.M., M.D., Professor of Pathology and Bacteriology. (Chairman of Department.)
DAVID PRESSLEY FINDLEY, B.Sc., M.D., Instructor in Obstetrics and Gynecology.
CHARLES FRANSEN, B.Sc., M.D., Instructor in Medicine.
FREDERIC D. GARRETT, Ph.D., Instructor in Anatomy.
JOHN LEO GEDGOUD, B.Sc., M.D., Assistant Professor of Pathology.
HAROLD GIFFORD JR., B.Sc. in Med., M.D., Assistant Professor of Pathology.
*ARTHUR M. GREENE, M.Sc., M.D., Instructor in Medicine.
†MANUEL GRODINSKY, B.Sc., M.D., Associate Professor of Anatomy and Associate Professor of Surgery.

* Absent on leave June 1, 1941 to May 31, 1942.
† Absent on leave September 1, 1941 to August 31, 1942.
MILLARD F. GUNDERSON, Ph.D., Associate Professor of Pathology and Bacteriology.
LYNN THOMPSON HALL, B.Sc., M.D., Professor of Clinical Medicine in Charge of Therapeutics.
WILLIAM RUDOLPH HAMSA, B.Sc., M.D., Instructor in Orthopedic Surgery.
ERNEST W. HANCOCK, A.B., M.D., Instructor in Pediatrics.
WILLIAM PORTER HANEY, M.D., Assistant Professor of Otorhinolaryngology.
LOUIS EVERETT HANISCH, B.Sc., M.D., Instructor in Surgery.
VINCENT CHARLES HASCALL, LL.B., Instructor in Medical Jurisprudence.
LYMAN HOWARD HEINE, A.B., M.D., Clinical Assistant in Otorhinolaryngology.
JOSEPH A. HENSKE, M.D., Professor of Pediatrics. (Chairman of Department.)
LLOYD OLIVER HOFFMAN, M.D., Instructor in Obstetrics and Gynecology.
EDWARD AGUSTUS HOLYOKE, Ph.D., M.D., Associate Professor of Anatomy.
HOWARD B. HUNT, A.M., M.D., Professor of Radiology and Physical Therapy. (Chairman of Department.)
HERBERT F. JACOBI, A.B., M.S., Ph.D., Instructor in Biochemistry.
HERMAN MILTON JAHR, B.Sc., M.D., Associate Professor of Pediatrics. (Secretary of Department.)
HERMAN FRANK JOHNSON, M.D., Assistant Professor of Orthopedics and Assistant Professor of Surgery in Charge of Division of Fractures.
AUGUST FREDERICK JONAS, M.D., Instructor in Surgery.
JOHN JAY KEEGAN, A.M., M.D., Professor of Neurological Surgery. (Chairman of Department of Surgery.)
ESLEY JOSEPH KIRK, A.M., M.D., Assistant Professor of Medicine, in Charge of Clinical Clerk Service.
JOHN STEPHENS LATTA, Ph.D., Professor of Anatomy. (Chairman of Department.)
JOHN DEWEY LEMAR, M.Sc., M.D., Assistant Professor of Public Health.
RAYMOND GERALD LEWIS, A.B., B.Sc., M.D., Instructor in Medicine.
JAMES S. MCAVIN, Ph.G., M.D., Instructor in Anesthesia and Radiology.
JOSEPH D. MCCARTHY, M.D., Assistant Professor of Medicine.
LEON STEINER MCGOOGAN, A.B., M.D., Assistant Professor of Obstetrics and Gynecology. (Secretary of Department.)
ARCHIBALD ROSS McINTYRE, Ph.D., M.D., Professor of Physiology and Pharmacology. (Chairman of Department.)
CHARLES WILLIAM McLAUGHLIN JR., B.Sc. in Med., M.D., Assistant Professor of Surgery.
ERNEST LYNCH MacQUIDDY, A.B., M.D., Associate Professor of Medicine.
MORRIS MARGOLIN, A.B., M.D., Instructor in Medicine.
OTIS WALLACE MARTIN, B.Sc., M.D., Instructor in Urology.
CLAUDE WILLIAM MASON, M.D., Assistant Professor of Medicine, in Charge of Tropical Medicine.
WILLSON BRIDGES MOODY, A.B., M.D., Associate Professor of Medicine.
CHARLES FRANKLIN MOON, B.Sc., M.D., Assistant Professor of Obstetrics and Gynecology.
JOHN CLYDE MOORE JR., A.B., B.Sc., M.D., Professor of Pediatrics.
HAROLD SMITH MORRISON, M.D., Instructor in Obstetrics and Gynecology.
SERGIUS MORGULIS, A.M., Ph.D., Professor of Biochemistry. (Chairman of Department.)
WILLIAM HOWARD MORRISON, B.Sc. in Med., M.D., Instructor in Ophthalmology.
PAUL NEWTON MORROW, A.B., M.D., Instructor in Pediatrics.
REUBEN ALLOY MOSER, A.B., M.D., Associate Professor of Medicine and Director of Medical Clinic at the Dispensary.
FACULTY

FLOYD JOSHUA MURRAY, B.Sc., M.D., Instructor in Surgery.
OLIVER CLARKE NICKUM, A.B., M.D., Instructor in Medicine.
FREDERICK W. NIEHAUS, B.Sc., M.D., Associate Professor of Medicine.
JOHN RUDOLPH NILSSON, M.D., Professor of Industrial Surgery.
CHARLES AUSTIN OWENS, B.Sc., M.D., Assistant Professor of Urology.
Ruth Pohle, A.B., Supervisor in Hospital Laboratory.
CHARLES WHITNEY POLLARD, A.B., M.D., Professor of Obstetrics and Gynecology, Emeritus.
JOHN BEEKMAN POTTS, M.D., Professor of Otorhinolaryngology, Emeritus.
CHARLES WILLIAM McCORKLE POYNTER, B.Sc., M.D., Dean of the College of Medicine, Professor of Anatomy, and Superintendent of University Hospital.
GEORGE PAYTON PRATT, B.Sc., M.D., Professor of Clinical Medicine.
GEORGE WINTHROP PRICHARD, A.B., M.D., Instructor in Medicine.
DANIEL THOMAS QUIGLEY, M.D., Instructor in Surgery.
ROBERT HOUSTON RASGORSHEK, M.D., Assistant Professor of Ophthalmology.
JOHN PHILBRICK REDWICK, B.Sc., M.D., Clinical Assistant in Obstetrics.
CHARLES O’NEILL RICH, B.Sc., M.D., Associate Professor of Surgery.
GEORGE EDWIN ROBERTSON, B.Sc. in Med., M.D., Assistant Professor of Pediatrics.
PHILIP L. ROMONEK, M.D., Instructor in Otorhinolaryngology.
CLARENCE RUBENDALL, B.Sc., M.D., Associate Professor of Otorhinolaryngology.
ABRAHAM SROL RUBNITZ, A.B., M.D., Assistant Professor of Medicine.
EARL CUDINGTON SAGE, B.Sc., M.D., Professor of Obstetrics and Gynecology. (Chairman of Department.)
ROBERT D. SCHROCK, A.B., M.D., Professor of Orthopedic Surgery. (Chairman of Department.)
JOHN CHARLES SHARPE, B.Sc. in Med., M.D., Instructor in Medicine and Technical Assistant in Urology and Bacteriology.
EUGENE EARL SIMMONS, B.Sc., M.D., Instructor in Medicine.
GEORGE A. SKINNER, M.D., Professor of Public Health, Emeritus.
JOHN M. SLACK, A.B., M.Sc., Instructor in Pathology and Bacteriology.
CLARENCE THOMPSON STEER, A.B., LL.B., Instructor in Medical Jurisprudence.
OLGA FRANCES STASNY, M.D., Instructor in Obstetrics and Gynecology.
ROBERT J. STEARNS, M.D., Instructor in Gynecology.
ABRAHAM A. STEINBERG, B.Sc., M.D., Instructor in Ophthalmology.
HARRY BAYLISS STOKES, M.D., Instructor in Otorhinolaryngology.
WILLIAM HERMAN STOKES, M.D., Professor of Ophthalmology. (Chairman of Department.)
WILLIS HARVEY TAYLOR, B.Sc., M.D., Professor of Clinical Obstetrics and Gynecology.
AMOS THOMAS, LL.B., Instructor in Medical Jurisprudence.
CHARLES EDWARD THOMPSON, B.Sc., M.D., Instructor in Internal Medicine.
CHESTER QUAY THOMPSON, B.Sc., M.D., Assistant Professor of Medicine.
WILLIAM HERMAN STOKES, M.D., Professor of Ophthalmology. (Chairman of Department.)
PAUL WAYNE TIPTON, B.Sc. in Med., M.D., Clinical Assistant in Orthopedic Surgery.
JAMES PERRY TOLLKIN, B.Sc., M.D., Professor of Clinical Pathology.
CHARLES CREIGHTON TOMLINSON, M.D., Professor of Dermatology and Syphilology. (Chairman of Department.)
CHARLES ARCHIBALD TOMPKINS, B.Sc. in Med., M.D., Instructor in Pediatrics.
DONALD CLAY VRROMAN, B.Sc. in Med., M.D., Instructor in Obstetrics and Gynecology.
OTIS WADE, Ph.D., Associate Professor of Zoology and Adviser to Premedical Students.
CHESTER HILL WATERS SR., B.Sc., M.D., Professor of Surgery.
CHESTER HILL WATERS JR., A.B., M.D., Instructor in Orthopedics.
JOSEPH A. WEINBERG, M.Sc., M.D., Associate Professor of Surgery.
WALTER JOSEPH WHERRY, M.D., Assistant Instructor in Otorhinolaryngology.
WILLIAM PENALUNA WHERRY, M.D., Professor of Otorhinolaryngology.
(Chairman of Department.)
HARRISON ALONZO WIGTON, B.Sc., M.D., Associate Professor of Neuro-Psychiatry.
VIOLET WILDER, Ph.D., Technician in Obstetrics and Gynecology with rank of Instructor in Biochemistry.
WILLIAM ALBERT WILLARD, Ph.D., Professor of Anatomy.
*DONALD JASPER WILSON, A.B., B.Sc., M.D., Assistant Professor of Dermatology and Syphilology.
WILLIS DEAN WRIGHT, B.Sc., M.D., Instructor in Medicine.
RAYMOND JOSEPH WYREN, A.B., M.D., Instructor in Medicine.
GEORGE ALEXANDER YOUNG SR., M.D., Professor of Neuro-Psychiatry.
(Chairman of Department.)
GEORGE ALEXANDER YOUNG JR., M.D., Instructor in Medicine.
RICHARD HARTE YOUNG, M.S., M.D., Assistant Professor of Neuro-Psychiatry.

GRADUATE ASSISTANTS: Glenn, Hermann, King, Nelson.
RESIDENTS: Malony—Obstetrics and Gynecology; Kraybill—Pathology; Neely—Radiology; Cochran and Knauff—Juniors.

Committees of the Faculty
CURRICULUM—Doctors Latta, Chairman, A. L. Bennett, Conlin, H. H. Davis.
DISPENSARY—Doctors Henske, Chairman, F. L. Dunn, McGoogan, McLaughlin.
EXECUTIVE—Chairmen of Departments.
Fever Therapy Research—Doctors A. E. Bennett, Chairman, Dunn, Owens, Simmons.
FORMULARY—Doctors Hall, Chairman, Bean, Cameron, J. C. Davis, McIntyre, C. Q. Thompson.
Graduate Studies—Doctors McIntyre, Chairman, Gunderson, Morgulis.
INTERN—Doctors Warren Thompson, Chairman, Bean, McGoogan, McLaughlin.
LIBRARY—Doctors Latta, Chairman, A. J. Brown, McIntyre, Pratt, Mr. Moe.
STAFF CLINICS—Doctors McCarthy, Chairman, H. H. Davis, Tollman.
STUDENT—Doctors Eggers, Chairman, A. L. Bennett, Bisgard, Latta, Waters, R. H. Young.
STUDENT ASSISTANCE—Doctors Willard, Chairman, A. L. Bennett, Tollman.
UNIVERSITY HOSPITAL—Doctors Hunt, Chairman, Keegan, Moore, Tollman, the Superintendent.

Administration
FRANCIS J. BEAN, A.B., M.D., Assistant Superintendent of University Hospital and Assistant Professor of Medicine.
LEAH BEDWELL, M.Sc., Associate Professor of Dietetics and Director of Dietetics.
CHARLOTTE BURGESS, R.N., Ph.B., Director of the School of Nursing and Professor of Nursing.
JOSEPHINE CHAMBERLIN, R.N., Superintendent of Dispensary.

* Absent on leave October 1, 1941 to September 30, 1942.
COLLEGE OF MEDICINE

History.—The first move for the establishment of a college of medicine in the state of Nebraska came February 15, 1869, when the Nebraska state legislature approved the formation of the University of Nebraska at Lincoln, which was to include a college of medicine. Nothing was done toward the establishment of this college until 1883, when the University of Nebraska Medical College was established at Lincoln. The legislature of 1887 withdrew its appropriation, necessitating discontinuance of the college on May 19, 1887. In 1902 the Omaha Medical College, incorporated at Omaha in 1881, entered into an agreement of affiliation with the University of Nebraska whereby the first two years of a four-year medical course would be given at Lincoln and the last two years in Omaha. By this move the college changed its name to the University of Nebraska College of Medicine and became an integral part of the State University. Since 1913 the entire four-year course has been offered at Omaha.

Standing.—Under the appropriation made by the legislature during the period since 1913, the Board of Regents has devoted more than a million and a half dollars to the erection and equipment of buildings for the Medical College. These buildings and their equipment provide for the student activities of the work of both the basic sciences and the clinical years. The University Hospital was built to provide for 250 beds in the various services organized for medical teaching.

The College of Medicine meets the requirements of the most exacting state examining and licensing boards. Its diploma grants the holder all privileges accorded to graduates of any medical college in the United States. It is a member of the Association of American Medical Colleges and has a Class A rating by the American Medical Association. It maintains the highest standards in instructional staff and content of courses.

The course of study in medicine covers four years of 36 weeks each. The first two years in medicine include those laboratory sciences which form the basis for the clinical studies of the last two years. The clinical application of laboratory subjects is emphasized and introductory clinical subjects are given in the second year. The last two years are spent largely in the study of disease in clinics of the hospital and out-patient department. The objective method is followed in laboratories and clinical instruction, with constant reference to the facts acquired from earlier laboratory work. In all courses students are encouraged to do the largest amount of individual work consistent with the discipline of the curriculum.

In the plan of instruction throughout the four years students are arranged in small groups to meet both laboratory and clinical instructors. This tends to overcome the objections which are so frequently urged by students where they are met in large classes for didactic exercises.
Admission to the College of Medicine

Credentials.—For admission to the College of Medicine, applicants must present official credentials as follows:

HIGH SCHOOL.—Graduates of accredited high schools may have full admission with 12 properly selected entrance units completed in the senior high school (grades 10, 11, 12) or with 15 entrance units on the four-year high school basis.

Six units from the senior high school shall be in the fields of English, foreign language, mathematics, natural sciences, and the social studies with a minimum of two units in English, two in mathematics (one each of algebra and geometry or an equivalent combination of general mathematics, algebra and geometry), and two in a foreign language. One unit of foreign language and one unit of mathematics completed below grade 10, while not counting toward the six units in the five fields mentioned above, may be used in fulfilling the specific requirements in these fields.

COLLEGE.—The following college subjects are required of all applicants:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemistry (4 hours of which shall be organic)</td>
<td>12</td>
</tr>
<tr>
<td>Physics</td>
<td>8</td>
</tr>
<tr>
<td>Biology</td>
<td>8</td>
</tr>
<tr>
<td>English</td>
<td>6</td>
</tr>
<tr>
<td>Electives</td>
<td>56</td>
</tr>
<tr>
<td>Total</td>
<td>90</td>
</tr>
</tbody>
</table>

The college course must include at least three years of work (90 semester hours) in an approved college of arts and sciences or university. The students are urged to elect a broad list of courses including the humanities as well as the basic sciences. This might well include sociology, psychology, history, advanced English, and a major foreign language, preferably German, to be carried through two or three years unless it has been begun in high school.

This number of hours must not include subjects such as anatomy, histology, embryology, physiology, biochemistry, medical bacteriology, nor any other subject which is taken in Medical College nor credits offered from professional schools which do not regularly receive Arts College credit.

Each student applying for admission to the College of Medicine is required to take the aptitude test as provided by the Association of American Medical Colleges, except where specifically excused by authorities of the college.

By meeting group and major and minor requirements, a degree of Bachelor of Arts or Bachelor of Science can be received on the satisfactory completion of the first year in Medical College.

Application for Admission.—Applications should be made to the Dean of the University of Nebraska College of Medicine, 42nd and Dewey avenue, Omaha, Nebraska, who will furnish a printed application blank and two character reference blanks. The latter are to be filled out preferably by a professor of zoology and a professor of chemistry. A personal interview with the dean or the Committee on Admissions is very desirable.

Applications should be submitted early in April and if presented after June 1 will be considered only at the discretion of the college. Applica-
Admissions may be presented upon completion of five semesters of premedical work, with indication of enrollment for the remaining necessary subjects during the sixth semester or summer school. A provisional acceptance will be given such a student if his record is satisfactory.

Admissions are on a selective basis, preferably being granted to residents of Nebraska. The number of admissions is limited and selection is based on character, scholarship, and promise of aptitude for the practice of medicine.

Upon receipt of notice that an applicant has been accepted for entrance to the College of Medicine, he is required to send a deposit of $25 to be applied as part payment of the tuition fee of the first term at the time of registration, or to be forfeited if the applicant fails to register in the College of Medicine by October 1. A charge of $5 may be made for evaluation of transcripts of nonresident students, such fees to be applied as part payment of tuition if applicant is accepted.

**Advanced Standing.** Application for admission to advanced standing in the second and third medical year classes will be considered only from Class A schools. Applicants for admission must furnish evidence that they have satisfactorily completed courses equivalent in kind and amount to those taken by the class to which admission is sought, and must present also a letter of honorable dismissal. The University of Nebraska College of Medicine reserves the right in every case to give examinations in any or all subjects in which credit is requested. Such examinations, however, are given only in exceptional cases.

No student coming from another school will be allowed any privileges in this school which would have been denied him in the school which he leaves.

No student will be admitted to advanced standing in any class with a delinquency in any subject; nor may he become a candidate for graduation without spending the last two years in residence.

**Credit Requirements.** In accordance with the recommendation of the Association of American Medical Colleges, the College of Medicine does not grant any time credit toward the Doctor of Medicine degree to holders of a bachelor's degree; this means that the total time spent by each student taking his medical degree must include as a minimum four years of registration in a medical college.

The granting of subject credit is at the discretion of the Committee on Credits, which may ask the chairman of any department in which credit is offered to certify as to the student's eligibility through such examination as he may reasonably impose. Admission to any class does not necessarily carry with it credit in all work previously done by the class, since the Committee on Credits has the right to demand satisfactory evidence of the completion of previous work in that subject equal to that required of the student of this College, and in case the work is not equal to such requirement the deficiency stands against the student as an "incomplete" until removed.

**Registration.** A day at the beginning of each semester is set apart for registration. To promote prompt registration, a fee of $3 is charged any student who, unless excused by the dean, seeks to register later than this day. A fee of $1 is charged for reregistration. Any change whatever in a registration once made is considered as a reregistration. No work
done in the College of Medicine may be granted credit without proper registration. Eligibility for the degree of Doctor of Medicine requires registration in eight separate semesters. No regular student is registered for less than 12 hours a semester without the dean’s permission, nor under any conditions for more than 18 hours. No student may add any subject to his schedule or drop from it any subject for which he has been regularly registered, without written permission from the dean. Students may not attend classes for which they are not registered.

Students desiring to use the work of the first two medical years for baccalaureate credit at the University of Nebraska must register in the College of Arts and Sciences until the necessary amount of college work is completed. Candidates for baccalaureate degrees in other institutions than the University of Nebraska may arrange with their colleges to accept transcripts of the work of the first two years in medicine to apply to such degrees, or otherwise satisfy the requirements of those institutions.

Class Standing and Examination.—The standing of a student in any course is determined by the instructor in charge of the subject through examinations, personal contact, and observation of routine work. The passing grade for subjects of the first and second medical years is 70 per cent and for the third and fourth medical years 75 per cent. A grade below passing constitutes a “failure.”

A course, which for a good reason has not been completed, may, if of passing grade, be marked “incomplete.” Such incomplete must be removed by the end of the first semester in which the course is again offered or it becomes a failure.

Attendance at less than 80 per cent of the scheduled lectures and recitations or 85 per cent of the scheduled laboratory and clinical hours constitutes a failure in any course and shall be so reported.

A failed subject must be absolved by reregistration in and satisfactory completion of the subject at or before the next offering in the college schedule. A reregistered subject takes precedence over all other subjects. A student who has failed twice here or elsewhere in the same subject is not eligible for registration in that subject at this college.

A student who fails to make an average of 75 per cent in all of the subjects of either the first or second medical year shall be reexamined in all of the subjects of the respective year by an examining committee before being permitted to register for the following year.

At the end of the senior year a committee examination and thesis will be required before recommendation for graduation.

Whenever at the end of any semester a student is delinquent in half or more of his registered hours, his name is automatically dropped from the rolls of the College of Medicine and his registration cancelled.

Absence or Withdrawal.—The Dean of the College of Medicine is the adviser of all students in the College of Medicine. A leave of absence for a short time may be granted a student by the dean of his college. This is merely a justification for absence and not an excuse from any work. If a student in good and honorable standing finds it necessary to withdraw from the University before the close of a semester, the dean grants him permission to do so. If he is in good standing and is not a minor he is given honorable dismissal from the University at his own request; if a minor, at the request of his parents or guardian.
Requirements for Graduation

The degree of Doctor of Medicine is granted only under the following conditions:

1. The candidate must be at least 21 years of age.
2. He must possess a good moral reputation.
3. He must have complied with all the requirements of admission.
4. He must have pursued the study of medicine for at least four years and must have passed all required courses and examinations and have received credit for at least four full years of instruction at medical colleges in good standing. The last two years must have been taken in this institution.

Combined Academic and Medical Courses

Course Leading to the Degrees of Bachelor of Arts or Bachelor of Science and Doctor of Medicine.—By completing the group requirements of the College of Arts and Sciences and two minors (or one major) and by the use of the subjects of the first year of the medical course as a major, the student is enabled to receive at the end of four years the degree of Bachelor of Arts or Bachelor of Science in the College of Arts and Sciences.

Course Leading to the Degree of Bachelor of Science in Medicine.—Students presenting premedical college credits of high standard and who have completed the first two years in medicine, the last year of which shall be in residence in this institution, but who have not fulfilled the requirements for the degree of Bachelor of Science in the College of Arts and Sciences, may become candidates for the degree of Bachelor of Science in Medicine.

Graduate Work

Graduate work of two types is offered in the College of Medicine:

1. Advanced study and research may be pursued in one or more of the laboratory departments by students holding baccalaureate degrees from this institution or from some other university or college. Such work, leading to the master's or doctor's degree, is registered for in the Graduate College and is subject to its regulations. A student may, with the consent of the Graduate College and the Dean of the College of Medicine, divide his work between the two colleges providing the general rules as to total hours of registration are not violated.

2. Research accomplished under the direct supervision of the faculty by graduates of outstanding scholarship serving in the University of Nebraska College of Medicine may lead to the degree of Doctor of Medicine cum laude. The following conditions laid down by the faculty must be complied with. The candidate should apply at least one year before he expects to come up for such degree and the subject of his study as well as an outline of the proposed work must be approved by the faculty Committee on Graduate Study. Throughout the year the candidate's investigative work should be under the supervision of two advisers named by this committee, one of whom shall be a member of the laboratory faculty, the other the chief of staff of the hospital where the candidate serves his internship. The work must represent original clinical or experimental data embodied in a typewritten thesis which should also give a
comprehensive and critical survey of the literature of the special topic under investigation. Three copies of the thesis should be submitted, one of which will be deposited in the Medical College Library, if accepted. The granting of the degree should be by unanimous vote of the faculty after the thesis, properly recommended by the advisory committee, has been accepted by the executive committee of the faculty.

Fees and Expenses

All fees must be paid to the Finance Secretary at the time of registration. No person may enroll in or attend classes or take any examination until his fees are paid. Students are urged to retain all receipts issued by University officials. The following schedule of fees will remain in force for the year 1942-43 unless changed by the Board of Regents prior to registration.

The tuition fees for the premedical years vary from $2.50 to $3 per credit hour.

</tbody>
</table>

1 For students who entered before September 1, 1939, the fee will remain $100 each semester, provided they have continuity of attendance.
No person may be recommended for a degree until he has paid all fees, including the fee for graduation.

Nonresident Students.—All students not residents of Nebraska must pay a nonresident fee, the fee charged being not less “than the fee charged to residents of Nebraska for a similar course of study in a corresponding institution by the state in which such a nonresident has his home.” This fee will not be less than $25 a semester. The exact amount will be determined when application for entrance to the University is made to the Registrar.

The following rules have been adopted by the Board of Regents:

1. In accordance with statutory provisions, all students not domiciled in Nebraska are required to pay the nonresident fees. These entering the state to attend a state school, or within one year prior to matriculation, are presumed to be nonresidents and the burden of overcoming this statutory presumption is upon them. Ordinarily this will not be satisfied by a mere declaration, while attending school, of intent to reside in Nebraska.

2. One desiring exemption shall make a verified application therefor upon a blank to be secured from the Finance Secretary’s office and approved by the committee on exemptions. All information called for by the form shall be given in full. When duly verified, the application shall be filed with the Finance Secretary.

3. Students who are charged the nonresident fee, and who claim exemption, must file their application for exemption with the Finance Secretary on or before the end of the ninth week of the semester for which the fee is charged; in the case of summer sessions, before the end of the third week of the term for which the fee is charged. For failure after due notice to file such application on said date, the fee becomes automatically assessed to the student.

4. In all cases the burden is upon the applicant to make a showing sufficient to justify the requested exemption. While personal hearings will not be granted as of right, the committee will summon the applicant for a personal interview in all cases where it is of the opinion that such an interview will aid the proper disposition of the case.

It should be noted that no provision is made for exempting students from this fee on account of financial need or of scholarship. Students coming from outside the state therefore should be prepared to pay the fee throughout their University career.

Refunds.—The matriculation fee will be refunded only when charged through an error of a University official. Registration and medical service fees will not be refunded but tuition and nonresident fees may be refunded on withdrawal in good standing from the University as follows:

<table>
<thead>
<tr>
<th>Tuition Returnable</th>
<th>All</th>
<th>75%</th>
<th>50%</th>
<th>25%</th>
<th>None</th>
</tr>

<td>1-2</td>
<td>3-6</td>
<td>7-10</td>
<td>11-14</td>
<td>15-18 weeks</td>
</tr>
</tbody>
</table>

Microscopes.—Students are required to provide suitable microscopes for their own use. Inquiries regarding specifications for microscopes as recommended by the faculty may be obtained by addressing the dean’s office.

Expenses.—Board may be obtained in the vicinity of the College campus at an average of $6 per week. Comfortable rooms for individuals cost from $10 to $15 a month. Students rooming together may obtain comfortable rooming quarters at approximately $8 per month each. The average ex-
expense of the student for a school year, including books, instruments, and all fees, is between $700 and $900. Students should provide an allowance of $75 a year for books and instruments.

Employment.—The Young Men's Christian Association offers to students in the College of Medicine special season tickets at a very small cost, granting the privileges of the Association Building. In a city the size of Omaha there are many opportunities for students to defray a part of their expenses. The College of Medicine does not, however, guarantee employment. Through the Young Men's Christian Association and other agencies, employment is obtained for a number of students.

Student Health Service

The Student Health Service, which is a part of the Department of Public Health, has as its function the protection and conservation of the health of the medical and nursing students. Periodic physical examinations are carried out and immunizations of proved worth are offered. Tuberculosis case-finding surveys are also conducted. Laboratory, x-ray, and hospital facilities are available to those who need them. Ill students may report here for examination and treatment in collaboration with the clinical staff. A student health council of senior medical students is maintained to give the students an opportunity to participate in this service and to make the contact between it and the students very close.

Laboratory Facilities

Anatomy.—The Department of Anatomy occupies the third and fourth floors of the North Laboratory Building. The rooms are well lighted and ventilated. The "unit room" system—each unit accommodating four or eight students—has been adopted as superior to that of a large common dissecting room. The state anatomical law provides ample material for dissection. In the laboratory for microscopic anatomy individual desks, lockers, reagents, etc., are at the student's command, as are also excellent collections of histological and embryological material, models, charts, etc.

Biochemistry.—This department, located on the fourth floor of the South Laboratory Building, is amply equipped with modern scientific apparatus. It also has special research laboratories equipped with calorimeter, thermostat, automatic burettes, electric stoves, etc. A balance room and rooms for combustion, calorimetric, and Kjeldahl work are among the excellent facilities of this building.

Clinical Pathology.—There are two laboratories on each floor of the hospital adjoining the wards which are equipped for all regular diagnostic laboratory tests. For clinical clerk service a central hospital laboratory is provided, in which clinical laboratory work on assigned cases is done under supervision. For tissue examination, a special laboratory is located on the ground floor of the first hospital unit, with necropsy room adjacent.

Maternal and Child Health.—The Departments of Obstetrics and Pediatrics, in cooperation with the Bureau of Maternal and Child Health of the State Department of Health, maintain a special laboratory for the detailed investigation of clinical problems. This laboratory is located on the fourth floor of the hospital building and is equipped for the special biological and chemical tests necessary for the study of patients. This laboratory also carries on a limited amount of clinical investigation under the direction of the sponsoring departments. It serves both a teaching and research function.
Pharmacology.—Experimental pharmacology occupies the second floor of the South Laboratory Building. The chemical and pharmaceutical work of the student is carried on in this laboratory. The department’s equipment includes private laboratories for experimental work.

Pathology and Bacteriology.—This department occupies the first and second floors of the North Laboratory Building, and has two large teaching laboratories for bacteriology, for general pathology of the second medical year, and for clinical and special pathology of the third medical year. Ample facilities and apparatus, with the exception of microscopes, are provided for each student.

Physiology.—The main physiology laboratory in the South Laboratory Building accommodates 40 students in each section and separate tables with lockers are provided for each pair of students. The room for mammalian experimentation accommodates 32 students. For research work and special experiments several additional rooms are available. The work shop, the instrument room, and the photographic room furnish opportunities for additional types of work.

Clinical Facilities

University Hospital.—The University Hospital forms the largest unit of the group of buildings constituting the College of Medicine. It is the center around which all the activities of the various departments are grouped, making possible a close correlation between clinical and laboratory teaching. The hospital, modern in every respect, contains floor space for 240 beds, and provides for the care of a wide variety of cases.

Patients are received from the several counties of Nebraska and are admitted on the application of a legally qualified practitioner of medicine and county official. The patient’s application certifies that he is financially unable to employ a physician. There are no private patients.

The ground floor contains an admitting department, drug room, kitchen, large and subsidiary dining rooms, pathological laboratories, necropsy amphitheater, the x-ray and physical therapy department, together with photography, and the stack room of the library. The first or main floor contains the college and hospital administration offices, finance office, medical amphitheater, reading room of the library, office of the dietitian, three medical wards, staff room, and electro cardiograph room.

The second floor provides four surgical wards similar to those on medicine, a faculty conference room, the offices of the School of Nursing, and the Department of Hospital Records. The third floor contains wards for obstetrics and gynecology, a nursery, a children’s ward, and a ward for neuro-psychiatry as well as the operating pavilion for obstetrics. On the fourth floor is situated the operating pavilion with rooms for general surgery and the surgical specialties which will accommodate large and small groups of observers, the hospital laboratory, the laboratory for clinical clerks, and interns’ quarters. Each ward is provided with a large solarium.

The control of the University Hospital rests in the Board of Regents and is administered by the College of Medicine.

University Dispensary.—The dispensary is located in the South Laboratory Building. Separate services, each having its own rooms and equipment, are provided in internal medicine; surgery; eye, ear, nose, and throat; pediatrics; gynecology; obstetrics; neurology; dermatology; and genito-urinary diseases. There is also an out-call service which pro-
vides medical treatment in the homes, and in its problems cooperates
with the Visiting Nurses' Association and other charitable agencies of the
city. These activities are organized for the teaching of the senior students
and furnish a wide diversity of diseases for observation and care by them
during the last year.

**Extramural Hospitals.**— Clarkson, Douglas County, Lutheran, Immanuel,
Methodist, and City Emergency hospitals are available for regular or
special clinics as needed. Members of the University faculty are on the
staffs of all these hospitals.

**Hospital Appointments.**—Graduates of the College of Medicine are
afforded a wide choice in the selection of internships. Approximately 30
internships are available in the Omaha hospitals.

### Library and Museum Facilities

**College of Medicine Library.**—The college library is located in a wing
of the Hospital Building and within easy access from the various lab-
atories, and stands as a vital, common interest to the laboratory and
clinical branches of medical instruction. The spacious reading and
seminar rooms furnish a most congenial place for students and faculty
to work. Accessions, cataloging, and indexing are in charge of a com-
petent, expert librarian. The 45,000 bound volumes and 21,000 unbound
pamphlets, reprints, and theses are the result of purchases and acquisi-
tions extending over more than half a century and represent the mature
judgment, as to valuable medical literature, of many specialists. There
has thus been built up, not only a very valuable research library, but one
which offers students abundant opportunities for additional reading and
study. More than 400 standard scientific periodicals are on the regular
subscription list.

Incidental to its ordinary functions, the library has in recent years laid
emphasis on the acquisition of material of historic interest, including
pictures of great medical men, biographies, histories, and surgical instru-
ments. It also keeps a file of reprints from the writings of Nebraska
medical authors. Incorporated within the library of the College of Med-
icine are 2,000 volumes of the Omaha-Douglas County Medical Society,
periodicals of the Nebraska State Medical Society, and private medical
libraries of former practitioners of the state.

**University Library.**—In Lincoln, the University Library, containing
375,000 volumes is freely accessible to students and faculty in Omaha.
Books may be withdrawn at any time upon demand. Likewise through
the Medical College librarian it is possible for short periods to draw upon
the resources of the John Crerar Library of Chicago or the Surgeon
General's Library at Washington. The State Library of 110,000 volumes
at the State Capitol and the Nebraska State Historical Society Library
of 25,000 volumes include valuable medical works in certain lines; series
of public documents such as reports of state boards of health and of state
hospitals and other institutions.

**Museum.**—The pathological museum of the College of Medicine con-
tains about 5,000 specimens. Nearly every variety of pathological lesion
is represented and the constant addition of fresh material from the large
number of autopsies performed continually adds to its interest. In addi-
tion to the gross specimens are thousands of microscopic sections and a
large collection of wax reproductions of various lesions. A man tech-
nically trained in museum preparation is in charge of this museum. The museum is an important and necessary adjunct to the teaching of pathology and of clinical medicine.

The anatomical museum consisting of models, charts, and mounted specimens is housed in the quarters of the department of anatomy, where it is readily accessible to the students of the department.

**Scholarships and Loan Funds**

**Scholarships and Fellowships.**—Scholarships are awarded in the various departments in return for student assistance. Applications should be made to the chairman of departments.

Fellowships are available to students who qualify for graduate study and research in the medical sciences. Application should be made to the chairman of departments.

**Jetur Riggs Conkling and Jennie Hanscom Conkling Foundation.**—The will of the late Clementine C. Conkling provides for the creation of a trust to be known as the “Jetur Riggs Conkling and Jennie Hanscom Conkling Foundation,” the income of which shall be used by the Regents of the University of Nebraska in providing scholarship loans for deserving medical students. Scholarship loans may be awarded only after the close of the students’ first year in the Medical College.

Under the stipulations of the trust, students who have completed the freshman medical year in good standing may apply for a scholarship loan. Scholarship loans will not exceed the sum of $200 per year. Applications should be addressed to the dean.

**Omaha Medical College Foundation.**—This foundation, created in April 1921, was established largely through contributions received from former professors in the Omaha Medical College. The object of the foundation is to promote the study of medicine and to provide for medical research in the University of Nebraska College of Medicine and to assist worthy students by scholarships and loans. The total in this fund exceeds $15,000. Only the income may be disbursed. Students applying for benefits under this fund should file a written application with the dean.

**Nebraska Federation of Women’s Clubs Scholarship Loan.**—An annual grant of $200 is made for a loan to a student in the College of Medicine, on the basis of scholarship and financial need.

**Student and Alumni Organizations**

**Alumni Association.**—Alumni of the University of Nebraska College of Medicine maintain an active organization with headquarters in Omaha. The association numbers about 2000 members.

**Premedical Society.**—A large premedical society has existed for a number of years among the students in the premedical courses at Lincoln. This society meets monthly for an informal evening and to hear addresses by members of the faculty.

A Saturday in May is set aside each year as Premedic Day for a visit to the Omaha campus.

**Public Service**

**Public Health.**—The College of Medicine stands ready to supply expert advice in cooperation with the state and local departments of health on the general health conditions within the state. Members of the faculty of the College of Medicine will respond whenever possible for addresses
on medical subjects of general interest. These addresses are available for teachers' associations, women's club meetings, and the like.

**Medical Curriculum**

**Departmental Hours.**—The course of study outlined is constructed in accordance with the recommendations of the Council on Medical Education of the American Medical Association and of the Association of American Medical Colleges. The experience of the best medical colleges of the country has been freely utilized. The University Hospital and Dispensary on the Medical College campus furnish ideal opportunities for bedside clinical instruction in close relation to the scientific departments of the college.

Courses of Instruction

In the following departments, courses numbered 1a, b, c, etc., are given in the first medical year; courses numbered 2a, b, c, etc., in the second medical year; courses numbered 3a, b, c, etc., in the third medical year; courses numbered 4a, b, c, etc., in the fourth medical year. Courses numbered 300 carry graduate credit. Roman I indicates courses offered the first semester and II, the second semester.

Anatomy

Professors Latta, Chairman, Poynter, Willard; Associate Professors Grodinsky, Holyoke; Assistant Professor R. R. Best; Instructor Garrett; Graduate Assistants.

In this department instruction is given in gross anatomy, histology, organology, embryology, and neurology. The work of the department extends through the first medical year.

All instruction is based on laboratory work carried out under the supervision of the staff. Lectures covering subjects of broad morphological significance are given before the entire class, but for the discussion of details, in conjunction with laboratory work, the class is subdivided into small groups. Every effort is made to correlate the work in gross and microscopic anatomy.

1. Anatomy...
   (a) Gross—Dissection of Upper Extremity.—Total 102 hours, second eight weeks. I.
   (b) Gross—Dissection of Head and Neck.—Total 120 hours. II.
   (c) Gross—Dissection of Torso.—Total 121 hours. II.
   (d) Gross—Dissection of Peritoneum and Lower Extremity.—Total 90 hours. I I.

The above courses cover dissection of the entire body. This work is carried out in groups of four, each group being assigned a separate room. From time to time table demonstrations and quizzes are required. Through this table teaching the student's proficiency is increased and calibration of individual progress is made possible.

*(e) EMBRYOLOGY-HISTOLOGY.—A brief survey of the fundamental facts of vertebrate development as based on chick, pig, and human embryos is first undertaken. This is followed by a study of the histogenesis of the fundamental tissues leading directly to their adult histological structure. Morphogenesis and histogenesis of the various organ systems of the body, excepting the nervous system which is studied independently, are similarly correlated with their adult histological and gross structure and with the relationships shown in gross anatomy. Special emphasis is placed on the study of the blood and blood-forming organs and the organs classified as endocrine which are studied somewhat independently. Total 208 hours. I.

(f) EMBRYOLOGY-HISTOLOGY. —Anatomy 1(e) continued. Total 90 hours, first eight weeks. II.

†(g) NEURO-ANATOMY.—The gross and microscopic anatomy of the nervous system including sense organs. Study is made of the human brain by means of gross dissection; gross and microscopic sections; gross and microscopic study of the eye, and other sense organs by specially prepared demonstrations. Text and lectures aim to integrate the details of laboratory study into functional systems applicable to later physiological and clinical studies. Lectures and laboratory. Total 114 hours. II.

Anatomy, Elective.

300. RESEARCH.—Facilities are available for research on special problems within the field of the department, such work leading to graduate degrees under the rules of the Graduate College of the University.

301. SEMINAR.—Literature reviews and reports of progress of research in the special fields of investigation conducted by graduate students.

* Formerly (e) and (f).
† Formerly (h).
Biochemistry

Professor Morgulis, Chairman; Instructor Jacobi; Graduate Assistant

The aim of the instruction in biochemistry is to acquaint the student with the elementary facts of this science with special reference to their application to the problems of clinical medicine. Much stress is laid on training in the necessary technical and the laboratory work affords the students ample opportunity to learn the theory and practice of various biochemical methods.

To further supplement the elementary instruction advanced courses of study are offered to meet the needs of those who desire to extend their study and research in the application of the principles and methods of biochemistry to problems of both clinical and scientific medicine.

The courses given in the Department of Biochemistry presuppose preparation in inorganic, organic, and in analytical chemistry, and are designed: (1) to give fundamental training in physiological chemistry as required in the regular curriculum of the medical student; (2) to afford students, not candidates for the degree of Doctor of Medicine, the means for obtaining the necessary credits for the degrees of Master of Arts and Doctor of Philosophy; (3) to extend the facilities of the laboratory for special work in selected topics to physicians and students independently of the requirements for a degree. All students who are candidates for a degree are expected to attend Course 2, unless the content of this course has been covered in an acceptable manner elsewhere.

2. Biological Chemistry.—

(a) Physical Chemistry.—In this course various physiological and pathological problems are studied from the point of view of the principles of physical chemistry. Total 84 hours. First six weeks; 5 lectures and 9 hours laboratory per week. I.

(b) Biological Chemistry.—Biochemistry 2a continued and covering: (a) descriptive biochemistry, dealing with the composition of biological materials; (b) dynamic biochemistry, dealing with the action of enzymes, metabolism, dietetics, urine secretion. Various methods for blood and urine analysis are taken up in the practical work of this course, and metabolism experiments carried out by the students constitute an important feature of the laboratory experience. Total 154 hours. Remaining 11 weeks; 5 lectures and 9 hours laboratory per week. I.

Biological Chemistry, Elective.—

300. Research.—Subjects for investigation and hours to be arranged individually.

301. Seminar.—Literature reviews and reports of progress of research in the special fields of investigation conducted by graduate students.

Dermatology and Syphilology

Professor Tomlinson, Chairman; Assistant Professors Cameron, D. J. Wilson

A thorough foundation in dermatology and syphilology is laid by lectures, quizzes, and demonstrations. At the University Dispensary the students are brought in personal contact with patients whom they observe throughout their entire care under the supervision of the attending physician. A large and carefully selected collection of plates and photographs is available for lantern use.

3a. Dermatology.—General classification of skin diseases, with lectures and quizzes on anatomy, histology, physiology, pathology, general symptomatology, etiology, diagnosis and treatment. 1 hour weekly. Total 17 hours. II.

4. Dermatology and Syphilology.—

(a) Dispensary Clinic.—Lectures and clinics supplementary to Derm. 3, with emphasis placed on the diagnosis and treatment of the more common dermatoses. Demonstration of the various clinical manifestations of syphilis, with discussion of diagnosis and principles of treatment. 1 hour weekly. Total 34 hours. I, II.

(b) Dispensary.—Two weekly 2-hour clinics are held at the University Dispensary. Fourth-year students are assigned to these clinics for practical experience in the diagnosis of skin diseases and the treatment of syphilis. 4 hours weekly. Total 20 hours. I, II.
Internal Medicine

Professors Bliss, Chairman, Allen, Conlin, Hall, Pratt, Skinner, Emeritus; Associate Professors F. L. Dunn, MacQuiddy, Moody, Moser, Niehaus, W. Thompson; Assistant Professors M. C. Andersen, Bean, Kirk, McCarthy, Mason, Rubnitz, C. Q. Thompson; Instructors Beber, G. N. Best, Brazer, Cloyd, Frandsen, Greene, Lewis, Margolin, Nickum, Pritchard, Sharpe, Simmons, C. E. Thompson, Wright, Wyrens, G. A. Young Jr.

2. Internal Medicine.—
(a) History of Medicine.—The outstanding characters and their contributions to medicine in relation to our present concepts of the practice of medicine as a whole. 17 hours. I.
(b) History Taking and Physical Examination.—Examination of the complete body by the use of the special senses and a minimum of apparatus. In the latter part of the course clinical cases are studied. 1 hour lecture, 2 hours demonstration and practice in groups. Total 51 hours. II.
(c) Symptomatology.—Lecture and quiz course. The essential principles of medicine, the physiology and clinical interpretation of some of the more common symptoms. Total 17 hours. II.

3. Internal Medicine—
(a) Physical Diagnosis.—Presentation of clinical cases from the standpoint of pure observation without the aid of laboratory procedures or mechanical test other than the stethoscope and the blood pressure apparatus with consideration given to the matter of constitutional characteristics of the patient. Total 34 hours. I.
(b) Fundamentals of Medicine.—This course consists of a series of special lectures on important subjects of medicine, combined with small group quiz sections on textbook assignments. One lecture and two quizzes weekly. Total 102 hours. I, II.
(c) Clinical Clerk.—Assignment to clinical cases in the hospital for complete history, physical examination, laboratory tests, progress notes, and presentation at regular staff rounds and clinics. Two groups of 10 students each are assigned to the University Hospital and County Hospital for a period of 9 weeks, 7 hours weekly. Total 63 hours. I, II.
(d) Hospital and Dispensary Clinic.—Presentation of selected cases to illustrate diagnosis and treatment with particular emphasis on tuberculosis and nutrition. 68 hours. I, II.
(e) Therapeutics.—Emphasizing treatment in internal medicine with clinical demonstrations of the use of drugs and other therapeutic measures. 1 hour weekly. Total 17 hours. II.

4. Internal Medicine—
(a) Dispensary.—Regular assignment to dispensary clinic, where senior students are given assignment and responsibility in the diagnosis and treatment of ambulant patients of the type seen in the office. 8 hours weekly. Total 96 hours. I, II.
(b) Out-Call.—Fourth-year students are assigned to answer calls requiring a visit to the homes, when the patients are unable to attend the dispensary. Daily supervision is maintained and home visits are made by the attending staff on all difficult or serious cases. 16 hours weekly. Total 128 hours. I, II.
(c) Hospital Clinic.—Presentation of selected cases from the hospital service. 2 hours weekly. Total 68 hours. I, II.
(d) Diagnostic Problems.—The medical, surgical and personality features of the more common disease entities are discussed in hospital cases, the aim being to instruct the student to consider the clinical case from a broader and more comprehensive aspect. 17 hours. I.
(e) Tropical Medicine.—Distribution, etiology, diagnosis, and treatment of such tropical diseases as are of practical importance to American physicians. The epidemiology and epidemiology of such diseases with the general and special sanitary measures adapted to the prevention, control, and suppression of the same. 1 hour weekly. Total 17 hours. II.
(f) Medical Review.—Review of medicine based upon current literature and systematic presentation of diseases. Reference reading assignments and abstracting of recent articles. 2 hour weekly. Total 17 hours. II.
(g) Therapeutics.—Continuation of Inter.Med. 3e. 1 hour weekly. Total 17 hours. I.
(h) Health Examinations.—Health examinations and compensation medicine, in
which a study is made of forms pertaining to health used in various government agencies. 17 hours.

Medical Jurisprudence
Instructors Thomas, Hascall, Spier

4. Medical Jurisprudence.—The course in medical jurisprudence has for its purpose the presentation of medico-legal relationships in order that the student may be familiar with that increasingly pertinent phase of professional life and practice. This course is a comprehensive survey of the medico-legal field and a detailed analysis and study of that science which applies the principles and practice of medicine to the elucidation and settlement of legal questions which arise in everyday professional practice as well as in courts of law.

Physicians' contracts, general medico-legal relations, identity and survivorship, medical legislation, expert testimony, privileged communications, malpractice, and the physician's status on quasi-judicial commissions and boards are some of the subjects discussed. Total 17 hours.

Neuro-Psychiatry

Professor G. A. Young Sr., Chairman; Associate Professor Wigton; Assistant Professors A. E. Bennett, R. H. Young; Instructor Cash.

The course in nervous and mental diseases which extends throughout the third and fourth medical years aims primarily at giving the student the ability to make a comprehensive neurologic or psychiatric examination of any patient. This is held to be of essential importance and implies a working knowledge of the anatomy and physiology of the nervous system and of the symptoms resulting from pathological conditions affecting the principal centers and tracts. Secondly, through the rich clinical material of the University Hospital and of the psychiatric ward of both the University Hospital and the Douglas County Hospital, it gives ample opportunity for first-hand contact with cases illustrative of the chief types of organic and functional nervous diseases and of the psychoses.

2. Neuro-Psychiatry.—
(a) PSYCHOBIOLOGY. — Lectures on psychobiology, an introduction to psychiatry. 1 hour weekly. Total 17 hours.

3. Neuro-Psychiatry.—
(b) PSYCHIATRY. — Lectures and clinical demonstrations covering the field of psychiatry. Total 17 hours.
(c) NEUROLOGY. — Lectures and quiz-lectures covering methods of case taking, etiology, pathology, symptomatology, and treatment of the organic and functional nervous diseases. Total 17 hours.
(d) CLINICAL CLERK. — Cases from the University Hospital and Douglas County Hospital neuro-psychiatric departments are assigned to third-year students for complete case study and presentation before clinics. 6 hours weekly. Total 24 hours.

4. Neuro-Psychiatry.—
(a) HOSPITAL CLINIC. — In this clinic, cases of neurologic and psychiatric types are presented for the purpose of demonstrating the main forms of neurologic and psychiatric disorders and to allow a discussion of their treatment and their relations to the field of general medicine. 2 hours weekly. Total 68 hours.
(b) DISPENSARY. — Clinics are held at the dispensary to which fourth-year students are assigned for practical work in the diagnosis and treatment of ambulant patients. A special clinic is held on the subnormal child. 4 hours weekly. Total 16 hours.

Obstetrics and Gynecology

Professors Sage, Chairman, Pollard, Emeritus, Taylor; Assistant Professors W. E. Brown, McGoogan, Secretary, Moon; Instructors Anderson, Collins, Findley, Hoffman, Morgan, Statnay, Stearns, Vroman; Clinical Assistants M. J. Clark, Redgwick.

The instruction in obstetrics and gynecology consists largely of practical demonstrations in the University Hospital, the dispensary, and the out-call service. In these clinics the student is trained in clinical diagnosis and treatment. The University Hospital affords abundant opportunity for the assignment of obstetric cases to members of the third-year medical class under direction. The prenatal clinic at the
dispensary provides an excellent opportunity for both third- and fourth-year students to learn the proper care of the expectant mother. After a didactic review of the principles of obstetrics, the junior student is assigned to serve as assistant to the intern or house officer in the care of a patient during labor. He is next assigned the responsibility of a patient in the home delivery suite. This unit serves to familiarize the student with home conditions yet does not divorce him from the ready consultation and assistance of the hospital staff. During the fourth year the medical students carry on the out-call home delivery service under direct supervision of a member of the obstetric staff. Complete written reports of all cases attended are required and each student must have a record of 12 cases of confinement before graduation.

2. Obstetrics and Gynecology.—
(a) PHYSIOLOGY OF PREGNANCY.—Anatomy and physiology of the female genital organs in their relation to normal pregnancy, labor, and the puerperium. Physiology and care of the newborn child. 2 hours weekly. Total 34 hours. II.

3. Obstetrics and Gynecology.—
(b) PATHOLOGY OF PREGNANCY.—Abnormalities and complications of pregnancy, labor, puerperium, and the newborn child. 2 hours weekly. Total 68 hours. I, II.
(c) CLINICAL CLERK.—A third-year student is assigned to each obstetric case entering the University Hospital and is required to follow the progress of labor, assist at delivery, and maintain a complete record until discharge from the hospital. Six such case records are required. As a correlation of maneuvers observed on actual cases in the delivery rooms, 2 hours weekly are used in practice on the manikin. 6 hours weekly. Total 24 hours. I, II.
(d) GYNECOLOGY.—Surgical conditions affecting pregnancy and the postpartum period. Lacerations, infections, relaxations, malposition, and tumors affecting the uterus. 1 hour weekly, lecture or clinic. Total 34 hours. I, II.

4. Obstetrics and Gynecology.—
(a) DISPENSARY.—Fourth-year students are assigned to the dispensary prenatal clinic and the gynecology clinic, where they assist in prenatal care and gynecologic examination and treatment. 10 hours weekly. Total 36 hours. I, II.
(b) OUT-CALL DELIVERIES.—Two fourth-year students are assigned to each home delivery. Their work is carefully supervised by a member of the staff, and they are assisted in the home by a competent nurse. Each case is carefully followed during the postnatal period and a final report submitted. Six deliveries are required of each student. Approximate total time 24 hours.
(c) HOSPITAL CLINIC.—This course covers pathological conditions arising from or related to the puerperium. Total 34 hours. I, II.
(d) PRACTICAL GYNECOLOGY.—A complete concise course in practical gynecology for general practice which covers a discussion of the more commonly found conditions and stresses different forms of treatment and the relative merits of each. 17 hours. II.

Ophthalmology

Professor W. H. Stokes, Chairman; Associate Professor Judd; Assistant Professors Gifford, Rasgorshek; Instructors Morrison, Steinberg.

3. Ophthalmology.—
(a) MEDICAL OPHTHALMOLOGY.—The didactic course consists of demonstrations and lectures on diseases of the eye, including ocular changes in general diseases. The lectures are illustrated by cases, diagrams, charts and slides. The course is supplemented by textbook work and quizzes. 1 hour weekly. Total 17 hours. II.
(b) CLINICAL CLERK.

4. Ophthalmology.—
(a) DISPENSARY.—Students are regularly assigned to the dispensary clinic for practical experience in the diagnosis and treatment of eye conditions. This course includes a drill in the principal uses of the ophthalmoscope and other instruments employed in the diagnosis of diseases of the eye. 8 hours weekly. Total 32 hours. I, II.

Orthopedic Surgery

Professor Schrock, Chairman; Assistant Professor Johnson; Instructors Hamsa, C.H. Waters Jr.; Clinical Assistant Tipton.
3. Orthopedic Surgery.—
   (a) Lecture Clinic.—Disease of bones and joints, synovial membranes and bursae. Congenital, acquired, and disease-producing deformities. Prevention of deformities and dystrophies with principles of treatment. Illustrated by photographs, slides, etc. 1 hour weekly. Total 17 hours. II.
   (b) Clinical Clerk.—Students are assigned to hospital cases for complete history, physical examinations, and progress notes. Total 9 hours. I, II.

4. Orthopedic Surgery.—
   (a) Dispensary.—Two weekly 2-hour clinics are held at the dispensary, to which fourth-year students are assigned for practical work in the diagnosis and treatment of orthopedic cases. 4 hours weekly. Total 8 hours. I, II.
   Orthopedic Surgery, Electives.—
   300. Research.—Work for specially qualified students on problems in special fields of investigation.
   301. Seminar.—Literature reviews and reports of progress of research in special fields of investigation.

Otorhinolaryngology

Professors W. F. Wherry, Chairman, Callias, Emeritus, Potts, Emeritus; Associate Professor Rubendall; Assistant Professors Cassidy, J. C. Davis, Haney; Instructors Romonek, H. B. Stokes; Assistant Instructor W. J. Wherry; Clinical Assistant Heine.

3. Otorhinolaryngology.—
   (a) Diseases of Ear, Nose, Throat, and Larynx.—Use of head mirror taught in normal conditions. Student familiarized with different appearances of ear drums and conditions underlying them. Common diseases of ear and mastoid. Principles of functional examination of ear. Physiology, general principles of pathology, diagnosis, and treatment of the more frequent diseases of the nose, throat, and larynx. 1 hour weekly. Total 17 hours. II.
   (b) Clinical Clerk.—Third-year students are assigned to University Hospital cases for complete history, physical examinations, and progress notes. Total 6 hours. I, II.

4. Otorhinolaryngology.—
   (a) Dispensary.—Clinics are held twice weekly at the University Dispensary. Fourth-year students are regularly assigned for practical work in the diagnosis and treatment of ear, nose, and throat diseases. Conferences are held regularly during these hours. 6 hours weekly. Total 24 hours. I, II.

Pathology and Bacteriology

Professors Eggers, Chairman, Tollman; Associate Professors Gunderson, Weinberg; Assistant Professor LeMar; Instructors Baker, Slack; Resident Kraybill; Graduate Assistants.

It is the aim of this department to acquaint the student with the material changes which cause, or are caused, by disease, including, in bacteriology, a study of the character and host relationships of disease-causing microorganisms, and, in clinical pathology, a study of laboratory methods as related to diagnosis.

1. Bacteriology.—
   (a) Medical Bacteriology.—Lecture and laboratory course on the cultural characteristics, pathogenic properties, etc., of bacteria in general, with special reference to those of importance in disease. Total 184 hours. I.

2. Pathology.—
   (a) General Pathology.—Lecture and laboratory course on the study of general disease processes. It comprises a study of the general principles of pathology; a study of disease processes in detail, in classroom and laboratory. 119 hours laboratory, 65 hours class work. Total 204 hours. II.

CLINICAL PATHOLOGY

The aim of these courses is to emphasize the application of pathological principles to the study of clinical patients. This is accomplished through lectures which emphasize correlation of pathology and symptomatology, and by the teaching of laboratory methods which are in general use in the study of patients. Detailed discussion of
the cases assigned in the clinical clerk services gives particularized application for
the individual students. Experience in laboratory procedures is continued by dis-

dispensary assignments in the senior year amounting to about 30 hours.

3. Clinical Pathology.—
(b) Clinical Pathology.—Systemic disease, with emphasis on correlation of pathol-

ogy and symptoms. Case history method is used, with presentation of gross and

microscopic pathology. 9 hours weekly. 51 hours lecture, 102 hours laboratory. Total

153 hours. I.

(c) Hospital Laboratory.—Regular assignment on clinical clerk service for prac-
tical work in laboratory diagnostic tests under supervision. 8 hours weekly. Total

32 hours. I, II.

4. Pathology.—
(a) Necropsies.—Fourth-year students are assigned to necropsies in succession for
detailed study and analysis, with presentation to the class in which interpretation of
symptoms and findings and a review of pertinent literature is emphasized. Total 68
hours. I, II.

PUBLIC HEALTH

Instruction in public health is given to third and fourth-year students. These
courses aim at giving the students a sound understanding of the principles of disease
prevention and health maintenance and of giving them practical experience in the

dispensary and in the field. Special emphasis is laid on the growing responsibilities
of the physician in this toward his patients and the public at large.

3. Public Health.—
(a) Hygiene.—The relationship between water, food, air, soil, waste disposal, etc.,

and the development of disease in both urban and rural conditions. Reports of in-

spection of industrial and public service plants and methods. Total 34 hours. II.

(b) Public Health Administration.—Medical practice in relation to public health

agencies, social histories, environment and disease, special methods of preventive

medicine, as quarantine, immunization, and disinfection. 2 hours weekly. Total 34

hours. I.

Pathology and Bacteriology, Electives.—

300. Research.—Work for specially qualified students, either in advanced laboratory

procedure or in special problems.

301. Seminar.—Literature reviews and reports of progress of research in the special

fields of investigation conducted by graduate students.

Pediatrics

Professors Henske, Chairman, Moore; Associate Professor Jahr, Secretary; Assistant

Professors Gedgoud, Robertson; Instructors C. F. Bantin, E. W. Bantin, G. L. Clark,

Hancock, Klokk, Morrow, Tompkins.

2. Pediatrics.—
(a) Growth and Development.—Diseases of newborn. Lectures and clinic. 1 hour

weekly. Total 17 hours. II.

3. Pediatrics.—
(b) Infant Nutrition.—Infant feeding, deficiency diseases, disorders of metabolism.

2 hours weekly. Total 34 hours. I.

(c) Communicable Diseases.—Lectures and clinics when cases are available. 1 hour

weekly. Total 17 hours. II.

(d) Clinical Clerk.—Students are assigned to University Hospital cases for com-

plete history, physical and laboratory examinations, with requirement of progress

notes and presentation at staff rounds and clinics. 6 hours weekly. Total 24 hours.

I, II.

4. Pediatrics.—
(a) General Pediatrics.—Clinics and lectures on all aspects of pediatrics, utilizing

clinical material within the hospital and out-patient departments. Behavior problems.

1 hour weekly. Total 34 hours. I, II.
(b) Dispensary and Out-Call.—Four weekly 2-hour clinics are held at the dispensary to which fourth-year students are assigned for practical work in the diagnosis and treatment of ambulant cases. All children enter the dispensary through the pediatric clinics. Special clinics utilizing postnatal cases, tuberculosis cases, and rheumatic heart cases are held each week. Home visits to pediatric patients unable to attend dispensary. Supervision by staff members. 10 hours weekly. Total 40 hours.

Physiology and Pharmacology

Professors McIntyre, Chairman, A. L. Bennett; Assistant Professor Dunn; Graduate Assistants.

The general courses in physiology and pharmacology stress the fundamental principles underlying living processes. The experimental evidence for present theories is examined and the application of these concepts to the study of abnormal physiology and to pharmacology is emphasized. Special instruction is provided in advanced physiology and pharmacology for students seeking higher degrees.

2. Physiology and Pharmacology.—
(a) Physiology General Course.—Muscle and nerve, central nervous system, circulation, digestion, metabolism, and special senses. Lectures, demonstrations, and conferences. Total 85 hours. I.

(b) Physiology Laboratory Course.—Practical course in conjunction with Physiol. and Pharmacol. 2a. Total 136 hours. I.

(c) Physiology and Pharmacology General Course.—Physiology of the kidney; physiology of the autonomic nervous system; physiology of the action of drugs; endocrinology; the vitamins; and prescription writing. Lectures, demonstrations, and conferences. Total 85 hours. II.

(d) Physiology and Pharmacology Laboratory Course.—Practical course in conjunction with Physiol. and Pharmacol. 2c. Total 136 hours. II.

Physiology and Pharmacology, Electives.—
300. Research.—By arrangement with the chairman, Associate Professor Bennett, and Assistant Professor Dunn.

301. Seminar.—Literature reviews and reports of progress of research in the special fields of investigation conducted by graduate students and research workers and fellows.

Radiology and Physical Therapy

Professor Hunt, Chairman; Instructor McAvin; Resident Neely; Nurse Neff.

The principles of radiology and physical therapy are presented during the second semester of the second medical year and first semester of third medical year by means of lectures, demonstrations, and conferences. The application and clinical correlation of roentgenologic studies are presented during the third medical year in connection with the clinical clerkship. A weekly tumor clinic is conducted in the department by the tumor study group which provides correlation of clinical manifestations, histopathology, and treatment in the case of individual tumor cases assigned to students in the clinical clerk service.

2. Radiology and Physical Therapy.—
(a) Principles of Roentgenological Diagnosis.—1 hour weekly. Total 17 hours. II.

3. Radiology and Physical Therapy.—
(b) Principles of Radiotherapy and Physical Therapy.—1 hour weekly. Total 17 hours. I.

4. Radiology and Physical Therapy, Electives.—
300. Research.—Facilities are available for research in radiobiology and clinical radiology.

301. Seminar.—Literature reviews and reports of progress of research in the special fields of investigation.
Surgery

Professors Keegan, Chairman, A. J. Brown, Nilsson, Shearer, C. H. Waters Sr.; Associate Professors R. R. Best, H. H. Davis, Grodinsky, Rich, Weinberg; Assistant Professors Bisgard, Johnson, McLaughlin; Instructors Hanisch, Jonas, McAvin, Murray, Quigley.

The courses in surgery aim to give the student a thorough understanding of the principles of surgical pathology, surgical diagnosis, surgical indications and treatment, and do not attempt, in the undergraduate courses, instruction in major surgical operative technic. Minor surgical technic is taught in the clinical clerk service and dispensary, including numerous practical exercises in surgical asepsis. It is intended that the intern service prepare the student to perform such operations as would come to the practitioner as emergencies or in the course of general work. Preparation for the practice of general surgery requires additional postgraduate work as a resident or assistant in surgery.

3. Surgery.—

(a) Fundamentals of Surgery.—A series of special lectures on important subjects of surgery, supplementary to the text. 2 hours weekly. Total 68 hours. I, II.

(b) Clinical Clerk.—Students are assigned to University Hospital cases for complete history, physical and laboratory examinations, with requirement of progress notes and presentation at staff rounds and clinics. 6 hours weekly. Total 24 hours. I, II.

(c) Clinics.—University Hospital. Presentation of selected cases to illustrate current lectures and textbook assignments. Practical experience in anesthesia and surgical asepsis. 1 hour weekly. Total 34 hours. I, II.

(d) Surgical Technic.—Bandaging, dressings, drains, sutures, closure of wounds. Local anesthesia. Total 17 hours. II.

4. Surgery.—

(a) Dispensary.—Regular assignment to dispensary clinics where students are given practical experience in the diagnosis and treatment of ambulant patients. 8 hours weekly. Total 32 hours. I, II.

(b) Hospital and Dispensary Clinic.—Presentation of selected cases to illustrate surgical diagnosis, operative indications, and postoperative care. Surgery of Trauma which includes lectures and clinical demonstrations of accidental and industrial injuries to various regions of the body, first aid, shock and regional treatment, medicolegal aspects. 2 hours weekly. Total 68 hours. I, II.

(c) Clinical Anatomy.—Clinical aspects of regional and systemic anatomy by means of lantern slides and lectures. 1 hour weekly. Total 17 hours. I.

(d) Fractures and Dislocations.—Lecture, quiz, and demonstration course on fractures and dislocations. X-ray diagnosis with application of splints and casts. 1 hour weekly. Total 34 hours. I, II.

Surgery, Electives.—

300. Research.—Work for specially qualified students on problems in special fields of investigation.

301. Seminar.—Literature reviews and reports of progress of research in special fields of investigation.

Urology

Professor Edwin Davis, Chairman; Assistant Professor Owens; Instructors Adams, Martin; Clinical Assistant Distefano.

3. Urology.—

(a) Fundamentals of Urology.—Lectures and clinics on diseases of the urogenital system. 1 hour weekly. Total 17 hours. II.

(b) Clinical Clerk.—Students are assigned to University Hospital cases for complete case study. Total 6 hours. I, II.

4. Urology.—

(a) Dispensary.—Two clinics are held each week to which students are assigned for practical experience in the diagnosis and treatment of urogenital diseases. 4 hours weekly. Total 12 hours. I, II.

Hansen, Karl Bruno ......... Tilden
Horne, George Marlin ......... Ainsworth
Hoselle, LaVerne Myrtle ......... Red Oak, Ia.
Hurley, Dale Wayne ......... Merna
Jackman, Herbert Saul ......... Omaha
Coca, Robert Michael ......... Lincoln
Johnson, Marlin John Elof ......... Bristow
Johnson, Walter Leland ......... Lincoln
Jones, Aubrey Harris ......... Lincoln
Kantor, Phillip William ......... Sioux City, Ia.
Keast, Robert William ......... Fremont
Kline, Nat Dan ......... Madison
Lauby, Vincent William ......... Bridgeport
McQuillan, William Michael ......... Lincoln
Mahan, William Frederick ......... Bridgeport
Mauck, Nancy Alice ......... Omaha
Mease, Willis Eugene ......... Broken Bow
Mikkelson, Ole William ......... Lincoln
Monsour, Karen Jean ......... Lincoln
Paine, Frederic Oney ......... Lincoln
Petersen, Gudmund Edward ......... Lincoln
Porter, Dale Orville ......... Nebraska City
Raaech, Richard Fredric ......... Broken Bow
Reddels, Jack Wright ......... Omaha
Rundquist, Russell Brian ......... Newman Grove
Schneckloth, Roland Edmunds ......... Lincoln
Shaw, Susan Pratt ......... David City
Shev, Elmer Edward ......... Lincoln
Spichal, Richard LeRoy ......... Valentine
Wessner, James Edward ......... Red Cloud
Welch, John Stanley ......... Lincoln
William, Robert Barr ......... Omaha
Witham, Ray Gardner ......... Chappell
Wood, Elbert Stanley Jr ......... Cody
Yoachim, William Peter Jr ......... Beulah, North Dakota

Zwiebel, Irvin Michael ......... Papillon

Sophomore Premedical Students

Alberts, Marion Edward ......... Hastings
Alfaro, Arsenio ......... Isabela, Puerto Rico
Arnot, Charles William ......... Humboldt
Barrett, William Clare ......... Nebraska City
Bell, James Dennis ......... York
Deines, Margaret Elizabeth ......... Lincoln
Douglas, Robert Norton ......... Cozad
Dowell, William Fredrick ......... Lincoln
Dunn, Walter Eugene ......... Benkelman
Eastman, Nathan LeRoy ......... Kimball
Fleibig, Emma ......... Lour City
Geesaman, Richard Elliott ......... Fort Calhoun
Hickman, Clara Marie ......... Lincoln
Hubbard, Dorothy Franklin ......... Columbus
Jahn, Dorothy Elizabeth ......... Lincoln
Jones, Richard Arthur ......... Bridgeport
Kohiro, Horace ......... Lincoln
Larson, Sherwood Lee ......... Cheyenne, Wyo.
Lincoln, Arthur Fulton ......... North Platte

McCarville, John Raymond ......... Omaha
Malashock, Edward Marvin ......... Omaha
Meese, Lee David ......... Ithaca
Mertz, Max Albert ......... Lincoln
Meyer, Milton William ......... Lincoln
Moell, Lyman Dwight ......... Lincoln
O'Connell, Frank Boyd Jr ......... Lincoln
Peck, Charlotte Deephayne ......... Lincoln
Petersen, Byron Douglas ......... Atkinson
Petersen, Deane Alfred ......... Avoca, la.
Rodman, Hubert Harmer ......... Louisville
Rose, Betty Alyce ......... Taylor
Rossmillwer, Lois Nadine ......... Deshler
Schabacker, Dorothea Elizabeth ......... Bridgeport
Shannon, Virginia Louise ......... Falls City
Witt, Alyse Marie ......... Syracuse
Zimmer, Clarence ......... Beaver Crossing

Junior Division Premedical Students

Allen Mary Lorraine ......... Weeping Water
Asher, John Calvin ......... Aurora
Bale, Samuel Arthur ......... Lincoln
Bartle, Edward Franklin ......... St. Paul
Batt, Harold Vernon ......... Hastings
Beede, Margaret Lea ......... Lincoln
Bennett, Bernard Howard ......... Omaha
Bently, Neil Benjamin ......... Norfolk
Berger, Mary Ellen ......... Seward
Bland, Robert Weidensall ......... Shelby
Brickell, Irene Doyle ......... Fairbury
Brignall, Lloyd Donald ......... Dakota City
Brieler, Hugo Anthony ......... Lincoln
Briggs, Arch Lee ......... Lincoln
Brugh, Elroy Alfred ......... York
Byers, Malcolm Sexton ......... Fremont
Cate, Rosettabel ......... Superior

Chaloupka, Melville Louis ......... Omaha
Chandler, Robert Michael ......... Pierre, S.D.
Chun, Esmond Chiu Kung ......... Honolulu, T.H.
Coehran, Roy Edwin Jr ......... Lincoln
Collins, Frederick Gene ......... West Point
Counce, Donald A ......... Hayes Center
Dailey, June Elizabeth ......... Hardy
Davies, Robert Russell ......... Kimball
Dworsky, Barbara Joy ......... Lincoln
Ehrlich, Robert Wayne ......... Alliance
Fiske, Richard L. ......... Alliance
Finkle, Joan Elizabeth ......... Lincoln
Flansberg, Robert Brooks ......... Detroit, Mich.
Frazier, Samuel Fred ......... Rosiclare, III.
Ginsberg, Eudice ......... Dakota City
Hahn, Richard Julius ......... Lincoln
Hansich, Robert Wiese ......... St. Paul

TRAINING COURSE FOR X-RAY TECHNICIANS

HOWARD B. HUNT, M.A., M.D.
Professor of Radiology and Physical Therapy

Organization.—The course for x-ray technicians has been established by authority of The Board of Regents in connection with the Department of Radiology, College of Medicine. It has been accredited by the American Registry of X-Ray Technicians conducted by the Radiological Society of North America.

The American Registry of X-Ray Technicians conducts examinations for candidates who shall have had acceptable training and a total of at least two years’ experience in radiological work, including the student year. Students who have satisfactorily completed the course of training in x-ray technic at the University of Nebraska College of Medicine and have had a second year of experience in an accepted department of radiology are accepted for examination. A certificate in x-ray technic is issued upon successful completion of the examination of the American Registry of X-Ray Technicians.

Facilities for Instruction.—Ample opportunity for experience in making of roentgenograms or x-ray films of patients is provided. During a period of 12 months about 4,500 radiographic examinations are made in the Department of Radiology for the University Hospital and Dispensary of the University of Nebraska College of Medicine. All types and positions of x-ray examinations are used in the department, including encephalography of the brain, cholangiography of the gall-bladder and bile ducts, mammography of the breast, as well as the more common studies such as cholecystography of the gall-bladder, urography of the kidneys and bladder, bronchography of the lungs, and examination of the stomach and intestines after administration of barium sulfate and other contrast media. The radiographic work is supervised by the radiologist and is directly in charge of a registered technician. Facilities are provided for deep x-ray therapy and radium therapy with adequate protection of all workers against exposure to radiation. About 2,000 x-ray treatments and 100 radium treatments are given in the department during a year. The library of the College of Medicine is maintained in the hospital. Forty-five thousand cataloged books and 400 current periodicals are available for study and for keeping in touch with current work in the field of x-ray diagnosis.

Requirements for Admission.—An applicant for admission to the course in x-ray technic shall be between 21 and 35 years of age and must be graduated from an accredited high school or other approved preparatory school. Records must be submitted covering the content and grades received in the preparatory studies. It is recommended that the preparatory work include English, Latin, physics, zoology, typing, shorthand, and secretarial work, although applicants are considered who do not present credits in all of these subjects. At least one year of collegiate study including English, physics, zoology, typing, shorthand, and secretarial work is recommended. Preference is given to applicants who are graduate nurses. Applicants must be in good health with no disabilities. The application should be accompanied by a photograph and the names of two people from whom references can be obtained. Admission is allowed in January and July. Only two students can be accepted annually.
Applications should be sent to the Chairman of the Department of Radiology, University of Nebraska College of Medicine, 42nd and Dewey avenue, Omaha, Nebraska. Application forms will be provided upon request.

**Fees and Expenses.**—There is a registration fee of $1, payable on entrance. Four dollars per year for the student health service is payable on admission. A tuition fee of $75 per year is charged and a minimum nonresident fee of $25 per semester for students enrolling from other states. Students must maintain themselves and provide their own uniforms. The cost of textbooks is about $15. Board may be obtained for $6 a week in the vicinity of the hospital and rooms for $2.50 to $4 a week. Second-year student appointments are frequently made available which provide maintenance and a small monthly stipend.

**Curriculum.**—The course of study covers a period of one year. Students are accepted on a probationary basis during the first month. Students are in class or on duty in the Department of Radiology from 8 a.m. until 5 p.m. with a free hour for lunch. Students are not on duty during Saturday afternoon or Sunday. A vacation of two weeks is allowed at the Christmas holiday or in the summer. Immunization against diphtheria, typhoid fever, and smallpox is advised.

**Plan of Instruction.**—The course of training for students of x-ray technic consists primarily of an apprenticeship and demonstrations under the technician and of conferences with the radiologist. The instruction in related fields is given in conjunction with the School of Nursing consisting of instruction in anatomy, pathology, radiology and physical therapy, principles of general medicine, general surgery, gynecology, orthopedics, urology, first aid, and eye, ear, nose, and throat. The apprenticeship comprises 90 per cent of the period of training. The student works with the technician in the making of all types of x-ray studies. Gradually increasing independent responsibilities are given over to the student as experience increases. The student must become familiar with transcription of the reports of the radiologist covering the x-ray studies of roentgenograms made of patients and his reports on patients treated with x-ray and radium. In case the student is unfamiliar with the operation of a typewriter, additional courses must be taken at night school during the period of training.

The following formal courses are required of students in x-ray technic. These courses are provided through the courtesy of the School of Nursing by the College of Medicine.

1. **ANATOMY.**— Lectures, class recitations, demonstrations, and laboratory work dealing with the structure of the human body. Preserved specimens and fresh animal specimens are used for study. 54 hours.

2. **ELEMENTARY PATHOLOGY.**—Causes and general features of disease and disease processes. 18 hours.

3. **MEDICINE.**—Lectures and clinics dealing with the causes, symptoms, course, treatment, complications, convalescence, and prevention of medical diseases. 20 hours.

4. **SURGERY.**—Lectures and clinics designed to give the student a practical understanding of the causes, symptoms, and treatment of surgical diseases and to stress the importance of early recognition and methods of prevention of these diseases. 18 hours.

5. **GYNECOLOGY.**—Anatomy and physiology of the female pelvic organs; the pathology of the pelvis; the symptoms and treatment of
gynecological diseases; complications, the care of patients before and after operation. Lectures and clinics. 10 hours.

(6) ORTHOPEDICS.—Lectures, classes, and demonstrations dealing with the causes, prevention, and mechanical and operative treatment and nursing care of diseases of the bones and joints and bony deformities. Demonstration of braces, splints, frames, and other appliances. 18 hours.

(7) UROLOGY.—Lectures dealing with the principal diseases of the genito-urinary tract. 4 hours.

(8) PHYSICAL THERAPY.—The basic principles and theory governing the use of physical agents, such as the electrical currents, high frequency currents, therapeutic exercises, ultraviolet, roentgen and radium therapy, are discussed in a series of lectures and demonstrations. 18 hours.

(9) FIRST AID.—Lectures, classes, and demonstrations. Standard Red Cross first aid course for which a Red Cross Certificate is awarded. 20 hours.

(10) DISEASES OF EYE, EAR, NOSE, AND THROAT.—Lectures and clinics dealing with the anatomy and physiology of the eye, ear, nose, and throat; the diseases of these organs, their treatment and prevention. 18 hours.

Opportunities.—There is a moderate demand for well-qualified technicians. These opportunities are primarily in the departments of radiology in hospitals and in the offices of doctors specializing in x-ray and radium work. There is no opportunity for independent operation of a laboratory by the technician since the use of x-ray in the diagnosis and treatment of diseases is legally the practice of medicine and in the interest of public welfare and safety must be carried out under the supervision of a registered physician. The remuneration for x-ray technicians varies from $60 to $150 a month with or without maintenance. In practice, it is frequently necessary for the technician to take dictation, typewrite reports, file correspondence, and in small hospitals to care for the hospital records on patients. Many of the duties are in the nature of minor nursing such as the sterilization of materials, administration of enemas, preparation of patients for examination, and the general care of the sick. The duties of secretary and practical nurse are frequently combined with those of operating an x-ray machine, processing of x-ray films, and handling of patients in x-ray work.
Organization.—The course for laboratory technicians has been established by authority of The Board of Regents, in connection with the Department of Pathology, College of Medicine. It has been accredited by the Committee on Education and Hospitals of the American Medical Association and the American Society of Clinical Pathology as being equipped and organized to furnish adequate training in laboratory technic. Graduates are eligible to take the examination for the Registry of Technicians maintained by the American Society of Clinical Pathology.

Facilities for Instruction.—The course is given in the University Hospital, and facilities of the University of Nebraska College of Medicine are available for instruction. The University Hospital is organized primarily for teaching and is under the control of The Board of Regents through the administration of the College of Medicine. It has a capacity of 240 beds, and accepts patients from over the state generally. All types of diseases are treated. Approximately 4,000 patients are admitted each year. The laboratory of the University Dispensary is also used for instruction. Approximately 4,000 patients are treated each year. The treatment of patients in the hospital and dispensary is directed by the faculty of the College of Medicine. The laboratory work requested includes all routine procedures, and many specialized tests that are required for unusual diseases which may be sent to the hospital from any part of the state.

The Library of the College of Medicine is maintained in the hospital. Forty-five thousand cataloged books and 400 current periodicals are available for study, and for keeping in touch with current work in the field of laboratory diagnosis.

Requirements for Admission.—The following list of courses meets the requirements of the Registry of Medical Technologists:

Biology: Eight semester hours of which at least 4 semester hours must be zoology.

Bacteriology: At least 3 semester hours. (If not available, other branches of biology may be substituted.)

Chemistry: General Inorganic Chemistry—At least 8 semester hours including 4 semester hours of laboratory. Organic Chemistry—A complete course, at least 4 semester hours with not less than 2 semester hours of laboratory. Quantitative Analysis—Three semester hours recommended.

Physics: At least 8 semester hours with 2 semester hours of laboratory recommended.

English: Six semester hours in English composition or rhetoric.

Electives: Sufficient to give a total of 60 semester hours of college credit. Sociology and psychology are recommended for electives.

A transcript of college credits is to be submitted with the application for admission. Secretarial training will be found most useful, as well as a reading knowledge of a foreign language. The candidate must be in good health.

Fees and Expenses.—There is a registration fee of $1, payable on entrance. Four dollars per year for the student health service is payable on admission. A tuition fee of $75 per year is charged and a minimum
nonresident fee of $25 per semester for students enrolling from other states. In addition, the students are responsible for their own maintenance, uniforms, and laundry. Board and room may be obtained in private homes for approximately $40 per month. Some allowance should be made for the purchase of books.

**Curriculum.**—The course of training is of 12 months' duration and is primarily on the apprenticeship basis, with rotating services of two months each. The plan of work is so arranged as to include all of the procedures usually carried out in a general hospital laboratory, as well as to acquaint the student with many of the more specialized types of laboratory determinations.

**Biochemistry** includes examinations of the blood and other body fluids for normal and abnormal chemical constituents. As a rule, these are quantitative determinations, and include such tests as blood sugar, non-protein-nitrogen and creatinine determinations, as well as examinations of urine and of secretions of the gastro-intestinal tract and its associated glands. Between 6,000 and 7,000 examinations a year allow thorough training in this field.

**Hematology** consists of examinations of the blood, particular attention being given to the cellular elements. Included in this service also are compatibility tests preparatory to transfusions. More than 7,000 examinations a year give adequate material for this phase of the work.

**Advanced Hematology and Biochemistry** covers the more specialized procedures in the above branches, such as determination of the inorganic constituents of the blood, various tests of liver function, and special hematological procedures as erythrocyte fragility tests and cell volume measurements. Basal metabolic rate determinations are also included.

**Bacteriology** takes up the identification of pathogenic micro-organisms by their morphological, cultural, and immunological characteristics. Approximately 2,400 bacteriological examinations are made each year.

**Parasitology,** a study of the small animal forms which may cause disease, is included with this and is studied both from the material available in the hospital and dispensary and from demonstration specimens in the medical college.

**Histologic Technic** covers the making of tissue preparations, principally sections of various organs and tissues, for the microscopic study by the pathologist. A variety of methods are taken up during the training period. More than 4,000 sections are made yearly.

**SEROLOGY** includes primarily immunological procedures, and is carried out under the direct supervision of the bacteriology department of the College of Medicine.

**Plan of Instruction.**—The work is conducted under the direct supervision of the director and the laboratory technicians. Lectures are given, divided as follows:

**Bacteriology,** 40 hours. This course is especially arranged to meet the requirements of the medical technologists, covering background and technic as well as the specific consideration of pathogenic bacteria.

**Pathology,** 24 hours, combined with the pathology course for the School of Nursing. The general considerations of changes produced by disease are taken up, particular attention being given to the causes of disease, the specific changes produced by various disease processes, and their
Junior Division
Registers and counsels all freshmen and supervises terminal and adult special curricula. Conducts the University orientation course and a special testing program for guidance purposes.

College of Agriculture
Leading to the degrees of Bachelor of Science in Agriculture and Bachelor of Science in Home Economics and to vocational education certificate.
Supervises Nebraska School of Agriculture at Curtis; Experiment Substations at North Platte, Scottsbluff, and Valentine; Nebraska Agricultural Experiment Station and Agricultural Extension Service, Lincoln; fruit farm, Union; agronomy farm, Havelock; Box Butte Experiment Farm, Alliance.

College of Arts and Sciences
Leading to the degrees of Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, Bachelor of Science.

School of Fine Arts
Leading to the degrees of Bachelor of Fine Arts, Bachelor of Music, Bachelor of Fine Arts in Education, Bachelor of Music in Education.

School of Journalism
Leading to the degrees of Bachelor of Arts, Bachelor of Science in Agriculture, and to certificate in journalism.

College of Business Administration
Leading to the degree of Bachelor of Science in Business Administration.

College of Dentistry
Leading to the degrees of Doctor of Dental Surgery and Bachelor of Science in Dentistry.

College of Engineering
Leading to the degrees of Bachelor of the Art of Architecture, Bachelor of Science in Agricultural Engineering, Bachelor of Science in Architectural Engineering, Bachelor of Science in Chemical Engineering, Bachelor of Science in Civil Engineering, Bachelor of Science in Commercial Engineering, Bachelor of Science in Electrical Engineering, Bachelor of Science in Mechanical Engineering.
Supervises Nebraska Engineering Experiment Station, Lincoln.

Graduate College
Leading to the degrees of Doctor of Philosophy, Master of Arts, Master of Architecture, Master of Science in Social Work, Master of Science in Agricultural Engineering, Master of Science in Architectural Engineering, Master of Science in Civil Engineering, Master of Science in Electrical Engineering, Master of Science in Mechanical Engineering, Agricultural Engineer, Chemical Engineer, Civil Engineer, Electrical Engineer, Mechanical Engineer.

Graduate School of Social Work
Leading to the degree of Master of Science in Social Work, and to certificate in social work.

College of Law
Leading to the degree of Bachelor of Laws.

College of Medicine
Leading to the degrees of Doctor of Medicine, Bachelor of Science in Medicine, Bachelor of Science in Nursing, and Graduate Nurse.

School of Nursing
Leading to the degrees of Bachelor of Science in Nursing and Graduate Nurse.

Department of Military Science and Tactics
Leading to a reserve commission in the military forces of the United States.

College of Pharmacy
Leading to the degree of Bachelor of Science in Pharmacy.

Department of Physical Education and Athletics
Leading to the degree of Bachelor of Science in Education, and to certificate in physical education (women) and certificate in physical education and athletics (men).

Teachers College
Leading to the degrees of Bachelor of Science in Education, Bachelor of Arts in Education, Bachelor of Fine Arts in Education, Bachelor of Music in Education.
Supervises Teachers College High School, Lincoln.

Summer School

Conservation and Survey Division

University Extension Division

Separate bulletins or information concerning any college, school, or division may be obtained free by addressing the Director of Admissions, University of Nebraska, Lincoln
