COLLEGE OF MEDICINE
OMAHA
THE HIPPOCRATIC OATH
FORMULATED AT GENEVA*

Now being admitted to the profession of medicine
I solemnly pledge to consecrate my life to the service
of humanity. I will give respect and gratitude to my
deserving teachers. I will practice medicine with con-
science and dignity. The health and life of my patient
will be my first consideration. I will hold in confi-
dence all that my patient confides in me. I will main-
tain the honor and the noble traditions of the medical
profession. My colleagues will be as my brothers. I
will not permit considerations of race, religion, nation-
ality, party politics or social standing to intervene be-
tween my duty and my patient. I will maintain the
utmost respect for human life from the time of its con-
ception. Even under threat I will not use my knowledge
contrary to the laws of humanity. These promises I
make freely and upon my honor.

* Adopted by the Second General Assembly of the World Medical
Association held in Geneva, Switzerland, September 8 to 11, 1948
college of medicine
1957-1958
course offerings
COLLEGE OF MEDICINE CALENDAR
ACADEMIC YEAR 1957-1958

Freshmen and Sophomores

Sept. 19, 20, 21, Thurs. through Sat. Freshman Orientation and Registration. First Half of Tuition Due
Sept. 21, Sat.

Sept. 23, Mon.
Nov. 28-Dec. 1, Thurs. through Sun. Sophomore Registration
Dec. 18-Jan. 1, Wed. through Wed. First Half of Tuition Due
Febr. 1, Sat.
April 4-6, Fri. through Sun. Fall Quarter Classes Begin
May 30-31, Fri., Sat. Thanksgiving Vacation
June 14, Sat. Christmas Vacation

Juniors

Sept. 5, Thurs.
Nov. 28-Dec. 1, Thurs. through Sun. Registration—First Half of Tuition Due. Classes Begin 1:00 p.m.
Dec. 19-Jan. 1, Thurs. through Wed. Thanksgiving Vacation
Febr. 1, Sat.
April 4-6, Fri. through Sun. Christmas Vacation
May 30-31, Fri., Sat. Balance of Tuition Due
June 14, Sat. Spring Vacation

Seniors

July 8, Mon.
Aug. 26, Mon.
Sept. 2, Mon.
Nov. 28-Dec. 1, Thurs. through Sun. Clinical Assignments Begin
Dec. 22-Jan. 1, Sun. through Wed. Didactic Exercises Begin
Febr. 1, Sat.
April 4-6, Fri. through Sun. Labor Day Holiday
May 30-31, Fri., Sat. Thanksgiving Vacation
June 7, Sat. Christmas Vacation
June 9-14, Mon. through Sat. Balance of Tuition Due
June 14, Sat. Spring Vacation

Graduate Students

Sept. 16-21 Fall Quarter Registration
Dec. 30-Jan. 4 Winter Quarter Registration
March 17-22 Spring Quarter Registration

Special Days

Nov. 24, 1957, Sun. Family Day
April 26, 1958, Sat. Pre-Medic and Pre-Nursing Day
ADMINISTRATION

The Board of Regents

Term Expires

Charles Y. Thompson, West Point .................................. January 1959
B. N. Greenberg, M.D., York ........................................... January 1959
J. Leroy Welsh, Omaha .................................................. January 1961
Clarence E. Swanson, Lincoln ......................................... January 1961
Frank Foote, Axtell ..................................................... January 1963
J. G. Elliott, Scottsbluff .............................................. January 1963

John Kent Selleck, Lincoln, Corporation Secretary

The University

Clifford Morris Hardin, B.Sc., M.Sc., Ph.D., Chancellor of the University.
Adam Carlyle Breckenridge, Ph.D., Dean of Faculties.
James Perry Tollman, B.Sc., M.D., Dean of the College of Medicine and Superintendent of the University Hospital.
James Winfred Benjamin, B.A., M.A., Ph.D., Assistant Dean of the College of Medicine.
J. Philip Colbert, B.Sc., M.Sc., Dean of the Division of Student Affairs.
Floyd Hoover, Ph.D., Registrar.

Emeriti Faculty

John Franklin Allen, B.Sc., M.D., Professor of Clinical Medicine, Emeritus, and Director of Student Health Service, Emeritus.
Elmer William Bantin, B.Sc., M.D., Assistant Professor of Pediatrics, Emeritus.
Rodney Waldo Bliss, A.B., M.D., Professor of Medicine, Emeritus.
John Francis Bresnahan, B.Sc., M.Sc., M.D., Instructor in Internal Medicine, Emeritus.
Alfred Jerome Brown, A.B., M.D., Professor of Surgery, Emeritus.
George Worthington Covey, B.Sc., M.D., Clinical Associate Professor of Internal Medicine, Emeritus.
Harold Everett Eggers, A.M., M.D., Professor of Pathology and Bacteriology, Emeritus.
Harry Evans Harvey, B.Sc., M.D., Clinical Associate Professor of Obstetrics and Gynecology, Emeritus.
Joseph Aloysius Henske, M.D., Professor of Pediatrics, Emeritus.
Lloyd Oliver Hoffman, M.D., Associate in Surgery, Emeritus.
Charles Franklin Moon, B.Sc., M.D., Professor of Obstetrics and Gynecology, Emeritus.
John Clyde Moore, Jr., A.B., B.Sc., M.D., Professor of Pediatrics, Emeritus.
Sergius Morgulis, A.M., Ph.D., Professor of Biochemistry, Emeritus.
Reuben Allyn Moser, B.A., M.D., Associate Professor of Internal Medicine, Emeritus.
Charles Austin Owens, B.Sc., M.D., Associate Professor of Urology, Emeritus.
Abraham Srol Rubnitz, A.B., M.D., Assistant Professor of Pathology and Bacteriology, Emeritus.
Robert D. Schrock, A.B., M.D., Professor of Orthopedic Surgery, Emeritus.
William Lote Shearer, A.B., D.D.S., M.D., Professor of Surgery, Emeritus.
Robert James Stearns, M.D., Assistant Professor of Obstetrics and Gynecology, Emeritus.

*Willis Harvey Taylor, Professor of Obstetrics and Gynecology, Emeritus.
Chester Hill Waters, Sr., B.Sc., M.D., Professor of Surgery, Emeritus.
William Albert Willard, Ph.D., Professor of Anatomy, Emeritus.
George Alexander Young, Sr., M.D., Professor of Neurology and Psychiatry, Emeritus.

*Deceased June 23, 1956.
**Deceased August 5, 1956.
Senior Consultants

Arthur Wesley Anderson, Sr., B.A., M.D., Clinical Associate in General Practice, Senior Consultant.
Maine C. Anderson, M.D., Assistant Professor of Internal Medicine, Senior Consultant.
Edwin Davis, B.A., M.D., Professor of Urology, Senior Consultant.
John Calvin Davis, Jr., A.B., M.D., Professor of Otorhinolaryngology, Senior Consultant.
J. Jay Keegan, A.B., A.M., M.D., Professor of Surgery, Senior Consultant.
Antonius Andrew Larsen, B.Sc., M.D., Clinical Associate in General Practice, Senior Consultant.
Ralph Herbert Luikart, M.D., Professor of Obstetrics and Gynecology, Senior Consultant.
Ernest Lynn MacQuiddy, A.M., M.D., Professor of Internal Medicine, Senior Consultant.
James Sylvester McAvim, Ph.G., M.D., Associate in Radiology and Physical Medicine, Senior Consultant.
Wilson Bridges Moody, A.B., M.D., Professor of Internal Medicine, Senior Consultant.
Friedrich Wilhelm Niehaus, B.Sc., M.D., Professor of Internal Medicine, Senior Consultant.
Sidney O. Reese, B.Sc., M.D., Clinical Associate Professor of Surgery, Senior Consultant.
Oliver Francis Relhart, D.V.S., Instructor in Pathology, Senior Consultant.
Donald Benjamin Steenburg, B.Sc., M.D., Clinical Associate in General Practice, Senior Consultant.
Harry Allen Taylor, A.B., B.Sc. in Med., M.D., Senior Consultant.
Chester Quay Thompson, B.Sc., M.D., Associate Professor of Internal Medicine, Senior Consultant.
Irwin Levi Thompson, A.B., M.D., Clinical Associate in General Practice, Senior Consultant.
Warren Thompson, B.Sc., M.D., Professor of Internal Medicine, Senior Consultant.
James E. M. Thomsoon, A.B., M.D., Clinical Associate Professor of Orthopedic Surgery, Senior Consultant.

Active Faculty

Henry B. Adams, A.B., M.A., Ph.D., Instructor in Neurology and Psychiatry.
Payson Stone Adams, B.Sc. in Med., M.D., Professor of Urology.
Herbert George Ahrens, B.Sc., M.D., Clinical Instructor in Internal Medicine.
John Andrew Aita, Ph.D., M.D., Associate Professor of Neurology and Psychiatry.
Leland Clayton Albertson, A.B., M.D., Instructor in Internal Medicine.
George Thomas Alliband, B.Sc., M.D., Assistant Professor of Ophthalmology.
Harley Eric Anderson, A.B., M.D., Associate Professor of Obstetrics and Gynecology.
Lawrence Lloyd Anderson, A.M., M.D., Associate in Surgery.
Thorwald Robert Anderson, A.B., M.D., Clinical Assistant Professor of Pathology.
Carol Remmer Angle, A.B., M.D., Instructor in Pediatrics.
William Dodge Angle, B.Sc., M.D., Assistant Professor of Internal Medicine.
Stanley Monrad Bach, A.B., M.D., Assistant Professor of Orthopedic Surgery and Instructor in Anatomy.
Marion Bacon, B.Sc., M.Sc., Ph.D., Assistant Professor of Microbiology.
Paul Martin Bancroft, B.Sc., M.Sc., M.D., Clinical Associate Professor of Pediatrics.
Clarence Fredrick Bantin, B.Sc., M.D., Associate in Pediatrics.
Anthony Joseph Barak, B.Sc., M.Sc., Ph.D., Assistant Professor of Biochemistry.
John Lucian Barmore, M.D., Associate Professor of Surgery.
William W. Baricks, A.B., M.D., Clinical Assistant Professor of Orthopedic Surgery.
John Hodgson Barthell, M.D., Clinical Instructor of Dermatology and Syphilology.
Meyer Beber, B.Sc., Ph.D., M.D., Associate Professor of Internal Medicine and Associate Professor of Biochemistry.
Harold George Beeken, B.Sc., Instructor in Internal Medicine and Assistant Director of Cardiovascular Research.
James Winfred Benjamin, B.A., M.A., Ph.D., Associate Professor of Anatomy, Assistant Dean of the College of Medicine.
Arthur Lawrence Bennett, A.B., Ph.D., M.D., Professor of Physiology and Pharmacology. (Assistant Chairman of Department.)
Gordon Newall Best, B.Sc., M.D., Assistant Professor of Internal Medicine.
Rolland Russell Best, B.Sc., M.D., Professor of Surgery and Assistant Professor of Anatomy.
James Dewey Bisgard, A.B., M.D., Professor of Surgery.
FACULTY

William Carl Boelter, B.A., M.D., Clinical Assistant in Obstetrics and Gynecology.
Russell Charles Brauer, A.B., M.D., Instructor in Surgery.
John Grierson Brazer, A.B., M.D., Associate Professor of Internal Medicine.
I. William Brill, B.Sc., M.D., Assistant Professor of Neurology and Psychiatry.
Herman Henry Brinkman, M.D., Clinical Assistant in Surgery.
Marion Porter Brolsma, A.B., B.Sc., M.D., Clinical Instructor in Internal Medicine.
Kenneth Murie Browne, M.Sc., M.D., Assistant Professor of Neurological Surgery and Adjunct Instructor in Physiology and Pharmacology.
John Hobart Brush, A.B., M.D., Assistant Professor of Surgery.
Donald John Bucholz, A.B., M.A., M.D., Assistant Professor of Internal Medicine.
Dwight Willard Burney, Jr., A.B., M.D., Assistant Professor of Orthopedic Surgery and Assistant in Anatomy.
Olin James Cameron, M.S., M.D., Professor of Dermatology (Chairman of Department.)
Louis Scott Campbell, B.Sc., M.D., Associate Professor of Orthopedic Surgery.
Oscar Carp, B.Sc., M.D., Associate Professor of Otorhinolaryngology.
Michael J. Carver, B.Sc., Ph.D., Assistant Research Professor of Biochemistry and Assistant Research Professor of Neurology and Psychiatry.
Waldron Alvin Cassidy, A.B., M.D., Professor of Otorhinolaryngology and Consultant in Bronchoscopy.
Arthur O. Chapman, A.B., M.A., Ph.D., Assistant Professor of Anatomy.
LaGrand Dwight Cherry, B.Sc., M.D., Clinical Assistant Professor of Surgery.
George Leonard Clark, B.Sc., M.D., Associate Professor of Pediatrics.
Robert Morris Cochran, B.Sc., M.D., Associate in Surgery and Instructor in Anatomy.
John Daniel Coe, A.B., M.D., Associate in Surgery.
Robert Archibald Ccen, A.B., M.D., Assistant Professor of Neurology and Psychiatry.
Frank Cole, B.Sc., M.D., Clinical Associate in Surgery.
Francis C. Coleman, M.D., Clinical Assistant Professor of Pathology.
Robert Marshall Collins, B.Sc. in Med., M.D., Assistant Professor of Obstetrics and Gynecology.
Walter Thomas Cotton, B.Sc, in Med., M.D., Assistant Professor of Obstetrics and Gynecology.
Michael Crofoot, A.B., M.D., Associate Professor of Pediatrics.
Edmund Jesse Dalley, D.D.S., Assistant Professor of Dental Surgery.
Louis T. Davies, A.B., B.Sc. in Med., M.A., M.D., Clinical Assistant Professor of Surgery.
Herbert Haywood Davis, A.B., M.D., Professor of Surgery.
Herbert Leroy Davis, A.B., Ph.D., Associate Research Professor of Biochemistry and Associate Research Professor of Surgery.
James Allan Davis, B.Sc., M.D., Instructor in Otorhinolaryngology.
John Byron Davis, B.Sc., M.D., Instructor in Surgery.
Neal Balbach Davis, M.D., Clinical Assistant in Urology.
John Lague Dewey, A.B., M.D., Clinical Assistant in Internal Medicine.
William John Dickerson, A.B., M.D., Associate in Internal Medicine.
Robert Hugh Dickinson, A.B., M.D., Associate Professor of Neurology and Psychiatry.
H. Dwyer Dunlop, A.B., M.A., Associate in Psychiatric Occupational Therapy, in Neurology and Psychiatry.
Arthur Lovell Dunn, A.B., A.M., Ph.D., Assistant Professor of Biochemistry and Radiology.
Frank Lowell Dunn, B.Sc., A.M., M.D., Professor of Internal Medicine and Associate Professor of Clinical Physiology and Chief Investigator Cardiovascular Teaching.
Frank Lewis Eagle, B.Sc., M.D., Associate in Ophthalmology.
Dorothea Mary Edwards, B.Sc., Clinical Assistant in Internal Medicine.
Alfred George Ellick, A.B., J.D., Associate Professor of Medical Jurisprudence (Chairman of Department.)
Robert James Ellingson, B.Sc., M.A., Ph.D., Associate Professor of Medical Psychology.
Clarence Kilgore Elliott, A.B., M.D., Clinical Assistant Professor of Internal Medicine.
H. Chandler Elliott, B.A., M.A., Ph.D., Associate Professor of Anatomy.
Herman Charles Ellsworth, B.A., M.D., Clinical Associate in Radiology.
K. J. Fijan, B.Sc., M.D., Clinical Instructor in Pediatrics.
John Clayton Filkins, B.Sc., M.D., Associate in Ophthalmology.
Gordon Filmer-Bennett, A.B., M.A., Ph.D., Instructor in Neurology and Psychiatry.

* On leave of absence.
Alister Ian Finlayson, M.A., M.D., Professor of Neurological Surgery.
Donald Max Fitch, A.B., B.Sc., M.D., Associate in Pathology.
Max Fleishman, M.D., Associate in Internal Medicine.
Miles E. Foster, A.B., B.Sc., M.D., Assistant Professor of Pathology.
Muriel Naomi Frank, A.B., M.D., Associate in Anesthesiology.
Maurice D. Frazer, B.Sc., M.D., Clinical Associate Professor of Radiology.
Albert Edward Freed, B.Sc., M.D., Associate in Internal Medicine.
Fred J. Fricker, B.Sc., M.Sc., M.D., Instructor in Physical Medicine.
Raymond John Friel, B.Sc., M.D., Assistant in Anatomy.
Dwight Maurice Frois, B.Sc., in Med., M.D., Assistant Professor of Rehabilitation and Physical Medicine (Chairman of Department.)
Samuel Isaiah Fuenning, B.Sc., M.Sc., M.D., Clinical Assistant in Medicine.
Charles Garetz, B.A., M.D., Instructor in Neurology and Psychiatry.
Richard Earl Garlinghouse, A.B., M.D., Clinical Associate Professor of Obstetrics and Gynecology.
Robert O. Garlinghouse, A.B., M.D., Clinical Assistant Professor of Surgery.
John Leo Gedgoud, B.Sc., M.D., Professor of Pediatrics.
John Harold George, M.D., Clinical Instructor in Obstetrics and Gynecology.
Gordon Everett Gibbs, A.B., M.A., Ph.D., M.D., Professor of Pediatrics (Chairman of Department.)
Horace Kerr Gillen, A.B., M.D., Assistant Professor of Pathology.
Harold Gifford, Jr., B.Sc. in Med., M.D., Associate Professor of Ophthalmology.
Louis Goldstein, B.Sc., M.D., Clinical Instructor in Urology.
Ray O’Herin Gillies, Jr., B.Sc., M.D., Instructor in Otorhinolaryngology.
Louis James Gogela, B.Sc. in Med., M.A., M.D., Clinical Instructor in Surgery.
Julius Charles Goldner, B.Sc., M.D., Associate in Neurology and Psychiatry.
William Ernest Graham, A.B., M.D., Assistant Professor of Internal Medicine.
Robert S. Grant, M.D., Clinical Instructor in Pediatrics.
Harris Breiner Graves, A.B., M.D., Clinical Assistant in Internal Medicine.
Richard Walter Gray, M.D., Instructor in Neurology and Psychiatry.
Arthur Morton Greene, B.Sc. in Med., M.Sc., M.D., Associate Professor of Internal Medicine.
Robert Leslie Grissom, B.Sc., M.D., Professor of Internal Medicine (Chairman of Department.)
Millard Filmore Gunderson, Ph.D., Professor of Medical Microbiology.
Shaun Gunderson, B.Sc., M.D., Associate in Radiology.
Walter Mark Gysin, M.D., Assistant Professor of Neurology and Psychiatry.
Keay Hachiya, A.B., M.D., Instructor in Surgery.
Charles Albert Hamilton, B.Sc., M.Sc., M.D., Clinical Assistant in Internal Medicine.
William Rudolph Hamsa, B.Sc., M.D., Professor of Orthopedic Surgery. (Chairman of Department.)
Charles Robert Hankins, A.B., M.D., Assistant Professor of Internal Medicine.
Kodion Arthur Hansen, B.Sc., M.D., Clinical Instructor in Obstetrics and Gynecology.
Alexander Thom Harvey, B.Sc., M.D., Instructor in Internal Medicine.
Harold Elmer Harvey, A.B., M.D., Clinical Instructor in Obstetrics and Gynecology.
Lyman Howard Heine, A.B., M.D., Assistant Professor of Otorhinolaryngology.
Malcolm M. Helper, B.Sc., A.M., Ph.D., Instructor in Neurology and Psychiatry.
Mary Jo Henn, A.B., M.Sc., M.D., Associate in Internal Medicine.
Harland Thomas Hermann, B.Sc., M.D., Instructor in Neurology and Psychiatry.
Bernice Martin Hetzner, B.A.L.S., M.A., Associate Professor of Library Science.
Robert Antoine Hillyer, B.A., M.D., Clinical Instructor in Surgery.
Hiram David Hilton, B.A., M.D., Clinical Assistant Professor of Surgery.
Donald Vincent Hirst, A.B., M.D., Instructor in Obstetrics and Gynecology.
Roy Groves Holly, B.Sc., Ph.D., M.D., Professor of Obstetrics and Gynecology (Chairman of Department.)
Joseph Michael Holthaus, B.Sc. in Med., M.D., Assistant Professor of Internal Medicine.
Edward Augustus Holyoke, Ph.D., M.D., Professor of Anatomy.
Leo Thomas Hood, B.Sc., M.D., Associate in Orthopedic Surgery.
Harold R. Horn, A.B., M.D., Clinical Instructor in Orthopedic Surgery.
Theodore Franklin Hubbard, A.B., M.Sc., M.D., Assistant Professor of Internal Medicine.
Wayne McKinley Hull, B.A., B.Sc. in Med., M.Sc., M.D., Assistant Professor of Internal Medicine.

*(On leave of absence).*
Faculty

Fred Ludwig Humoller, B.Sc., Ph.D., Associate Research Professor of Chemical Physiology and Pharmacology.

Herbert Haynes Humphreys, A.B., M.A., Ph.D., Associate Professor of Medical Psychology, Neurology and Psychiatry.

Howard Beeman Hunt, A.M., M.D., Professor of Radiology (Chairman of Department), and Professor of Rehabilitation and Physical Medicine.

Charles Gregory Ingham, M.D., Associate in Neurology and Psychiatry.

Donald Robert Jackson, A.B., M.D., Associate in Internal Medicine.

Herbert Paul Jacobi, B.Sc., M.Sc., Ph.D., Professor of Biochemistry (Chairman of Department).

Herman Mandel Jahr, B.Sc., M.D., Professor of Pediatrics.

Lawrence Royce James, B.Sc., M.D., Clinical Instructor in Radiology.

George Nick Johnson, Jr., M.D., Assistant Professor of Surgery.

Herman Frank Johnson, M.D., Professor of Orthopedic Surgery.

Marshall R. Jones, A.B., M.A., Ph.D., Assistant Professor of Medical Psychology.

Robert Dale Jones, M.D., Associate in Neurology and Psychiatry.

Robert Eric Jonanson, B.Sc., M.D., Associate in Internal Medicine.

John Hewitt Judd, B.Sc., M.D., Professor of Ophthalmology. (Chairman of Department.)

Henry Kammandel, B.Sc., M.D., Assistant Professor of Urology.

John Charles Kennedy, B.Sc. in Med., M.A., M.D., Associate Professor of Surgery.

Esley Joseph Kirk, A.M., M.D., Associate Professor of Medicine.

Frank Klabenes, B.Sc. in Med., M.D., Associate Professor of Otorhinolaryngology (Chairman of Department).

William Philip Kleitsch, M.D., Assistant Professor of Surgery.

George John Klok, A.B., B.Sc., M.D., Assistant Professor of Pediatrics.

Walter George Klopf, A.B., M.A., Ph.D., Assistant Professor of Neurology and Psychiatry.

James Robert Kovarik, M.D., Associate in Obstetrics and Gynecology.

Thaddeus P. Krush, B.Sc., M.D., Associate Professor of Neurology and Psychiatry and Clinical Director of Community Services, Nebraska Psychiatric Institute.

Morton Howard Kulesh, A.B., M.D., Assistant Professor of Pathology.

Charles William Landgraf, B.Sc., M.D., Instructor in Neurology and Psychiatry.

Edward Langdon, B.Sc., M.D., Assistant Professor of Internal Medicine.

John Francis Latenser, M.D., Associate in Surgery.

John Stephens Latta, Ph.D., Professor of Anatomy. (Chairman of Department.)

Leroy William Lee, B.Sc. in Med., M.S., M.D., Professor of Urology. (Chairman of Department.)

Henry John Lehnhoff, Jr., A.B., M.D., Associate Professor of Internal Medicine.

Raymond Gerald Lewis, A.B., B.Sc., M.D., Assistant Professor of Internal Medicine.

Robert Stanley Long, B.Sc., M.D., Assistant Professor of Internal Medicine.

Charles William Love, B.Sc., M.D., Assistant Professor of Internal Medicine.

Donald Monroe Love, A.B., B.Sc., M.D., Instructor in Surgery.

Robert Ellsworth Lovgren, B.Sc., M.D., Associate Professor of Otorhinolaryngology.

Burdeette W. Lundy, M.A., Ph.D., Clinical Assistant in Neurology and Psychiatry.

Joseph Daniel McCarthy, M.D., Professor of Internal Medicine.

John Donald McCrary, B.Sc., M.D., Associate in Obstetrics and Gynecology.

Harry Sterling McGee, A.B., B.Sc., M.D., Professor of Microbiology (Chairman of Department.)

Millard Blair McGee, A.B., B.Sc., M.D., Instructor in Internal Medicine.

Kenneth T. McGinnis, B.Sc., M.D., Clinical Assistant Professor of Obstetrics and Gynecology.

Leon Steiner McGoogan, A.B., M.D., Professor of Obstetrics and Gynecology.

Waldean Chester McIntyre, M.D., Clinical Assistant in Ophthalmology.

Archibald Ross McIntyre, Ph.D., M.D., Professor of Physiology and Pharmacology. (Chairman of Department.)

Charles William McLaughlin, Jr., B.Sc. in Med., M.D., Professor of Surgery.

George Boone McMurray, B.Sc., M.D., Assistant Professor of Surgery.

William Robert McPhee, M.D., Clinical Assistant in Pathology.

Clarence Austin McWhorter, B.Sc. in Med., M.D., Associate Professor of Pathology.

Reginald Anslow MacHaffie, B.Sc., M.A., M.D., Instructor in Internal Medicine.

Ernest Lynn MacQuiddy, Jr., A.B., M.D., Associate in Internal Medicine.

Frank Majka, B.Sc., M.D., Assistant Professor of Neurology and Psychiatry.

Edward Marvin Malashock, B.A., M.D., Assistant Professor of Urology.

W. Robert Maloney, M.D., Clinical Assistant in Obstetrics and Gynecology.
Morris Margolin, A.B., M.D., Assistant Professor of Internal Medicine.
Harold R. Martin, B.Sc., M.D., Associate Professor of Neurology and Psychiatry and Clinical Director In-services, Nebraska Psychiatric Institute.
Joe Mac Martin, B.Sc., M.D., Associate in Neurology and Psychiatry.
Paul J. Maxwell, M.D., Clinical Instructor in Internal Medicine.
Daniel Martin Miller, B.Sc., M.D., Assistant Professor of Surgery.
Norman Gustav Miller, B.Sc., M.Sc., Ph.D., Assistant Professor of Medical Microbiology.
Clinton Charles Millet, B.Sc., M.D., Clinical Assistant in Internal Medicine.
Howard Eugene Mitchell, M.D., Clinical Assistant Professor of Orthopedic Surgery.
Samuel F. Moessner, B.Sc., M.D., Clinical Instructor in Surgery.
Ralph Cory Moore, B.Sc., M.D., Professor of Radiology.
Harold Smith Morgan, M.D., Instructor in Obstetrics and Gynecology.
Haskell Morris, A.B., M.D., Assistant Professor of Internal Medicine and Director of Student Health Service.
William Howard Morrison, B.Sc. in Med., M.D., Associate Professor of Ophthalmology.
Paul Newton Morrow, A.B., B.Sc. in Med., M.D., Associate Professor of Pediatrics.
Herschel B. Morton, B.Sc., M.D., Clinical Associate Professor of Surgery.
Horace Varnum Munger, A.B., M.D., Clinical Assistant Professor of Urology.
Floyd Joshua Murray, B.Sc., M.D., Associate in Surgery.
Nathan Muskin, A.B., M.D., Instructor in Internal Medicine.
Mervin McNeil Musselman, B.Sc., M.D., Professor of Surgery (Chairman of Department.)
Orvis A. Neely, B.Sc., M.D., Clinical Assistant Professor of Radiology.
Delbert Delso Neis, A.B., M.D., Assistant Professor of Surgery.
Oliver Clarke Nickum, A.B., M.D., Instructor in Medicine.
Donald Charles Nilsson, A.B., M.D., Associate in Pediatrics.
John Frederick Nilsson, M.D., Instructor in Surgery.
William Edwin Nutzman, A.B., M.D., Assistant Professor of Internal Medicine.
Byron Bay Oberst, B.A., M.D., Associate in Pediatrics.
Richard Eugene Ogborn, B.A., B.Sc., M.Sc., M.D., Associate in Internal Medicine.
Loland J. Olson, A.B., M.D., Associate in Obstetrics and Gynecology.
Gerald Roy Patterson, B.Sc., M.Sc., Ph.D., Instructor in Neurology and Psychiatry.
Paul David Pedersen, M.P.H., M.D., Instructor in Preventive Medicine.
Earl Stanley Pederson, A.B., M.A., Ph.D., M.D., Assistant Professor of Radiology and Anatomy.
Maurice Lewis Pepper, B.Sc., M.D., Assistant Professor of Internal Medicine and Associate in Cardiology.
George Henry Petser, A.B., M.D., Associate in Surgery.
Paul L. Peterson, M.D., Clinical Assistant Professor of Otorhinolaryngology.
LaVerne F. Pfeifer, B.A., M.D., Clinical Instructor in Urology.
George Francois Pinne, M.D., Assistant Professor of Dermatology and Syphilology.
Louis Thomas Placeck, B.Sc., M.D., Assistant Professor of Otorhinolaryngology.
Stanley Ernest Potter, M.D., Assistant Professor of Surgery.
Carl Joseph Poithoff, B.Sc., M.D., M.Sc., M.P.H., Associate Professor of Preventive Medicine and Public Health.
Eugene Francis Powell, A.B., Ph.D., Premedical Adviser, Assistant Professor of Zoology and Anatomy.
Peyton Thomas Pratt, A.B., B.Sc., M.D., Assistant Professor of Internal Medicine.
Philip France Howard Pugh, B.Sc. in Med., M.Sc., M.D., Lecturer in Neurology and Psychiatry.
Donald Frederick Purvis, M.D., Clinical Assistant Professor of Internal Medicine.
Robert Houston Razgorske, M.D., Assistant Professor of Ophthalmology.
John Arthur Rasmussen, M.D., Assistant Professor of Surgery.
John Philbrick Redwick, B.Sc., M.D., Associate Professor of Obstetrics and Gynecology.
E. Burkett Reed, B.Sc., M.D., Clinical Associate Professor of Internal Medicine.
Barney Benjamin Rees, A.B., M.A., M.D., Associate in Surgery.
Norman Davis Rendeer, M.D., Associate in Neurology and Psychiatry.
Rose M. Reynolds, A.B., Assistant Professor of Anatomical Illustration.
Charles Erskine Richards, B.Sc., M.D., Associate Professor of Internal Medicine and Director of Clinics.
Floyd O. Ring, B.Sc., M.D., Associate in Neurology and Psychiatry.
Jerome Riffez, A.B., M.D., Clinical Associate Professor of Internal Medicine.
George Edwin Robertson, B.Sc. in Med., M.D., Professor of Pediatrics.
Earl Alvin Rogers, B.A., M.D., Associate Professor of Preventive Medicine.
Charles Morton Root, M.D., Associate in Internal Medicine.
Jerman Walter Rose, B.Sc., M.D., Associate Professor of Neurology and Psychiatry and Clinical Director of Children's Service, Nebraska Psychiatric Institute.

Robert Carl Rosenlof, M.D., Instructor in Internal Medicine.

William Leonard Rumbolt, A.B., M.D., Assistant Professor of Obstetrics and Gynecology.

Earl Cuddington Sage, B.Sc., M.D., Clinical Director of the School of Medical Technologists.

Robert Alben Slabaugh, B.Sc., M.D., Instructor in Internal Medicine.

Dorothy Irene Smith, A.B., M.D., Assistant Professor of Pediatrics.

Earl S. Taulbee, A.B., Ph.D., Assistant Professor of Obstetrics and Gynecology.

Doris Maxine Spragg, B.A., M.A., Assistant Professor of Pediatrics.

George H. Scofield, A.B., M.S.S.W., Associate Professor of Pediatrics.

Rudolph Frederick Slover, Ph.D., M.D., Associate Professor of Pathology.

Eugene Earl Simmons, B.Sc., M.D., Professor of Neurology and Psychiatry.

Herbert Blake Saichek, B.Sc., M.D., Associate Professor of Internal Medicine.

Anton William Stoog-Smith, B.Sc., M.D., Clinical Assistant in Pathology.

Robert Aiken Slabaugh, B.Sc., M.D., Clinical Assistant in Internal Medicine.

Doris Maxine Spragg, B.A., M.A., Clinical Assistant in Pathology.

Frank Paschal Stone, A.B., M.D., Clinical Assistant Professor of Pediatrics.

Robert D. Vickery, A.B., M.D., Clinical Assistant Professor of Pediatrics.

Robert Charles Therien, B.Sc., M.D., Clinical Assistant Professor of Pediatrics.

Robert E. Taylor, A.B., M.D., Clinical Assistant Professor of Pediatrics.

Mary S. Tice, M.D., Clinical Assistant Professor of Pediatrics.

James Perry Tollman, B.Sc., M.D., Associate Professor of Pathology.

Doris Maxine Spragg, B.A., M.A., Clinical Assistant in Pathology.

Donald Clay Vroman, B.Sc., M.D., Clinical Assistant Professor of Pediatrics.

Chester Hill Waters, Jr., A.B., M.D., Clinical Assistant Professor of Pediatrics.

Frederick S. Webster, A.B., M.D., Clinical Assistant Professor of Pediatrics.

COLLEGE OF MEDICINE

History.—The legislative Act of February 15, 1869, provided for the formation of the University of Nebraska at Lincoln, and included provision for a college of medicine. In 1883, the University of Nebraska College of Medicine was established at Lincoln. It continued in operation until the 1887 session of the legislature withdrew its appropriation, necessitating discontinuance of the college on May 19, 1887. The Omaha Medical College, incorporated at Omaha in 1881, became a part of the University of Nebraska in 1902. The merger resulted in the first two years of the four-year medical course being given in Lincoln and the last two years in Omaha. Since 1913 the entire four-year course has been given in Omaha.

Standing.—Nebraska legislatures, since 1913, have appropriated more than three million dollars which the Board of Regents has devoted to the construction and equipment of buildings on the University of Nebraska College of Medicine campus at Omaha. In the 1953 Session of the Nebraska Legislature a bill was passed to raise $6,000,000 within the next five years to build an addition to the University of Nebraska Hospital and to increase other teaching facilities on the College of Medicine campus. The campus provides for the instruction of students in the preclinical sciences, and in the University Hospital and Dispensary, for clinical teaching and experience. A strong faculty has met the demands of the expanding requirements of medical education, and, through affiliated hospitals, adequate clinical facilities have been provided.

The College of Medicine meets the requirements of the most exacting state examining and licensing boards. Its diploma grants the holder all privileges accorded to graduates of any medical college in the United States. It is a member of the Association of American Medical Colleges and is approved by the Council of Medical Education and Hospitals of the American Medical Association. It maintains high standards in instructional staff and content of courses.

The course of study in medicine covers four years of 36 to 48 weeks each. The first two years in medicine include those laboratory sciences which form the basis for the clinical studies of the last two years. The clinical application of laboratory subjects is emphasized and introductory clinical subjects are given in the second year. The last two years are spent largely in the study of disease in clinics of the hospital and outpatient department. The objective method is followed in laboratories and clinical instruction. In all courses students are encouraged to do a large amount of individual work and are arranged in small groups to meet both laboratory and clinical instructors.

APPLICATIONS FOR ADMISSION

Printed application forms are available at the College of Medicine, University of Nebraska, 42nd Street and Dewey Avenue, Omaha 5, Nebraska. Students applying for any given class must have their applications completed by December 1st of the year preceding intended entrance.

In considering scholastic records of applicants, greater weight is given to the quality of work than to an excess of credit hours over the minimum required number. High scholarship alone does not assure acceptance. Consideration is given also to appraisals of character, personal interviews, scores on the Medical College Admission Tests and general fitness and promise of the candidate.

A very limited number of students from states other than Nebraska and not more than two students from foreign countries will be accepted to
the freshman class. It is the policy of the Committee on Admissions and Scholastic Standing to require that foreign students spend at least one year, and preferably two, studying in an undergraduate college in this country before applying for admission to the College of Medicine. This policy has been established in order both that the applicant may become familiar with the language, customs, and methods of teaching in the United States, and that the Committee may obtain a better evaluation of his qualifications and preparation for medicine.

APPLICATION PROCEDURE

Applicants for admission to the College of Medicine must present the following:

1. A completed application form sent from the College of Medicine.
2. A small recent, unmounted photograph, preferably 2 x 2 inches.
3. An official transcript sent directly from the high school attended, showing the grades and credits earned.
4. An official transcript sent directly from each college or university attended.
5. Two character appraisals from professors of premedical sciences, preferably chemistry, zoology or physics.
6. The result of the Medical College Admission Test. Applicants will take the test by the fall of the year preceding intended entrance. Information concerning this test may be obtained from the premedical advisor of the College of Arts and Sciences or from the Education Testing Service, 20 Nassau Street, Princeton, New Jersey. Students should communicate directly with that office for specific details.

A personal interview with members of the Committee on Admissions and Scholastic Standing is required. Interview sessions will be held at the campus of the University of Nebraska in Lincoln in November or December. Interviews will be given at the College of Medicine at stated dates. Inquiries should be made of the premedical advisers at Lincoln or of the Assistant Registrar of the College of Medicine for appointments for interviews.

A fee of $5.00 must accompany the request for application of a student who is not a legal resident of Nebraska. Remittance should be made by check or postoffice money order and made payable to the University of Nebraska College of Medicine. Currency should not be sent. The fee will cover the cost of handling the application and is not refunded.

Any applicant who has previously applied for admission and has not been accepted or who fails to enroll after an acceptance must re-apply in the regular manner if he wishes consideration for a subsequent year.

Advanced Standing.—Application for admission to the second or third year medical classes will be considered only from students attending medical schools approved by the Council on Medical Education and Hospitals of the American Medical Association and provided a vacancy exists. An applicant for admission to advanced standing must follow the regular application procedure and must furnish evidence that he has satisfactorily completed courses equivalent in kind and amount to those taken by the class to which admission is sought, and must present also a letter of honorable dismissal from the dean of the medical school last attended. The University of Nebraska College of Medicine reserves the right in
every case to give examinations in any or all subjects in which credit is requested.

No student coming from another school will be allowed any privileges in this school which would have been denied him in the school which he leaves.

No student will be admitted to advanced standing in any class while he has a delinquency in any subject. No student may become a candidate for graduation unless he has spent the last two years in residence at this college.

In accordance with the recommendation of the Association of American Medical Colleges, the College of Medicine does not grant any time credit toward the Doctor of Medicine degree to holders of a bachelor's degree; this means that the total time spent by each student taking his medical degree must include as a minimum four years of registration in a medical college, the last two years of which must be in residence in the University of Nebraska College of Medicine.

The granting of transfer credit is at the discretion of the Committee on Admissions and Scholastic Standing. Admission to any class does not necessarily carry with it credit in all work previously done by the class since the Committee on Admissions and Scholastic Standing has the right to demand satisfactory evidence of the completion of previous work in that subject equal to that required of the students of this College, and in case the work is not equal to such requirement the deficiency stands against the student as an "incomplete" until removed.

If a student has been dropped from another medical school because of poor scholarship or unsatisfactory conduct, he is not acceptable for admission to The University of Nebraska College of Medicine.

**SPECIFIC EDUCATIONAL REQUIREMENTS**

**High School.**—Sixteen secondary school units are required for admission and must include three units in English, two units in one foreign language (ancient or modern), two units in mathematics (one each of algebra and geometry or an equivalent), and one in science (biology, botany, chemistry, physics or zoology).

**College or University.**—The University of Nebraska College of Medicine requires a minimum of three years of college work (90 semester hours or 135 quarter hours) in an accredited college. Not more than 65 semester hours credit will be recognized from a junior college. Specific minimum premedical course requirements are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEMISTRY</td>
<td>14</td>
</tr>
<tr>
<td>The requirement is an adequate complete course in general chemistry and adequate complete course in organic chemistry. Should these total less than fourteen semester hours, they will be subject to approval by the Admissions Committee.</td>
<td></td>
</tr>
<tr>
<td>BIOLOGY</td>
<td>8</td>
</tr>
<tr>
<td>Four hours must be zoology. Half of the credit must be in laboratory work.</td>
<td></td>
</tr>
<tr>
<td>PHYSICS</td>
<td>8</td>
</tr>
<tr>
<td>Must include mechanics, sound, heat, electricity, magnetism and light.</td>
<td></td>
</tr>
<tr>
<td>ENGLISH</td>
<td>6</td>
</tr>
<tr>
<td>Six semester hours of English composition and literature. Students should develop ability to speak and write good English. Those found deficient in use of written or spoken English will not be permitted to enter upon or continue the medical course.</td>
<td></td>
</tr>
<tr>
<td>FOREIGN LANGUAGE</td>
<td>6-18</td>
</tr>
</tbody>
</table>
| Students must have reading knowledge of a foreign language. Two years of a selected modern or classical foreign language at the college level, or
equivalent, is required. This requirement may be met by satisfactorily completing a fourth-semester course in the elected language without having earned college credit in the more elementary courses. Or it may be met by certification of proficiency equal to second-year college level in the elected language.

**ELECTIVES**

A sufficient number of electives are required so that combined with required hours above the total is ninety. It is urged that electives include subjects not related to specific medical requirements. Recommended subjects include psychology, social studies, history, philosophy and other humanities, chosen to give a broad cultural background.

Credits offered from professional schools which do not regularly receive arts college credit are not accepted for premedical college requirements.

Semester hours of credit in subjects specifically offered in the medical college cannot be used in satisfying admission requirements.

A student applying to the College of Medicine should have a grade average of at least 6.0 in all the required science courses. The grade point of 6.0 is based upon the grading system of the University of Nebraska. The equivalent in other grading systems will be determined by the Assistant Registrar’s Office, College of Medicine, and the Committee on Admissions and Scholastic Standing. In determining the equivalent, the grading system and the scholarship requirements of the college or university wherein the work was completed will be taken into consideration.

**REGISTRATION AND ADMISSION TO CLASSES**

When an applicant receives notice that he has been accepted for entrance to the College of Medicine, he is required to send a deposit of $25.00. This is applied as part payment of the tuition fee for the first quarter or is forfeited if the applicant fails to register in the class for which he was accepted.

Veterans entering under PL-550 must submit on day of registration a Certificate of Education and Training (VA Form 7-1993) approved for a program with objective of Doctor of Medicine Degree.

Registration is accomplished on the day indicated in the official calendar. A fee of $3.00 is charged any student who, unless excused by the dean, seeks to register later than this day. A fee of $2.50 is charged for reregistration. Any change whatever in a registration once made is considered as a reregistration. No work done in the College of Medicine may be granted credit without proper registration. No student may add any subject to his schedule or drop from it any subject for which he has been regularly registered without written permission from the dean.

**Class Standing and Examination.**—The standing of a student in any course is determined by the instructor in charge of the subject through examinations, personal contact, and observation of work. The passing grade for subjects of the first and second medical years is 4 (70 to 74). However, a student who fails to make a yearly average of 5 (75 to 79) must pass an oral examination in all of the subjects of the year just completed before being permitted to register for the following year. A student is allowed to take only one recapitulation examination. The passing grade for the third and fourth years is 5 (75 to 79).

A course, which for a good reason has not been completed, may, if of passing grade, be marked “incomplete.” Such incomplete must be re-
moved by the end of the first quarter in which the course is again offered or it becomes a failure.

A failed subject must be absolved by reregistration in and satisfactory completion of the subject at or before the next offering in the college schedule. A reregistered subject takes precedence over all other subjects. A minimum grade of 5 in each course is required of students repeating work during the first two years. A student who has failed twice here or elsewhere in the same subject is not eligible for registration in that subject at this college.

Whenever at the end of any quarter a student is delinquent in half or more of his registered hours, his name is automatically dropped from the rolls of the College of Medicine and his registration cancelled.

Student discipline will be handled by the Dean of the College of Medicine. A student who by quality of work or conduct indicates an unfitness to enter the medical profession may be required at any time to withdraw from the medical college. Recommendations for suspensions, dismissals, or other suitable action as the case warrants, will be made to the Faculty of the College of Medicine, the Chancellor, and the Board of Regents. The Dean may appoint a committee of the Faculty to advise him on such matters.

**Absence or Withdrawal.**—Attendance at less than 80 per cent of the scheduled lectures and recitations or 85 per cent of the scheduled laboratory and clinical hours constitutes a failure in any course and shall be so reported.

The Dean of the College of Medicine is the adviser of all students in the College of Medicine. A leave of absence for a short time may be granted by the dean. This is merely a justification for absence and not an excuse from any work. If a student in good and honorable standing finds it necessary to withdraw from the University before the close of a quarter, the dean grants him permission to do so. If he is in good standing and is not a minor he is given honorable dismissal from the University at his own request; if a minor, at the request of his parents or guardian.

**Requirements for Graduation**

The degree of Doctor of Medicine is granted only under the following conditions:

1. The candidate must be at least 21 years of age.
2. He must possess a good moral reputation.
3. He must have complied with all the requirements of admission.
4. He must have pursued the study of medicine for at least four years and must have passed all required courses and examinations of the College of Medicine, University of Nebraska. The last two years work must have been taken at this institution.
5. He must have written an acceptable paper on an examination posed by the Examinations Committee at the end of the senior year, and also have passed all departmental examinations.
6. He must have written and presented an acceptable, typed senior thesis.
7. He must have discharged all indebtedness to the University of Nebraska.

The degree of Doctor of Medicine *cum laude* may be conferred upon a student who has made a high scholastic record, and who, in addition,
has in the course of his medical studies performed some original research. Such a student must be recommended by the department in which the original work was done. Usually he must stand in the upper ten per cent of his class.

Courses Leading to the Degrees of Bachelor of Arts or Bachelor of Science and Doctor of Medicine.—Students who have transferred from the University of Nebraska College of Arts and Sciences may at the end of their fourth year earn the Bachelor of Arts degree or Bachelor of Science degree by:

1. Completing the group requirements of the College of Arts and Sciences.
2. Completing two minors or one major.
3. Using the subjects of the first year of the medical course as a major, all of which must be completed satisfactorily.

Both of these degrees are conferred by the College of Arts and Sciences at a Commencement on the Lincoln campus.

Candidates for baccalaureate degrees in institutions other than the University of Nebraska may arrange with their colleges to accept transcripts of the work of the first two years in medicine to apply to such degrees, or otherwise satisfy the requirements of those institutions.

Course Leading to the Degree of Bachelor of Science in Medicine.—Only students presenting premedical college credits of high standard and who have satisfactorily completed all courses of the first two years in medicine, the last year of which shall be in residence in this institution, but who have not fulfilled the requirements for the degree of Bachelor of Science or Bachelor of Arts in the College of Arts and Sciences, may become candidates for the degree of Bachelor of Science in Medicine.

FEES AND EXPENSES

All students who are legal residents of Nebraska and who carry a full student load will pay a single annual fee of $525.00. Nonresident students will be charged a single annual fee of $765.00. Adjustments may be made in the case of students carrying less than the full student load. One-half of tuition is due at registration, the balance on February 1.

The annual fee includes matriculation, registration, medical, laboratory, library, diploma and course fees. In case of undue usage of materials or breakage or loss of equipment other than that allotted to each course, and because of negligence on the part of the student, a penalty charge will be levied based on the fair value of such material and equipment so lost or broken.

Fee Refunds.—A student who withdraws from the University during any term for which he registered is entitled to claim a refund of a portion of his fees. A refund schedule is available at the Finance Office.

Miscellaneous Fees.—The following fees are not included in the schedule listed above:

- Transcript—one copy furnished free
- Each additional original ................................ $ 1.00
- Degree in absentia ......................................... 10.00
- Special examination, each course ......................... 5.00
- Photostatic copy of diploma, each copy ................. .35
- Cap and gown rental fee—amount fluctuates.

Expenses.—Board may be obtained in the vicinity of the College campus at an average cost of $15 to $20 a week and comfortable rooms for $30 to
$40 a month. Students rooming together may obtain comfortable rooming quarters at slightly less than this amount. One hundred dollars a year should be allowed for books and instruments. The average expenses of the student for a school year, including board and room, books, instruments (exclusive of microscope and other special equipment) and all fees is between $1,400 and $1,600.

MISCELLANEOUS INFORMATION

Form of Payment.—To avoid misunderstanding as to the amount charged for fees, checks on personal accounts will be received only when written for the exact amount of the fees. Parents or guardians should write checks for fees and for other expenses separately; if this is not done, students should deposit funds in a local bank and give personal checks for the amount of the fees.

Remittance by mail should be by draft, money order, or cashier’s check. Do not send coin or money except by registered mail. It is impossible to trace money lost in the mail and University officials cannot be held responsible for such loss.

Housing.—Although the College of Medicine has no on-campus housing for medical or technology students, the Registrar’s Office maintains listing of rooms, apartments, duplexes and houses reported available.

Nonresident Students.—According to the Nebraska law, any student whose legal residence is not Nebraska is required to pay the nonresident fee. Those who enter the state to attend any institution of learning will be considered nonresidents until they prove that they are legal residents as defined by the state statutes.

If a student wants to apply for exemption from the nonresident fee, he must get a residency application blank from the Office of the Comptroller and fill it in completely. This application blank must be notarized and then filed in the Office of the Comptroller.

The deadline for filing this application is the end of the sixth week of the term for which the tuition fee has been charged.

Students who are interested in the requirements for residency may write the Comptroller’s Office, University of Nebraska, Lincoln 8, Nebr.

Microscopes.—Students are required to provide suitable microscopes for their own use. Inquiries regarding specifications for microscopes as recommended by the faculty may be obtained by addressing the Assistant Registrar, College of Medicine.

STUDENT HEALTH SERVICE

The Student Health Service, which is a part of the Division of Preventive Medicine, has as its function the protection and conservation of the health of medical and nursing students. Periodic physical examinations are given, including those at time of entrance, and immunizations of proved worth are offered. Laboratory, X-ray and hospital facilities are available to those who need them. Ill students may report here for examination and treatment.

Health insurance which is available to University students on the Lincoln campus is also available to students on the Omaha campus.

GRADUATE WORK

Graduate Committee: Professors McIntyre, Chairman, Bisgard, Hunt, Latta, Jacobi, McFadden, Schenken.
Graduate work leading to the Master of Science or Doctor of Philosophy degree is offered at the College of Medicine under the rules and regulations of the Graduate College. Students registering for graduate work in Medical Sciences must comply with the general requirements of the Graduate College and special rules governing the graduate work in Medical Sciences. Upon recommendation of the Graduate Committee at the College of Medicine admission to graduate work in the Medical Sciences may be granted to students who are in any of the following categories:

1. Students with Bachelor of Science or Bachelor of Arts degrees from recognized colleges or universities who attain an average grade of 7 in a qualifying examination in the basic medical sciences.
2. Students with a baccalaureate degree and the degree of Doctor of Medicine with an acceptable record.
3. Students with a master's degree from an acceptable college and presenting the equivalent of two semesters credit in the basic medical sciences.
4. Students from the College of Medicine who have bachelor's degrees, who have completed the first two years of the regular curriculum in the College of Medicine or its equivalent, and who have attained an average grade of 7 in their courses or passed a qualifying examination in the basic medical sciences with a grade of at least 7.

For admission to work in the Department of Neurology and Psychiatry, leading to the degree of Master in Psychiatric Nursing, a student must have completed an approved professional program in nursing with a bachelor's degree from a recognized college or university. Acceptable evidence will also need to be submitted on the student's personal qualifications for psychiatric nursing.

Graduate students who are admitted with deficiencies in the medical sciences may, by permission of the Graduate Committee and approval of the Dean of the Medical College, register for courses on the College of Medicine campus in preparation for their qualifying examinations. Such graduate students may, upon satisfying the examiners in the medical sciences, make application to the Graduate Committee for graduate credit in certain medical courses successfully completed. The Graduate Committee may make recommendation for such credit on the basis of the attainment and aptitude of the applicant. In any case at least one-half of the total credit for the Master's degree shall be taken in graduate courses listed as 350 and above. Medical courses for which partial or total graduate credit may be allowed are listed under the respective departmental headings in the sections which follow listing courses of instruction.

A student who wishes to become a candidate for an advanced degree must select work in the departments which have been approved to offer graduate work. The distribution of graduate work should be such that not more than two-thirds of the total program, including thesis research, should be in the major field of study and the remainder in at least one other department for candidates for the Master's degree or at least two other departments for candidates for the Doctor of Philosophy degree.

Candidates who select one of the pre-clinical departments for their thesis research may come from any of the four categories (for admission) listed above. They may select other pre-clinical departments for additional work.
Candidates who select one of the clinical departments for their thesis research must have qualified for admission through category 2 above. They must select pre-clinical departments for additional work. Such students may be admitted to the Graduate College and awarded Graduate Fellowships after one year of service as Residents. During their terms as Fellows these students will be enrolled in the Graduate College and their programs will be governed by the rules of that College. While fulfilling their minor (pre-clinical) requirements these Fellows must be assigned to the minor department or departments on a full-time basis during at least one-third of the total hour requirement for the degree sought.

Graduate students may be required to obtain proficiency in their field of concentration by participation in the instruction of medical students for at least one quarter in a regularly required course in the College of Medicine. A student who fails to earn an average grade of at least 7 may not continue his program of study without special permission of the Committee on Graduate Studies. The final oral examination for all advanced degrees will involve a defense of the thesis and will determine the candidate’s knowledge of the fundamentals in the field of medical science, and their integration with the special fields of study.

**GRADUATE FEES**

A resident student who originally registers for less than 12 quarter hours will be charged at the rate of $10.50 for the first hour and $4.50 for each additional hour up to and—including the twelfth quarter hour. Quarter hours added thereafter will be free of charge.

A change of registration fee of $2.50 is charged in addition to the regular tuition for any changes made from the original registration.

A nonresident student who registers for less than 12 quarter hours will be charged $21.00 for the first hour and $9.00 for each additional hour as well as the $2.50 change-of-registration fee if the original registration is changed.

All students who are legal residents of Nebraska and who carry a full schedule (12 or more hours) in any quarter will pay a fee of $80.00 per quarter. Nonresident students will be charged a fee of $160.00 each quarter. The single fee includes—in addition to course charges—registration, library, diploma, and Student Health fees. For additional miscellaneous fees, consult the Bulletin of the Graduate College.

For thesis publication and binding fees, consult the Librarian of the College of Medicine before starting thesis.

**Teaching and Research Assistantships.**—A graduate student holding an appointment as a teaching or research assistant during a quarter or summer session is required to pay only the administrative fee, providing the appointment carries a University stipend equal to at least the maximum tuition fee of $120.00 for a quarter, or for the summer. If the stipend received by an assistant for an academic year (three quarters) is equal to at least the maximum fee for all four quarters ($480.00), he will pay only the administrative fee for the summer session following, or intervening between quarters for which he is appointed, even though he does not hold an appointment for the summer session.

The administrative fee is $20.00 for a registration of 12 or more hours during a quarter. If an assistant is registered for less than 12 hours during a quarter, he pays only a registration fee of $3.50 for the first hour and $1.50 for each additional hour.
Graduate Fellowships.—A student must carry a full program of graduate study or research for each quarter during which the fellowship stipend is received. Recipients of Regents Tuition Fellowships are required to pay only the administrative fee of $20.00 for each quarter.

GRADUATE REGISTRATION

Registration will be accomplished during the early part of each quarter in consultation with the chairmen of the different departments in which the graduate work will be carried on.

UNIVERSITY STAFF EXEMPTION

Members of the academic-administrative staff employed full time may be permitted to register for not more than 4 credit hours per quarter, or 5 credit hours if a single 5 credit hour course, for which the charge is $1.00 plus a $5.00 matriculation fee. All such registrations must carry the signed approval of the chairman of the department and the dean or director of the college, school or division in which the staff member is employed during the period for which he is registered.

Academic-administrative staff members of the University employed by the Nebraska Psychiatric Institute are eligible for this staff exemption.

POSTGRADUATE WORK

Postgraduate Committee: Assistant Professor W. D. Angle, Chairman; Professors Bennett, Holly, Lee; Assistant Professors Brush, Kammandel; Associate Eagle.

Postgraduate courses are offered to practicing physicians and ancillary medical groups through the Office of Postgraduate Affairs. These courses number from fifteen to twenty each school year and are presently provided as a cooperative project between the College of Medicine and the University Extension Division.

Well-known authorities from throughout the country and from our own campus take part in these programs as guest lecturers. The course fee is $10.00 per day, and the average length of these courses is two and one-half days. Each course is announced by mail to each practicing physician in the state, and to others interested, at least one month prior to the course date.

All clinical courses are approved for hour-for-hour Category 1 credit by the American Academy of General Practice. Further information may be obtained by writing the Office of Postgraduate Affairs.

LABORATORY FACILITIES

Anatomy.—The Department of Anatomy occupies the third and fourth floors of the North Laboratory Building. The rooms are well lighted and ventilated. The “unit room” system—each unit accommodating four or eight students—has been adopted as superior to that of a large common dissecting room. The state anatomical law provides ample material for dissection. In the laboratory for microscopic anatomy individual desks, lockers, reagents, etc., are at the student's disposal, as are also excellent collections of histological and embryological material, models, charts, etc.

Biochemistry.—This department occupies the entire fourth floor of the South Laboratory Building. The well-equipped student laboratory can accommodate 48 students. Adjoining it are a classroom, balance room, “walk-in” incubator, and student stock room. The department also has several large research laboratories equipped with all of the modern tools of biochemistry. Among these are analytical and preparative ultracentri-
fuges, filter paper and zone electrophoresis apparatus, chromatography cabinets, Warburg apparatus, spectrophotometers, special balances, flash evaporator, blood gas apparatus, micro-Soxhlet extraction battery, as well as the usual items of a research laboratory.

Microbiology.—Occupying the first floor of the North Laboratory Building, this department uses the same student laboratory as Pathology. There are excellent facilities for support of the teaching exercises and for support of an active research program being carried out. The diagnostic work for the University Hospital provides material useful in the class exercises. An extensive collection of color lantern slides, mounted specimens and charts is available for the teaching exercises.

Pathology.—The office and classroom area is principally on the second floor of the North Laboratory Building. The student laboratory is utilized also by Microbiology. Equipment, loan sets of slides, and apparatus, with the exception of microscopes, are provided for the student. Approximately 7,000 color lantern slides are used for the teaching exercises. The Pathologic Anatomy and Clinical Pathology laboratories of the University Hospital provide material and support the teaching program.

Physiology and Pharmacology.—Experimental physiology and pharmacology occupies the fourth floor, part of the second, and the sixth floor of the South Laboratory Building. Laboratory exercises of the medical students are carried out on part of the fourth floor, and research work for graduate students in the remainder of the space. The main laboratories accommodate forty-four students in each section with separate tables and lockers for each group of students. There is a separate mammalian laboratory in which students work in groups of five.

There are special rooms for specialized research instruments, including space provided for an ultracentrifuge and for spectrophotometric work. In addition there is a well-equipped workshop for the construction and repair of a wide variety of apparatus.

Museum.—The pathological museum of the College of Medicine contains about 5,000 specimens. Nearly every variety of pathological lesion is represented and the constant addition of fresh material from the autopsies performed continually adds to its interest. In addition to the gross specimens are thousands of microscopic sections and a large collection of wax reproductions of various lesions. The museum is an important and necessary adjunct to the teaching of pathology and of clinical medicine.

Clinical Pathology.—For clinical clerk service a central hospital laboratory is provided, in which clinical laboratory work on assigned cases is done under supervision. For tissue examination, a special laboratory is located on the ground floor of the first hospital unit, with necropsy room adjacent.

FELLOWSHIPS, GRADUATE ASSISTANTSHIPS AND SCHOLARSHIPS

Fellowships are available to students who qualify for graduate study and research in the medical sciences. Application should be made to the chairman of the department concerned.

Graduate Assistantships are available to students of exceptional ability to give them opportunity to do research in the medical sciences and fulfill the requirements for a Master of Science or Doctor of Philosophy degree.

Jetur Riggs Conkling and Jennie Hanscom Conkling Foundation.—The will of the late Clementine C. Conkling provides for the creation of a trust to be known as the "Jetur Riggs Conkling and Jennie Hanscom Conkling
Foundation,” the income of which is used by the Regents of the University of Nebraska in providing scholarships for deserving medical students. Scholarships may be awarded only after the close of the students' first year in the Medical College. These scholarships are awarded on the basis of recommendation by the student assistance committee.

**August Frederick Jonas Senior Memorial Fund.**—This fund was established by Mrs. A. F. Jonas of Omaha to provide assistance for needy students who are judged worthy both for scholastic attainment and for character and promise. This fund is administered under the direction of the Student Assistance Committee.

**The Anna Glock Fellowship in Cancer.**—The will of the late Anna Glock provided money for research and treatment of cancer during a five-year period. A fellowship is awarded annually to the person who has had sufficient training and qualifications to pursue these studies. Applications should be addressed to the Dean.

**The Sidney R. Kent Fellowship in Medicine.**—An award of $500 is available annually to the student in the College of Medicine who has made the most outstanding record and who desires to pursue further work in medicine. Such study may be pursued either in the University of Nebraska or elsewhere agreeable to the action of the Committee. Details of this award may be learned on application to the Dean's office or to the Sidney R. Kent Committee of Awards.

**The C. W. M. Poynter Foundation.**—A fellowship under the sponsorship of the Poynter Foundation provides a stipend of $1,200 for a period of ten months, during which time the recipient will be expected to devote his entire time to research under the direction of any department of the College of Medicine. Applicants should have completed two or more years of medicine and have demonstrated ability and aptitude for investigative work. The recipient may, if he desires, become a candidate for an advanced degree in the medical sciences.

**LOANS**

The University of Nebraska College of Medicine has available loans for deserving students who, in an emergency, need financial assistance while attending medical school. These funds are generally reserved for students who have completed one or more years of the medical courses and established themselves as able and worthy. Application for any of the following loan funds should be made to the Student Assistance Committee, College of Medicine.

**The Josephine Chamberlin Loan Fund.**—On the retirement of Miss Josephine Chamberlin as Superintendent of the University of Nebraska Dispensary, on June 11, 1946, a fund was established in her honor. From this fund loans are available to students of the College of Medicine and the School of Nursing. Application should be made at the Dean's office.

**The Faculty Woman's Club of the University of Nebraska College of Medicine Student Loan Fund.**—Available funds will be allotted under the same conditions which apply to loans from other funds.

**Kellogg Fund.**—In April, 1942, the W. K. Kellogg Foundation of Battle Creek, Michigan, gave the College of Medicine $10,000 to be used as a student loan fund, particularly to meet the emergency created by the accelerated war schedule and the consequent loss of student earnings during the summer. An additional grant of $5,000 was made later in the year.
Omaha Medical College Foundation.—This foundation, created in April, 1921, was established largely through contributions received from former professors in the Omaha Medical College. The object of the foundation is to promote the study of medicine and to provide for medical research in the University of Nebraska College of Medicine and to assist worthy students with loans.

Lizzie Oltmans and Frederick Oltmans Student Loan Fund.—In March, 1950, the donors named above paid $1,000 to the University of Nebraska Foundation to be used as a loan fund for undergraduate and graduate students enrolled in the College of Medicine. Applications for these loans are acted upon by the Student Assistance Committee.

Robert H. Storz Student Loan Fund.—This fund was established by Storz Brewing Company in 1952 as an annual sum of $1,500.00 paid to the University of Nebraska. This fund was established to provide loans to students in the College of Medicine who are in need of assistance. Applications should be made through the Student Assistance Committee.

Dr. Carl P. Wagner Memorial Medical Student Loan Fund.—The sum of $500.00 was paid to the University of Nebraska Foundation in 1952. This fund was established to provide loans to students in the College of Medicine adjudged to be worthy and in need of assistance. Application should be made through the Student Assistance Committee.

Award

University of Nebraska College of Medicine Alumni Association Award.—An award of $50.00 is given each year to the senior student presenting the best thesis as judged by the Thesis Committee.

Student and Alumni Organizations

Student Activities Council.—The Student Activities Council governs the organization and regulation of student activities of the College of Medicine and School of Nursing. It serves as an agency through which faculty relationships with student activity may be fostered and maintained. Recognized student groups elect members who serve as representatives in the Student Activities Council. Officers for 1957-58 include: James Carson, President; Hal Mardis, Vice-President; James McGath, Treasurer.

Alumni Association.—Alumni of the University of Nebraska College of Medicine maintain an active organization with headquarters in Omaha at the college. Activities include sponsorship of class reunions, luncheons, dinners and traditional senior reception following Commencement each year. A monthly news bulletin is sent to members. Officers for 1957-58 are: Dr. Stanley M. Truhlsen, President; Dr. S. A. Swenson, Jr., Vice-President; Dr. E. A. Holyoke, Secretary.

The alumni of the medical college offer a prize of $50 for the senior thesis of the year judged best by the Thesis Committee.

Alpha Omega Alpha.—A.O.A. is a non-secret medical college honorary society, membership in which is based upon scholarship and moral qualifications.

Elections are made from the students who have completed nine or more quarters of the four-year medical curriculum and are made by unanimous vote of the active members of the Chapter. Not more than one-sixth of any class may be elected to membership. The University of Nebraska Chapter was organized November 2, 1914.
Student American Medical Association.—Founded in 1950 with the aid of a grant from the AMA, the Student American Medical Association swiftly grew to its present membership of over twenty thousand students, representing sixty-nine medical schools. Serving expressly "to advance the profession of medicine, to contribute to the welfare and education of medical students, to familiarize its members with the purposes and ideals of organized medicine, and to prepare its members to meet the social, moral, and ethical obligations of the medical profession," SAMA offers group insurance plans, an internship evaluation program, and a monthly Journal. Plans for the immediate future include low-interest student loans, new scholarships, and a job placement service.

At Nebraska, among other functions SAMA jointly sponsors "Premed Day" and a series of convocations held regularly throughout the school year. Membership closely approaches one hundred per cent of the student body. Officers for 1957-58 are: James Carson, President; Stanley Serbousek, Vice-President; James McGath, Secretary; Jerome Fuhrman, Treasurer.

MEDICAL CURRICULUM

Departmental Hours.—The course of study outlined is constructed in accordance with the recommendations of the Council on Medical Education and Hospitals of the American Medical Association and of the Association of American Medical Colleges. The University Hospital and Dispensary on the Medical College campus furnish ideal opportunities for bedside clinical instruction in close relation to the scientific departments of the college.

CLINICAL FACILITIES

University Hospital.—The University Hospital forms the largest unit of the group of buildings constituting the College of Medicine. It is the center around which all the activities of the various departments are grouped, making possible a close correlation between clinical and laboratory teaching. The hospital, modern in every respect, contains floor space for 202 beds, and provides for the care of a wide variety of cases.

Patients are received from the several counties of Nebraska and are admitted on the application of a legally qualified practitioner of medicine and chairman of the county board. The ground floor contains an admitting department, diet kitchen, patient’s library, drug room, kitchen, dining rooms, pathological laboratories, necropsy amphitheater, the X-ray department, and the stack room of the library. The first or main floor contains the college and hospital administration offices, registrar’s office, medical records office, medical amphitheater, reading room of the library, office of the medical department, three medical wards, and electro-cardiograph room. The second floor provides four surgical wards similar to those on medicine, faculty conference room, the offices of the School of Nursing, surgery department office, and the photography department. The third floor contains wards for obstetrics, a nursery, a children’s ward, offices of Departments of Pediatrics and Obstetrics and Gynecology, and a central hospital supply as well as the operating pavilion for obstetrics. The fourth floor is situated the operating pavilion with rooms for general surgery and the surgical specialties which will accommodate large and small groups of observers, the hospital laboratory, the laboratory for clinical clerks, and interns’ quarters. Each ward is provided with a large solarium.
The control of the University Hospital rests in the Board of Regents and is administered by the College of Medicine.

University Dispensary.—The dispensary is located in the South Laboratory Building. Separate services, each having its own rooms and equipment, are provided in: dermatology; eye, ear, nose, and throat; genito-urinary diseases; gynecology; internal medicine; neurology; obstetrics; orthopedic surgery; pediatrics; surgery; and urology. These activities furnish a wide diversity of diseases and are organized for the teaching of the senior students, under the supervision of the clinical staff.

Extramural Hospitals.—Bishop Clarkson Memorial, Children’s Memorial, Lutheran, Immanuel Deaconess, Nebraska Methodist, Hattie B. Munroe Convalescent Home, Douglas County and Veterans hospitals in Omaha and Bryan Memorial and Lincoln General hospitals in Lincoln are available for regular or special clinics as needed. Clinics in psychiatry are provided at the Nebraska Psychiatric Institute. Members of the University faculty are on the staffs of all these hospitals.

Hospital Appointments.—Graduates of the College of Medicine are afforded a wide choice in the selection of internships. Twelve internships and thirty-four residencies in the major specialties are available at the University Hospital.

Medical Social Service Department.—The Medical Social Service Department provides a service to the patient and to the doctor. It interprets the medical findings and recommendations to the patient and his family and gives to the doctor information regarding the economic, social and cultural problems of the patient. This information gives the doctor a better understanding of the patient and enables him to evaluate better the patient’s ability to carry out his orders.

SCHOOL OF NURSING

The School of Nursing, which is a part of the College of Medicine, affords three years of professional education following one year of liberal arts in an accredited college. The immediate administration of the School of Nursing is provided through the director and the faculty. The program of instruction is given by the faculties of the University of Nebraska which includes the College of Arts and Sciences, Teachers College, the College of Medicine and the School of Nursing. Students are admitted as candidates for the diploma of graduate nurse and as candidates for the degree of Bachelor of Science in Nursing. The School of Nursing Building on the College of Medicine campus provides residence and educational facilities for the student nurses. Requests for bulletins and application blanks should be made to the Director, School of Nursing.

LIBRARY FACILITIES

The College Library is located in the Hospital Building within easy access from the various laboratories and stands as a vital common interest to the laboratory and clinical branches of medical instruction. The reading room, seating ninety, furnishes a congenial place for students, faculty, and staff to work. Most of the 826 current journals received are shelved in this room. The book stacks are directly below on two levels and contain 72,000 bound volumes and 30,000 pamphlets, theses, and unbound journals. This collection is the result of purchases and acquisitions extending over more than half a century, building up complete files of important journals in the fields of clinical medicine and the medical sciences in English and foreign languages as well. Here, the student has
access to one of the most complete medical libraries in the Midwest, which offers abundant opportunities for research and additional reading and study. First year students are given instruction in the use of the library including an introduction to all the important medical reference tools and indexes.

Incident to its ordinary function, the Library maintains a collection of material on the history of medicine in Nebraska, graduates of the College, activities of its staff, and keeps a complete file of reprints of the writings of staff members. Incorporated within the library of the College of Medicine are 2,000 volumes of the Omaha-Douglas County Medical Society, periodicals and transactions of the Nebraska State Medical Association and several outstanding private medical libraries of former practitioners of the state.

The resources of the University of Nebraska Libraries in Lincoln are available to students and faculty in Omaha, putting an additional 650,000 volumes at their disposal. Through close cooperation with other medical libraries it is possible for the Librarian to secure interlibrary loan material available in other libraries, including the John Crerar Library in Chicago and the National Library of Medicine in Washington.

**Freshman Year** .................................. 1084
**Sophomore Year** .................................. 1292
**Junior Year** ..................................... 1562
**Senior Year** ..................................... 1680
Courses of Instruction

In the following departments, courses numbered 310–319 are given in the first medical year; courses numbered 320–329, in the second medical year; courses numbered 330–339, in the third medical year; courses numbered 340–349, in the fourth medical year. Courses numbered 350 carry graduate credit. Roman I indicates courses offered the fall quarter, II, the winter quarter, III, the spring quarter, and SS, the summer.

Anatomy

Professors Latta, Chairman, Holyoke; Associate Professors Benjamin, Elliott; Assistant Professors R. R. Best, Chapman, Pederson, Reynolds; Instructors Bach, Cochran; Assistants Burney, Friel, Rasmussen, Rees, Wilson.

In this department instruction is given in gross, microscopic, and developmental anatomy including gross and microscopic anatomy of the nervous system. The work of the department extends through the first two quarters of the first medical year.

All instruction is based on laboratory work carried out under the supervision of the staff. Lectures covering subjects of broad morphological significance are given before the entire class, but for the discussion of details, in conjunction with laboratory work, the class is subdivided into small groups. Every effort is made to correlate the work in gross and microscopic anatomy. A comprehensive examination covering all phases of anatomy is given at the end of the second quarter.

Anatomy—

310. Gross Anatomy (Total 312 hrs I, II)
The course covers dissection of the entire body. This work is carried out in groups of four, each group being assigned a separate room. From time to time table demonstrations and quizzes are required. Through this table teaching the student’s proficiency is increased and calibration of individual progress is made possible. (240 hrs or 10 qtr hrs credit for graduate work.)

311. Embryology-Histology (Total 212 hrs I, II)
A brief survey of the fundamental facts of vertebrate development as based on chick, pig, and human embryos is first undertaken. This is followed by a study of the histogenesis of the fundamental tissues leading directly to their adult histological structure. Morphogenesis and histogenesis of the various organ systems of the body, excepting the nervous system which is studied independently, are similarly correlated with their adult histological and gross structure and with the relationships shown in gross anatomy. Special emphasis is placed on the study of the blood and blood-forming organs and the organs classified as endocrine which are studied somewhat independently. (200 hrs or 9 qtr hrs credit for graduate work.)

312. Neuro-Anatomy (Total 100 hrs II)
Lecture and laboratory
The gross and microscopic anatomy of the nervous system including sense organs. Study is made of the human brain by means of gross dissection; gross and microscopic sections; gross and microscopic study of the eye, and other sense organs by specially prepared demonstrations. Text and lectures aim to integrate the details of laboratory study into functional systems applicable to later physiological and clinical studies. (80 hrs or 7 qtr hrs credit for graduate work.)

350. General and Special Methods in Histological Technique (3-8 qtr hrs) Mr. Latta, Mr. Elliott, Dr. Holyoke
Prereq Anat 310-314
Principles and practice in general methods of preparation of tissue for histological study; special training given in the field of the student’s particular interest.

351. Special Neurohistological and Experimental Neurological Techniques (3-8 qtr hrs) Mr. Latta
Mr. Elliott, Mr. Latta
Prereq Anat 350
Advanced special technical methods of demonstrating the histological structure of nervous tissue and of the experimental approaches to neurological problems.

352. Techniques of Histochrometry (3-8 qtr hrs) Mr. Latta, Mr. Jacob
Prereq Anat 350
Development of methods for demonstrating various chemical features in tissues of the body.

353. Morphological and Experimental Hematology (4-9 qtr hrs) Mr. Latta
Prereq Anat 350
Detailed study of the morphology and inter-relationships between the cells of the blood, blood-forming organs and the connective tissues. Experimental studies of the biological significance of the cellular elements of the blood.
354. Comparative Human Embryology (4-9 qtr hrs) Mr. Latta, Mr. Benjamin, Dr. Pederson
Pre req: Anat 350
Special advanced studies of various features of reproduction and development as illustrated in the departmental and embryological collection.

355. Special Human Embryology (4-9 qtr hrs) Dr. Holyoke, Mr. Latta
Pre req: Anat 350
Advanced study and training in the methods employed in analysis of the factors and potentials operative in mammalian development processes.

356. Advanced Human and Comparative Neuroanatomy and Neurohistology (4-9 qtr hrs) Mr. Elliott, Mr. Benjamin
Pre req: Anat 350
Advanced detailed study of the structural organization of the central and peripheral nervous system of a man and/or various laboratory animals.

357. Morphological Endocrinology (4-9 qtr hrs) Dr. Pederson, Mr. Latta, Dr. Holyoke
Pre req: Anat 350
Advanced study of histological features of the various endocrine glands and morphological effects of endocrine substances on various target organs.

358. Biology of Radiation (4-9 qtr hrs) Mr. Latta, Dr. Pederson, Mr. Chapman
Pre req: Anat 350
Morphological alterations induced in the living organism by radioactive substances.

359. Thesis Research (cr arranged) Staff
Independent investigation of some problem chosen by consultation between student and the staff.

360. Seminar (1 cr per qtr) Staff
By permission
Presentation of problems and accomplishments of investigations conducted by the graduate students and members of the department with critical discussion.

361. Advanced Gross Anatomy (2-5 qtr hrs) Dr. Holyoke, Dr. Pederson
Pre req: Anatomy 310, 311, 312
Studies of general and special gross dissection of the human body.

Biochemistry
Professor Jacobi, Chairman; Associate Professors Beber, Wilder; Associate Research Professor H. L. Davis; Assistant Professors Barak, A. L. Dunn; Assistant Research Professor Carver.

The instruction in biochemistry aims to acquaint students with the basic facts of this science in its strictly physiological background and to elucidate medical problems. Stress is laid on training in laboratory technics, but the practical exercises are planned to give students ample opportunity to learn the theory and practice of various biochemical methods.

The instruction offered in the elementary course is further supplemented with more advanced and specialized courses designed to meet the needs of those who have already acquired considerable clinical knowledge as well as of those desiring to extend their study and research in the application of the principles and methods of biochemistry to problems of scientific and clinical medicine.

The courses offered in this department presuppose adequate preparation in inorganic and organic chemistry and are designed: (1) to furnish training in the fundamentals of physiological chemistry of a scope commensurate with the requirements of the regular medical curriculum; (2) to afford students, not candidates for the M.D. degree, the means for obtaining necessary credits for the Degree of M.S. or Ph.D.; (3) to extend the facilities of the laboratory for special work in selected topics independently of the requirements for a degree. All students who are candidates for a degree are expected to attend Course 310, unless the content of this course has been covered in an acceptable manner elsewhere.

310. Medical Biochemistry (Total 264 hrs II, III) (264 hrs or 14 qtr hrs credit for graduate work except for those completing a graduate major in biochemistry.) Mr. Jacobi and Staff.

The descriptive and dynamic aspects of biochemistry with special reference to the human are presented. Physico-chemical principles are reviewed and applied to understanding normal and pathological physiology. Lipids, carbohydrates, and proteins are discussed from the standpoints of descriptive chemistry, digestion, absorption, intermediary metabolism, and of their relationships in metabolism and nutrition. Principles of biochemistry as they relate to clinical medicine are considered in discussions of blood and other body fluids and tissues; urine; water,
32 COLLEGE OF MEDICINE

electrolyte, and acid-base balance; mineral metabolism; enzymes; vitamins; and
of hormones. The laboratory work is illustrative of the problems and methods
discussed, and the experiments performed by the students constitute an important
and integral part of the course in medical biochemistry.

340. Clinical Biochemistry (12 hrs III) Dr. Beber
Although this course deals with clinical problems, it is presented against a
background of basic biochemistry. The content varies, depending on topics of
current interest as well as on student needs. Such subjects as acid-base balance,
water and electrolyte metabolism, protein metabolism, and antibiotics have been
covered. The biochemical aspects of these topics are emphasized in extensive
relation with clinical material. In this way the biochemistry of clinical medi­
cine is brought into sharp focus.

Biological Chemistry, Electives.—

350. Biochemistry of Disease (3-9 qtr hrs) Mr. Jacobi, Dr. Beber.
Prereq Biochem 310
This course consists of the systematic presentation of the biochemical aspects
of various diseases. Biochemical principles and facts are studied and utilized in
a detailed manner in connection with the pathogenesis, course and treatment of
disease.

351. Vitamins and Nutrition (3-9 qtr hrs) Miss Wilder
Prereq Biochem 310
Each of the vitamins is considered from the standpoint of history, chemistry,
determination, physiological function, and requirements. Nutritional aspects
of proteins, carbohydrates, lipids, and essential mineral elements are reviewed
and integrated with the study of vitamins.

352. Enzymes (3-9 qtr hrs) Mr. Barak
Prereq Biochem 310
This course deals with the chemical nature of enzymes, the methods for their
isolation, the kinetics of enzyme reactions, and the physiological function of
enzymes. The clinical significance of certain of the enzymes is considered.

353. Hormones (2-9 qtr hrs) Miss Wilder
Prereq Biochem 310
Hormones are discussed from the standpoint of chemical nature, isolation,
determination, and function. The hormonal control of metabolism and the rela­
tionship of hormones to enzymes and vitamins are emphasized.

354. Intermediate Metabolism (3-9 qtr hrs) Mr. Jacobi
Prereq Biochem 310
The chemical reactions involved in the anabolism, catabolism, transformations,
and interconversions of proteins, lipids, and carbohydrates are presented in
detail.

355. Water, Electrolyte, and Acid-Base Balance (3-9 qtr hrs) Mr. Jacobi, Dr. Beber
Prereq Biochem 310
This course is an advanced study of the chemical structure and volume of the
various body fluids and the mechanisms whereby they are formed and main­
tained within normal limits. Deviations in various pathological conditions are
interpreted in terms of normal mechanisms.

356. Advanced Biochemical Techniques (3-9 qtr hrs) Staff
Prereq Biochem 310
Instruction in advanced biochemical techniques including paper and solution
electrophoresis, spectrophotometry, Warburg manometry, paper chromatography,
ultracentrifugation and special chemical determinations.

357. Histochemistry (3-9 qtr hrs) Mr. Carver, Mr. Latta
Prereq Biochem 310
The histochemistry of proteins, lipids, carbohydrates, enzymes, and other bio­
logically important compounds will be reviewed with emphasis on the chemistry
of the staining techniques. The application of histochemistry to physiological and
pathological problems will be described.

358. Radioactive Tracers in Biochemistry (3-9 qtr hrs) Mr. Dunn
Prereq Biochem 310
The employment of radioisotopes as a research tool in biochemistry will be pre­
sented. The theoretical and practical aspects of isotope methodology and the ap­
plication of this technique to the solution of biochemical problems will be em­
phasized.

359. Proteins (3-9 qtr hrs) Mr. Barak, Mr. Carver
Prereq Biochem 310
This course consists of a survey of the chemistry and biology of proteins and the
products of their hydrolysis. Descriptive chemistry, methods of isolation.
techniques for characterization, and biological significance of proteins and amino acids will be considered.

360. Physical Biochemistry (3-9 qtr hrs) Mr. Davis
Prereq Biochem. 310 and Chemistry 217 or equivalent

Purely physical phenomena will be reviewed and applied to the interpretation of biological systems. In particular, the course will emphasize the view that colloidal phenomena are concerned in the functioning of all living systems. Colloidal aspects of proteins, lipids, carbohydrates, blood, bone, muscle, nerve, etc., will be scrutinized.

370. Seminar (cr arr) Staff
371. Research (cr arr) Staff

Dermatology and Syphilology

Professor Cameron, Chairman; Associate Professor D. Wilson; Assistant Professor Pinne; Clinical Instructor Barthell.

A foundation in dermatology and syphilology is laid by lectures, clinics, and demonstrations. At the University Dispensary the students are brought in personal contact with patients whom they observe throughout their entire care under the supervision of the attending physician. A large and carefully selected collection of plates and photographs is available for lantern use.

Dermatology—

330. Fundamentals (1 hr weekly, total 8 hrs I) Dr. Pinne
General classification of skin diseases, with lectures and quizzes on anatomy, histology, physiology, pathology, general symptomatology, etiology, diagnosis and treatment.

331. Diagnostic Clinic (1 hr weekly, total 8 hrs I) Dr. Cameron
A more advanced course in dermatology consisting largely of patient and colored slide demonstrations with particular reference to differential diagnosis and treatment.

341. Dispensary (3 hrs weekly, for 8 wks, total 24 hrs SS, I, II, III)
Two weekly 2-hour clinics are held at the University Dispensary. Fourth-year students are assigned to these clinics for practical experience in the diagnosis of skin diseases and the treatment of syphilis.

Internal Medicine

Professors Grissom, Chairman, F. L. Dunn, McCarthy, Simmons; Associate Professors Beber, Baxier, Greene, Kirk, Lehnhoff, Richards; Clinical Associate Professors Reed, Ritter; Assistant Professors Angle, G. N. Best, Bucholz, Graham, Hanks, Holthaus, Hubbard, Hull, Langdon, Lewis, Long, Loonis, Margoil, Morris, Nutzman, Pepper, Pratt, Wright, Wyrens; Clinical Assistant Professors C. K. Elliott, Purvis, Stover, Youngman; Associates Dickerson, Fleishman, Freed, Hem, Jackson, Jordan, E. L. MacQuiddy, Jr., Ogborn, Root; Instructors Albertson, Beenken, Harvey, McGee, MacHaffie, Muskin, Nickum, Rosenlof, Slabough, Spragg; Clinical Instructors Ahrens, Bralusa, Maxwell, B. E. Taylor, Whitlock; Clinical Assistants Dewey, Edwards, Frenning, Graves, Hamilton, Millett, Walvoord, J. T. Williams; Senior Consultants Anderson, E. L. MacQuiddy, Sr., Moody, Niehaus, C. Q. Thompson, W. Thompson; Emeritus Bliss, Bresnaham, Covey, Moser.

It is the aim of instruction in Internal Medicine to establish a broad understanding of patients with disease and to develop a scholarly approach to the study of medical problems. Intensive study by each student of relatively fewer patients is emphasized rather than superficial observation of many patients. The student studies health as well as disease. Small group conferences (four to six students) are utilized, with each member of the group participating. Time is allowed in each weekly program for reading, research and other independent pursuits for the purpose of establishing habits for self-development which will persist for life.

Internal Medicine—

320. History-Taking and Physical Diagnosis (1 hr lecture demonstration; 2 hrs practical weekly, total 108 hrs, I, II, III)
Instruction in history taking and the performance of the complete physical examination. Special methods of examination are taught by members of other departments. Students are assigned in groups of six to each instructor.

330. Principles of Internal Medicine (Total 454 hrs, I, II, III)
The lectures (68) are designed to acquaint the students with fundamental problems encountered in medical practice, and to supplement bedside learning. Students are assigned to the University Hospital, Douglas County Hospital and
to the Veterans Hospital for a period of twelve weeks, where they take histories, do physical examinations and perform designated laboratory tests. Special instruction on tuberculosis occupies two weeks. Small-group instruction in nutrition, hematology, rheumatology and cardiology supplements general assignments.

Grand Rounds at the University of Nebraska Hospital and the Veterans Administration Hospital are held weekly throughout the year and attended by all those assigned to Internal Medicine services. In addition, a combined medical-surgical conference is held once monthly.

341. Clinical Clerkship (Total 148 hrs, SS, I, II, III)
Each student has four weeks of experience studying hospitalized patients in one of the cooperating hospitals: University of Nebraska, Bishop Clarkson Memorial, Nebraska Methodist, Immanuel, Bryan Memorial or Lincoln General Hospital.

342. Dispensary (Total 184 hrs, SS, I, II, III)
Students participate in general medicine and sub-specialty clinics for ambulatory patients during the mornings of an eight-week period. During this period conferences on clinical problems and courses in hematology and ECG are held. A weekly conference in Therapeutics is held cooperatively with the Department of Physiology and Pharmacology.

Internal Medicine Electives.—Professors Grissom, Chairman; Assistant Professors Hull, Pepper, Pratt.

350. The Physiology of Symptoms (1 qtr hr cr per qtr—total 3) Dr. Grissom
351. Problems in Metabolism and Endocrinology, Dr. Grissom
   a. Diabetes Mellitus (1 qtr hr cr per qtr—total 3)
   b. Advanced Endocrinology (1 qtr hr cr per qtr—total 3)
   c. Metabolism and Nutrition (1 qtr hr cr per qtr—total 3)
   d. Rheumatology (1 qtr hr cr per qtr—total 3)

352. Advanced Gastroenterology and Biliary Diseases (1 qtr hr cr per qtr—total 3) Dr. Grissom
353. Advanced Studies of the Cardiovascular Renal System—Drs. Grissom, Dunn, Pepper
   a. Cardiologic Diagnosis and Electrocardiography (4 qtr hr cr per qtr—total 12)
   b. The Management of Heart Disease (3 qtr hr cr per qtr—total 9)
   c. Hypertension and Nephritis (3 qtr hr cr per qtr—total 9)
   d. Peripheral Vascular Diseases (1 qtr hr cr per qtr—total 3)

354. Infectious Diseases, Chemotherapy and Antibiotics (3 qtr hr cr per qtr—total 9) Dr. Grissom
355. Advanced Allergy (1 qtr hr cr per qtr—total 4) Dr. Hull
356. Advanced Hematology (1 qtr hr cr per qtr—total 4) Dr. Pratt

360. Research (er arr) Staff

Medical Bibliography

Librarian Hetzner; Assistant Librarians Farris, Toner

Lectures and conferences are held to acquaint the student with resources in medical literature and bibliographic methods in medical research.

First year students are given instruction regarding the use of reference and indexing tools and receive practical experience in the application of literature-searching techniques. Advanced students may receive instruction and arrange conferences on the bibliography of science and the problems involved in thesis writing.

Medical Jurisprudence

Associate Professor Ellick, Chairman

The course in medical jurisprudence has for its purpose the presentation of medico-legal relationships in order that the student may be familiar with that increasingly pertinent phase of professional life and practice. This course is a comprehensive survey of the medico-legal field and a detailed analysis and study of that science which applies the principles and practice of medicine to the elucidation and settlement of legal questions which arise in everyday professional practice as well as in courts of law.

340. Medical Jurisprudence (2 hrs weekly, total 16 hrs)
Medical legislation, medical evidence and witnesses, privileged communications, general medico-legal relations, physicians' contracts and compensation, income taxes, malpractice, and liability of hospitals and nurses are some of the subjects discussed.
Medical Microbiology

Professors McFadden, Chairman, M. F. Gunderson; Assistant Professors Bacon, N. Miller.

It is the aim of this department to develop with the student the character and host relationships of disease-causing microorganisms. It is also our aim to consider the effect upon the human host of microbial agents and to suggest the manner in which a bacteriological diagnosis may be made. This is done by lectures which emphasize host-parasite relationships. Immunity and associated phenomena are discussed and laboratory exercises demonstrate the essential features of disease and resistance.

Medical Microbiology.—

320. Medical Bacteriology and Clinical Parasitology (Total 252 hrs. I, II)
Lect and lab course on the cultural characteristics, pathogenic properties, immunological responses, etc., of bacteria, fungi, viruses and Rickettsia in general, with special reference to those of importance in disease. The course also provides a consideration of Clinical Parasitology and deals with Protozoa, Helminths and Arthropods of medical importance.

Medical Microbiology, Electives.—

350. Physiology of Bacteria (3 cr) Mr. Gunderson, Dr. McFadden, Mr. Miller
Prereq Medical Microbiology 320

351. Public Health Bacteriology
The facilities of the diagnostic lab with its turnover of at least 5,000 diagnostic tests per annum are available for this course.

a. Study of Diagnostic Techniques (8 cr) Dr. McFadden, Mr. Gunderson
Prereq Medical Microbiology 350
Hospital lab diagnosis.

b. Immunology (4 cr) Dr. McFadden, Mr. Gunderson
Prereq Medical Microbiology 350
Laws of hemolysis, antigen-antibody relationships, blood grouping, anaphylaxis.

352. Molds, Yeast, and Actinomycetes (4 cr) Mr. Gunderson, Mr. Miller
Prereq Medical Microbiology 350
A study of fungi of medical importance; their morphological and immunological characteristics. With emphasis on the recognition and diagnosis of those producing mycotic infections in man.

353. Filtrable Viruses (4 cr) Mr. Gunderson, Dr. McFadden, Mr. Miller
Prereq Medical Microbiology 350
Character, nature and transmission of viruses. Important human virus diseases.

354. Applied Bacteriology (4 cr) Mr. Gunderson
Prereq Medical Microbiology 350
Bacteriology of sanitation, Food bacteriology.

355. Medical Parasitology and Tropical Diseases (4 cr) Mr. Gunderson, Dr. McFadden, Mr. Miller
a. Diseases Due to Animal Parasites
Prereq Medical Microbiology 350
Life cycles, Vectors.

b. Diseases of Animals Transmissible to Man
Prereq Medical Microbiology 350
Plague, Tularemia, Undulant Fever, Typhus, Spotted Fever, etc.

361. Seminar (1 cr) Staff
By permission.

362. Research (cr arr) Staff

Neurology and Psychiatry

Professors Wittson, Chairman, J. A. Smith, Wigton; Associate Professors Alta, Ellingson, Gysin, Humphreys, Kruehl, H. R. Martin, Rose, Starr, Strough; Clinical Associate Professor Stein; Assistant Professors Brill, Carver, Coen, M. R. Jones, Klopfer, Majka, Wilcott, Wolford; Associates Dundon, Goldner, Ingham, R. D. Jones, J. M. Martin, Render, Ring, Tunakan, M. Williams, Yager, G. A. Young, Jr.; Instructors H. Adams, Filmer-Bennett, Garetz, Helper, Landgraf, Patterson, Stevens, Taubbe; Clinical Assisants Lundy, Scofield; Lecturers Freeman, Pugh, Saxvik, J. H. Young.

Courses are planned to give the student, commencing in his freshman year, correlated, progressive training in the anatomical, physiological and psychological fundamentals of psychiatry and neurology.
Lectures and demonstrations in the freshman year emphasize the significance of personality development in relation to normal and abnormal functioning. The sophomore program consists of lectures and case demonstrations in basic psychiatry which include descriptive and dynamic psychopathology and techniques of examination; and in neurology in which neurological illnesses, their relationship to the anatomical, pathological and physiological factors are introduced. In the junior and senior years stress is placed on supervised experience with psychiatric and neurological patients, both on inpatient and outpatient bases. Formal lectures are kept to a minimum, except for the clinical neurology lectures in the junior year. Instruction in psychiatry is correlated with the teaching in other departments.

Neurology and Psychiatry.

310. Personality Development and Clinical Perspectives (1 hr weekly, total 24 hrs, II, III)
This course reviews the emotional and psychophysiological growth of the individual with primary emphasis on the normal aspects of personality development from birth to old age. Clinical applications are made by relating to the more common psychiatric syndromes. The historical, psychoanalytic, biochemical, pharmacological and neuropsychological aspects of psychiatry are presented. The relationship between mental and physical factors in disease states is outlined and psychological aspects of medical practice are considered.

320. Basic Psychiatry (1 hr weekly, total 36 hrs, I, II, III)
During this course lectures and demonstrations of clinical material are held at the Nebraska Psychiatric Institute. The historical background of psychiatry, methods of interviewing, history-taking and general mental examination are presented. The course is preparatory to the junior clerkship in psychiatry and gives the student a basic understanding of mental illness from the standpoint of a general practitioner.

321. Neurology (1 hr weekly, total 12 hrs, III)
The neurological illnesses are discussed and demonstrated from the descriptive viewpoint and related to anatomical, pathological and physiological factors. The material is correlated with medicine generally and particularly with psychiatry. Diagnosis and treatment are emphasized.

330. Neurology (1 hr weekly, total 12 hrs, II)
Continuation of course 321.

335. Clinical Clerk (23 hrs weekly, total 92 hrs, I, II, III)
The junior class is divided into groups, each of which is assigned four weeks at the Nebraska Psychiatric Institute. Students do the history and physical and mental examinations of selected inpatients. They continue to see the patient in interviews during the whole of the clerkship. Work is supervised in detail. Seminars and lectures are included as well as demonstrations of interviewing technique, treatment, etc. In addition, lectures and demonstrations of psychosomatic disorders are presented. Emphasis is on the interrelationship of the emotional and physical functions of the total person.

340. Neuropsychiatric Demonstrations (1 hr weekly, total 4 hrs SS, I, II, III)
Selected patients presenting various psychiatric and neurological disorders are presented and discussed by the senior faculty.

341. Senior Clerkship (32 hrs weekly, total 120 hrs SS, I, II, III)
The senior class is divided into groups, each of which spends four weeks in a psychiatric clerkship. Two students of each group are assigned to the Psychiatric Department at Lutheran Hospital and the remainder to the Nebraska Psychiatric Institute. Students are given increasing clinical responsibility with patients under supervision. Regular teaching seminars and conferences are scheduled. Emphasis is placed on techniques of treatment, diagnosis and planning for the patient’s post-hospitalization care in the community.

342. Dispensary (4½ hrs weekly, total 40 hrs SS, I, II, III)
Practical experience in diagnosis and treatment of outpatients in the psychiatric, neurologic and epileptic clinics is provided. The student gains experience under supervision with a variety of psychiatric patients commonly seen by the general practitioner.

Obstetrics and Gynecology

Professors Holly, Chairman, McGoogan, Sage; Associate Professors H. Anderson, Redgwick; Clinical Associate Professors Richard Garlinghouse, H. Morgan; Assistant Professors Collins, Cotton, Rumbolz, Vroman; Clinical Assistant Professor McGinnis; Associates Kovarik, McCravy, Olson, Taylor; Instructor Hirst; Clinical Instructors George, Gorthey, Hansen, Harold Harvey; Clinical Assistants Boelter, Malony, Schack, Warden.
The instruction in obstetrics and gynecology consists largely of practical demonstrations in the University Hospital and the dispensary. In these clinics the student is trained in clinical diagnosis and treatment. The University Hospital offers abundant opportunity for the assignment of obstetric cases to members of the third-year medical class under direction. The prenatal clinic at the dispensary provides an excellent opportunity for both third- and fourth-year students to learn the proper care of the expectant mother. After a didactic review of the principles of obstetrics, the junior student is assigned to serve as assistant to the intern or house officer in the care of a patient during labor. During the fourth year the medical students are assigned to dispensary prenatal clinic and the gynecology clinic.

Obstetrics and Gynecology.—

320. Introduction to Obstetrics and Gynecology (1 hr weekly, total 16 hrs I, II)
Anatomy and physiology of the female genital organs in their relation to normal pregnancy, labor and the puerperium and to gynecology. Physical diagnosis in obstetrics and gynecology.

330. Obstetrics and Gynecology (1 hr weekly, total 12 hrs II)
Abnormalities and complications of pregnancy, labor, puerperium and the newborn child. Theory, diagnosis and management of gynecologic disease.

335. Junior Clinical Clerk (Total 84 hrs I, II, III)
Third-year students are assigned to a hospital obstetric and gynecologic service, where they are assigned patients. They follow the progress of patients in labor, assist at deliveries, follow the workup and management of gynecology patients, assist at operative procedures and maintain a complete record until the patient is discharged from the hospital. They attend weekly obstetric and gynecologic conferences, ward rounds and gynecological pathology conferences.

340. Obstetrics and Gynecology (1 hr weekly, total 40 hrs I, II, III)
Continuation of Course 330.

341. Senior Clinical Clerk (Total 224 hrs, SS, I, II, III)
Fourth-year students are assigned to a hospital obstetrics and gynecologic service for more advanced and practical experience. They follow the progress of patients in labor and assist at or perform deliveries. They follow the workup and management of gynecologic patients and assist at operative procedure. They are assigned to the dispensary obstetric and gynecologic clinics. They attend weekly obstetric and gynecologic conferences, ward rounds and gynecologic pathology conferences.

Obstetrics and Gynecology, Electives.—

350. Advanced Obstetrics and Gynecology (6 cr) Staff
Seminars, conferences, lectures and demonstrations designed to familiarize the student with the applications of basic science to the field of obstetrics and gynecology. The student will be required to evaluate the clinical condition of the patient, write records of his findings and recommendations, and outline a program of treatment to be carried out under supervision.

351. Gynecological Pathology (3 cr) Staff
An advanced course in gross and microscopic pathology in the field of obstetrics and gynecology, including the physiological variations encountered in the reproductive cycle. A written discussion of all clinical, surgical, and autopsy specimens in the field of obstetrics and gynecology is required.

352. Anatomy (4 cr) Dr. Latta, Dr. Holyoke, Staff
Special dissection and study to cover the basic science aspects of anatomy and embryology as applied to obstetrics and gynecology. This work will be special dissections, reading, and histologic study of the generative tract.

353. Gynecological Radiology (1-5 cr) Dr. Hunt, Staff
Readings, demonstrations, clinics and seminars designed to show the application of radiographic and radio-therapeutic principles and procedures to obstetrics and gynecology. Conducted in conjunction with the department of radiology, this course gives experience in radiographic techniques, the interpretation of films, and the use of X-ray and radium. Independent reports will be required.

354. Advanced Course in Gynecological Surgery (4 cr) Staff
Personal conferences, discussions, and demonstration of the principles and technique of gynecological surgery. The nature of the material covered will depend upon the student's aptitude and experience.

355. Special Problems and Thesis (cr arr) Staff
The student will select or be assigned special research problems in the basic science fields as applied to obstetrics and gynecology, including lab studies, literature analysis, and clinical evaluation of problems.
Ophthalmology

Professor Judd, Chairman; Associate Professors Gifford, Morrison; Assistant Professors Alliband, Ragsorsheik, Steinburg; Associates Eagle, Filkins, Truhlsen; Instructor Vickery; Clinical Assistants McIntire, Wood.

Ophthalmology.—

320. Medical Ophthalmology (1 hr weekly, total 12 hrs III)
The didactic course consists of demonstrations and lectures on diseases of the eye, including ocular changes in general diseases. The lectures are illustrated by cases, diagrams, charts and slides. The course is supplemented by textbook work and quizzes.

335. Clinical Clerk (Total 24 hrs, I, II, III)
Selected cases of eye pathology are shown to small groups of students illustrating the major types of disease that are encountered in medical practice.

340. Dispensary (Total 48 hrs SS, I, II, III)
Students are regularly assigned to the dispensary clinic for practical experience in the diagnosis and treatment of eye conditions. This course includes a drill in the principal uses of the ophthalmoscope and other instruments employed in the diagnosis of diseases of the eye.

Orthopedic Surgery

Professors Hamsa, Chairman, H. Johnson; Associate Professors Campbell, Teal. Waters; Assistant Professor Bach; Clinical Assistant Professors Bartels, Stone, Burney, R. Smith; Associate Hood; Clinical Assistant Weingarten; Clinical Instructors Horn, F. Webster.

Orthopedic Surgery deals with the diseases, deformities and injuries of the structure composing the musculo-skeletal system.

Orthopedic Surgery.—

330. Fractures, Dislocations and Sprains (1 hr weekly, total 12 hrs, III)
Lectures and clinics on anatomy, pathology and treatment of fractures, dislocations and sprains.

340. Diseases of Bones and Joints (1 hr weekly, total 16 hrs, I)
Lecture clinics on disease of bones and joints, synovial membranes and bursae. Congenital, acquired, and disease-producing deformities. Prevention of deformities and dystrophies with principles of treatment. Illustrated by photographs, slides, etc.

341. Orthopedic Clinical Clerkship (Total 112 hrs, SS, I, II, III)
Practical work in the diagnosis and treatment of orthopedic cases. Includes 6 hrs in Crippled Children's Clinic; 6 hrs Orthopedic Dispensary; two weeks (100 hrs) clerkship, consisting of experience in the University Hospital and affiliated private hospitals.

342. Fractures, Dislocations and Sprains (1 hr weekly, total 16 hrs SS, I, II, III)
Lectures, quizzes, and demonstration course on fractures, dislocations and sprains. X-ray diagnosis with application of splints and casts.

Orthopedic Surgery, Electives.—

350. Research (1-7 cr) Staff
Work for specially qualified students in special fields of investigation.

351. Seminar (1-6 cr) Staff
Literature reviews and reports of progress of research in special fields of investigation.

Otorhinolaryngology

Associate Professor Klabenes, Chairman; Professor Cassidy; Associate Professors Carp, Lovgren; Assistant Professors Heine, Placek; Clinical Assistant Professor P. L. Peterson; Instructors J. A. Davis, Gillies.

Otorhinolaryngology.—
One lecture is given on the anatomy of the ear and temporal bone and demonstration of the tympanic membrane in the freshman year in Anatomy. Two lectures on the examination of the ear, nose, pharynx and larynx; and two 2-hour demonstrations on the use of instruments commonly used in ORL examinations is given in conjunction with the sophomore course in Physical Diagnosis.

330. Disease of Ear, Nose, Throat and Larynx (1 hr weekly, total 16 hrs I)
Lectures covering the anatomy, physiology, common diseases, abnormalities, tumors, diagnosis and treatment in the ORL field.

Ward Clinics (Groups of ten students, 3 hrs weekly, total 12 hrs)
Four periods of two hours each are given each group of students which includes ward rounds whenever feasible and definitive instruction in carrying out complete ORL examinations.
Pathology

Professors Schenken, Chairman; Tollman; Associate Professor McWhorter; Clinical Associate Professor Tanner; Assistant Professors Foster, Giffen, Kulesh, Smith; Clinical Assistant Professors T. R. Anderson, Coleman; Associate Fitch; Clinical Assistants McPhee, Tamisiea, Vose, R. Wilson; Instructors Cooke, Wilcox.

It is the aim of this department to acquaint the student with the etiology, the pathologic physiology and the morphologic changes produced by disease processes in the human body.

Pathology.—

321. General Pathology (Total 275 hrs, I, II, III)
This course emphasizes the etiology and morphologic alterations produced by disease processes. It comprises the general principles of the reaction of the body to injury and of specific disease processes in detail by organ systems in both lecture and laboratory exercise. This course is closely integrated with the course in Medical Microbiology 320 so that at the time the student studies microbiologic aspects of microorganisms, the alterations produced in the tissues and organs of the body by the same organisms are covered.

322. Clinical Pathology (2 hrs lecture, 3 hrs laboratory weekly, total 120 hrs II, III)
The lecture and laboratory course emphasizing selection and performance of laboratory tests used by the physician. The student becomes proficient with many such tests and acquires a working knowledge of the remainder. Special emphasis is placed upon the selection of tests and the interpretation of the results of such tests, correlating these results with the clinical findings.

323. Clinical Pathology Conference (1 hr weekly, total 24 hrs II, III)
Selected cases are presented by a Clinical Department and the Department of Pathology for discussion of the differential diagnosis, management, and correlation of the clinical findings with the pathology.

333. Correlative Clinical Pathology (1 hr weekly, total 36 hrs I, II, III)
Selected cases are discussed from the standpoint of correlation of clinical observations with radiological and pathological findings. Whenever possible these cases parallel the lectures given in clinical departments.

334. Correlative Clinical Pathology (Total 60 hrs I, II, III)
Continuation of course 333.

Pathology, Electives.—

356. Autopsy Pathology (8 cr) Dr. Schenken
Prereq Path 330
In addition to participation in autopsies, the student will study in detail both gross and microscopic tissue changes, and will correlate these with clinical findings.

357. Pathology of Tumors
a. An Intensive Course in Oncology, With Special Attention to the Morphology, Derivation, and Course, of Various Tumors (4 cr) Dr. Schenken, Staff
Prereq Path 356
b. Studies of Bone Tumors (3 cr) Prereq Path 357a
c. Studies of Tumors of the Nervous System (3 cr) Prereq Path 357a

358. Etiology of Tumors (1 cr) Dr. Schenken
Prereq Path 356
This will be a general study of the subject of tumor etiology with special emphasis on the phases represented by the investigative work carried on by the student. In large part this will be carried on by study of the periodical literature.

359. Seminar (1 cr) Staff
By permission

360. Research (cr arr) Staff

Pediatrics

Professors Gibbs, Chairman, Gedgoud, Jahr, Robertson; Associate Professors Crofoot, Morrow, Thomas, Tompkins; Clinical Associate Professors Bancroft, Stafford; Assistant Professors Klok, D. Smith; Clinical Assistant Professor Stewart; Associates
The aim of this department is to train the student in the application of his training in the basic sciences to an understanding of human growth and development, together with the various anomalies in structure and function of the organism as a whole and to the diseases characteristic of childhood through adolescence. This is done through lectures and demonstrations, small group bedside conferences and discussions, clinical clerkship at the University and at Children’s Memorial Hospitals and the outpatient service at the University Hospital. Special orientation and training in rehabilitation is planned at the new Rehabilitation Center now under construction.

Undergraduate students are encouraged to participate in research on a wide variety of projects, and students who show particular interest in a given problem are afforded guidance and support in their scientific investigations.

### Pediatrics.—

**320. Growth and Development** (1 hr weekly, total 16 hrs II, III)
Lectures on basic principles of total growth. The rate of progress to be expected in weight and length together with the mental and emotional development from birth to adolescence is discussed. Part of the course is devoted to presentation of some of the anomalies and diseases encountered during the newborn period.

**330. Diseases of Childhood** (1 hr weekly, total 40 hrs I, II, III)
In this course are covered the various diseases of childhood, including the diseases by systems, deviations in growth and development, nutritional diseases, and communicable diseases.

**335. Clinical Clerk** (22 hrs weekly, total 88 hrs I, II, III)
Students are assigned cases on the pediatric ward of the University and Children’s Memorial Hospitals for complete study including history, physical examination, routine and special laboratory tests and other aids for the establishment of diagnosis with a view toward an effective program of therapy. Students are expected to have full knowledge of the cases assigned to them and also to be familiar with patients on the ward assigned to other students. Each student is held responsible for presentation of his cases at any time he may be called upon by the instructor during ward walks. One ward walk a week is devoted to discussion of behavior problems in childhood.

**340. Hospital Clinics** (1 hr weekly, total 18 hrs SS, I, II, III)
Clinics in all aspects of pediatrics are included in this course, utilizing material on the wards of the University Hospital and Children’s Memorial Hospital as well as other institutions affiliated with the College of Medicine. An effort is made to cover the entire field of pediatrics as seen in the various institutions.

**341. Dispensary** (17 hrs weekly, total 68 hrs SS, I, II, III)
Clinics are held at the dispensary to which fourth-year students are assigned for practical work in the diagnosis and treatment of ambulant cases. All children enter the dispensary through the pediatric clinics. Special clinics utilizing postnatal cases, and rheumatic heart cases are held each week.

**342. Senior Clerkship** (40 hrs weekly, total 120 hrs, SS, I, II, III)
Senior students are assigned to the wards of the University and Children’s Memorial Hospitals for a period of 3 weeks under staff direction. They are required to work up cases assigned to them, and to acquire general information regarding diagnosis and therapy on all patients admitted to the hospital to enable them to participate in the discussion of these cases. They are also assigned to the admitting and emergency sections of the hospital under the direction of the Staff. Senior clerks are required to attend ward walks twice daily, and a radiological conference once a day. Attendance at pathology conferences is also a requirement. Senior clerks are encouraged to participate freely in all staff conference discussions and to attend monthly staff meetings.

### Pediatrics, Electives.—

Junior and senior students interested in special problems in pediatrics are encouraged to engage in research under the direction of the staff. Arrangements for such work should be discussed with the Chairman of the Department.

**350. Pediatric Gastroenterology** (3 qtr hrs per qtr, total 9 qtr hrs) Dr. Gibbs

Prereq medical school courses as follows: biochemistry, physiology, and histology or their equivalents

The special characteristics of the gastrointestinal physiology of the normal infant and the pathological physiology, clinical manifestations, and treatment of gastrointestinal diseases of special importance in early life will be surveyed. Particular attention will be given to the chronic metabolic diarrheas.
PHYSIOLOGY AND PHARMACOLOGY

351. Endocrine and Metabolic Diseases in Early Life (3 qtr hrs per qtr, total 9 qtr hrs) Dr. Gibbs
Prereq same as in Course 350
The normal endocrine physiology is reviewed as it pertains to the infant, child, and adolescent. Abnormalities of endocrine and metabolic nature in early life are considered.

352. Pediatric Biochemical Ultra-Micro Analysis (2-3 qtr hrs per qtr, total 9 qtr hrs) Dr. Gibbs
Prereq Biochemistry 310 or completion of course in Medical Technology Instruction and experience in the performance of micro-biochemical procedures particularly useful to a clinical biochemical laboratory serving a children’s ward or children’s hospital.

353. Developmental Behavior Pattern of the Newborn (3 qtr hrs per qtr, total 6 qtr hrs) Dr. Jahr
Prereq M.D. degree or B.Sc. in Nursing or undergraduate major in psychology
A study of activities of the normal infant as related to environmental factors.

354. Electroencephalographic Findings in the Newborn (3 qtr hrs per qtr, total 6 qtr hrs) Dr. Jahr
Prereq M.D. degree or B.Sc. in Nursing or an undergraduate major in psychology
A series of electroencephalographic tracings will be made of newborn infants. These and previously collected records will be studied and discussed and correlated with clinical manifestations.

358. Pediatric Research Seminar (2 qtr hrs per qtr, total 6 qtr hrs) Dr. Gibbs
Selected topics of current research or contemplated research with presentation of appropriate patients.

359. Research in Pediatrics (er arr) Dr. Gibbs
Prereq Ped 358 completed or in progress

Physical Medicine and Rehabilitation

Assistant Professor Frost, Chairman; Professor Hunt.

The principles of Physical Medicine and Rehabilitation are presented at assigned times to the student body in groups of eight students at the Nebraska College of Medicine, the Rehabilitation Section of the Douglas County Hospital, and the Rehabilitation Section of the Omaha Veterans Administration Hospital. A one-hour lecture on Philosophies and Principles of Physical Medicine and Rehabilitation will be given in the sophomore year. Sixteen hours of lectures and clinics over a four-week period will be given in the third year, and four hours of clinical experience in the fourth year.

330. Principles of Physical Medicine and Rehabilitation (Total 16 hrs I, II, III) Dr. Frost and Staff.
Covering the aspect of their individual fields of work or specialty concerned in the total approach to evaluation and treatment of disabled persons.

Physiology and Pharmacology

Professors McIntyre, Chairman, Bennett; Associate Professor F. L. Dunn; Associate Research Professor Humoller; Assistant Professor Wetherell; Instructor Sievers; Adjunct Instructor Browne.

The courses in physiology and pharmacology 310–336, inclusively, stress the fundamental principles underlying living processes in health and disease and provide a comprehensive basis for medical practice. Courses 350–358, inclusively, are designed for special instruction for advanced students in physiology and pharmacology.

Physiology and Pharmacology—

310. General Introductory Course (lectures, demonstrations and conferences, total 72 hrs, III)
This course presents the essentials of physiology and pharmacology as a basis for more advanced study. The mechanism by which the body cells maintain the normal milieu intérieur are examined and emphasized and the fundamentals of neurophysiology including the autonomic system and the pharmacology of neural-effector cell transmission are described. The principles of endocrinology and the fundamental physiology of the pituitary glands, gonads, thyroid, parathyroid, islet tissue and adrenals are outlined.
311. Physiology and Pharmacology Laboratory Course (total 84 hrs, III)
In this course students perform experiments designed to illustrate basic physiological techniques and apparatus and are directed towards illustrating salient principles as concurrently developed in the lecture course. Several demonstrations are conducted using more advanced techniques to illustrate principles of electrophysiology and the mammalian preparations. Other teaching aids, such as film and discussion groups, are employed.

322. Physiology and Pharmacology Lectures and Demonstrations (total 72 hrs, I)
In this course the normal and pathological physiology of the cardiovascular, renal and respiratory systems are discussed in detail with special reference to the drugs most widely used in cardiovascular and renal disorders, including cardiac decomposition, shock and hypertension.

323. Physiology and Pharmacology Laboratory (total 84 hrs, I)
The elements of anesthesia are presented concurrently with practical work in anesthesiology on mammals. This course consists largely of acute mammalian experiments designed to illustrate the fundamentals of cardiovascular, renal and respiratory physiology, and the pharmacology of cardiovascular drugs.

324. Physiology and Pharmacology Lectures and Demonstrations (total 72 hrs, II)
This course presents a detailed account of endocrinology together with a discussion of the physiology of the G.I. tract and drugs used to correct its disorders, together with a presentation of the pharmacology of specific agents including the antibiotics, chemotherapeutic substances and vitamins.

325. Physiology and Pharmacology Laboratory (total 84 hrs, II)
This course consists of practical work performed chiefly on the students themselves in gastro-enterology and experiments designed to demonstrate the physiology of vision and hearing.

326. Application of Physiology and Pharmacology to Clinical Problems (lectures and demonstrations, total 72 hrs I, II, III)
This course is designed to illustrate the practical use of drugs in the treatment of patients including prescription writing. The fundamentals of normal and pathological physiology are stressed, together with the pharmacodynamics of the agents discussed.

Physiology and Pharmacology, Electives.—
350. Technique in Experimental Physiology and Pharmacology (1-9 qtr hrs cr) Dr. McIntyre and Staff
Prereq Physiology and Pharmacology 310, 311
This course consists of instruction in surgical procedures on mamma, reptilia, and amphibia and the preparation of organs and tissues in situ and ex situ for experimental study; instruction in the construction, manipulation and operation of apparatus.

Special Physiology and Pharmacology.—
351-1. Advanced Physiology and Pharmacology (1-9 qtr hrs cr) Drs. Bisgard, Hendrickson and Judrey
Prereq Physiology and Pharmacology 350
In Vivo aseptic preparations; instruction in the fundamental techniques of aseptic surgery for the preparation of animals for study, and their postoperative care.

351-2. Advanced Physiology and Pharmacology (1-9 qtr hrs cr) Dr. McIntyre
Prereq Physiology and Pharmacology 350
In Vivo preparations. The preparation of tissues for in vitro metabolism studies, perfusion of organs, isolated heart preparations, isolated smooth and striated muscles, myography, electromyography, cardiography, oncometry, and plethysmographic studies.

351-3. Electro-Physiology (1-9 qtr hrs cr) Dr. Bennett
Prereq Physiology and Pharmacology 350
Preparation of nerve for action-potential studies and other phenomena associated with nerve-activity; the electrostatic voltmeter, the cathode ray oscilloscope, direct-current amplification; the modification of nerve-activity by chemical and physical agents.

Advanced Pharmacology.—
352-1. Advanced Pharmacology-Toxicology (1-9 qtr hrs cr) Mr. Wetherell, Mr. Humoller
Prereq Physiology and Pharmacology 350
The recognition of poisons in the body. The quantitative determination of toxic substances in necropsy materials and excreta: Polarigraphic quantitative determination of metallic ions present in tissues. Qualitative and quantitative tests for alkaloids by polarigraphic and other methods.
352-2. Advanced Pharmacology-Bioassay (1-9 qtr hrs cr) Mr. Humoller, Dr. McIntyre
Prereq Physiology and Pharmacology 350
The assay of drugs and hormones and so-called vitamins by biometric methods, including standardization of drugs and biologically active substances.

353-1. Vitamin and Endocrine Studies—The "Deficient State" (1-9 qtr hrs cr) Staff
Prereq Physiology and Pharmacology 350
Animal experiments on diets deficient in accessory food factors; avitaminosis; physico-chemical properties of accessory food factors; isolation and purification of accessory food factors.

353-2. Vitamin and Endocrine Studies—The Endocrine System (1-9 qtr hrs cr) Dr. McIntyre
Prereq Physiology and Pharmacology 350
Studies in hypo- and hyper-normal hormonal activity; techniques for extirpation of glands of internal secretion.

354. Application of Physiology and Pharmacology to Clinical Problems (1-9 qtr hrs cr) Drs. Bennett, McIntyre
Prereq Physiology and Pharmacology 350
Electrocardiography, electrostethoscopy, metabolic rates. Study of neuro-muscular lesions by physiological methods; application of endocrinology to obstetrics and gynecology and medicine; special use of drugs and their diagnostic and therapeutic use in clinical problems.

355. Special Application of Physiology and Pharmacology to Industrial Medicine and Surgery (1-9 cr) Drs. Bennett, McIntyre, Sievers, Mr. Humoller
Prereq Physiology and Pharmacology 350
Physiological principles in shock therapy due to trauma; low pressure, low oxygen tension encountered in high altitude aviation. Physiological effects of high pressure. Caisson disease; noxious gases and toxic industrial poisons.

356. Biophysics and Biochemistry of the Cell (4-15 cr) Dr. McIntyre, Mr. Humoller and Staff
This course places special emphasis on the physiology and biochemistry of the anatomical units of the neuro-muscular system, and the effects of drugs, poisons, and physical agents upon their functions and enzyme systems.

357. Seminar (1 or 2 qtr hrs credit per quarter) Staff
358. Research in Physiology and Pharmacology (cr arr) Staff

Preventive Medicine

Associate Professors Potthoff, Rogers; Instructor Pedersen; Lecturers Crabill, DuBois, McArdle.

These courses aim to give the students basic orientation and preparation related to physicians' increasingly important responsibilities in preventing disease, promoting efficiency, acting as health counsellors, and serving as community leaders in health matters. The field work of the junior year is carried on through cooperative agreement with the Omaha-Douglas County Health Department.

310. The Accident Problem and Field Emergency Care (2 hrs weekly, total 16 hrs, III)
This course is offered cooperatively with the Department of Surgery. Includes study of the epidemiology of accidents and with methods of immediate care under field conditions.

320. Principles of Preventive Medicine (2 hrs weekly, I; 1 hr weekly for four wks, II, total 28 hrs)
Considers our major health problems and the organization and programming principles in our society at local, state, and national levels to promote good health; biostatistics; occupational health.

321. Principles of Preventive Medicine (2 hrs weekly, total 24 hrs, III)
Includes study of epidemiology, with emphasis upon the prevention of communicable disease; selected community health programs.

330. Clerkship in Preventive Medicine (Total 24 hrs, I, II, III)
Field trips to facilities and agencies of public health importance; topic and case studies embodying aspects of disease prevention, use of community resources, and comprehensive care.

Radiology

Professors Hunt, Chairman, Moore; Clinical Associate Professor Fraser; Assistant Professors A. L. Dunn, E. S. Pederson; Clinical Assistant Professor Noely; Associate S. Gunderson; Clinical Associate Ellsworth; Instructor Tuma; Clinical Instructors Bradley, James, Saichek, Skoog-Smith, Tice.
The principles of radiology presented during the third quarter of the second year relate to radiation physics, radiobiology, principles of radiographic technique and the interpretation of roentgenograms. During the third year, radiologic interpretation is presented by lectures and diagnostic conferences, with tumor conferences presented on the alternate weeks. In the fourth year clinical radiologic conferences relating to diagnosis and radiotherapy are held for students assigned to Omaha.

Applications of x-ray, radium and radioisotopes in the treatment of disease are presented in the third year by ward rounds and on clerkship, and in the fourth year by tumor conference for those students assigned in Omaha.

Radiological Anatomy (total 6 hrs) Taught as a part of Gross Anatomy.

320. Principles of Radiology (1 hr weekly, total 12 hrs, III)
330. Clinical Radiology (Total 20 hrs) Staff Assignment of a group of students who during the four weeks they are assigned observe and participate in radiographic technique, fluoroscopy and radiographic interpretation, clerkship on radiotherapy service with ward rounds, radioisotope clinic and journal seminar.

331. Tumor Conference and Clinic (2 hrs monthly, total 20 hrs, I, II, III) Staff.
332. Diagnostic Radiologic Conference (2 hrs monthly, total 20 hrs, I, II, III) Staff.
341. Tumor Conference and Clinic (2 hrs monthly, total 20 hrs, SS, I, II, III) Dr. Hunt Clinical presentation of selected cases with participation by radiology, pathology and involved clinical specialties.
342. Diagnostic Radiologic Conference (2 hrs monthly, total 20 hrs, SS, I, II, III) Dr. Moore Case presentation correlating clinical and radiologic findings.

Radiology Electives—
350. Advanced Diagnostic Radiology (4 to 8 cr) Dr. Moore, Dr. Pederson
AppRreq Radiol. 320, 330, 340
Responsible analyses of the status of the various tissues, organs, regions and systems of the body through correlation of radiographic and fluoroscopic observations with anatomy, physiology and pathology.

352. Advanced Therapeutic Radiology (4 to 8 cr) Dr. Hunt
Prereq Radiol. 320, 330, 340
Systematic consideration and responsible application of roentgen rays, radium and radioisotopes in the treatment of benign and malignant disease involving the various organs and regions of the body.

353. Seminar (1 cr each semester) Staff
354. Radiological Dosimetry (3 to 8 cr) Drs. Hunt, Tuma
Prereq Radiol. 320, and consent of department.
Analysis of factors controlling the intensity, quality, distribution, absorption and effects of radiation in phantoms, barriers and tissues.

355. Radiobiology (3 to 8 cr) Dr. Latta, Dr. Hunt, Dr. Pederson
Prereq Anat. 314, 315, Radiol. 320, 354 (may be concurrent)
Assigned laboratory projects and reading for analysis of basic biologic effects of radiation on cells, tissues and organisms.

356. Medical Instrumentation and Biophysics (3 to 8 cr) Dr. McIntyre, Dr. Hunt, Dr. Dunn
Prereq Physiol. 320, 321, Radiol. 320, 354
Assigned laboratory projects, practice and correlated reading referable to special applications of physics in medical instrumentation and biophysiologic analyses.

357. Thesis (cr arr) Staff

Surgery

Professors Musselman, Chairman, H. H. Davis, R. R. Best, Bisgard, Finlayson, McLaughlin; Associate Professors Barmore, Kennedy; Clinical Associate Professors Morton, Reese; Associate Research Professor H. L. Davis; Assistant Professors K. M. Browne, Brush, Dalley, G. N. Johnson, Kleitsch, McMurtry, D. M. Miller, Nels, Potter, Rasmussen, Swenson, Therien, D. H. Thompson; Clinical Assistant Professors Cherry, Davies, Robert Garlinghouse, Hilton, Mitchell, W. W. Webster; Associates L. L. Anderson, Cochran, J. D. Coe, Frank, Latenser, Murray, Pester, Rees, L. W. Thompson, C. Wilson; Clinical Associate Cole; Instructors Brauer, J. B. Davis, Hachiya, Kimball, Kutler, LeWorthy, Love, J. F. Milson; Clinical Instructors Ehrlich, Gogela, Hillyer, Moessner, Wiedman; Clinical Assistant Brinkman.

The courses in surgery are given in the junior and senior years. However, the student is introduced to surgery in his freshman year in the Correlation Hour of the Department of Anatomy. The student has further work in surgery in the sophomore year as a part of the courses in Physical Diagnosis. In the clinical years
the student is encouraged by direction and by precept to review the basic sciences as related to each disease which he encounters and to apply this knowledge in learning and understanding the principles of surgery.

The courses in surgery are planned to give the student a thorough understanding of the principles of surgical pathology, surgical diagnosis and surgical treatment. The undergraduate courses do not include instruction in major operating technic. Minor surgery technic is taught in the Clinical Clerkship and Dispensary and includes practical exercises. The technic for performing such major operations as would come to the practitioner in the course of general work or as emergencies is taught during the internship. Preparation for the practice of surgery requires additional postgraduate training as a resident in surgery. Surgery includes a section of neurosurgery, a section of thoracic and cardiac surgery, a section of plastic surgery, and anesthesiology.

330. Fundamentals of Surgery for Juniors (2 hrs weekly I and III; 1 hr weekly II, total 68 hrs)
A presentation of the principles of surgery by assigned reading and by lectures, demonstrations and quizzes supplementary to the text.

335. Clinical Clerkship for Juniors (12 wks, total 384 hrs, I, II, III)
Students are assigned patients in the University Hospital, the Veterans Administration Hospital, and Douglas County Hospital. They follow these patients under close supervision. The students are responsible for the history, physical examination, routine laboratory work, progress notes, and written discussions of the differential diagnosis and of the clinical-pathologic correlation. Instructors review the cases with the students individually and on ward rounds. The students receive training and practical experience in asepsis and operating room technic, and in gross surgical pathology. Total hours include clerkships in anesthesiology and urology.

340. Neuro-Surgery (16 wks, 1 hr per wk, I)
Lectures in fundamentals of neuro-surgery.

341. Clinical Clerkship for Seniors (6 wks, 210 hrs, SS, I, II, III)
Students are assigned as clinical clerks to the several hospitals associated with the Medical College: the Bishop Clarkson Memorial Hospital, the Immanuel Deaconess Hospital, the Nebraska Methodist Hospital, the Veterans Administration Hospital of Omaha; and Bryan Memorial Hospital and Lincoln General Hospital of Lincoln. The students serve four weeks on general surgery and two weeks on neuro-surgery. Senior clerks work under the close supervision of members of the faculty. They record the history, the physical examination, laboratory work, the differential diagnosis, progress notes, and a case summary on patients assigned to them. Progress notes include discussions of pathogenesis, explanation of symptoms, rationale of treatment and prognosis. Clerks assist at operations on their own patients and submit reports of the operations. In addition, they make rounds on their patients and review their charts with members of the faculty. The course includes teaching conferences but no didactic work.

342. Dispensary (16 hrs per wk; total 64 hrs, SS, I, II, III)
Students are given practical experience in diagnosis and treatment of ambulant patients, and experience in anesthesia.

Medical-Surgical Conference (First Tuesday each month, 8:00 to 9:15 a.m., Medical Amphitheater)
A joint effort of the Departments of Medicine and Surgery, at which patients with problems of common interest are presented and discussed by members of both departments. This conference is directed to both undergraduate and postgraduate students and is attended by junior students, senior students and the faculties of the Departments of Surgery and Medicine. Physicians in practice are cordially invited to attend.

Surgery Grand Rounds (Every Thursday, 8:00 a.m., Medical Amphitheater)
All patients on the surgical service are presented and their problems discussed. The patients are then seen on the wards. These rounds are attended by junior students, senior students and the attending staff of surgeons. Physicians in practice are cordially invited to attend.

Urology
Professors L. W. Lee, Chairman; P. S. Adams; Assistant Professors H. Kammandel, Malashock; Clinical Assistant Professor Munger; Clinical Instructors Gilbert, Pfeifer; Clinical Assistant N. Davis.

The fundamental principles of this surgical specialty are taught in close cooperation with the general surgical teaching program. The educational experience is geared to the type of knowledge which is of value to the general physician. Pro-
ficiency in a general knowledge of urology is accomplished by coordinated study, including lectures, clinical clerkship, dispensary and operative clinics. Emphasis at all times is on methods of diagnosis and management of the patient with urological disease.

Aside from the undergraduate teaching, the members of this department provide instruction to internes, surgical residents and nurses. They also provide specialized urological care to patients in the University Hospital and conduct investigative research in various subjects of urological interest.

**Ward Clinics (1 hr weekly, total 8 hrs I, II, III)**

Students are given ward clinics using patients at the University Hospital to illustrate major disease entities encountered in the medical practice.

**330. Fundamentals of Urology (1 hr weekly, total 16 hrs, I)**

Lect and clinics on diseases of the urogenital system.

**341. Dispensary (3 hrs weekly, total 12 hrs SS, I, II, III)**

One clinic is held each week to which students are assigned for practical experience in the diagnosis and treatment of urogenital diseases.

**Senior Preceptorship Program**

An extramural teaching program consisting of having each senior student serve a period of eight weeks with an experienced practitioner of medicine has been established. It affords the student an opportunity to learn much of the art and science of medical practice. Preceptors have been selected by a Preceptorship Committee of the Faculty of the College, and are outstanding leaders in medical practice in the rural communities of Nebraska. Preceptors are regularly appointed members of the College of Medicine faculty, subject to the same rules and regulations as all other faculty members.

The student is assigned a preceptor and he closely follows his teacher in all of his medical activities, including hospital work, office practice and home calls. Students are allowed to participate in the various aspects of medical practice as they become familiar with the preceptor's method of practice, and as the preceptor feels they are capable of handling the work. The various aspects of general practice and community life are made known to the student during his preceptorship.
TRAINING COURSE FOR X-RAY TECHNICIANS

HOWARD B. HUNT, M.A., M.D.
Professor of Radiology and Chairman of Department

CHARLES H. NEWELL, M.D.
Clinical Assistant in Radiology

ALICE MccOy, R.T.
Radiotherapy Technician

DOROTHY DAVID, R.T.
Chief Radiologic Technician

Organization.—The course for X-ray technicians has been established by authority of the Board of Regents in connection with the Department of Radiology, College of Medicine, and extends over a two-year period. The first year consists of lectures and demonstrations with supervised experience. The second year consists of an apprenticeship in an accredited Department of Radiology. The course has been approved by the American Registry of X-ray Technicians which is sponsored by the American College of Radiology.

Students who have satisfactorily completed the course of training in X-ray Technique at the University of Nebraska, College of Medicine, including at least a second year of experience in an accredited Department of Radiology for which they are usually paid a salary, are accepted for examination by the American Registry of X-ray Technicians. A certificate in X-ray Technique is issued by the American Registry of X-ray Technicians upon successful completion of the examination.

Facilities for Instruction.—Ample opportunity for experience in making roentgenograms of patients is provided. During a period of 12 months about 15,000 X-ray examinations are done annually, including all usual and most special procedures. These are made in the Department of Radiology for the University Hospital and Clinics of the University of Nebraska College of Medicine. All types and positions of X-ray examinations are used in the department. The radiographic work is supervised by the radiologists and chief radiological technician. Facilities are provided for deep X-ray therapy and radium therapy with adequate protection of all workers against exposure to radiation. About 3,000 X-ray treatments and 100 radium treatments are given in the department during a year. The radioisotope laboratory conducts about 500 procedures annually. The library of the College of Medicine is maintained in the hospital.

Requirements for Admission.—An applicant for admission to the course in X-ray technique may be between 18 and 35 years of age and must be a graduate from an accredited high school. Transcripts of high school and college, if attended, which show subjects studied and grades earned must be submitted. It is recommended that the preparatory work include English, chemistry, physics, zoology, typing, and secretarial work, although applicants are considered who do not present credits in all these subjects.

One year of collegiate study including English, physics, biology, chemistry, typing, shorthand, and secretarial work is recommended. In the case of those students who have completed 90 semester hours of college work, including English 6 hours, Physics 8 hours, Chemistry 12 hours, and Biology 8 hours, the University of Nebraska College of Medicine will
grant the degree of Bachelor of Science in Radiologic Technology upon completion of the prescribed course including intermediate radioisotopic technology and the additional year of approved preceptor training. Applicants must be in good health with no disabilities. The application should be accompanied by a transcript of high school and college credits, a photograph, and the names of two people from whom references can be obtained. Admission is allowed in January, July and September, and only six students can be accepted annually. Applications should be sent to the Chairman of the Department of Radiology, University of Nebraska College of Medicine, 42nd and Dewey Avenue, Omaha 5, Nebraska. Application forms will be provided upon request.

Fees and Expenses.—A tuition fee of $120.00 for a resident student and $200.00 for a nonresident is charged at the time of enrollment. This fee covers tuition, registration, student health and diploma fees. Students must maintain themselves and provide their own uniforms. The cost of textbooks is about $15. Board may be obtained for $10 a week in the vicinity of the hospital and rooms for $5 to $10 a week. A student may elect to spend the required second year in training at the University of Nebraska Hospital for which no tuition is charged.

Through the generosity of the W. K. Kellogg Foundation there are loan funds available for students taking training as technicians. Information concerning the same can be secured by applying to the Director.

General Information.—The course of study covers a period of one year. Students are accepted on a probationary basis during the first month. Students are in class or on duty in the Department of Radiology from 8 a.m. until 5 p.m. with a free hour for lunch. Students are not on duty during Saturday afternoon or Sunday. A vacation of two weeks is allowed at the Christmas holiday or in the summer. Immunization against diphtheria, typhoid fever and smallpox is advised.

Curriculum.—The course of training for students of X-ray technique consists primarily of an apprenticeship and demonstrations under the technician and of conferences with the radiologist. The instruction in related fields is given in conjunction with the School of Nursing and consists of instruction in anatomy, pathology, radiology and physical medicine. The apprenticeship comprises 90 per cent of the period of training. The student works with the technician in the making of all types of X-ray studies. Gradually increasing independent responsibilities are given over to the student as experience increases. The student must become familiar with transcription of the reports of the radiologist covering the X-ray studies made of patients and his reports on patients treated with X-ray and radium. In case the student is unfamiliar with the operation of a typewriter, additional courses must be taken at night school during the period of training.

The following courses are required of students in X-ray technique. The courses in Anatomy and Medical Science are provided through the courtesy of the School of Nursing by the College of Medicine. Credits are expressed in semester hours.

(1) **ANATOMY.**—Lectures, class recitations, demonstrations, and laboratory work dealing with the structure of the human body. Preserved specimens and fresh animal specimens are used for study. 3 cr. hr.

(2) **MEDICAL SCIENCE.**—Causes and general features of disease processes. Lectures. 1 cr. hr.
(3) PRINCIPLES OF RADIOLOGY.—The general principles of radiation, technique, contrast media and various diagnostic procedures are presented together with the basic principles of X-ray and radium therapy. Professional ethics. Lectures 1 cr. hr.

(4) SECRETARIAL OFFICE PRACTICE.—Supervised experience covering filing, cross indexing of diagnoses according to the Standard Nomenclature of Disease, vocabulary training and transcription of radiological reports. 2 cr. hr.

(5) RADIATION PHYSICS.—The production, characteristics and control of X-rays applicable to radiographic technique, radiotherapy and protection of personnel. Lectures. 2 cr. hr.

(6) a. ELEMENTARY RADIOGRAPHIC TECHNOLOGY.—Demonstration of anatomical positioning and adaptation of radiographic exposure to the more common radiographic examinations. 6 cr. hr.

b. INTERMEDIATE RADIOGRAPHIC TECHNOLOGY.—Supervised application of above principles by the student in the conduct of routine radiographic procedures. 6 cr. hr.

(7) RADIOTHERAPEUTIC TECHNOLOGY.—Demonstration of types of diseases to which radiotherapy is applicable and demonstration of their treatment by X-ray and radioactive agents. 3 cr. hr.

(8) ELEMENTARY RADIOISOTOPIC TECHNOLOGY.—Supervised experience in instrumentation and laboratory procedure. 3 cr. hr.

(9) INTERMEDIATE RADIOISOTOPIC TECHNOLOGY.—Conduct radioassay, monitoring, and laboratory determination. Required all candidates for B.Sc. in radiologic technology. 9 cr. hrs.

(10) FIRST AID.—A course in first aid as prescribed by The American Red Cross with award of First Aid Certificate by The American Red Cross upon satisfactory completion of course.

Opportunities.—There is an increasing demand for qualified technicians. These opportunities are primarily in the departments of radiology in hospitals and in the offices of doctors specializing in X-ray and radium work. There is no opportunity for independent operation of a laboratory by the technician since the use of X-ray in the diagnosis and treatment of diseases is legally the practice of medicine and in the interest of public welfare and safety must be carried out under the supervision of a registered physician.
KNOWLEDGE in the fields of biochemistry, hematology, serology, parasitology, bacteriology, immunology, and mycology has been increased greatly during the last twenty or thirty years. This knowledge is now being routinely applied in medical science by means of laboratory tests in the diagnosis and treatment of all patients, both those who enter hospitals and those who are cared for in physicians' offices.

Performing these laboratory tests and interpreting their results have become so important and complicated that this is now a special field of medicine in itself. The volume of laboratory work has led to the training of medical technologists for the assistance of the physicians in this and other specialties, and in the general practice of medicine.

The demand for well-trained medical technologists has been increasing steadily. Most technicians are employed in hospital laboratories, although many of them work in physicians' offices and in clinics. There are some openings for medical technologists in research laboratories, and a number of opportunities have appeared in industrial laboratories with work related to or similar to medical techniques.

Organization.—The course for medical technologists has been established by authority of The Board of Regents, in connection with the Department of Pathology, College of Medicine. It has been accredited by the Council on Medical Education and Hospitals of the American Medical Association and the American Society of Clinical Pathologists as being equipped and organized to furnish adequate training in laboratory technic. Graduates of the Training Course for Medical Technologists are expected to take the examination for certification by the Registry of Medical Technologists maintained by the American Society of Clinical Pathologists.

Facilities for Instruction.—The course is given in the University Hospital, and facilities of the University of Nebraska College of Medicine are available for instruction.

The University Hospital is organized primarily for teaching and is under the control of The Board of Regents, through the administration of the College of Medicine. It has a capacity of 202 beds, and patients are accepted from all over the state. All types of diseases are treated. Approximately 4,000 patients are admitted each year.

The laboratory of the University Dispensary is also used for instruction. Approximately 35,000 visits are made each year by patients of the University Dispensary. The treatment of patients in the hospital and dispensary is directed by the faculty of the College of Medicine. The laboratory work that is done includes all routine procedures, and many specialized tests that are required for unusual diseases.

The Library of the College of Medicine is maintained in the hospital. These books and periodicals are available for study, and for keeping in touch with current work in the field of laboratory diagnosis.
REQUIREMENTS FOR ADMISSION

High School.—Sixteen high school units are required for admission and must include three units in English, two units in one foreign language (ancient or modern), two units in mathematics (one each of algebra and geometry or an equivalent), and one in science (biology, botany, chemistry, physics or zoology).

College or University.—To insure adequate background and training for entering a recognized course in medical technology, the following minimum requirements have been established in accordance with the Registry of Medical Technologists:

BIOLOGY.—Twelve semester hours, of which are required at least 4 semester hours of zoology, and 3 semester hours of bacteriology if offered at the college where preliminary work is taken. If bacteriology is not available other branches of biology may be substituted.

CHEMISTRY: General Inorganic Chemistry.—At least 8 semester hours including 4 semester hours of laboratory. Organic Chemistry.—A complete course, at least 4 semester hours with not less than 2 semester hours of laboratory. Quantitative Analysis.—A semester course is recommended.

PHYSICS.—A lecture and laboratory course in physics is recommended.

ENGLISH.—Six semester hours in English.

ELECTIVES.—Sufficient to give a total of 60 semester hours of college credit. Sociology and psychology are recommended for electives.

After completion of the training course in Medical Technology, those students who have at least 90 semester hours of previous college work may obtain the degree of Bachelor of Science in Medical Technology, granted by the University of Nebraska College of Medicine. Those students taking the Training Course in Medical Technology with less than 90 semester hours of previous college work may be granted the Certificate of Medical Technologist.

Through the generosity of the W. K. Kellogg Foundation there are loan funds available for students taking training as technologists. Information concerning the same can be secured by applying to the Director.

Starting Dates.—Students begin their training during the summer months, on a somewhat staggered schedule.

Applications.—Forms for application may be obtained from the Director. These forms, with transcripts of both high school and college work, and accompanied by a small recent photograph or snapshot, should be submitted several months prior to the date for which application is being made.

Fees and Expenses.—A tuition fee of $120.00 a year for a resident student and $200.00 a year for a nonresident student is charged at the time of enrollment. This fee covers tuition, registration, student health and diploma fees. Other than uniform laundry, students are responsible for their own maintenance, uniforms, laundry, etc. No housing facilities are available on the Omaha campus. Adequate facilities for lodging and/or board are available near the campus. Allowance should be made for the purchase of books.

Plan of Instruction.—The course of training is 12 months in length. No part of the course is offered separately. Lectures covering background
material are taken with the students of the College of Medicine. Other lectures are designed especially for the needs of the medical technologists. Conferences are held at frequent intervals for consideration of technics, their relation to disease processes, and possible sources of error. Oral and written examinations are given at intervals. Demonstrations are used to introduce new subject matter, to emphasize important points, and to familiarize the student with unusual problems.

The hours credit are arranged as follows:

The following formally arranged lecture courses are given:

**INTRODUCTION TO MEDICAL SCIENCE.**—This course covers a general survey of disease processes and their effect upon the individual. The relation of laboratory determinations and alterations in these tests associated with disease states is stressed.

**MEDICAL MICROBIOLOGY.**—This course is taken with the students of the College of Medicine. The medical aspects of bacteriology, immunology, mycology and parasitology are discussed.

**BACTERIOLOGY AND SEROLOGY LABORATORY PROBLEMS.**—Particular attention is given to laboratory technics, their control and interpretation.

**HISTOLOGIC TECHNIC.**—A series of lectures covering the basic principles of processing tissue and other materials for microscopic examination is given.

**BIOCHEMISTRY.**—This course embodies a study of the chemical reactions occurring within the human body. Particular attention is given to the way in which laboratory tests can give information about normal and abnormal chemical functions in the body.

**HEMATOLOGY AND CLINICAL LABORATORY TECHNIQUES.**—This course covers the general principles of blood examination for alterations in the cellular elements, including a discussion of abnormal conditions which are reflected in the laboratory results. In addition, the general aspects of urinalysis, gastric analysis, basal metabolic rates, and electrocardiography are discussed.

**WEEKLY SEMINAR.**—Periodic seminars are held weekly, during which time pertinent problems regarding the laboratory are discussed. Periodic reviews of the recent literature are conducted.

In addition to the formal lecture material, the student is assigned to various services, as follows:

**CHEMISTRY**—three months. This service includes examination of blood and other body materials for chemical constituents. Such tests usually are quantitative. The student learns the use of proper equipment and the application of careful technics to the performance of a wide variety of tests. Over 30,000 tests in the chemistry section are performed annually, allowing thorough training in this field.

**HEMATOLOGY**—three months. The various tests for enumeration and detection of abnormality of the formed elements of the blood, and the tests for alterations in the coagulation mechanism of the blood are
done. Over 35,000 such tests are performed in the hospital laboratory yearly.

**Bacteriology, Serology, and Parasitology**—three months. The identification of microorganisms, particularly pathogenic, by morphologic and cultural characteristics is undertaken in bacteriology. Serology involves primarily immunologic procedures in laboratory tests. Parasitology includes the study of technics for isolation and identification of small animal forms capable of causing disease in man. Adequate demonstration material is maintained in the laboratory. This section of training is under the direction and supervision of the bacteriology staff of the College of Medicine. Over 35,000 procedures are done yearly in this field.

**Blood Bank Technic**—one month. Here the student is instructed in methods for handling and storage of blood, as well as preparation of blood for transfusion. Methods for detection of incompatibilities between bloods are emphasized. Over 5,000 tests are made in this section yearly.

**Histologic Technic**—one month. The student becomes familiar with the methods for processing tissues for microscopic examination. A variety of methods is presented, and there are approximately 8,000 tissue sections made yearly.

**Miscellaneous**—one month. On this service, the student performs routine examinations of urine, gastric contents, and other body fluids. In addition, the performance of basal metabolic rate determinations and of electrocardiographs is accomplished. Approximately 10,000 such tests are made yearly.
Graduating Class of 1957

Internship Appointments

Allely, Donald George, A.B. 1954, Nebraska Wesleyan, Nebraska Methodist Hospital, Omaha, Nebraska

Anderson, Robert Clifford, B.Sc. in Med. 1955, Nebraska Methodist Hospital, Omaha, Nebraska

Axtell, Harold Kent, B.Sc. 1952, University of Nebraska Hospital, Omaha, Nebraska

Bauer, Lawrence William, A.B. 1952, Taylor University, Bishop Clarkson Memorial Hospital, Omaha, Nebraska
