THE UNIVERSITY OF NEBRASKA
College of Medicine
Omaha
ANNOUNCEMENTS
1960 - 1961
THE HIPPOCRATIC OATH
FORMULATED AT GENEVA*

Now being admitted to the profession of medicine
I solemnly pledge to consecrate my life to the service
of humanity. I will give respect and gratitude to my
deserving teachers. I will practice medicine with con­
science and dignity. The health and life of my patient
will be my first consideration. I will hold in confi­
dence all that my patient confides in me. I will main­
tain the honor and the noble traditions of the medical
profession. My colleagues will be as my brothers. I
will not permit considerations of race, religion, nation­
ality, party politics or social standing to intervene be­
tween my duty and my patient. I will maintain the
utmost respect for human life from the time of its con­
ception. Even under threat I will not use my knowledge
contrary to the laws of humanity. These promises I
make freely and upon my honor.

* Adopted by the Second General Assembly of the World Medical
Association held in Geneva, Switzerland, September 8 to 11, 1948
college of medicine
1960-1961
course offerings
Freshmen and Sophomores

Sept. 15, Thurs.
Sept. 15, Thurs.
Sept. 15, Thurs.

Sept. 16, Fri.
Sept. 16, Fri.

Sept. 19, Mon.
Nov. 24-27, Thurs. through Sun.
Dec. 20-Jan. 2, Tues. through Mon.
Jan. 30, Mon.
March 31-April 2, Fri. through Sun.
May 30, Tues.
June 10, Sat.

Freshman orientation
Freshman physical examination
Sophomore registration
First half of tuition due
Freshman aptitude tests
Freshman registration
First half of tuition due
Fall quarter classes begin
Thanksgiving vacation
Christmas vacation
Balance of tuition due
Easter vacation
Memorial Day holiday
Academic year ends

Juniors

Aug. 22, Mon.

Sept. 5, Mon.
Nov. 24-27, Thurs. through Sun.
Dec. 20-Jan. 2, Tues. through Mon.
Jan. 30, Mon.
March 31-April 2, Fri. through Sun.
May 30, Tues.
June 10, Sat.

Registration
First half of tuition due
Classes begin 1:00 p.m.
Labor Day holiday
Thanksgiving vacation
Christmas vacation
Balance of tuition due
Easter vacation
Memorial Day holiday
Academic year ends

Seniors

June 20-Sept. 10
Sept. 5, Mon.
Sept. 12-Dec. 3

Nov. 24-27, Thurs. through Sun.
Dec. 5 thru March 11
Dec. 20-Jan. 2, Tues. through Mon.
Jan. 30, Mon.
Feb. 20, Mon.
March 13 through June 10
March 31-April 2, Fri. through Sun.
May 30, Tues.
June 11, Sun.

Summer quarter
First half of tuition due
Labor Day holiday
Fall quarter
Didactic exercises begin
Thanksgiving vacation
Winter quarter
Christmas vacation
Balance of tuition due
Degree applications due
Spring quarter
Easter vacation
Memorial Day holiday
Commencement

Graduate Students

Sept. 12-17, Mon. through Sat.
Dec. 12-17, Mon. through Sat.
March 13-18, Mon. through Sat.

Fall quarter registration
Winter quarter registration
Spring quarter registration

Special Days

April 22, Sat.

Family Day
Pre-Medic and Pre-Nursing Day
ADMINISTRATION

The Board of Regents

Term Expires

J. Leroy Welsh, Omaha ........................................ January 1961
Clarence E. Swanson, Lincoln ................................ January 1961
Frank Foose, Axtell ........................................... January 1963

Richard E. Adkins, Osmond ................................... January 1965

John Kent Selleck, Lincoln, Corporation Secretary

The University

Clifford Morris Hardin, B.Sc., M.Sc., Ph.D., Chancellor of the University.
Adam Carlyle Breckenridge, Ph.D., Dean of Faculties.
James Pittinger, B.Sc., Assistant to the Chancellor.
James Perry Tollman, B.Sc., M.D., Dean of the College of Medicine and Superintendent of the University Hospital.
James Winfred Benjamin, B.A., M.A., Ph.D., Assistant Dean of the College of Medicine.
J. Philip Colbert, B.Sc., M.Sc., Dean of the Division of Student Affairs.
Floyd Hoover, Ph.D., Registrar.

Emeriti Faculty

John Franklin Allen, B.Sc., M.D., Professor of Clinical Medicine, Emeritus, and Director of Student Health Service, Emeritus.
Elmer William Bantin, B.Sc., M.D., Assistant Professor of Pediatrics, Emeritus.
John Francis Bresnahan, B.Sc., M.Sc., M.D., Instructor in Internal Medicine, Emeritus.
Alfred Jerome Brown, A.B., M.D., Professor of Surgery, Emeritus.
George Worthington Covey, B.Sc., M.D., Clinical Associate Professor of Internal Medicine, Emeritus.
Harold Everett Eggers, A.M., M.D., Professor of Pathology and Bacteriology, Emeritus.
Harry Evans Harvey, B.Sc., M.D., Clinical Associate Professor of Obstetrics and Gynecology, Emeritus.
Lloyd Oliver Hoffman, M.D., Associate in Surgery, Emeritus.
John Stephens Latia, Ph.D., Professor of Anatomy, Emeritus.
Charles Franklin Moon, B.Sc., M.D., Professor of Obstetrics and Gynecology, Emeritus.
John Clyde Moore, Jr., A.B., B.Sc., M.D., Professor of Pediatrics, Emeritus.
Sergius Morgulis, A.M., Ph.D., Professor of Biochemistry, Emeritus.
Reuben Allyn Moser, B.A., M.D., Associate Professor of Internal Medicine, Emeritus.
Charles Austin Owens, B.Sc., M.D., Associate Professor of Urology, Emeritus.
Abraham Srl Rubini, A.B., M.D., Assistant Professor of Pathology and Bacteriology, Emeritus.
Robert D. Schrock, A.B., M.D., Professor of Orthopedic Surgery, Emeritus.
William Leta Shearer, A.B., D.D.S., M.D., Professor of Surgery, Emeritus.
Robert James Stearns, M.D., Assistant Professor of Obstetrics and Gynecology, Emeritus.
Chester Hill Waters, Sr., B.Sc., M.D., Professor of Surgery, Emeritus.
William Albert Willard, Ph.D., Professor of Anatomy, Emeritus.

Senior Consultants

Maine C. Andersen, M.D., Assistant Professor of Internal Medicine, Senior Consultant.
Allen Byford Anderson, M.D., Clinical Associate in General Practice, Senior Consultant.
Arthur Wesley Anderson, B.A., M.D., Clinical Associate in General Practice, Senior Consultant.
Gordon Newell Bost, B.Sc., M.D., Assistant Professor of Internal Medicine, Senior Consultant.
Waldron Alvin Cassidy, M.D., Professor of Otorhinolaryngology and Consultant in Bronchoscopy, Senior Consultant.

*Deceased December 2, 1959.
George Leonard Clark, B.Sc., M.D., Assistant Professor of Pediatrics, Senior Consultant.
Edwin Davis, B.A., M.D., Professor of Urology, Senior Consultant.
Herbert Hayward Davis, M.D., Professor of Surgery, Senior Consultant.
John Calvin Davis, Jr., A.B., M.D., Professor of Otorhinolaryngology, Senior Consultant.
Herman Mandel Jahr, M.D., Professor of Pediatrics, Senior Consultant.
J. Jay Keegan, A.B., A.M., M.D., Professor of Surgery, Senior Consultant.
Ralph Herbert Luikart, M.D., Professor of Obstetrics and Gynecology, Senior Consultant.
Ernest Lynn MacQuiddy, A.M., M.D., Professor of Internal Medicine, Senior Consultant.
James Sylvester McAvlin, Ph.G., M.D., Associate in Radiology and Physical Medicine, Senior Consultant.
Joseph Daniel McCarthy, M.D., Professor of Internal Medicine, Senior Consultant.
Morris Margolin, M.D., Assistant Professor of Internal Medicine, Senior Consultant.
Willson Bridges Moody, A.B., M.D., Professor of Internal Medicine, Senior Consultant.
Floyd Joshua Murray, B.Sc., M.D., Associate in Surgery, Senior Consultant.
Friedrich Wilhelm Niehaus, B.Sc., M.D., Professor of Internal Medicine, Senior Consultant.
Sidney O. Reese, B.Sc., M.D., Clinical Associate Professor of Surgery, Senior Consultant.
Oliver Francis Reihart, D.V.S., Instructor in Pathology, Senior Consultant.
Earl Cuddington Sage, B.Sc., M.D., Professor of Obstetrics and Gynecology, Senior Consultant.
Donald Benjamin Steenburg, B.Sc., M.D., Clinical Associate in General Practice, Senior Consultant.
Harry Allen Taylor, A.B., B.Sc. in Med., M.D., Senior Consultant.
Chester Quay Thompson, B.Sc., M.D., Associate Professor of Internal Medicine, Senior Consultant.
Irwin Levi Thompson, B.Sc., M.D., Clinical Associate in General Practice, Senior Consultant.
Warren Thompson, B.Sc., M.D., Professor of Internal Medicine, Senior Consultant.
James E. M. Thomson, A.B., M.D., Clinical Associate Professor of Orthopedic Surgery, Senior Consultant.

Active Faculty

Payson Stone Adams, B.Sc. in Med., M.D., Professor of Urology.
Dean Craig Affleck, Ph.D., Assistant Professor of Medical Psychology, Neurology and Psychology.
Herbert George Ahrens, B.Sc., M.D., Clinical Instructor in Internal Medicine.
John Andrew Alta, Ph.D., M.D., Associate Professor of Neurology and Psychiatry and Lecturer in Physical Medicine and Rehabilitation.
Leland Clayton Albertson, A.B., M.D., Instructor in Internal Medicine.
George Thomas Alliband, B.Sc., M.D., Associate Professor of Ophthalmology.
Harley Eric Anderson, B.Sc. in Med., M.D., Associate Professor of Obstetrics and Gynecology.
Lawrence Lloyd Anderson, A.B., M.D., Associate in Surgery.
Thorwald Robert Anderson, A.B., M.D., Clinical Assistant Professor of Pathology.
Carol Remmer Angle, A.B., M.D., Assistant Professor of Pediatrics.
William Dodge Angle, B.Sc., M.D., Associate Professor of Internal Medicine.
Stanley Monrad Bach, B.A., M.D., Assistant Professor of Orthopedic Surgery and Anatomy and Associate in Physical Medicine and Rehabilitation.
John William Ballow, B.Sc., M.D., Clinical Instructor in Obstetrics and Gynecology.
Pual Martin Bancroft, B.Sc., M.Sc., M.D., Clinical Associate Professor of Pediatrics.
Clarence Fredrick Bantin, B.Sc., M.D., Associate in Pediatrics.
Anthony Joseph Barak, B.Sc., M.Sc., Ph.D., Assistant Professor of Biochemistry.
John Lucian Barmore, M.D., Associate Professor of Surgery.
Wilbur W. Barile, A.B., M.D., Clinical Assistant Professor of Orthopedic Surgery.
John Hodgson Barthall, M.D., Clinical Instructor in Dermatology and Syphilology.
Meyer Beber, B.Sc., Ph.D., M.D., Associate Professor of Internal Medicine and Associate Professor of Biochemistry.
Harold George Beenken, B.Sc., Research Associate in Internal Medicine.
Charles Dudley Bell, B.A., M.D., Instructor in Dermatology and Syphilology.
James Winfred Benjamin, B.A., M.A., Ph.D., Associate Professor of Anatomy, Assistant Dean of the College of Medicine.
Arthur Lawrence Bennett, A.B., Ph.D., M.D., Professor of Physiology and Pharmacology. (Assistant Chairman of Department.)
Reba Ann Benschoter, M.S., Assistant Instructor in Medical Teaching Aids, Neurology and Psychiatry.

Rolland Russell Best, B.Sc., M.D., Professor of Surgery and Assistant Professor of Anatomy.

James Dewey Bisgard, A.B., M.D., Professor of Surgery.

William Carl Boelster, B.A., M.D., Associate in Obstetrics and Gynecology.

Donald Robert Bohenenkamp, Demonstrator in Bracing and Prosthetics, Physical Medicine and Rehabilitation.

Warren G. Bosley, A.B., M.D., Clinical Assistant Professor of Pediatrics.

Warren Quentin Bradley, M.D., Clinical Instructor in Radiology.

Russell Charles Brauer, M.D., Associate in Surgery.

John Grierson Brazer, A.B., M.D., Associate Professor of Internal Medicine.

Charles M. Bressman, A.B., M.D., Assistant Instructor in Internal Medicine.

I. William Brill, B.Sc., M.D., Assistant Professor of Neurology and Psychiatry.

Herman Henry Brinkman, B.Sc., M.D., Assistant in Med., M.D., Clinical Assistant in Surgery.

Marion Porter Brolsma, A.B., B.Sc., M.D., Clinical Instructor in Internal Medicine.

Kenneth Murle Browne, M.Sc., M.D., Assistant Professor of Neurological Surgery and Adjunct Instructor in Physiotherapy and Pharmacology.

Karl Wayne Bruce, B.Sc., M.D., Associate Professor of Orthopedic Surgery.

John Hobart Brush, A.B., M.D., Assistant Professor of Surgery.

Donald John Bucholz, A.B., M.A., M.D., Clinical Assistant Professor of Internal Medicine.

Richard Arndt Bunting, B.Sc., M.D., Assistant Professor of Radiology.

Dwight William Burney, Jr., A.B., M.D., Assistant Professor of Orthopedic Surgery and Assistant in Anatomy.

David Samuel Burton, Demonstrator in Prosthetics, Physical Medicine and Rehabilitation.

Olin James Cameron, M.S., M.D., Professor of Dermatology (Chairman of Department.)

Louis Scott Campbell, B.Sc., M.D., Associate Professor of Orthopedic Surgery.

James Goodlow Carter, B.A., M.D., Instructor in Anesthesiology in the Department of Surgery.

Michael J. Carver, Ph.D., Assistant Research Professor of Biochemistry and Associate Professor of Neurology and Psychiatry.

LaGrande Dwight Cherry, B.Sc., M.D., Clinical Assistant Professor of Surgery.

William John Chleborad, M.D., Assistant Instructor in Surgery.

Robert Morris Cochran, B.Sc., M.D., Associate in Surgery and Instructor in Anatomy.

John Daniel Coe, A.B., M.D., Assistant Professor of Surgery.

Frank Cole, B.Sc., M.D., Clinical Associate in Surgery.

Francis C. Coleman, M.D., Clinical Assistant Professor of Pathology.

Robert Marshall Collins, B.Sc. in Med., M.D., Assistant Professor of Obstetrics and Gynecology.

Walter Thomas Cotton, B.Sc. in Med., M.D., Assistant Professor of Obstetrics and Gynecology.

Michael Crofoot, A.B., M.D., Associate Professor of Pediatrics.

Robert Emmett Cullen, B.A., M.D., Clinical Instructor in Internal Medicine.

Marion Rose Cunningham, B.Sc., Assistant Instructor in Neurology and Psychiatry.

Edmund Jesse Dailey, D.D.S., Assistant Professor of Dental Surgery.

Louis T. Davies, A.B., B.Sc. in Med., M.A., M.D., Clinical Assistant Professor of Surgery.

Herbert Leroy Davis, A.B., Ph.D., Associate Research Professor of Biochemistry and Associate Research Professor of Surgery.

James Allan Davis, M.D., Associate in Otorhinolaryngology.

John Byron Davis, M.D., Assistant Professor of Surgery.

Neil Balbach Davis, M.D., Associate in Urology.

John Lage Dewey, A.B., M.D., Instructor in Internal Medicine.

William John Dickerson, A.B., M.D., Associate in Internal Medicine.

H. Dwyer Dundon, A.B., M.A., Assistant Professor of Psychiatric Occupational Therapy, Neurology and Psychiatry.

Arthur Lowell Dunn, A.B., A.M., Ph.D., Assistant Professor of Biochemistry and Biophysics in Radiology.

Frank Lowell Dunn, B.Sc., A.M., M.D., Professor of Internal Medicine and Associate Professor of Clinical Physiology and Chief Investigator Cardiovascular Teaching.

Stephen John Dutch, Jr., A.B., M.D., Assistant Professor of Neurology and Psychiatry.

Frank Lewis Eagle, B.Sc., M.D., Assistant Professor of Ophthalmology.
Dale Walter Ebers, B.Sc., M.D., Associate in Pediatrics.
Dorothea Mary Edwards, B.Sc., Instructor in Internal Medicine.
Alfred George Ellick, A.B., J.D., Associate Professor of Medical Jurisprudence (Chairman of Department).
Robert James Ellington, B.Sc., M.A., Ph.D., Associate Professor of Medical Psychology.
Clarence Kilgore Elliott, A.B., M.D., Clinical Assistant Professor of Internal Medicine.
H. Chandler Elliott, B.A., M.A., Ph.D., Associate Professor of Anatomy.
Joan M. Ellison, B.Sc., M.N.S., Assistant Instructor in Internal Medicine.
Herman Charles Ellsworth, B.A., M.D., Clinical Associate in Radiology.
K. J. Fijan, B.Sc., M.D., Clinical Instructor in Pediatrics.
Alister Ian Finlayson, M.A., M.D., Professor of Neurological Surgery.
Donald Max Fitch, A.B., B.Sc., M.D., Associate in Pathology.
Kenneth Leonard Fitch, B.Sc., M.A., Ph.D., Assistant Professor of Anatomy.
Max Fleishman, M.D., Associate in Internal Medicine.
Russel A. Forrest, M.D., Instructor in Internal Medicine.
Miles E. Foster, A.B., B.Sc., Assistant Professor of Pathology.
Muriel Naomi Frank, A.B., M.D., Associate in Anesthesiology.
Maurice D. Frazer, B.Sc., M.D., Clinical Associate Professor of Radiology.
Albert Edward Freed, B.Sc., M.D., Associate in Internal Medicine and Lecturer in Physical Medicine and Rehabilitation.
John George Freman, A.B., M.D., Assistant Professor of Neurology and Psychiatry.
Fred J. Fricke, M.D., Associate in Physical Medicine and Rehabilitation.
Raymond John Friel, B.Sc., M.D., Assistant in Anatomy.
Dwight Maurice Frost, B.Sc. in Med., M.D., Assistant Professor of Physical Medicine and Rehabilitation (Chairman of Department).
Samuel Isaiah Fuenning, B.Sc., M.Sc., M.D., Clinical Assistant in Medicine.
Charles Garets, A.B., M.S.W., Associate in Neurology and Psychiatry.
Sol L. Garfield, Ph.D., Professor of Medical Psychology, Neurology and Psychiatry.
Richard Earl Garlinghouse, A.B., M.D., Clinical Associate Professor of Obstetrics and Gynecology.
Robert O. Garlinghouse, A.B., M.D., Clinical Assistant Professor of Surgery.
John Leo Gedgoud, B.Sc., M.D., Professor of Pediatrics.
John Harold George, M.D., Instructor in Obstetrics and Gynecology.
Gordon Everett Gibbs, A.B., M.A., Ph.D., Professor of Pediatrics (Chairman of Department).
Horace Kerr Giffen, A.B., M.D., Assistant Professor of Pathology.
Harris Breiner Graves, A.B., M.D., Instructor in Internal Medicine.
Harold Elmer Harvey, A.B., M.D., Clinical Associate in Obstetrics and Gynecology.
George James Haslam, M.D., Assistant Instructor in Pathology.
Lyman Howard Heine, A.B., M.D., Assistant Professor of Otorhinolaryngology.
Malcolm M. Helper, Ph.D., Associate in Neurology and Psychiatry.
Mary J. Hann, M.D., Assistant Professor of Internal Medicine.
Bernice Martin Hetzner, B.A.L.S., M.A., Associate Professor of Library Science.
Marion Robert Hicks, M.Sc., Assistant Instructor in Pathology.
Robert Antoine Hillyer, B.A., M.D., Clinical Instructor in Surgery.
Hiram David Hilton, B.A., M.D., Clinical Assistant Professor of Surgery.
Donald Vincent Hirsi, A.B., M.D., Instructor in Obstetrics and Gynecology.
Roy Groves Holly, B.Sc., Ph.D., M.D., Professor of Obstetrics and Gynecology (Chairman of Department.)
Joseph Michael Holthaus, B.Sc., Assistant Professor of Internal Medicine.
Edward Augustus Holyoke, B.Sc., M.A., M.D., Professor of Anatomy (Chairman of Department).
Leo Thomas Hood, M.D., Assistant Professor of Orthopedic Surgery.
Harold R. Horn, A.B., M.D., Clinical Instructor in Orthopedic Surgery.
Robert Howard Hornberger, Ph.D., Instructor in Medical Psychology, Neurology and Psychiatry.
Dorothy H. Hubbard, B.A., M.S.W., Assistant Instructor in Neurology and Psychiatry.
Theodore Franklin Hubbard, A.B. M.Sc., M.D., Associate Professor of Internal Medicine.
Wayne McKinley Hull, B.A., B.Sc. in Med., M.Sc., M.D., Assistant Professor of Internal Medicine.
Fred Ludwig Humoller, B.Sc., Ph.D., Associate Research Professor of Chemical Physiology and Pharmacology.
Herbert Haynes Humphreys, A.B., M.A., Ph.D., Associate Professor of Medical Psychology, Neurology and Psychiatry.
Howard Beeman Hunt, A.M., M.D., Professor of Radiology (Chairman of Department) and Professor of Physical Medicine and Rehabilitation.
Charles Gregory Ingham, M.D., Associate in Neurology and Psychiatry.
Donald Robert Jackson, A.B., M.D., Associate in Internal Medicine.
Herbert Paul Jacobi, B.Sc., M.Sc., Ph.D., Professor of Biochemistry (Chairman of Department.)
Lawrence Royce James, B.Sc., M.D., Clinical Instructor in Radiology.
George Nick Johnson, M.D., Assistant Professor of Surgery.
Henry Kammandel, B.Sc., M.D., Assistant Professor of Urology.
John Charles Kennedy, B.Sc., M.Sc., M.D., Associate Professor of Surgery.
Kisik Kim, B.A., M.D., Instructor in Neurology and Psychiatry.
Elsie Joseph Kolk, A.B., M.D., Associate Professor of Medicine.
Frank Klubenes, B.Sc. in Med., M.D., Associate Professor of Otorhinolaryngology (Chairman of Department.)
William Philip Kleitsch, M.D., Assistant Professor of Surgery.
George J. Klick, A.B., B.Sc., M.D., Associate Professor of Pediatrics.
James L. Karel, M.S., M.D., Assistant Instructor in Internal Medicine.
John Charles Kennedy, B.Sc. in Med., M.A., M.D., Associate Professor of Surgery.
Thaddeus P. Krush, B.Sc., M.D., Associate Professor of Neurology and Psychiatry and Clinical Director of Community Services, Nebraska Psychiatric Institute.
Morion Howard Kulesh, B.A., M.D., Associate Professor of Pathology.
Marion Labusohr, B.A., Lecturer in Occupational Therapy, Physical Medicine and Rehabilitation.
Charles William Landgraf, B.Sc., M.D., Instructor in Neurology and Psychiatry.
Gerard R. F. Landry, M.D., Instructor in Anesthesiology, Department of Surgery.
Edward Langdon, B.Sc., M.D., Assistant Professor of Internal Medicine.
Arthur Lee Larsen, B.A., M.D., Assistant Instructor in Pathology.
John Francis Latenser, M.D., Associate in Surgery.
Jerome L. L'Ecury, M.D., Instructor in Pediatrics.
Leroy William Lee, B.Sc. in Med., M.S., M.D., Professor of Urology. (Chairman of Department.)

Henry John Lehnhoff, Jr., A.B., M.D., Associate Professor of Internal Medicine.
Raymond Gerald Lewis, A.B., B.Sc., M.D., Assistant Professor of Internal Medicine.
George William LeWorthy, A.B., M.D., Clinical Instructor in Surgery.
Robert Stanley Long, B.Sc., M.D., Associate Professor of Internal Medicine.
Robert Ellsworth Lovgren, B.Sc., M.D., Associate Professor of Otorhinolaryngology.
Finn Lunde, M.D., Instructor in Neurology and Psychiatry.
Burdette W. Lundy, Ph.D., Instructor in Neurology and Psychiatry.
John O. McCarthy, M.D., Assistant Instructor in Obstetrics and Gynecology.
Harry Webber McFadden, A.B., M.D., Professor of Medical Microbiology (Chairman of Department.)

Kenneth T. McGinnis, B.Sc., M.D., Clinical Assistant Professor of Obstetrics and Gynecology.
Leon Steiner McGooGAN, A.B., M.D., Professor of Obstetrics and Gynecology. (Chairman of Department.)

Charles Lewis McKeen, M.D., Instructor in Surgery.
Charles William McLaughlin, Jr., B.Sc. in Med., M.D., Professor of Surgery.
George Boone McMurtry, B.Sc., M.D., Assistant Professor of Surgery.
Clarence Austin McWhorter, B.Sc. in Med., M.D., Professor of Pathology.
Ernest Lynn MacQuiddy, Jr., A.B., M.D., Associate in Internal Medicine.
Bernard Magid, M.D., Clinical Instructor in Obstetrics and Gynecology.
Delmar James Mahler, B.S., M.S., Ph.D., Demonstrator in Physiology and Pharmacology.

Frank Majka, B.Sc., M.D., Assistant Professor of Neurology and Psychiatry.
Edward Marvin Malashock, B.A., M.D., Assistant Professor of Urology and Associate in Physical Medicine and Rehabilitation.
Paul J. Maxwell, M.D., Clinical Instructor in Internal Medicine.

Norman Alvin Milgram, A.B., B.Sc., Ph.D., Associate in Medical Psychology, Neurology and Psychiatry.
Daniel Martin Miller, B.Sc., M.D., Assistant Professor of Surgery.
Norman Gustav Miller, Ph.D., Associate Professor of Medical Microbiology.
Clinton Charles Millett, B.Sc., M.D., Clinical Assistant in Internal Medicine.
Howard Eugene Mitchell, M.D., Clinical Assistant Professor of Orthopedic Surgery.
Samuel F. Moessner, B.Sc., M.D., Clinical Instructor in Surgery.
Ralph Cory Moore, B.Sc., M.D., Professor of Radiology.
Harold Smith Morgan, M.D., Clinical Associate Professor of Obstetrics and Gynecology.

Kermit G. Morris, B.Sc., M.D., Assistant Professor of Internal Medicine and Director of Student Health Service.
William Howard Morrison, B.Sc. in Med., M.D., Associate Professor of Ophthalmology.
Paul Newton Morrow, A.B., B.Sc. in Med., M.D., Associate Professor of Pediatrics.
Herschel B. Morton, B.Sc., M.D., Clinical Associate Professor of Surgery.
Robert Benton Muffly, B.A., M.D., Associate in Neurology and Psychiatry.
Harace Varnum Munger, A.B., M.D., Clinical Assistant Professor of Urology.
Nathan Muskin, A.B., M.D., Instructor in Internal Medicine.

Merle McNeil Musselman, B.Sc., M.D., Professor of Surgery (Chairman of Department.)

Orvis A. Naely, B.Sc., M.D., Clinical Assistant Professor of Radiology.
Delbert Delose Neis, A.B., M.D., Assistant Professor of Surgery.
Shirley Ann Nelson, A.B., M.S.W., Instructor in Neurology and Psychiatry.
Richard William Newcomb, B.A., M.D., Assistant Instructor in Internal Medicine.
Yook C. Ng, Ph.D., Assistant Professor of Biochemistry.
Janet P. Niess, B.S., Assistant Instructor in Radiology.
Donald Charles Nilsson, M.D., Assistant Professor of Pediatrics.
William Edwin Nuzman, A.B., M.D., Assistant Professor of Internal Medicine.
Byron Bay Oberst, M.D., Assistant Professor of Pediatrics.
Richard Eugene Ogborn, B.A., B.Sc., M.Sc., M.D., Assistant Professor of Internal Medicine and Nuclear Medicine.
Leland J. Olson, A.B., M.D., Assistant Professor of Obstetrics and Gynecology.
George Wallace Omian, B.A., M.D., Clinical Associate in Pathology.
Donald Eugene Parkison, A.B., M.D., Clinical Assistant in Obstetrics and Gynecology.
Orest Joseph Parrillo, M.D., Associate in Internal Medicine.
Frederick Franz Pauflan, B.Sc., M.D., Associate in Internal Medicine.
Warren Harland Pearse, B.Sc., M.D., Associate in Obstetrics and Gynecology.
Earl Stanley Pederson, A.B., M.A., Ph.D., M.D., Associate Professor of Radiology and Assistant Professor of Anatomy.

Peter A. Peffer, M.D., Assistant Professor of Neurology and Psychiatry.

Maurice Lewis Pepper, B.Sc. M.D., Assistant Professor of Internal Medicine.

George Henry Pester, A.B., M.D., Assistant Professor of Surgery.

Paul L. Peterson, M.D., Clinical Assistant Professor of Otorhinolaryngology.

Laverne F. Pfieffer, B.A., M.D., Clinical Instructor in Urology.

George Francois Pinne, M.D., Associate Professor of Dermatology and Syphilology.

John Wesley Porter, M.D., Instructor in Surgery.

Stanley Ernest Potts, M.D., Assistant Professor of Surgery.

Carl John Potthoff, B.Sc., M.S.P.H. M.D., Associate Professor of Preventive Medicine and Public Health. (Chairman of Department)

Eugene Francis Powell, A.B., Ph.D., Premedical Adviser, Associate Professor of Zoology and Anatomy.

Peter A. Peffer, M.D., Assistant Professor of Neurology and Psychiatry.

Maurice Lewis Pepper, B.Sc. M.D., Assistant Professor of Internal Medicine.

George Henry Pester, A.B., M.D., Assistant Professor of Surgery.

Paul L. Peterson, M.D., Clinical Assistant Professor of Otorhinolaryngology.

Laverne F. Pfieffer, B.A., M.D., Clinical Instructor in Urology.

George Francois Pinne, M.D., Associate Professor of Dermatology and Syphilology.

John Wesley Porter, M.D., Instructor in Surgery.

Stanley Ernest Potts, M.D., Assistant Professor of Surgery.

Carl John Potthoff, B.Sc., M.S.P.H. M.D., Associate Professor of Preventive Medicine and Public Health. (Chairman of Department)

Eugene Francis Powell, A.B., Ph.D., Premedical Adviser, Associate Professor of Zoology and Anatomy.

Peyton Thomas Pratt, A.B., B.Sc., M.D., Assistant Professor of Internal Medicine.

Philip Francis Howard Pugh, B.Sc. in Med., M.Sc., M.D., Instructor in Neurology and Psychiatry.

Donald Frederick Purvis, M.D., Clinical Assistant Professor of Internal Medicine.

Robert Houston Rasscorshak, M.D., Assistant Professor of Ophthalmology.

John Arthur Rasmussen, M.D., Assistant Professor of Surgery.

John Philbrook Redgwick, B.Sc., M.D., Associate Professor of Obstetrics and Gynecology.

E. Burckett Reed, B.Sc., M.D., Clinical Associate Professor of Internal Medicine.

Barney Benjamin Rees, A.B., M.A., M.D., Associate in Surgery.

Helen Wyandt Reihart, B.Sc., M.Sc., Research Associate in Microbiology.

Norman Davis Render, M.D., Associate in Neurology and Psychiatry.

Rose M. Reynolds, A.B., Assistant Professor of Anatomical Illustration.

Charles Erskine Richards, B.Sc., M.D., Associate Professor of Internal Medicine and Director of Clinics.

Floyd O. Ring, B.Sc., M.D., Associate Professor of Neurology and Psychiatry.

George Edwin Robertson, B.Sc. in Med., M.D., Professor of Pediatrics.

Earl Alvir. Rogers, B.Sc., M.D., Associate Professor of Preventive Medicine.

Charles Morton Root, M.D., Assistant Professor of Internal Medicine.

Jerman Walter Rose, B.Sc., M.D., Associate Professor of Neurology and Psychiatry and Associate in Pediatrics and Clinical Director of Children's Service, Nebraska Psychiatric Institute.

Robert Carl Rosenlof, M.D., Associate in Internal Medicine and Associate in Physical Medicine and Rehabilitation.

William F. Roth, Jr., Ph.B., M.D., Participating Consultant, Neurology and Psychiatry.

Sidney L. Rubin, M.D., Associate in Pediatrics.

William Leonard Rumbolt, A.B., M.D., Assistant Professor of Obstetrics and Gynecology.

Herbert Blake Salchek, B.Sc., M.D., Clinical Instructor in Radiology.

Catherine Orr Salhanick, A.B. M.D., Instructor in Pediatrics.

Hilton Aaron Salhanick, A.B., M.A., Ph.D., M.D., Associate Professor of Obstetrics and Gynecology.

Colin Burwell Schack, A.B., M.D., Instructor in Obstetrics and Gynecology.

Irving J. Schaefer, Demonstrator, Neurology and Psychiatry.

John Rudolph Schenken, B.Sc., M.D., Professor of Pathology (Chairman of Department), Director of the School of Medical Technologists.

Gilbert C. Schreiner, A.B., M.D., Assistant Professor of Pediatrics.

George H. Scofield, A.B., M.S.S.W., Instructor in Psychiatric Social Work, Neurology and Psychiatry.

Nathaniel Scott, M.D., Instructor in Radiology.

Rudolph Frederick Sievers, Ph.D., M.D., Instructor in Physiology and Pharmacology.

Eugene Earl Simmons, B.Sc., M.D., Professor of Internal Medicine.

Milton Simons, B.Sc. in Med., M.D., Associate Professor of Pathology.

Anton William Skoog-Smith, B.Sc. in Med., M.D., Clinical Instructor in Radiology.

Robert Alken Slabaugh, B.Sc., M.D., Instructor in Internal Medicine.

Dorothea Irene Smith, A.B., M.D., Assistant Professor of Pediatrics.

Evelyn M. Smith, M.A., Instructor in Psychiatric Social Work, Department of Neurology and Psychiatry.
Francis D. Smith, B.Sc., M.D., Assistant Professor of Pathology.

Richard Dale Smith, A.B., M.D., Assistant Professor of Orthopedic Surgery.

Mary A. Soule, M.D., Instructor in Obstetrics and Gynecology.

Robert Morton Spire, B.A., LL.B., Instructor in Medical Jurisprudence.

George Ewing Stafford, B.Sc., A.B., M.D., Clinical Associate Professor of Pediatrics.

Phillip Henry Starr, M.D., Associate Professor of Neurology and Psychiatry.

Robert Johnston Stein, B.Sc., M.D., Clinical Associate Professor of Neurology and Psychiatry.

Abraham A. Steinberg, B.Sc., M.D., Assistant Professor of Ophthalmology.

Frank A. Stewart, B.Sc., M.D., Clinical Associate Professor of Pediatrics.

Frank Paschal Stone, A.B., M.D., Clinical Assistant Professor of Orthopedic Surgery.

George Ewing Stafford, B.Sc., A.B., M.D., Clinical Associate Professor of Pediatrics.

Robert Johnstone Stein, B.Sc., M.D., Clinical Associate Professor of Neurology and Psychiatry.

Abraham A. Steinberg, B.Sc., M.D., Assistant Professor of Ophthalmology.

Frank A. Stewart, B.Sc., M.D., Clinical Associate Professor of Pediatrics.

Frank Paschal Stone, A.B., M.D., Clinical Assistant Professor of Orthopedic Surgery.

Lee Stover, A.B., M.D., Clinical Assistant Professor of Internal Medicine.

LaVern Craig Strong, B.Sc., M.D., Associate Professor of Neurology and Psychiatry.

Mary A. Soule, M.D., Instructor in Obstetrics and Gynecology.

Robert Morton Spire, B.A., LL.B., Instructor in Medical Jurisprudence.

George Ewing Stafford, B.Sc., A.B., M.D., Clinical Associate Professor of Pediatrics.

Phillip Henry Starr, M.D., Associate Professor of Neurology and Psychiatry.

Robert Johnston Stein, B.Sc., M.D., Clinical Associate Professor of Neurology and Psychiatry.

Abraham A. Steinberg, B.Sc., M.D., Assistant Professor of Ophthalmology.

Frank A. Stewart, B.Sc., M.D., Clinical Associate Professor of Pediatrics.

Frank Paschal Stone, A.B., M.D., Clinical Assistant Professor of Orthopedic Surgery.

Lee Stover, A.B., M.D., Clinical Assistant Professor of Internal Medicine.

LaVern Craig Strong, B.Sc., M.D., Associate Professor of Neurology and Psychiatry.

Mary A. Soule, M.D., Instructor in Obstetrics and Gynecology.

Robert Morton Spire, B.A., LL.B., Instructor in Medical Jurisprudence.

George Ewing Stafford, B.Sc., A.B., M.D., Clinical Associate Professor of Pediatrics.

Phillip Henry Starr, M.D., Associate Professor of Neurology and Psychiatry.

Robert Johnston Stein, B.Sc., M.D., Clinical Associate Professor of Neurology and Psychiatry.

Abraham A. Steinberg, B.Sc., M.D., Assistant Professor of Ophthalmology.
Faculty

Jon T. Williams, M.D., Clinical Instructor in Internal Medicine.
Margaret A. Williams, B.Sc., M.S.S.W., Assistant Professor of Psychiatric Social Work, Neurology and Psychiatry.
Carly Everett Wilson, A.B., B.Sc., M.D., Assistant Professor of Surgery and Assistant in Anatomy.
Donald Jasper Wilson, A.B., B.Sc., M.D., Professor of Dermatology and Syphilology.
Richard Barr Wilson A.B., M.D., Associate in Pathology.
Jack Frederick Wisman, A.B., M.D., Instructor in Neurology and Psychiatry.
Cecil Legriel Wittson, B.Sc., M.D., Professor of Neurology and Psychiatry (Chairman of Department) and Director of Nebraska Psychiatric Institute.
Milton Wolpin, B.A., M.Sc., Ph.D., Instructor in Medical Psychology, Department of Neurology and Psychiatry.
Maynard A. Wood, B.Sc., M.D., Clinical Associate Professor of Ophthalmology.
Willis Dean Wright, B.Sc., M.D., Assistant Professor of Internal Medicine.
Raymond Joseph Wyrons, A.B., M.D., Assistant Professor of Internal Medicine.
J. Lewis Yager, A.B., Ph.D., Associate in Neurology and Psychiatry.
George Alexander Young, Jr., M.D., Associate in Neurology and Psychiatry.
Robert Armstrong Youngman, M.D., Clinical Assistant Professor of Internal Medicine.
*Robert L. Zaayer, B.A., M.S., Assistant Instructor in Microbiology.
Frank Marshall Zahrler, M.D., Associate in Pediatrics.

Administration

Richard Eugene Bennett, B.Sc., M.A., Buyer.
Josephine Chamberlin, R.N., Superintendent of Dispensary, Emeritus.
Florence M. Clussen, Secretary to the Dean.
Joan M. Ellison, B.Sc., M.N.S., Director of Dietetics.
Duane Johnson, B.Sc., in M. Hosp. Adm., Hospital Administrator.
Elmer E. Koch, B.Sc. in E.E., Superintendent of Physical Plant.
Irma Maurine Kyle, R.N., B.Sc., S.M., Director of the School of Nursing and Professor of Nursing.
Helen C. Miller, Assistant Registrar.
Herschel Nuss, Assistant Finance Director.
Ruth ErDena Pohle, B.A., Supervisor in Hospital Laboratory.
Charles Erskine Richards, B.Sc., M.D., Director of Clinics and Associate Professor of Internal Medicine.
Evelyn Schelback, A.B., M.S. in Soc. Adm., Director of Medical Social Service.

* Deceased August 19, 1959.
COLLEGE OF MEDICINE

History.—The legislative Act of February 15, 1869, provided for the formation of the University of Nebraska at Lincoln, and included provision for a college of medicine. In 1883, the University of Nebraska College of Medicine was established at Lincoln. It continued in operation until the 1887 session of the legislature withdrew its appropriation, necessitating discontinuance of the college on May 19, 1887. The Omaha Medical College, incorporated at Omaha in 1881, became a part of the University of Nebraska in 1902. The merger resulted in the first two years of the four-year medical course being given in Lincoln and the last two years in Omaha. Since 1913 the entire four-year course has been given in Omaha.

Standing.—The present value of the land, buildings, and equipment of the College of Medicine exceeds $10,000,000. A strong faculty is meeting the demands of the expanding requirements of medical education. Excellent clinical facilities are provided through the University Hospital and Dispensary as well as other affiliated hospitals.

The College of Medicine meets the requirements of the most exacting state examining and licensing boards. Its diploma grants the holder all privileges accorded to graduates of any medical college in the United States. It is a member of the Association of American Medical Colleges and is approved by the Council of Medical Education and Hospitals of the American Medical Association. It maintains high standards in instructional staff and content of courses.

The course of study in medicine covers four years of 36 to 48 weeks each. The first two years in medicine include those laboratory sciences which form the basis for the clinical studies of the last two years. The clinical application of laboratory subjects is emphasized and introductory clinical subjects are given in the second year. The last two years are spent largely in the study of disease in the clinics and outpatient department of the hospital. The objective method is followed in laboratories and clinical instruction. In all courses students are encouraged to do a large amount of individual work, meeting in small groups with laboratory and clinical instructors.

APPLICATIONS FOR ADMISSION

Printed application forms are available at the Registrar's Office, College of Medicine, University of Nebraska, 42nd Street and Dewey Avenue, Omaha 5, Nebraska. Students applying for any given class must have their applications completed by November 1st of the year preceding intended entrance.

In considering scholastic records of applicants, greater weight is given to the quality of work than to an excess of credit hours over the minimum required number. High scholarship alone does not assure acceptance. Consideration is given also to appraisals of character, personal interviews, scores on the Medical College Admission Test and general fitness and promise of the candidate.

A very limited number of students from states other than Nebraska and not more than two students from foreign countries will be accepted for the freshman class. It is the policy of the Committee on Admissions and Scholastic Standing to require that foreign students spend at least one year, and preferably two, studying in an undergraduate college in this country before applying for admission to the College of Medicine. This policy has been established in order that the applicant may become familiar with the language, custom, and methods of teaching in the
APPLICATION PROCEDURE

Applicants for admission to the College of Medicine must present the following:

1. A completed application form available from the Assistant Registrar of the College of Medicine.
2. Two recent, unmounted photographs, 2½ x 2½ inches head size.
3. An official transcript sent directly from each college or university attended.
4. Two character appraisals from professors of premedical sciences, preferably chemistry, zoology or physics; or official report of Pre-Med Committee.
5. The result of the Medical College Admission Test. Applicants will take the test by the fall of the year preceding intended entrance. Information concerning this test may be obtained from the premedical advisor of the College of Arts and Sciences; from the Psychological Corporation, 304 East 45th Street, New York 17, New York; or the Assistant Registrar of the College of Medicine. Students should communicate directly with The Psychological Corporation for specific details.

A personal interview with members of the Committee on Admissions and Scholastic Standing is required. Interview sessions will be held at the campus of the University of Nebraska in Lincoln in November or December. Interviews will be given at the College of Medicine at stated dates. Inquiries should be made of the premedical advisers at Lincoln or of the Assistant Registrar of the College of Medicine regarding appointments for interviews.

A fee of $5.00 must accompany the request for application of a student who is not a legal resident of Nebraska. Remittance should be made by check or postoffice money order and made payable to the University of Nebraska College of Medicine. Currency should not be sent. The fee will cover the cost of handling the application and will not be refunded.

Any applicant who has previously applied for admission and has not been accepted or who fails to enroll after an acceptance must re-apply in the regular manner if he wishes consideration for a subsequent year.

Advanced Standing.—Application for admission to the second or third year medical classes will be considered only from students attending medical schools approved by the Council on Medical Education and Hospitals of the American Medical Association and only if a vacancy exists. An applicant for admission to advanced standing must follow the regular application procedure and must furnish evidence that he has satisfactorily completed courses equivalent in kind and amount to those taken by the class to which admission is sought. He must also present a letter of honorable dismissal from the dean of the medical school last attended. The University of Nebraska College of Medicine reserves the right in every case to give examinations in any or all subjects in which credit is requested.

No student coming from another school will be allowed any privileges in this school which would have been denied him in the school which he leaves.
No student will be admitted to advanced standing in any class while he has a delinquency in any subject. No student may become a candidate for graduation unless he has spent the last two years in residence at this college.

In accordance with the recommendation of the Association of American Medical Colleges, the College of Medicine does not grant any time credit toward the Doctor of Medicine degree to holders of a bachelor's degree; this means that the total time spent by each student taking his medical degree must include, as a minimum, four years of registration in a medical college, the last two years of which must be in residence in the University of Nebraska College of Medicine.

The granting of transfer credit is at the discretion of the Committee on Admissions and Scholastic Standing. Admission to any class does not necessarily carry with it credit in all work previously done by the class since the Committee on Admissions and Scholastic Standing has the right to demand satisfactory evidence of the completion of previous work in that subject equal to that required of the students of this College, and in case the work is not equal to such requirement, the deficiency stands against the student as an “incomplete” until removed.

If a student has been dropped from another medical school because of poor scholarship or unsatisfactory conduct, he is not acceptable for admission to The University of Nebraska College of Medicine.

SPECIFIC EDUCATIONAL REQUIREMENTS

High School.—Sixteen secondary school units are required for admission and must include three units in English, two units in one foreign language (ancient or modern), two units in mathematics (one each of algebra and geometry or an equivalent), and one in science (biology, botany, chemistry, physics or zoology).

College or University.—The University of Nebraska College of Medicine requires a minimum of three years of college work (90 semester hours or 135 quarter hours) in an accredited college. Not more than 65 semester hours credit will be recognized from a junior college. Specific minimum premedical course requirements are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Semester Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEMISTRY</td>
<td></td>
</tr>
<tr>
<td>The requirement is an adequate complete course in general chemistry and an adequate complete course in organic chemistry. Should these total less than fourteen semester hours, they will be subject to approval by the Admissions Committee.</td>
<td>14</td>
</tr>
<tr>
<td>BIOLOGY</td>
<td></td>
</tr>
<tr>
<td>Four hours must be zoology. Half of the credit must be in laboratory work.</td>
<td>3</td>
</tr>
<tr>
<td>PHYSICS</td>
<td></td>
</tr>
<tr>
<td>Mechanics, sound, heat, electricity, magnetism and light must be included.</td>
<td>3</td>
</tr>
<tr>
<td>ENGLISH COMPOSITION AND LITERATURE</td>
<td></td>
</tr>
<tr>
<td>Students should develop ability to speak and write correct English. Those found deficient in the use of written or spoken English will not be permitted to enter upon or continue the medical course.</td>
<td>6</td>
</tr>
<tr>
<td>FOREIGN LANGUAGE</td>
<td></td>
</tr>
<tr>
<td>Students must have reading knowledge of a foreign language. Two years of a selected modern or classical foreign language at the college level, or equivalent, is required. This requirement may be met by satisfactorily completing a fourth-semester course in the elected language without having earned college credit in the more elementary courses. Or it may be met by certification of proficiency equal to second-year college level in the elected language.</td>
<td>6-18</td>
</tr>
</tbody>
</table>
ELECTIVES

A sufficient number of electives is required so that, combined with the required hours above, the total is ninety. It is urged that electives include subjects not related to specific medical requirements. Recommended subjects include psychology, social studies, history, philosophy and other humanities, to give a broad cultural background.

Total minimum hours required

Credits offered from professional schools which do not regularly receive arts college credit are not accepted for premedical college requirements.

Semester hours of credit in subjects specifically offered in the medical college cannot be used in satisfying admission requirements.

A student applying to the College of Medicine should have a grade average of at least 6.0 in all the required science courses. The grade point of 6.0 is based upon the grading system of the University of Nebraska. The equivalent in other grading systems will be determined by the Assistant Registrar, College of Medicine, and the Committee on Admissions and Scholastic Standing. In determining the equivalent, the grading system and the scholarship requirements of the college or university wherein the work was completed will be taken into consideration.

REGISTRATION AND ADMISSION TO CLASSES

When an applicant receives notice that he has been accepted for entrance to the College of Medicine, he is required to send a deposit of $25.00. This is applied as part payment of the tuition fee for the first semester or is forfeited if the applicant fails to register in the class for which he was accepted.

Veterans entering under PL-550 must submit on day of registration a Certificate of Education and Training (VA Form 7-1993) approved for a program with the objective of Doctor of Medicine Degree, indicating the University of Nebraska College of Medicine as place of training.

Registration is accomplished on the day indicated in the official calendar. A fee of $3.00 is charged any student who, unless excused by the dean, seeks to register later than this day. A fee of $2.50 is charged for reregistration. Any change whatever in a registration once made is considered as a reregistration. No work done in the College of Medicine may be credited without proper registration. No student may add any subject to his schedule or drop from it any subject for which he has been regularly registered without written permission from the dean.

Class Standing and Examination.—The standing of a student in any course is determined by the instructor in charge of the subject through examinations, personal contact, and observation of work. The passing grade for subjects of the first and second medical years is 4 (70 to 74). However, a student who fails to make a yearly average of 5 (75 to 79) must pass an oral examination in all of the subjects of the year just completed before being permitted to register for the following year. A student is allowed to take only one recapitulation examination. The passing grade for the third and fourth years is 5 (75 to 79).

A course which for a good reason has not been completed may, if of passing grade, be marked "incomplete." An incomplete must be removed according to the procedure outlined by the instructor of the course. The incomplete cannot be removed later than the end of the first quarter in which the course is again offered or it becomes a failure.

A failed subject must be absolved by reregistration in and satisfactory
completion of the subject at or before the next offering in the college schedule. A reregistered subject takes precedence over all other subjects. A minimum grade of 5 in each course is required of students repeating work during the first two years. A student who has failed twice here or elsewhere in the same subject is not eligible for registration in that subject at this college.

Whenever at the end of any quarter a student is delinquent in half or more of his registered hours, his name is automatically dropped from the rolls of the College of Medicine and his registration cancelled.

Student discipline will be handled by the Dean of the College of Medicine. A student who, by quality of work or conduct, indicates an unfitness to enter the medical profession may be required at any time to withdraw from the medical college. Recommendations for suspensions, dismissals, or other suitable action as the case warrants, will be made to the Faculty of the College of Medicine, the Chancellor, and the Board of Regents. The Dean may appoint a committee of the Faculty to advise him on such matters.

Absence or Withdrawal.—Attendance at less than 80 per cent of the scheduled lectures and recitations or 85 per cent of the scheduled laboratory and clinical hours constitutes a failure in any course and shall be so reported.

The Dean of the College of Medicine is the adviser of all students in the College of Medicine. A leave of absence for a short time may be granted by the dean. This is merely a justification for absence and not an excuse from any work. If a student in good and honorable standing finds it necessary to withdraw from the University before the close of a quarter, the dean grants him permission to do so. If he is in good standing and is not a minor he is given honorable dismissal from the University at his own request; if a minor, at the request of his parents or guardian.

REQUIREMENTS FOR GRADUATION

The degree of Doctor of Medicine is granted only under the following conditions:

1. The candidate must be at least 21 years of age.
2. He must possess a good moral reputation.
3. He must have complied with all the requirements for admission.
4. He must have pursued the study of medicine for at least four years and must have passed all required courses and examinations of the College of Medicine, University of Nebraska. The last two years' work must have been taken at this institution.
5. He must have written an acceptable paper on an examination posed by the Examinations Committee at the end of the senior year, and also have passed all departmental examinations.
6. He must have written and presented an acceptable, typed senior thesis.
7. He must have discharged all indebtedness to the University of Nebraska.

The degree of Doctor of Medicine cum laude may be conferred upon a student who has made a high scholastic record, and who, in addition, has in the course of his medical studies performed some original research. Such a student must be recommended by the department in which the original work was done. Usually he must stand in the upper ten per cent of his class.
Courses Leading to the Degrees of Bachelor of Arts or Bachelor of Science and Doctor of Medicine.—Students who have transferred from the University of Nebraska College of Arts and Sciences may at the end of their fourth year earn the Bachelor of Arts degree or Bachelor of Science degree by:

1. Completing the group requirements of the College of Arts and Sciences.
2. Completing two minors or one major.
3. Using the subjects of the first year of the medical course as a major, all of which must be completed satisfactorily.

Both of these degrees are conferred by the College of Arts and Sciences at a Commencement on the Lincoln campus.

Candidates for baccalaureate degrees in institutions other than the University of Nebraska may arrange with their colleges to accept transcripts of the work of the first two years in medicine to apply to such degrees, or otherwise satisfy the requirements of those institutions.

Courses Leading to the Degree of Bachelor of Science in Medicine.—Only students presenting premedical college credits of high standard and who have satisfactorily completed all courses of the first two years in medicine, the last year of which shall be in residence in this institution, but who have not fulfilled the requirements for the degree of Bachelor of Science or Bachelor of Arts in the College of Arts and Sciences, may become candidates for the degree of Bachelor of Science in Medicine.

FEES AND EXPENSES

All students who are legal residents of Nebraska and who carry a full student load will pay a single annual fee of $525.00. Nonresident students will be charged a single annual fee of $765.00. Adjustments may be made in the case of students carrying less than the full student load. One-half of tuition is due at registration, the balance on January 30, 1961.

The annual fee includes matriculation, registration, medical, laboratory, library, diploma, and course fees. In case of undue usage of materials or breakage or loss of equipment other than that allotted to each course, and because of negligence on the part of the student, a penalty charge will be levied based on the fair value of the material and equipment so lost or broken.

Fee Refunds.—A student who withdraws from the University during any term for which he registered is entitled to claim a refund of a portion of his fees. A refund schedule is available at the Finance Office.

Miscellaneous Fees.—Candidates for a degree to be awarded at public exercises shall be present at such exercises, except as herein provided. A candidate must make application and show just cause in order to obtain the necessary faculty recommendation to receive a degree in absentia. Candidates to whom diplomas or certificates are awarded in absentia shall pay a special fee of $10.00. The following fees are not included in the schedule listed above:

- Late registration ................................................................. $ 3.00*
- Transcript—one copy furnished free
  Each additional original .............................................. 1.00
- Degree in absentia ........................................................ 10.00
- Special examination, each course .................................... 5.00
- Photostatic copy of diploma, 3 copies ................................ .50
- Cap and gown rental fee—amount fluctuates.

* This charge is made to all students paying during the first week following the date the tuition installment falls due. An additional charge of $1.00 is made for each additional week after the first week of late registration.
Expenses.—Board may be obtained in the vicinity of the College campus at an average cost of $15 to $20 a week and comfortable rooms for $30 to $40 a month. Students rooming together may obtain comfortable rooming quarters at slightly less than this amount. One hundred dollars a year should be allowed for books and instruments. The average expenses of the student for a school year, including board and room, books, instruments (exclusive of microscope and other special equipment) and all fees is between $1,400 and $1,600.

MISCELLANEOUS INFORMATION

Form of Payment.—To avoid misunderstanding as to the amount charged for fees, checks on personal accounts will be received only when written for the exact amount of the fees. Parents or guardians should write checks for fees and for other expenses separately; if this is not done, students should deposit funds in a local bank and give personal checks for the amounts of the fees.

Remittance by mail should be by draft, money order, or cashier’s check. Do not send coin or money except by registered mail. It is impossible to trace money lost in the mail and University officials cannot be held responsible for such loss.

Housing.—Although the College of Medicine has no on-campus housing for medical or technology students the Assistant Registrar’s Office maintains listings of rooms, apartments, duplexes and houses reported available.

Nonresident Students.—According to Nebraska law, any student whose legal residence is not Nebraska is required to pay the nonresident fee.

A student’s right to classification as a resident for purposes of registration in a state educational institution must be determined under the provisions of Sec. 85-502, Revised Statutes of 1943, Reissue of 1956.

Any student who has been classified as a nonresident student who believes he can qualify as a resident may secure from the University Comptroller a residency application form and, when it is properly filled out, file such form with the Comptroller for review and ruling. The form must be filed in the Office of the Comptroller before the end of the ninth week of the term for which the tuition fee was charged.

The exact wording of the state law on residency is given on the resident application form.

Students who are interested in the requirements for residency may write the Comptroller’s Office, University of Nebraska, Lincoln 8, Neb.

Microscopes.—Students are required to provide suitable microscopes for their own use. Inquiries regarding specifications for microscopes as recommended by the faculty may be obtained by addressing the Assistant Registrar, College of Medicine.

GRADUATE WORK

Graduate course work in the field of the Medical Sciences is offered in eleven departments: Anatomy, Biochemistry, Internal Medicine, Microbiology, Neurology and Psychiatry, Obstetrics and Gynecology, Orthopedic Surgery, Pathology, Pediatrics, Physiology, Pharmacology, and Radiology. Three of these departments (Anatomy, Biochemistry, Physiology, and Pharmacology) offer independent majors leading to the
Master's degree or to the Ph.D. degree. Four additional departments (Microbiology, Neurology and Psychiatry, Pathology, and Radiology) offer independent majors leading to the Master's degree only. The eleven departments also cooperate in offering an interdepartmental area program which permits the student to pursue a course of study for the Master's or the Ph.D. degree with concentration in the medical sciences rather than in a specific department.

The requirements for admission are identical for study in an independent department or under the interdepartmental area program.

Admission for graduate work leading to the Master of Science or Doctor of Philosophy degrees may be granted to students from any of the following categories:

1. Students with Bachelor of Science or Bachelor of Arts degrees from recognized colleges or universities who attain an acceptable grade in a qualifying examination in basic medical sciences.
2. Students with a baccalaureate degree and the degree of Doctor of Medicine with an acceptable record.
3. Students with a master's degree from an acceptable college and the equivalent of two semesters' credit in the basic medical sciences.
4. Students from the College of Medicine who have bachelor's degrees, who have completed the first two years of the regular curriculum in the College of Medicine, or its equivalent, and who have attained acceptable grades in their courses or passed a qualifying examination in basic medical sciences.

For admission for work in the Department of Neurology and Psychiatry, leading to the degree of Master in Psychiatric Nursing, a student must have completed an approved professional program in nursing with a bachelor's degree from a recognized college or university. Acceptable evidence will also need to be submitted on the student's personal qualifications for psychiatric nursing.

A student registering for graduate work in the medical sciences must comply with the general requirements of the Graduate College and with any special rules established by the graduate committee of his major department, or if the major is in medical sciences, by the interdepartmental area committee. Certain special rules which are applicable to all students in the medical sciences regardless of the major are set forth in the paragraphs which follow. Other rules which pertain to the work in specific departments or in the interdepartmental area are indicated under the headings designating the respective departments.

Graduate students who are admitted with deficiencies in the medical sciences may, by permission of the appropriate graduate or area committee and approval of the Dean of the Medical College, register for courses on the College of Medicine campus in preparation for their qualifying examinations. Such graduate students may, upon the passing of qualifying examinations, make application to the appropriate graduate or area committee for graduate credit in certain medical courses successfully completed. The graduate or area committee may make recommendation for such credit on the basis of the attainment and aptitude of the applicant. In any case, at least one-half of the total credit for the master's degree shall be taken in graduate courses listed as 350 and above. Medical courses for which partial or total graduate credit may be allowed are listed under the respective departmental headings in the sections which follow.
Graduate students may be required to attain proficiency in their field of concentration by participating in the instruction of medical students for at least one quarter in a regularly required course in the College of Medicine. A student who fails to earn an average grade of at least 7 may not continue his program of study without the special permission of the appropriate graduate or area committee.

A student who wishes to become a candidate for an advanced degree with concentration in the medical sciences must select work in the departments which have been approved to offer graduate work. He may elect to do his thesis research in any one of the eleven cooperating departments. The distribution of graduate work shall be such that not more than two-thirds of the total program, including thesis research, shall be in the major field of study, with a remainder in at least one other department for candidates for the master's degree, and two other departments for candidates for the degree of Doctor of Philosophy.

Candidates who select one of the preclinical departments for their thesis research may come from any of the four categories (for admission) listed on page 21. They may select other departments for additional work.

Candidates who select one of the clinical departments for their thesis research must have qualified for admission through Category 2, page 21. They must select preclinical departments for additional work. Such students may be required to serve as residents for one year before being admitted to the Graduate College. While fulfilling their minor (preclinical) requirements, these candidates must be assigned to the minor department or departments during at least one-third of the total hour requirement for the degree sought.

Candidates electing to work in the interdepartmental area will do their work under the supervision of the area committee: Professors McIntyre, Chairman, L. F. Dunn, Gibbs, Hamsa, Holly, Hunt, Jacobi, Latta, McFadden, McWhorter and Wittson.

GRADUATE FEES

All students who are legal residents of Nebraska and who carry a full schedule (12 or more hours) in any quarter will pay a fee of $80.00 per quarter. Nonresident students will be charged a fee of $160.00 each quarter. The single fee includes—in addition to course charges—registration, library, diploma and Student Health fees. For additional miscellaneous fees, consult the Bulletin of the Graduate College.

A resident student who originally registers for less than 12 quarter hours will be charged one-twelfth of $80.00 for each quarter hour registered up to and—if courses are added later— including the twelfth quarter hour. Quarter hours added thereafter will be free of charge.

A change-of-registration fee of $2.50 is charged in addition to the regular tuition for any changes made from the original registration.

A nonresident student who registers for less than 12 quarter hours will be charged one-twelfth of $160.00 for each quarter hour registered up to and—if courses are added later—including the twelfth quarter hour as well as the $2.50 change-of-registration fee for each change of registration.

For thesis publication and binding fees, consult the Librarian of the College of Medicine before starting thesis.

Teaching and Research Assistantships.—A graduate student holding an appointment as a teaching or research assistant during a quarter or summer session is required to pay only the administrative fee, provided the
appointment carries a University stipend equal to at least the maximum tuition fee of $120.00 for a quarter, or for the summer. If the stipend received by an assistant for an academic year (three quarters) is equal to at least the maximum fee for all four quarters ($480.00), he will pay only the administrative fee for the summer session following, or intervening between, quarters for which he is appointed, even though he does not hold an appointment for the summer session.

The administrative fee is $20.00 for a registration of 12 or more hours during a quarter. If an assistant is registered for less than 12 hours during a quarter, he pays only one-twelfth of $20.00 for each hour registered up to and—if courses are added later—including the twelfth quarter hour.

Graduate Fellowships.—A student must carry a full program of graduate study or research for each quarter during which the fellowship stipend is received. Recipients of Regents Tuition Fellowships are required to pay only the administrative fee of $20.00 for each quarter.

GRADUATE REGISTRATION

Registration will be accomplished during the early part of each quarter in consultation with the chairmen of the different departments in which the graduate work will be carried on.

UNIVERSITY STAFF EXEMPTION

Members of the academic-administrative staff employed full time may be permitted to register for not more than 4 credit hours per quarter, or 5 credit hours if a single 5 credit hour course, for which the charge is $1.00 plus a $5.00 matriculation fee. All such registrations must carry the signed approval of the chairman of the department and the dean or director of the college, school or division in which the staff member is employed during the period for which he is registered.

Academic-administrative staff members of the University employed by the Nebraska Psychiatric Institute are eligible for this staff exemption.

POSTGRADUATE WORK

Postgraduate courses are offered to practicing physicians and ancillary medical groups through the Office of Postgraduate Affairs. These courses number from fifteen to twenty each school year and are presently provided as a cooperative project between the College of Medicine and the University Extension Division.

Well-known authorities from throughout the country and from our own campus take part in these programs as guest lecturers. The course fee is $10.00 per day, and the average length of these courses is two and one-half days. Each course is announced by mail to each practicing physician in the state, and to others interested, at least one month prior to the course date.

All clinical courses are approved for hour-for-hour Category 1 credit by the American Academy of General Practice. Further information may be obtained by writing the Office of Postgraduate Affairs.
Graduate assistantships are available to students of exceptional ability to give them opportunity to do research in the medical sciences and fulfill the requirements for a Master of Science or Doctor of Philosophy degree.

**Jetur Riggs Conkling and Jennie Hanscom Conkling Foundation.**—The will of the late Clementine C. Conkling provides for the creation of a trust to be known as the "Jetur Riggs Conkling and Jennie Hanscom Conkling Foundation," the income of which is used by the Regents of the University of Nebraska in providing scholarships for deserving medical students. Scholarships may be awarded only after the close of the students' first year in the Medical College. These scholarships are awarded on the basis of recommendation by the Committee on Scholarships and Awards.

**August Frederick Jonas Senior Memorial Fund.**—This fund was established by Mrs. A. F. Jonas of Omaha to provide assistance for needy students who are judged worthy both for scholastic attainment and for character and promise. This fund is administered under the direction of the Committee on Scholarships and Awards.

**The Anna Glock Fellowship in Cancer.**—The will of the late Anna Glock provided money for research and treatment of cancer during a five-year period. A fellowship is awarded annually to the person who has had sufficient training and qualifications to pursue these studies. Applications should be addressed to the Dean.

**The Sidney R. Kent Fellowship in Medicine.**—An award of $500 is available annually to the student in the College of Medicine who has made the most outstanding record and who desires to pursue further work in medicine. Such study may be pursued either in the University of Nebraska or elsewhere agreeable to the action of the Committee. Details of this award may be learned on application to the Dean's office or to the Sidney R. Kent Committee of Awards.

**The C. W. M. Poynter Foundation.**—A fellowship under the sponsorship of the Poynter Foundation provides a stipend of $2,000 for a period of ten months, during which time the recipient will be expected to devote his entire time to research in the Department of Anatomy. Appointment is made by the Chairman of the Department. Applicants should have completed two or more years of medicine and have demonstrated ability and aptitude for investigative work. The recipient may, if he desires, become a candidate for an advanced degree in the medical sciences.

**LOANS**

There are a number of funds available to the University of Nebraska College of Medicine from which money can be lent to deserving students who are in need of financial assistance. These funds are available to students enrolled in the College of Medicine. Generally they are reserved for students who have established themselves as able and worthy during the completion of at least the first year in medical school.

Applications for loans from any of these funds should be made to the Student Assistance Committee on forms which are available in the Registrar's office.

Ordinarily the Student Assistance Committee will accept applications during a period ending about one month before the dates on which payment of tuition is required. The exact dates will be posted at the College well in advance. Students who foresee the need of financial assistance should have submitted applications by these dates. Except under extreme and unusual emergencies, applications which fail to meet the deadline will be held for review until the next posted date.
The College of Medicine Alumni Association Student Loan and Scholarship Fund.—On July 15, 1958, a fund was established by the University of Nebraska College of Medicine Alumni Association and placed in the custody of the University of Nebraska Foundation to provide loans or scholarships to students registered or accepted for admission in the College of Medicine. Applications for loans on this fund are received by the Student Assistance Committee.

Students enrolled in the College of Medicine may also receive loans through the Nebraska Medical Foundation and the Nebraska Medical Education Fund, Inc. The Student Assistance Committee can supply information on either of these sources.

The Josephine Chamberlin Loan Fund.—On the retirement of Miss Josephine Chamberlin as Superintendent of the University of Nebraska Dispensary, on June 11, 1946, a fund was established in her honor. From this fund loans are available to students of the College of Medicine and the School of Nursing.

The Faculty Woman’s Club of the University of Nebraska College of Medicine Student Loan Fund.—This fund was established in 1956. Money is assigned to it from operation of the student exchange shop. The fund is administered by the University of Nebraska Foundation under conditions which apply to loans from other funds.

Kellogg Fund.—In April, 1942, the W. K. Kellogg Foundation of Battle Creek, Michigan, gave the College of Medicine $10,000 to be used as a student loan fund, particularly to meet the emergency created by the accelerated war schedule and the consequent loss of student earnings during the summer. An additional grant of $5,000 was made later in the year.

Omaha Medical College Foundation.—This foundation, created in April, 1921, was established largely through contributions received from former professors in the Omaha Medical College. The object of the foundation is to promote the study of medicine and to provide for medical research in the University of Nebraska College of Medicine and to assist worthy students with loans.

Lizzie Oltmans and Frederick Oltmans Student Loan Fund.—In March, 1950, the donors named above paid $1,000 to the University of Nebraska Foundation to be used as a loan fund for undergraduate and graduate students enrolled in the College of Medicine.

Robert H. Storz Student Loan Fund.—This fund was established by Storz Brewing Company in 1952 with a sum of $1,500 to be paid to the University of Nebraska annually. This fund was established to provide loans to students in the College of Medicine who are in need of assistance.

Dr. Carl P. Wagner Memorial Medical Student Loan Fund.—The sum of $500.00 was paid to the University of Nebraska Foundation in 1952. This fund was established to provide loans to students in the College of Medicine adjudged to be worthy and in need of assistance.

Scottish Rite Loan Fund.—A fund has been established with the University of Nebraska Foundation from which needy medical students may borrow up to $400 per academic year. Application should be made through the Student Assistance Committee.

Nebraska Medical Education Fund, Inc.—A group of local physicians and alumni of The University of Nebraska College of Medicine has established a fund to assist medical students, nursing students, interns, and residents. Students in need of assistance may borrow up to $1,500 per
academic year from this fund. Application should be made to the Student Assistance Committee at the College of Medicine.

**AWARD**

**University of Nebraska College of Medicine Alumni Association Award.**
—An award of $50 is given each year to the senior student presenting the best thesis as judged by the Thesis Committee.

**STUDENT AND ALUMNI ORGANIZATIONS**

**Student Activities Council.**—The Student Activities Council governs the organization and regulation of student activities of the College of Medicine and School of Nursing. It serves as an agency through which faculty relationships with student activity may be fostered and maintained. Recognized student groups elect members who serve as representatives in the Student Activities Council.

**Alumni Association.**—Alumni of the University of Nebraska College of Medicine maintain an active organization with headquarters in Omaha at the college. Activities include sponsorship of class reunions, luncheons, dinners and the traditional senior reception following Commencement each year. A monthly news bulletin is sent to members. Officers for 1959-60 were: Dr. S. A. Swenson, Jr., President; Dr. Leroy W. Lee, Vice-President; Dr. E. A. Holyoke, Secretary-Treasurer.

The alumni of the medical college offer a prize of $50 for the senior thesis of the year judged best by the Thesis Committee.

**Alpha Omega Alpha.**—A.O.A. is a non-secret medical college honorary society, membership in which is based upon scholarship and moral qualifications.

Elections are made from the students who have completed nine or more quarters of the four-year medical curriculum and are made by unanimous vote of the active members of the Chapter. Not more than one-sixth of any class may be elected to membership. The University of Nebraska Chapter was organized November 2, 1914.

**Student American Medical Association.**—Founded in 1950 with the aid of a grant from the AMA, the Student American Medical Association swiftly grew to its present membership of over twenty thousand students, representing sixty-nine medical schools. Serving expressly “to advance the profession of medicine, to contribute to the welfare and education of medical students, to familiarize its members with the purposes and ideals of organized medicine, and to prepare its members to meet the social, moral, and ethical obligations of the medical profession,” SAMA offers group insurance plans, an internship evaluation program and a monthly Journal. Plans for the immediate future include low-interest student loans, new scholarships and a job placement service.

At Nebraska, among other functions SAMA jointly sponsors “Pre-Med Day” and a series of convocations held regularly throughout the school year. Membership closely approaches one hundred per cent of the student body.

**SCHOOL OF NURSING**

The School of Nursing, which is a part of the College of Medicine, affords three years of professional education following one year of liberal arts in an accredited college. The immediate administration of the School of Nursing is provided through the director and the faculty. The program
of instruction is given by the faculties of the University of Nebraska which include the College of Arts and Sciences, the College of Medicine and the School of Nursing. Students are admitted as candidates for the degree of Bachelor of Science in Nursing. The School of Nursing Building on the College of Medicine campus provides residence and educational facilities for the student nurses. Requests for bulletins and application blanks should be made to the Director, School of Nursing.

MEDICAL CURRICULUM

Departmental Hours.—The course of study outlined is constructed in accordance with the recommendations of the Council on Medical Education and Hospitals of the American Medical Association and of the Association of American Medical Colleges. The University Hospital and Dispensary on the Medical College campus furnish ideal opportunities for bedside clinical instruction in close relation to the scientific departments of the college.

CLINICAL FACILITIES

University Hospital.—The University Hospital forms the largest unit of the group of buildings constituting the College of Medicine. It is the center around which all the activities of the various departments are grouped, making possible a close correlation between clinical and laboratory teaching. The hospital, modern in every respect, contains floor space for 202 beds, and provides for the care of a wide variety of cases.

Patients are received from the several counties of Nebraska and are admitted on the application of a legally qualified practitioner of medicine and chairman of the county board.

The ground floor contains an admitting department, diet kitchen, drug room, kitchen, dining rooms, pathological laboratories, necropsy amphitheater, the X-ray department and the stack room of the library. The first or main floor contains the college and hospital administration offices, registrar’s office, medical records office, medical amphitheater, reading room of the library, patients’ library and three medical wards. The second floor provides four surgical wards similar to those on the medical floor, faculty conference room, the offices of the School of Nursing, surgery department office and the photography department. The third floor contains wards for obstetrics, a nursery, a children’s ward, offices of Departments of Pediatrics and Obstetrics and Gynecology and a central hospital supply center as well as the operating pavilion for obstetrics. On the fourth floor are situated the operating pavilion with rooms for general surgery and the surgical specialties which will accommodate large and small groups of observers, the hospital laboratory, and the laboratory for clinical clerks. Each ward is provided with a large solarium.

The control of the University Hospital rests in The Board of Regents. It is administered by the College of Medicine.

University Dispensary.—The dispensary is located in the South Laboratory Building. Separate services, each having its own rooms and equipment, are provided in: dermatology; eye, ear, nose and throat; genito-urinary diseases; gynecology; internal medicine; neurology; obstetrics; orthopedic surgery; pediatrics; surgery; and urology. These activities furnish a wide diversity of diseases and are organized for the teaching of the senior students, under the supervision of the clinical staff.

Extramural Hospitals.—Bishop Clarkson Memorial, Children’s Memorial,
Lutheran, Immanuel Deaconess, Nebraska Methodist, Hattie B. Munroe Convalescent Home, Douglas County, and Veterans hospitals in Omaha, and Bryan Memorial and Lincoln General hospitals in Lincoln, are available for regular or special clinics as needed. Clinics in psychiatry are provided at the Nebraska Psychiatric Institute. Members of the University faculty are on the staffs of all these hospitals.

Hospital Appointments.—Graduates of the College of Medicine are afforded a wide choice in the selection of internships. Twelve internships and thirty-four residencies in the major specialties are available at the University Hospital.

Medical Social Service Department.—The Medical Social Service Department provides a service to the patient and to the doctor. It interprets the medical findings and recommendations to the patient and his family and gives to the doctor information regarding the economic, social and cultural problems of the patient. This information gives the doctor a better understanding of the patient and enables him to better evaluate the patient's ability to carry out his orders.

LABORATORY FACILITIES

Anatomy.—The Department of Anatomy occupies the third and fourth floors of the North Laboratory Building. The rooms are well lighted and ventilated. The "unit room" system—each unit accommodating four or eight students—has been adopted as superior to that of a large common dissecting room. The state anatomical law provides ample material for dissection. In the laboratory for microscopic anatomy individual desks, lockers, reagents, etc., are at the student's disposal, as are also excellent collections of histological and embryological material, models, charts, etc.

Biochemistry.—This department occupies the entire fifth floor of the South Laboratory Building. The well-equipped student laboratory can accommodate 90 students. Adjoining it are a classroom, balance room, "walk-in" incubator, and student stock room. The department also has several large research laboratories equipped with all of the modern tools of biochemistry. Among these are analytical and preparative ultracentrifuges, filter paper and zone electrophoresis apparatus, chromatography cabinets, Warburg apparatus, metabolic shaking incubator, spectrophotometers, special balances, flash evaporator, blood gas apparatus, micro-Soxhlet extraction battery, as well as the usual items of a research laboratory. Facilities for techniques with radioisotopes are also available.

Microbiology.—Occupying the first floor of the North Laboratory Building, this department uses the same student laboratory as Pathology. There are excellent facilities for support of the teaching exercises and for support of an active research program being carried out. The diagnostic work for the University Hospital provides material useful in the class exercises. An extensive collection of color lantern slides, mounted specimens and charts is available for the teaching exercises.

Pathology.—The office and classroom area is principally on the second floor of the North Laboratory Building. The student laboratory is utilized also by Microbiology. Equipment, loan sets of slides, and apparatus, with the exception of microscopes, are provided for the student. Approximately 8,500 color lantern slides are used for the teaching exercises. The Pathologic Anatomy and Clinical Pathology laboratories of the University Hospital provide material and support the teaching program.

Physiology and Pharmacology.—Experimental physiology and pharmacology occupies the fourth floor, a part of the second, and the sixth floor
of the South Laboratory Building. Laboratory exercises of the medical students are carried out on part of the fourth floor, and research work for graduate students in the remainder of the space. The main laboratories accommodate forty-four students in each section, with separate tables and lockers for each group of students. In a separate mammalian laboratory students work in groups of five.

There are special rooms for specialized research instruments, including space provided for an ultracentrifuge and for spectrophotometric work. In addition there is a well-equipped workshop for the construction and repair of a wide variety of apparatus.

Museum.—The pathological museum of the College of Medicine contains about 3,500 specimens. Nearly every variety of pathological lesion is represented and the constant addition of fresh material from the autopsies performed continually adds to its interest. In addition to the gross specimens are thousands of microscopic sections and a large collection of wax reproductions of various lesions. The museum is an important and necessary adjunct to the teaching of pathology and of clinical medicine.

Clinical Pathology.—For clinical clerk service a central hospital laboratory is provided in which clinical laboratory work on assigned cases is done under supervision. For tissue examination, a special laboratory is located on the ground floor of the first hospital unit, with necropsy room adjacent.

LIBRARY FACILITIES

The College Library is located in the Hospital Building within easy access of the various laboratories and stands as a vital common interest to the laboratory and clinical branches of medical instruction. The reading room, seating ninety, furnishes a congenial place for students, faculty and staff to work. Most of the 1,200 current journals received are shelved in this room. The book stacks are directly below on two levels and contain 85,000 bound volumes and 50,000 pamphlets, theses and unbound journals. This collection is the result of purchases and acquisitions extending over more than half a century, building up complete files of important journals in the fields of clinical medicine and the medical sciences in English and foreign languages as well. Here the student has access to one of the most complete medical libraries in the Midwest, which offers abundant opportunities for research and additional reading and study. First year students are given instruction in the use of the library, including an introduction to all the important medical reference tools and indexes.

Incident to its ordinary function, the Library maintains a collection of material on the history of medicine in Nebraska, graduates of the College, activities of its staff and keeps a complete file of reprints of the writings of staff members. Incorporated within the library of the College of Medicine are 2,000 volumes of the Omaha-Douglas County Medical Society, periodicals and transactions of the Nebraska State Medical Association and several outstanding private medical libraries of former practitioners of the state.

The resources of the University of Nebraska Libraries in Lincoln are available to students and faculty in Omaha, putting an additional 550,000 volumes at their disposal. Through close cooperation with other medical libraries it is possible for the Librarian to secure interlibrary loan material available in other libraries, including the Midwest Interlibrary Center in Chicago and the National Library of Medicine in Washington.

Courses of Instruction

In the following departments, courses numbered 310-319 are given in the first medical year; courses numbered 320-329, in the second medical year; courses numbered 330-339, in the third medical year; courses numbered 340-349, in the fourth medical year. Courses numbered 350 carry graduate credit. Roman I indicates courses offered the fall quarter; II, the winter quarter; III, the spring quarter; and SS, the summer.

Anatomy

Professors Holyoke, Chairman, Latta; Associate Professors Benjamin, Elliott; Assistant Professors Bach, R. R. Best, K. Fitch, Pederson, Reynolds; Instructor Cochran; Demonstrators Coe, Rees, Wilson.

In this department instruction is given in gross, microscopic, and developmental anatomy including gross and microscopic anatomy of the nervous system. The work of the department extends through the first two quarters of the first medical year.

All instruction is based on laboratory work carried out under the supervision of the staff. Lectures covering subjects of broad morphological significance are given before the entire class, but for the discussion of details, in conjunction with laboratory work, the class is subdivided into small groups. Every effort is made to correlate the work in gross and microscopic anatomy. A comprehensive examination covering all phases of anatomy is given at the end of the second quarter.

Anatomy.—

310. Gross Anatomy (Total 312 hrs I, II)
The course covers dissection of the entire body. This work is carried out in groups of four, each group being assigned a separate room. From time to time table demonstrations and quizzes are required. Through this table teaching the student's proficiency is increased and calibration of individual progress is made possible. (240 hrs or 10 qtr hrs credit for graduate work.)

311. Embryology-Histology (Total 212 hrs I, II)
A brief survey of the fundamental facts of vertebrate development as based on chick, pig and human embryos is first undertaken. This is followed by a study of the histogenesis of the fundamental tissues leading directly to their adult histological structure. Morphogenesis and histogenesis of the various organ systems of the body, excepting the nervous system which is studied independently, are similarly correlated with their adult histological and gross structure and with the relationships shown in gross anatomy. Special emphasis is placed on the study of the blood and blood-forming organs and the organs classified as endocrine which are studied somewhat independently. (200 hrs or 9 qtr hrs credit for graduate work.)

312. Neuro-Anatomy (Total 100 hrs II)
Lecture and laboratory
The gross and microscopic anatomy of the nervous system including sense organs. Study is made of the human brain by means of gross dissection; gross and microscopic sections; gross and microscopic study of the eye, and other sense organs by specially prepared demonstrations. Text and lectures aim to integrate the details of laboratory study into functional systems applicable to later physiological and clinical studies. (80 hrs or 7 qtr hrs credit for graduate work.)

350. General and Special Methods in Histological Technique (3-8 qtr hrs) Mr. Latta, Mr. Elliott, Dr. Holyoke
Prereq Anat 310-314
Principles and practice in general methods of preparation of tissue for histological study; special training given in the field of the student's particular interest.

351. Special Neu rho histological and Experimental Neurological Techniques (3-8 qtr hrs) Mr. Elliott, Mr. Latta
Prereq Anat 350
Advanced special technical methods of demonstrating the histological structure of nervous tissue and of the experimental approaches to neurological problems.

352. Techniques of Histochernistry (3-8 qtr hrs) Mr. Latta, Mr. Jacobi, Mr. Fitch
Prereq Anat 350
Development of methods for demonstrating various chemical features in tissues of the body.

353. Morphological and Experimental Hematology (4-9 qtr hrs) Mr. Latta, Dr. Holyoke
Prereq Anat 350
Detailed study of the morphology and inter-relationships between the cells of the blood, blood-forming organs and the connective tissues. Experimental studies of the biological significance of the cellular elements of the blood.
354. Comparative Human Embryology (4-9 qtr hrs) Mr. Latta, Mr. Benjamin, Dr. Pederson

Prereq: Anat 350

Special advanced studies of various features of reproduction and development as illustrated in the departmental and embryological collection.

355. Experimental Embryology (4-9 qtr hrs) Dr. Holyoke, Mr. Latta

Prereq: Anat 350

Advanced study and training in the methods employed in analysis of the factors and potentials operative in mammalian development processes.

356. Advanced Human and Comparative Neuroanatomy and Neuropathology (4-9 qtr hrs) Mr. Elliott, Mr. Benjamin

Prereq: Anat 350

Advanced detailed study of the structural organization of the central and peripheral nervous system of a man and/or various laboratory animals.

357. Experimental Embryology (4-9 qtr hrs) Dr. Holyoke, Mr. Latta

Prereq: Anat 350

Advanced study and training in the methods employed in analysis of the factors and potentials operative in mammalian development processes.

358. Biology of Radiation (4-9 qtr hrs) Dr. Pederson, Mr. Latta, Dr. Holyoke

Prereq: Anat 350

Morphological alterations induced in the living organism by radioactive substances.

359. Thesis Research (cr arranged) Staff

Independent investigation of some problem chosen by consultation between student and the staff.

360. Seminar (1 cr per qtr) Staff

By permission

Presentation of problems and accomplishments of investigations conducted by the graduate students and members of the department with critical discussion.

361. Advanced Gross Anatomy (3-10 qtr hrs) Dr. Holyoke, Dr. Pederson

Prereq: Anatomy 310, 311, 312

Studies of general and special gross dissection of the human body.

362. Techniques of Electron Microscopy (5 qtr hrs) Mr. Latta

Instruction in the general theory, and practice in the operation of the electron microscope, including special methods involved in the fixation, embedding, sectioning and mounting of specimens.

363. Selected Problems in Electron Microscopy (5-10 qtr hrs) Mr. Latta, Dr. Holyoke

Prereq: Anat 362

Special problems will be selected involving the ultrastructure of organelles within cells, of plasma membranes, interrelationships between cells or the characteristics of intercellular substances as revealed by the electron microscope.

Biochemistry

Professor Jacobi, Chairman; Associate Professors Beber, Harman, Wilder; Associate Research Professor H. L. Davis; Assistant Professors Barak, Carver, A. L. Dunn, Ng, Salanick.

The Courses in Biochemistry 310 and 340 aim to acquaint students with the basic facts of the science, particularly as these relate to an understanding of disease states. Moreover, biochemical aberrations in disease states are introduced to aid in the understanding of normal reactions and mechanisms.

The instruction offered in these courses is supplemented with more advanced and specialized courses (350-371, inclusive) for students who are candidates for the M.S. or Ph.D. degree; and for other students, such as hospital residents, desiring advanced training in medical biochemistry independently of the requirements for a degree.

310. Medical Biochemistry (Total 264 hrs II, III) (14 qtr hrs credit for graduate work except for those completing a graduate major in biochemistry.) Mr. Jacobi and Staff.

The descriptive and dynamic aspects of biochemistry with special reference to the human are presented. Physico-chemical principles are reviewed and applied to understanding normal physiological processes and their derangements in disease. Lipids, carbohydrates and proteins are discussed from the standpoints of descriptive chemistry, digestion, absorption, intermediary metabolism and of their relationships in metabolism and nutrition. Principles of biochemistry as they relate to clinical medicine are further considered in discussions of blood and other body fluids and tissues; urine; water, electrolyte, and acid-base balance; mineral metabolism; enzymes; vitamins; and of hormones. The laboratory work is illustrative of the problems and methods discussed, and the experi-
ments performed by the students constitute an important and integral part of the course in medical biochemistry.

340. **Clinical Biochemistry** (12 hrs III) Dr. Harman
Although this course deals with clinical problems, it is presented against a background of basic biochemistry. The content varies, depending on topics of current interest as well as on student needs. Such subjects as acid-base balance, water and electrolytic metabolism, protein metabolism and antibiotics have been covered. The biochemical aspects of these topics are emphasized in extensive correlation with clinical material. In this way the biochemistry of clinical medicine is brought into sharp focus.

350. **Biochemistry of Disease** (3-9 qtr hrs) Dr. Harman, Dr. Beber, Mr. Jacobi

*Prereq* Biochem 310
This course consists of the systematic presentation of the biochemical aspects of various diseases. Biochemical principles and facts are studied and utilized in a detailed manner in connection with the pathogenesis, course and treatment of disease.

351. **Vitamins and Nutrition** (3-9 qtr hrs) Miss Wilder

*Prereq* Biochem 310
Each of the vitamins is considered from the standpoints of history, chemistry, determination, physiological function and requirements. Nutritional aspects of proteins, carbohydrates, lipids and essential mineral elements are reviewed and integrated with the study of vitamins.

352. **Enzymes** (3-9 qtr hrs) Mr. Barak

*Prereq* Biochem 310
This course deals with the chemical nature of enzymes, the methods for their isolation, the kinetics of enzyme reactions, and the physiological function of enzymes. The clinical significance of certain of the enzymes is considered.

353. **Hormones** (3-9 qtr hrs) Miss Wilder, Dr. Salhanick

*Prereq* Biochem 310
Hormones are discussed from the standpoints of chemical nature, isolation, determination and function. The hormonal control of metabolism and the relationship of hormones to enzymes and vitamins are emphasized.

354. **Intermediary Metabolism** (3-9 qtr hrs) Mr. Jacobi

*Prereq* Biochem 310
The chemical reactions involved in the anabolism, catabolism, transformations and interconversions of proteins, lipids and carbohydrates are presented in detail.

355. **Water, Electrolyte, and Acid-Base Balance** (3-9 qtr hrs) Mr. Jacobi, Dr. C. R. Angle

*Prereq* Biochem 310
This course is an advanced study of the chemical structure and volume of the various body fluids and the mechanisms whereby they are formed and maintained within normal limits. Deviations in various pathological conditions are interpreted in terms of normal mechanisms.

356. **Advanced Biochemical Techniques** (3-9 qtr hrs) Staff

*Prereq* Biochem 310
Instruction in advanced biochemical techniques including paper and solution electrophoresis, spectrophotometry, Warburg manometry, paper chromatography, ultracentrifugation and special chemical determinations.

357. **Histochemistry** (3-9 qtr hrs) Mr. Carver, Mr. Latta

*Prereq* Biochem 310
The histochemistry of proteins, lipids, carbohydrates, enzymes and other biologically important compounds will be reviewed with emphasis on the chemistry of the staining techniques. The application of histochemistry to physiological and pathological problems will be described.

358. **Radioactive Tracers in Biochemistry** (3-9 qtr hrs) Mr. Dunn

*Prereq* Biochem 310
The employment of radioisotopes as a research tool in biochemistry will be presented. The theoretical and practical aspects of isotope methodology and the application of this technique to the solution of biochemical problems will be emphasized.

359. **Proteins** (3-9 qtr hrs) Mr. Barak, Mr. Carver

*Prereq* Biochem 310
This course consists of a survey of the chemistry and biology of proteins and the products of their hydrolysis. Descriptive chemistry, methods of isolation techniques for characterization and biological significance of proteins and amino acids will be considered.
360. Physical Biochemistry (3-9 qtr hrs) Mr. Davis, Mr. Ng
Prereq Biochem. 310 and Chemistry 217 or equivalent.
Purely physical phenomena will be reviewed and applied to the interpretation of biological systems. In particular, the course will emphasize the view that colloidal phenomena are concerned in the functioning of all living systems. Colloidal aspects of proteins, lipids, carbohydrates, blood, bone, muscle, nerve, etc., will be scrutinized.

361. Lipids (3-9 qtr hrs) Mr. Ng, Mr. Davis
Prereq Biochem 310
Studies of chemical and physical properties of lipids; methods for isolation and analysis; physiology and metabolism; role of lipids in biological structure; and clinical applications involving lipid metabolism are presented.

362. Endocrinology of the Sex Hormones (Obstetrics and Gynecology 355) (3-5 qtr hrs)
Dr. Salhanick, Miss Wilder
Prereq Biochem 310 or equivalent
Designed to acquaint the student with the chemistry and metabolism of the estrogens, androgens, progestational substances and gonadotropins. As needed, essential information on adrenal hormones will be included.

370. Seminar (cr arr) Staff

371. Research (cr arr) Staff

Correlation Courses

310. First Year Correlation Course (36 qtr hrs I, II, III)
Clinical patients and problems are presented by clinical staff members to illustrate the application of basic science course content to medical problems and practice.

320. Introduction to Clinical Medicine (12 qtr hrs III)
An introduction to clinical medicine for sophomores is held weekly, jointly with the Department of Surgery. A member of each department is present and they jointly discuss such subjects as Ageing and Involution, Diseases of Medical Progress, Shock, Fever and Reaction to Injury and Stress.

330. Medical Surgical Conference (8 qtr hrs)
A combined medical-surgical conference is held once each month, at which staff members of both departments discuss patients and their diagnosis and care. This conference is directed to both undergraduate and postgraduate students and is attended by junior students, senior students and the faculties of the Departments of Surgery and Medicine. Physicians in practice are cordially invited to attend.

340. Medical Therapeutics (8 qtr hrs)
This is a seminar-type conference for students in small groups, held jointly by the Department of Medicine and the Department of Physiology-Pharmacology. Students report in pairs on the backgrounds of several types of diseases and discuss the rationale of treatment with specific drugs.

Dermatology and Syphilology

Professors Cameron, Chairman; D. Wilson; Associate Professor Pinne; Clinical Instructors Barthell, Bell.

A foundation in dermatology and syphilology is laid by lectures, clinics and demonstrations. At the University Dispensary the students are brought in personal contact with patients whom they observe throughout their entire care under the supervision of the attending physician. A large and carefully selected collection of plates and photographs is available for lantern use.

330. Fundamentals (2 hrs weekly, total 16 hrs I) Dr. Cameron, Dr. Pinne
Lectures on the skin and its diseases; syphilis.

341. Dispensary (3 hrs weekly, for 8 wks, total 24 hrs SS, I, II, III)
Two weekly 2-hour clinics are held at the University Dispensary. Fourth-year students are assigned to these clinics for practical experience in the diagnosis of skin diseases and the treatment of syphilis.

Internal Medicine

Professors Grissom, Chairman, F. L. Dunn, Simmons; Associate Professors Angle, Beber, Brazer, Greene, Hubbard, Kirk, Lennhoff, Long, Richards; Clinical Associate Professor Reed; Assistant Professors Bucholz, Graham, Hankins, Henn, Holthaus, Hull, Langdon, Lewis, Loomis, Morris, Nutzman, Ogborn, Pepper, Pratt, Root, Wright, Wyrens; Clinical Assistant Professors C. K. Elliott, Purvis, Stover, Youngman; Associates Beenken, Dickerson, Fleishman, Freed, Harman, Jackson, Joranson, Knott, R. L. MacQuiddy, Jr., Parrilo, Paustian, Rosenlof, White; Clinical Associate R. F. Thompson; Instructors Albertson, Dewey, Edwards, Graves, Muskin, Slabaugh; Clini-
It is the aim of instruction in Internal Medicine to establish a broad understanding of patients with disease and to develop a scholarly approach to the study of medical problems. Intensive study by each student of relatively fewer patients is emphasized rather than superficial observation of many patients. The student studies health as well as disease. Small group conferences (four to six students) are utilized, with each member of the group participating. Time is allowed in each weekly program for reading, research and other independent pursuits for the purpose of establishing habits for self-development which will persist for life.

Internal Medicine.—

320. History-Taking and Physical Diagnosis (1 hr lecture demonstration, 2 hrs practical, weekly. Total 108 hrs I, II, III)
Instruction in history taking and the performance of the complete physical examination. Special methods of examination are taught by members of other departments. Students are assigned in groups of six to each instructor. During the final eight weeks, the lectures in Principles of Internal Medicine begin with a study of Respiratory Diseases.

330. Principles of Internal Medicine (Total 454 hrs I, II, III)
The lectures (68) are designed to acquaint the students with fundamental problems encountered in medical practice and to supplement bedside learning. Students are assigned to the University Hospital and to the Omaha Veterans Hospital for a period of twelve weeks, where they take histories, do physical examinations and perform designated laboratory tests. Small-group instruction in nutrition, hematology, radioisotopes, tuberculosis, rheumatology and cardiology supplements general assignments.

Grand Rounds at the University of Nebraska Hospital and the Veterans Administration Hospital are held weekly throughout the year and attended by all those assigned to Internal Medicine services. In addition, a combined medical-surgical conference is held once monthly.

340. Clinical Clerkship (Total 266 hrs I, II, III)
A combined inpatient and outpatient experience in general and specialty areas over a 12 week period, sharing time with the Departments of Neurology and Psychiatry and Dermatology and Syphilology. The cooperating hospitals are: Bishop Clarkson Memorial Hospital, Bryan Memorial Hospital, Douglas County Hospital, Immanuel Hospital, Lincoln General Hospital, Methodist Hospital and University of Nebraska Hospital. A lecture-clinic course is given one hour weekly throughout the year.

General Exercises. (Total hours—see Correlation Courses)
An introduction to Clinical Medicine for sophomores is held weekly, jointly with the Department of Surgery. A member of each department is present and jointly discusses such subjects as Ageing and Evolution, Diseases of Medical Progress, Shock, Fever, Reaction to Injury and Stress.

Internal Medicine Electives.—Professors Grissom, Chairman, Dunn; Associate Professor Hubbard; Assistant Professors Angle, Henn, Langdon, Loomis, Pepper, Pratt; Associate Beenken.

350. The Physiology of Symptoms (1 qtr hr cr per qtr—total 3) Dr. Grissom

351. Problems in Metabolism and Endocrinology. Drs. Grissom, Henn
a. Diabetes Mellitus (1 qtr hr cr per qtr—total 3)

352. Advanced Gastroenterology and Biliary Diseases (1 qtr hr cr per qtr—total 3)
Dr. Grissom, Langdon, Loomis

353. Advanced Studies of the Cardiovascular Renal System—Drs. Grissom, Dunn, Pepper, Angle, Hubbard, Beenken
a. Cardiologic Diagnosis and Electrocardiography (4 qtr hr cr per qtr—total 12)
b. The Management of Heart Disease (3 qtr hr cr per qtr—total 9)
c. Hypertension and Nephritis (3 qtr hr cr per qtr—total 9)
d. Peripheral Vascular Diseases (1 qtr hr cr per qtr—total 3)

354. Infectious Diseases, Chemotherapy and Antibiotics (3 qtr hr cr per qtr—total 9)
Drs. Grissom, Langdon, Loomis

355. Advanced Allergy (1 qtr hr cr per qtr—total 4) Dr. Hull

356. Advanced Hematology (1 qtr hr cr per qtr—total 4) Dr. Pratt

360. Research (cr arr) Staff
**Medical Ethics**

Lecturers, F. C. Coleman, J. H. Judd, R. K. Kirkman, J. D. McCarthy, L. S. McGoogan, C. A. McWhorter, E. A. Rogers, R. F. Sievers, M. C. Smith, J. P. Tollman. These selected physicians and laymen present pertinent facts and considerations relating to the economics, the organization, the types of practice and the obligations of physicians to patients, to their community and to their fellow physicians.

340. Medical Ethics and Professional Relationships (12 qtr hrs I, II)

**Medical Bibliography**

Librarian Hetzner; Associate Librarian Wright; Assistant Librarian Taniuchi. Lectures and conferences are held to acquaint the student with resources in medical literature and bibliographic methods in medical research. First year students are given instruction regarding the use of reference and indexing tools and receive practical experience in the application of literature-searching techniques. Advanced students may receive instruction and arrange conferences on the bibliography of science and the problems involved in thesis writing.

**Medical Jurisprudence**

Associate Professor Ellick, Chairman; Instructor Robert M. Spire

The course in medical jurisprudence has for its purpose the presentation of medico-legal relationships in order that the student may be familiar with that increasingly pertinent phase of professional life and practice. This course is a comprehensive survey of the medico-legal field and a detailed analysis and study of that science which applies the principles and practice of medicine to the elucidation and settlement of legal questions which arise in everyday professional practice as well as in courts of law.

340. Medical Jurisprudence (2 hrs weekly, total 16 hrs II, III)

Medical legislation, medical evidence and witnesses, privileged communications, general medico-legal relations, physicians' contracts and compensation, income taxes, malpractice, workmen's compensation law, sterilization and liability of hospitals and nurses are some of the subjects discussed.

**Medical Microbiology**

Professors McFadden, Jr., Chairman, Gunderson; Associate Professor N. G. Miller; Assistant Professors von Riesen, Tremaine; Research Associate H. Reihart.

It is the aim of this department to develop with the student the character and host relationships of disease-causing microorganisms. It is also our aim to consider the effect upon the human host of microbial agents and to suggest the manner in which a bacteriological diagnosis may be made. This is done by lectures which emphasize host-parasite relationships. Immunity and associated phenomenon are discussed and laboratory exercises demonstrate the essential features of disease and resistance.

**Medical Microbiology**

320. Medical Bacteriology and Clinical Parasitology (Total 252 hrs. I, II)

Lecture and laboratory course on the cultural characteristics, pathogenic properties, immunological responses, etc., of bacteria, fungi, viruses and Rickettsia in general, with special reference to those of importance in disease. The course also provides a consideration of Clinical Parasitology and deals with Protozoa, Helminths and Arthropods of medical importance.

325. Physiology of Bacteria (8 cr) Mr. Bacon, Mr. Gunderson, Mr. Miller

Prereq Medical Microbiology 320

351. Public Health Bacteriology

The facilities of the diagnostic lab with its turnover of at least 5,000 diagnostic tests per annum are available for this course.

a. Study of Diagnostic Technics (8 cr) Dr. McFadden, Mr. Miller

Prereq Medical Microbiology 320

Hospital lab diagnosis.

b. Immunology (4 cr) Dr. McFadden, Miss Tremaine

Prereq Medical Microbiology 320

Laws of hemolysis, antigen-antibody relationships, blood grouping, anaphylaxis.
352. Moulds, Yeast and Actinomycetes (4 cr) Mr. von Riesen, Mr. Miller
Prereq Medical Microbiology 320
A study of fungi of medical importance, their morphological and immunological characteristics. With emphasis on the recognition and diagnosis of those producing mycotic infections in man.

353. Filterable Viruses (4 cr) Dr. McFadden, Mr. Miller, Mrs. Reihart
Prereq Medical Microbiology 320
Character, nature and transmission of viruses. Important human virus diseases.

354. Applied Bacteriology (4 cr) Mr. von Riesen, Mr. Gunderson
Prereq Medical Microbiology 320
Bacteriology of sanitation. Food bacteriology.

355. Medical Parasitology and Tropical Diseases (4 cr) Dr. McFadden, Mr. Miller, Mr. von Riesen
a. Diseases Due to Animal Parasites
Prereq Medical Microbiology 320
Life cycles. Vectors.
b. Diseases of Animals Transmissible to Man
Prereq Medical Microbiology 320
Plague, Tularemia, Undulant Fever, Typhus, Spotted Fever, etc.

361. Seminar (1 cr) Staff
By permission

362. Research (cr arr) Staff

Neurology and Psychiatry

Professors Wittson, Chairman, Garfield, Jahr, Wixton; Associate Professors Alta, Carver, Ellingson, Gysin, Humphreys, Krush, Starr, Strow; Clinical Associate Professor Stein; Assistant Professors Affleck, Dunton, Freeman, Majka, Ring, R. Wilcott, Williams; Associates Dutch, Goldner, Helper, Ingham, Jones, Tunakan, Yager, Young; Research Associate Kim; Instructors Garetz, Hornberger, Landgraf, Lundy, Milgram, Muffly, Sebofield, Smith, J. Wilcott, Wisman, Wolpin; Assistant Instructors Benschoter, Cunningham, Hubbard, Lunde, Nelson, Noordsij; Lecturer Pugh; Demonstrator Schaefer.

Courses are planned to give the student, commencing in his freshman year, correlated, progressive training in the anatomical, physiological and psychological fundamentals of psychiatry and neurology.

Lectures and demonstrations in the freshman year emphasize the significance of personality development in relation to normal and abnormal functioning. The sophomore program consists of lectures and case demonstrations in basic psychiatry which include descriptive and dynamic psychopathology and techniques of examination; and in neurology in which neurological illnesses, their relationship to the anatomical, pathological and physiological factors are introduced. In the junior and senior years stress is placed on supervised experience with psychiatric and neurological patients, both on inpatient and outpatient bases. Formal lectures are kept to a minimum, except for the clinical neurology lectures in the junior year. Instruction in psychiatry is correlated with the teaching in other departments.

Neurology and Psychiatry—

310. Introduction to the Behavioral Sciences and Personality Development (1 hr weekly, total 24 hrs. II, III)
This course consists essentially of two sections. The first section constitutes an introduction to the behavioral sciences. This sequence surveys basic concepts in the behavioral sciences, methods of studying behavior, and the general adaptation of the organism to environment and culture. The second section concerns the emotional and social growth of the individual, with emphasis on the formative years of childhood. Reference is made to abnormal development, psychiatric syndromes, and the psychological aspects of medical practice.

320. Basic Psychiatry (1 hr weekly, total 36 hrs. I, II, III)
During this course lectures and demonstrations of clinical material are held at the Nebraska Psychiatric Institute. The historical background of psychiatry, methods of interviewing, history-taking and general mental examination are presented. Descriptive aspects of clinical syndromes are presented. The course is preparatory to the junior clerkship in psychiatry and gives the student a basic understanding of mental illness from the standpoint of a general practitioner.

321. Neurology (1 hr weekly, total 12 hrs. III)
The neurological illnesses are discussed and demonstrated from the descriptive viewpoint and related to anatomical, pathological, physiological and psychiatric factors. The material is correlated with medicine generally and particularly with psychiatry. Diagnosis and treatment are emphasized.
331. Neurology (1 hr weekly, total 12 hrs, II)
Continuation of course 321.

335. Clinical Clerkship (23 hrs weekly, total 92 hrs I, II, III)
The junior class is divided into groups, each of which is assigned four weeks at the Nebraska Psychiatric Institute. Selected inpatients are assigned for history-taking and physical and mental examination. Students continue to see the patient in interviews during the whole of the clerkship. Work is supervised in detail. Seminars and lectures are included as well as demonstrations of interviewing technique and treatment. Lectures and demonstrations of common psychiatric disorders are presented.

340. Neuropsychiatric Demonstrations (1 hr weekly, total 4 hrs, SS, I, II, III)
Selected patients demonstrating various psychiatric and neurological disorders are presented and discussed by the senior faculty.

341. Senior Clerkship (32 hrs weekly, total 120 hrs, SS, I, II, III)
The senior class is divided into groups, each of which is assigned four weeks at the Nebraska Psychiatric Institute. Under supervision, students are given increasing clinical responsibility with patients on the adult inpatient service, adult outpatient service and children's services. Regular teaching seminars and conferences are scheduled.

342. Dispensary (7½ hrs weekly, total 60 hrs, SS, I, II, III)
Practical experience in diagnosis and treatment of outpatients in the psychiatric, neurologic and epileptic clinics is provided. Under supervision, the student gains experience in the diagnosis, treatment and management of a variety of common neurologic and psychiatric problems.

343. Applications of Neurology and Psychiatry in Medical Practice (4 wks., 140 hrs., SS)
Individually supervised opportunity to diagnose and treat neuropsychiatric conditions common to all medical practice; combined with short intensive study of current and emerging developments of biochemical, psychopharmacological and psychophysiological aspects of these problems. Limited to 4 students. May be substituted by permission for course 341 or 342.

351. Seminar in Psychiatric Nursing (3 qtr hrs cr each I, II, III) Miss Hook
Prereq open only to qualified graduate students in nursing in an approved master's program.

352. Field Instruction in Psychiatric Nursing (12 qtr hrs cr total) Miss Hook
Prereq open only to qualified graduate students in nursing in an approved master's program.

353. Basic Psychodynamics (2 qtr hr er each I, II) Dr. Starr
Prereq graduate standing in fields related to psychiatry and upon approval of instructor.

354. Interdisciplinary Communication in Psychiatry (2 qtr, hr. cr each II, III) Dr. Wittson
Prereq graduate standing in fields related to psychiatry and upon approval of instructor.

355. Basic Psychodynamics (2 qtr hr cr each I, II) Dr. Starr
Prereq graduate standing in fields related to psychiatry and upon approval of instructor.

Special lecturers from the fields of psychiatry, clinical psychology, psychiatric social work, psychiatric nursing and other related fields will discuss their respective major contributions as related to formulation and application of psychiatric theory. In addition, seminars are regularly scheduled.

The presentation of psychoanalytic theory of personality development of the normal individual. The material presents the factors influencing the growth and development of the individual from preconception through senescence. The developmental processes are related to the formation of personality and character as they affect normal behavior.
40 COLLEGE OF MEDICINE

361. Research in Neurology and Psychiatry (4 wks., 140 hrs., I, II, III)
Laboratory or clinical research under direction in selected areas of psychiatry, neurology and/or behavioral sciences. Limited to 4 students.

Obstetrics and Gynecology

Professors Holly, Chairman, McGoogan; Associate Professors Salhanick, H. Anderson, Redwick; Clinical Associate Professors Richard Garlinghouse, H. Morgan; Assistant Professors Collins, Cotton, Olson, Rumbolz; Clinical Assistant Professor McGinnis; Associates Pearse, Boelter, Kovarik, Taylor; Clinical Associates Gorhey, Harvey; Instructors George, Hirst, Schack, Soule; Clinical Instructors Ballew, Hanson; Assistant Instructor John McCarthy; Clinical Assistant Warden.

The instruction in obstetrics and gynecology consists largely of practical demonstrations in the University Hospital and the dispensary. In these clinics the student is trained in clinical diagnosis and treatment. The University Hospital affords abundant opportunity for the assignment of obstetric cases under direction to members of the third-year medical class. The prenatal clinic at the dispensary provides an excellent opportunity for both third- and fourth-year students to learn the proper care of the expectant mother. After a didactic review of the principles of obstetrics, the junior student is assigned to serve as assistant to the intern or house officer in the care of a patient during labor. During the fourth year the medical students are assigned to dispensary prenatal clinic and the gynecology clinic as well as affiliated hospitals.

Obstetrics and Gynecology—

320. Introduction to Obstetrics and Gynecology (1 hr weekly, total 16 hrs, I, II)
Anatomy and physiology of the female genital organs in their relation to normal pregnancy, labor and the puerperium and to gynecology. Physical diagnosis in obstetrics and gynecology.

330. Obstetrics and Gynecology (1 hr weekly, total 40 hrs, I, II, III)
Abnormalities and complications of pregnancy, labor, puerperium and the newborn child. Theory, diagnosis and management of gynecologic disease.

335. Junior Clinical Clerkship (Total 112 hrs, I, II, III)
Third-year students are assigned to the University Hospital obstetric and gynecologic service, where they are assigned patients. They follow the progress of patients in labor, assist at deliveries, follow the workup and management of gynecology patients, assist at operative procedures and maintain a complete record until the patient is discharged from the hospital. They attend weekly obstetrics and gynecologic conferences, ward rounds and gynecological pathology conferences.

340. Obstetrics and Gynecology (1 hr weekly, total 12 hrs, II)
Continuation of Course 330.

341. Senior Clinical Clerkship (Total 224 hrs, SS, I, II, III)
Fourth-year students are assigned to a hospital obstetrics and gynecologic service for more advanced and practical experience. They follow the progress of patients in labor and assist at or perform deliveries. They follow the workup and management of gynecologic patients and assist at operative procedures. They are assigned to the dispensary obstetric and gynecologic clinics. They attend weekly obstetric and gynecologic conferences, ward rounds and gynecologic pathology conferences.

350. Advanced Obstetrics and Gynecology (6 qtr hr per q.-max 24) Staff
Conferences, demonstrations, and clinical assignments designed to familiarize the student with all phases of obstetrics and gynecology. The application of anatomy, physiology, biochemistry, pathology and microbiology will be stressed. Diagnosis and management of obstetric and gynecologic conditions will be emphasized.

351. Gynecological Pathology (3 qtr hr per q.-max 9) Dr. Holly, Dr. Schenk, Dr. Tollman, Staff
An advanced course in gross and microscopic pathology in the field of obstetrics and gynecology. The student is required to attend two weekly conferences in gynecologic pathology. Clinical work consists in preparation, review, and description of all specimens submitted in this area.

352. Pelvic Anatomy (4 qtr hr cr) Dr. Holyoke, Dr. Latta, Staff
Special dissection and study to cover the basic science aspects of anatomy and embryology as applied to obstetrics and gynecology. This work will consist of special dissection, reading, and histologic study of the generative tract.
353. Gynecological Radiology (1-5 qtr hr cr) Dr. Hunt, Staff
Readings, demonstrations, clinics and seminars designed to show the application of radiographic and radio-therapeutic principles and procedures of obstetrics and gynecology. Conducted in conjunction with the Department of Radiology, this course gives experience in radiographic techniques, the interpretation of films, and the use of x-ray and radium. Independent reports will be required.

354. Advanced Course in Gynecological Surgery (4 qtr hr cr per q.—max 8) Staff
Conferences and demonstrations of principles and technique of gynecological surgery. The student will perform surgical procedures under the supervision of the supervisory staff. Special techniques such as culdoscopy and gynecography are included.

355. Endocrinology of the Sex Hormones (Biochemistry 362) (3-5 qtr hr cr) Dr. Salhanick, Miss Wilder
Prereq Medical Biochemistry 310 or its equivalent
A lecture course designed to acquaint the student with the chemistry and metabolism of the estrogens, androgens, progestational substances, and gonadotropins. Essential information on adrenal hormones will be included as needed.

356. Gynecologic Endocrinology (3-5 qtr hr cr) Dr. Salhanick
Prereq Biochemistry 353 and Obstetrics and Gynecology 355
A course in applied endocrinology with emphasis on the diagnosis and management of a variety of gynecologic disorders. The lecture series will be accompanied by assignment of the student to the clinical service.

357. Obstetrical Hematology (3 qtr hr cr) Dr. Holly
A course in applied hematology with emphasis on problems which occur in pregnancy. The lecture series will be accompanied by laboratory work and by clinical work in the clinic and hospital.

358. Gynecology Seminar (1 qtr hr cr per q.—max 8) Staff

359. Obstetrics and Gynecology Seminar (1 qtr hr cr per q.—max 8) Staff

360. Thesis (er arr) Staff

Ophthalmology

Professor Judd, Chairman; Associate Professors Alliband, Gifford, Morrison; Assistant Professors Eagle, Filkins, Rasgorshek, Steinburg, Truhlsen; Associate Vickery; Clinical Assistant Professor Wood.

Ophthalmology

330. Medical Ophthalmology (1 hr weekly, total 12 hrs, III)
The didactic course consists of demonstrations and lectures on diseases of the eye, including ocular changes in general diseases. The lectures are illustrated by cases, diagrams, charts and slides. The course is supplemented by textbook work and quizzes.

335. Clinical Clerkship (Total 24 hrs, I, II, III)
Selected cases of eye pathology are shown to small groups of students illustrating the major types of disease that are encountered in medical practice.

340. Dispensary (Total 48 hrs, SS, I, II, III)
Students are regularly assigned to the dispensary clinic for practical experience in the diagnosis and treatment of eye conditions. This course includes a drill in the principal uses of the ophthalmoscope and other instruments employed in the diagnosis of diseases of the eye.

Orthopedic Surgery

Professors Hamsa, Chairman, H. Johnson; Associate Professors Campbell, Teal, Waters; Assistant Professors Bach, Burney, R. Smith, Hood; Clinical Assistant Professors Bartels, Mitchell, Stone; Clinical Assistant Weingarten; Clinical Instructors Horn, F. Webster.

Orthopedic Surgery deals with the diseases, deformities and injuries of the structure composing the musculo-skeletal system.

330. Fractures, Dislocations and Sprains (1 hr weekly, total 12 hrs, III)
Lectures and clinics on anatomy, pathology and treatment of fractures, dislocations and sprains.

340. Diseases of Bones and Joints (1 hr weekly, total 16 hrs, I)
Lecture clinics on disease of bones and joints, synovial membranes and bursae. Congenital, acquired and disease-producing deformities. Prevention of deformities and dystrophies with principles of treatment. Illustrated by photographs, slides, etc.
341. Orthopedic Clinical Clerkship (Total 112 hrs, SS, I, II, III)
Practical work in the diagnosis and treatment of orthopedic cases. Includes 6 hrs in Crippled Children's Clinic; 6 hrs Orthopedic Dispensary; two weeks (100 hrs) clerkship, consisting of experience in the University Hospital and affiliated private hospitals.

342. Fractures, Dislocations and Sprains (1 hr weekly, total 16 hrs, SS, I, II, III)
Lectures, quizzes and demonstration course on fractures, dislocations and sprains. X-ray diagnosis with application of splints and casts.

350. Research (1-7 cr) Staff
Work for specially qualified students in special fields of investigation.

351. Seminar (1-6 cr) Staff
Literature reviews and reports of progress of research in special fields of investigation.

Otorhinolaryngology
Associate Professor Klabenes, Chairman; Professor Cassidy; Associate Professors Carp, Lovgren; Assistant Professor Heine; Clinical Assistant Professor P. L. Peterson; Instructors J. A. Davis, Gillies.

Otorhinolaryngology.
One lecture is given on the anatomy of the ear and temporal bone and demonstration of the tympanic membrane in the freshman year in Anatomy. Two lectures on the examination of the ear, nose, pharynx and larynx; and two 2-hour demonstrations on the use of instruments commonly used in ORL examinations is given in conjunction with the sophomore course in Physical Diagnosis.

330. Disease of Ear, Nose, Throat and Larynx (1 hr weekly, total 16 hrs, I)
Lectures covering the anatomy, physiology, common diseases, abnormalities, tumors, diagnosis and treatment in the ORL field.

340. Dispensary (3 hrs weekly, total 12 hrs, SS, I, II, III)
Clinics are held once weekly at the University Dispensary. Senior students are assigned patients for examination, diagnosis and treatment under supervision. Conferences are frequently held during these hours.

Pathology

Professors Schenken, Chairman, McWhorter, Tollman; Associate Professor Kulesh; Clinical Associate Professor Tanner; Assistant Professors Foster, Giffen, Simons, F. Smith; Clinical Assistant Professors T. R. Anderson, Coleman; Associates Fitch, Greene, Wilson; Clinical Associates Papenfuss, Tamisiea; Assistant Instructor Lang.

It is the aim of this department to acquaint the student with the etiology, the pathologic physiology and the morphologic changes produced by disease processes in the human body.

Pathology.

321. General Pathology (Total 275 hrs, I, II, III)
This course emphasizes the etiology and morphologic alterations produced by disease processes. It comprises the general principles of the reaction of the body to injury and of specific disease processes in detail by organ systems in both lecture and laboratory exercise. This course is closely integrated with the course in Medical Microbiology 320 so that at the time the student studies microbiologic aspects of microorganisms, the alterations produced in the tissues and organs of the body by the same organisms are covered.

322. Clinical Pathology (2 hrs lecture, 3 hrs laboratory weekly, total 60 hrs, III)
The lecture and laboratory course emphasizes selection and performance of laboratory tests used by the physician. The student becomes proficient with many such tests and acquires a working knowledge of the remainder. Special emphasis is placed upon the selection of tests and the interpretation of the results of such tests, correlating these results with the clinical findings.

331. Clinical Pathology (Total 75 hrs, I, II) Continuation of course 322.

349. Clinical Pathology Conference (1 hr weekly, total 24 hrs, II, III)
Selected cases are presented by a clinical department and the Department of Pathology for discussion of the differential diagnosis, management, and correlation of the clinical findings with the pathology.
333. Correlative Clinical Pathology (1 hr weekly, total 36 hrs, I, II, III)
Selected cases are discussed from the standpoint of correlation of clinical observations with radiological and pathological findings. Whenever possible these cases parallel the lectures given in clinical departments.

340. Clinical Pathology Conference (Total 40 hrs, I, II, III)
Continuation of course 332.

341. Correlative Clinical Pathology (Total 40 hrs, I, II, III)
Continuation of course 333.

356. Autopsy Pathology (8 cr) Dr. Schenken
Prereq Path 320
In addition to participation in autopsies, the student will study in detail both gross and microscopic tissue changes, and will correlate these with clinical findings.

357. Pathology of Tumors
a. An Intensive Course in Oncology, With Special Attention to the Morphology, Derivation and Course, of Various Tumors (4 cr) Dr. Schenken, Staff
Prereq Path 356
b. Studies of Bone Tumors (3 cr)
Prereq Path 357a
c. Studies of Tumors of the Nervous System (3 cr)
Prereq Path 357a

358. Etiology of Tumors (1 cr) Dr. Schenken
Prereq Path 356
This will be a general study of the subject of tumor etiology with special emphasis on the phases represented by the investigative work carried on by the student. In large part this will be carried on by study of the periodical literature.

359. Seminar (1 cr) Staff
By permission

360. Research (cr arr) Staff

Pediatrics

Professors Gibbs, Chairman, Gedgoud, Robertson, Thomas; Associate Professors Crofoot, Klok, Morrow; Clinical Associate Professors Bancroft, Stafford, Stewart; Assistant Professors C. R. Angle, Nilsson, Oberst, Schreiner, D. I. Smith, Zahller; Clinical Assistant Professor Bosley; Associates C. F. Bantin, Ebers, Rubin; Instructors L'Ecuier, C. Salhanick; Clinical Instructors Fijan, Grant, Steinman.

The aim of this department is to develop in the student an understanding of human growth and development, as well as the diseases characteristic of infancy, childhood and adolescence. This is done through the lectures and demonstrations, small group bedside conferences and discussions, clinical clerkship at the University and at the Childrens Memorial Hospitals and the outpatient service at the University Hospital. Special orientation and training in rehabilitation is given at the new Rehabilitation Center.

Undergraduate students are encouraged to participate in research on a wide variety of projects, and students who show particular interest in a given problem are afforded guidance and support in their scientific investigations.

Pediatrics—

332. Growth and Development (1 hr weekly, total 16 hrs, II, III)
Lectures on basic principles of total growth. The rate of progress to be expected in weight and length, together with the mental and emotional development from birth to adolescence, is discussed. Part of the course is devoted to presentation of some of the anomalies and diseases encountered during the newborn period.

330. Diseases of Childhood (1 hr weekly, total 40 hrs, I, II, III)
In this course are covered the various diseases of childhood, including the diseases by systems, deviations in growth and development, nutritional diseases and communicable diseases.

335. Clinical Clerkship (22 hrs weekly, total 88 hrs, I, II, III)
Students are assigned at the Children's Memorial Hospital for complete study including history, physical examination, routine and special laboratory tests and other aids for the establishment of diagnosis with a view toward an effective program of therapy. Students are expected to have full knowledge of the cases assigned to them and also to be familiar with patients on the ward assigned to other students. Each student is held responsible for presentation of his cases at any time he may be called upon by the instructor during ward walks. These students participate in the newborn out-patient clinic held weekly at the University Dispensary.
44. **Hospital Clinics** (1 hr weekly, total 18 hrs, SS, I, II, III)
Clinics in all aspects of pediatrics are included in this course, utilizing material on the wards of the University Hospital and Children's Memorial Hospital as well as other institutions affiliated with the College of Medicine. An effort is made to cover the entire field of pediatrics as seen in the various institutions.

341. **Dispensary** (15 hrs weekly, total 90 hrs, SS, I, II, III)
Clinics are held at the dispensary to which fourth-year students are assigned for practical work in the diagnosis and treatment of ambulant cases. All children enter the dispensary through the pediatric clinics. Special clinics for heart, allergy, neurological and metabolic cases.

342. **Senior Clerkship** (30 hrs weekly, total 180 hrs, SS, I, II, III)
Senior students are assigned to the pediatric ward and the newborn nursery of the University Hospital for a period of 6 weeks under staff direction. They are required to work up cases assigned to them, and to acquire general information regarding diagnosis and therapy on all patients admitted to the hospital to enable them to participate in the discussion of these cases. They are also assigned to the admitting and emergency sections of the hospital under the direction of the Staff. Senior clerks are encouraged to participate freely in all staff conference discussions.

Junior and senior students interested in special problems in pediatrics are encouraged to engage in research under the direction of the staff. Arrangements for such work should be discussed with the Chairman of the Department.

350. **Pediatric Gastroenterology** (3 qtr hrs per qtr, total 9 qtr hrs) Dr. Gibbs
Prereq medical school courses as follows: biochemistry, physiology, and histology or their equivalents
The special characteristics of the gastrointestinal physiology of the normal infant and the pathological physiology, clinical manifestations, and treatment of gastrointestinal diseases of special importance in early life will be surveyed. Particular attention will be given to the chronic metabolic diarrhea.

351. **Endocrine and Metabolic Diseases in Early Life** (3 qtr hrs per qtr, total 9 qtr hrs) Dr. Gibbs
Prereq same as in Course 350
The normal endocrine physiology is reviewed as it pertains to the infant, child, and adolescent. Abnormalities of endocrine and metabolic nature in early life are considered.

352. **Pediatric Biochemical Ultra-Micro Analysis** (2-3 qtr hrs per qtr, total 9 qtr hrs) Dr. Gibbs
Prereq Biochemistry 310 or completion of course in Medical Technology Instruction and experience in the performance of biochemical procedures particularly useful to a clinical biochemical laboratory serving a children's ward or children's hospital.

353. **Developmental Behavior Pattern of the Newborn** (3 qtr hrs per qtr, total 6 qtr hrs) Dr. Gibbs
Prereq M.D. degree or B.Sc. in Nursing or undergraduate major in psychology
A study of activities of the normal infant as related to environmental factors.

358. **Pediatric Research Seminar** (2 qtr hrs per qtr, total 6 qtr hrs) Dr. Gibbs
Selected topics of current research or contemplated research with presentation of appropriate patients.

359. **Research in Pediatrics** (or arr) Dr. Gibbs
Prereq Ped 358 completed or in progress

**Physical Medicine and Rehabilitation**

The principles and techniques of Physical Medicine and Rehabilitation are presented at assigned times to the student body. A one-hour lecture on Principles of Physical Medicine and Rehabilitation is given in the sophomore year.

The junior and senior students are divided into groups of approximately eight students each. The junior students receive sixteen hours of lectures and clinical experience at assigned times over a four-week period, at the Nebraska University and Douglas County Rehabilitation Center.
PHYSIOLOGY AND PHARMACOLOGY 45

330. Principles of Physical Medicine and Rehabilitation (Total 16 hrs, I, II, III) Dr. Frost and Staff

Covering the aspect of their individual fields of work or specialty concerned in the total approach to evaluation and treatment of disabled persons.

Physiology and Pharmacology

Professors McIntyre, Chairman, Bennett; Associate Professor F. L. Dunn; Associate Research Professor Humoller; Assistant Professors Wetherell, Ginski, Sievers; Instructors Wardell, Stratbucker; Adjunct Instructor Browne; Demonstrator Mahler.

The courses in physiology and pharmacology 310-327, inclusively, stress the fundamental principles underlying living processes in health and disease and provide a comprehensive basis for medical practice. Courses 350-357, inclusively, are designed for special instruction for advanced students in physiology and pharmacology.

Physiology and Pharmacology.—

310. General Introductory Course (lectures, demonstrations and conferences, total 72 hrs, III)

This course presents the essentials of physiology and pharmacology as a basis for more advanced study. The mechanisms by which the body cells maintain the normal milieu intérieur are examined and emphasized and the fundamentals of neurophysiology including the autonomic system and the pharmacology of neural-effector cell transmission are described. The principles of endocrinology and the fundamental physiology of the pituitary gland, gonads, thyroid, parathyroid, islet tissue and adrenals are outlined.

311. Physiology and Pharmacology Laboratory Course (total 84 hrs, III)

In this course students perform experiments designed to illustrate basic physiological techniques and apparatus and are directed towards illustrating salient principles as concurrently developed in the lecture course. Several demonstrations are conducted using more advanced techniques to illustrate principles of electrophysiology and the mammalian preparations. Other teaching aids, such as film and discussion groups, are employed.

312. Physiology and Pharmacology Lectures and Demonstrations (Total 84 hrs, I)

The concepts presented in Courses 310 and 311 are developed to include the pharmacology of the anesthetics and the drugs acting on the nervous system. The neuromuscular apparatus and the mechanisms relating to posture are considered. The depressant drugs including hypnotics, antipyretics, analgesics and tranquilizers are discussed in detail. The cardiovascular, respiratory and renal systems are discussed in detail together with the pharmacological agents effective in these systems.

323. Physiology and Pharmacology Laboratory (total 84 hrs, I)

The elements of anesthesia are presented concurrently with practical work in anesthesiology on mammals. This course consists largely of acute mammalian experiments designed to illustrate the fundamentals of cardiovascular, renal and respiratory physiology, and the pharmacology of cardiovascular drugs.

324. Physiology and Pharmacology Lectures and Demonstrations (total 84 hrs, II)

The physiology and pharmacology of the gastrointestinal tract are examined in detail. The specific pharmacological agents including chemotherapeutic drugs and antibiotics are discussed in detail. The endocrine system is further examined and the hormones and their therapeutic uses stressed.

325. Physiology and Pharmacology Laboratory (total 84 hrs, II)

The laboratory exercises include experiments and demonstrations of the therapeutic and hormonal agents discussed in Course 324, the content of which is supplemental and complemented by exercises, demonstrations and discussions.

326. The Physiology of the Eye and Ear (total 24 hrs, III)

The principles of vision, hearing and the vestibular functions of the ear are presented. The pharmacology of the drugs and other agents used in the eye and ear are considered in detail.

327. The Physiology of the Eye and Ear Laboratory (total 24 hrs, III)

This consists of laboratory experiments and demonstrations illustrating basic principles of visual optics, properties of the retina, visual reflexes, central mechanisms of visual perception, and the action of drugs on the eye. Peripheral and central auditory and vestibular mechanisms of the ear are studied. This course supplements Course 326.

350. Technique in Experimental Physiology and Pharmacology (1-9 qtr hrs cr) Dr. McIntyre and Staff

Prereq Physiology and Pharmacology 310, 311

This course consists of instruction in surgical procedures on mammalia, reptilia,
and amphibia and the preparation of organs and tissues in situ and ex situ for experimental study; instruction in the construction, manipulation and operation of apparatus.

Special Physiology and Pharmacology.—

351-1. Advanced Physiology and Pharmacology (1-9 qtr hrs cr) Drs. Bisgard, Hendrickson and Jodrey

Prereq Physiology and Pharmacology 350

In Vivo aseptic preparations; instruction in the fundamental techniques of aseptic surgery for the preparation of animals for study, and their postoperative care.

351-2. Advanced Physiology and Pharmacology (1-9 qtr hrs cr) Dr. McIntyre

Prereq Physiology and Pharmacology 350

In Vivo preparations. The preparation of tissues for in vitro metabolism studies, perfusion of organs, isolated heart preparations, isolated smooth and striated muscles, myography, electromyography, cardiography, oncometry, and plethysmographic studies.

351-3. Electro-Physiology (1-9 qtr hrs cr) Dr. Bennett

Prereq Physiology and Pharmacology 350

Preparation of nerve for action-potentials studies and other phenomena associated with nerve-activity; the electrostatic voltmeter, the cathode ray oscilloscope, direct-current amplification: the modification of nerve-activity by chemical and physical agents.

Advanced Pharmacology.—

352-1. Advanced Pharmacology-Toxicology (1-9 qtr hrs cr) Mr. Wetherell, Mr. Humoller

Prereq Physiology and Pharmacology 350

The recognition of poisons in the body. The quantitative determination of toxic substances in necropsy materials and excreta: Polargraphic quantitative determination of metallic ions present in tissues. Qualitative and quantitative tests for alkaloids by polargraphic and other methods.

352-2. Advanced Pharmacology-Bioassay (1-9 qtr hrs cr) Mr. Humoller, Dr. McIntyre

Prereq Physiology and Pharmacology 350

The assay of drugs and hormones and so-called vitamins by biometric methods, including standardization of drugs and biologically active substances.

353-1. Vitamin and Endocrine Studies—The “Deficient State” (1-9 qtr hrs cr) Staff

Prereq Physiology and Pharmacology 350

Animal experiments on diets deficient in accessory food factors; avitaminosis; physico-chemical properties of accessory food factors; isolation and purification of accessory food factors.

353-2. Vitamin and Endocrine Studies—The Endocrine System (1-9 qtr hrs cr) Dr. McIntyre

Prereq Physiology and Pharmacology 350

Studies in hypo- and hyper-normal hormonal activity; techniques for extirpation of glands of internal secretion.

354. Application of Physiology and Pharmacology to Clinical Problems (1-9 qtr hrs cr)

Drs. Bennett, McIntyre

Prereq Physiology and Pharmacology 350

Electrocardiography, electrostethoscopy, metabolic rates. Study of neuro-muscular lesions by physiological methods; application of endocrinology to obstetrics and gynecology and medicine; special use of drugs and their diagnostic and therapeutic use in clinical problems.

355. Special Application of Physiology and Pharmacology to Industrial Medicine and Surgery (1-9 cr) Drs. Bennett, McIntyre, Sievers, Mr. Humoller

Prereq Physiology and Pharmacology 350

Physiological principles in shock therapy due to trauma; low pressure, low oxygen tension encountered in high altitude aviation. Physiological effects of high pressure. Caisson disease; noxious gases and toxic industrial poisons.

356. Biophysics and Biochemistry of the Cell (4-15 cr) Dr. McIntyre, Mr. Humoller and Staff

This course places special emphasis on the physiology and biochemistry of the anatomical units of the neuro-muscular system, and the effects of drugs, poisons and physical agents upon their functions and enzyme systems.

357. Seminar (1 or 2 qtr hrs credit per quarter) Staff

358. Research in Physiology and Pharmacology (cr arr) Staff
Preventive Medicine

Associate Professors Potthoff, Chairman, Rogers; Instructor Kutler; Lecturers Crabill, DuBois, Johnson, McArdle, Saathoff.

These courses aim to give the students basic orientation and preparation related to physicians' increasingly important responsibilities in preventing disease, promoting efficiency, acting as health counselors and serving as community leaders in health matters. The field work of the junior year is carried on through cooperative agreement with the Omaha-Douglas County Health Department.

310. The Accident Problem and Field Emergency Care (2 hrs weekly, total 16 hrs, III)
This course is offered cooperatively with the Department of Surgery. Includes study of the epidemiology of accidents and methods of immediate care under field conditions.

320. Principles of Preventive Medicine (2 hrs weekly, I; 1 hr weekly for four wks, II, total 23 hrs)
Considers our major health problems and the organization and programming principles in our society at local, state and national levels to promote good health; biostatistics; occupational health.

321. Principles of Preventive Medicine (2 hrs weekly, total 24 hrs, III)
Includes epidemiology, with emphasis upon the preventive aspects of medical practice.

330. Clerkship in Preventive Medicine (Total 35 hrs, I, II, III)
Field trips to facilities and agencies of public health importance; topic and case studies embodying aspects of disease prevention, use of community resources and comprehensive care; medical socio-economics.

Radiology

Professors Hunt, Chairman, Moore; Associate Professor E. S. Pederson, Clinical Associate Professor Fraser; Assistant Professors Bunting, A. L. Dunn, S. Gunderson, R. Ogborn, Waggener; Clinical Assistant Professor Neely; Associate Tuma; Clinical Associate Ellsworth; Instructor Scott; Clinical Instructors Bradley, James, Siaheki, Skoog-Smith; Assistant Instructor Niess.

The curriculum in radiology aims to relate the physical and biological principles of radiation effects to the basic sciences and to the diagnosis, prevention and treatment of disease.

The principles of radiology presented during the third quarter of the second year relate to radiation physics, radiobiology, principles of radiographic technique and the interpretation of roentgenograms.

During the third year radiologic interpretation is continued by lectures and diagnostic conferences during the first quarter. The principles of radiotherapy are presented during the second quarter. Sectional teaching to groups of four to eight students is conducted by demonstrations, ward rounds, film reading sessions, group conferences and tumor clinics.

Radiological Anatomy

Taught as part of gross anatomy.

320. Principles of Radiology (1 hr weekly, total 12 hrs, III)

330. Principles of Radiology (1 hr weekly, total 28 hrs, I, II)

331. Clinical Radiology (total 16 hrs) Staff
Assignment of a group of 4 to 8 students who, during 4 weeks, observe and participate in radiographic technique, fluoroscopy, radiographic interpretation, radioisotope clinic, cancer follow-up clinics and ward rounds on radiotherapy service.

341. Radiologic Conference and Clinic (1 hr weekly, 20 hrs, I, II, III. September through May at the Nebraska Methodist Hospital.) Drs. Hunt and Moore Clinical presentation correlating clinical and radiologic findings in selected cases with participation by radiology, pathology and involved clinical specialties.

350. Advanced Diagnostic Radiology (4 to 8 cr) Dr. Moore, Dr. Pederson, Dr. Gunderson
Prereq Radiol. 320, 330, 331, 341
Responsible analyses of the status of the various tissues, organs, regions and systems of the body through correlation of radiographic and fluoroscopic observations with anatomy, physiology and pathology.

352. Advanced Therapeutic Radiology (4 to 8 cr) Dr. Hunt, Dr. Waggener
Prereq Radiol. 320, 330, 350, 354, 355
Systematic consideration and responsible application of roentgen rays, radium and radioisotopes in the treatment of benign and malignant diseases involving the various organs and regions of the body.
College of Medicine

353. Seminar (1 cr each semester) Staff
354. Radiological Dosimetry (3 to 8 cr) Drs. Tuma and Waggener
   Prereq Radiol. 320, and consent of department.
   Analysis of factors controlling the intensity, quality, distribution, absorption and effects of radiation in phantoms, barriers and tissues.
355. Radiobiology (3 to 8 cr) Drs. Latta, Pederson, Waggener
   Prereq Anat. 314, 315, Radiol. 320, 354 (may be concurrent)
   Assigned laboratory projects and reading for analysis of basic biologic effects of radiation on cells, tissues and organisms.
356. Nuclear Technology and Biophysics (3 to 8 cr) Drs. Bunting, Tuma, Dunn, Ogborn
   Prereq Physiol. 320, 321, Radiol. 320, 354
   Assigned laboratory projects, practice and correlated reading referable to special applications of nuclear technology in basic medical science and clinical practice.
357. Thesis (cr arr) Staff

Surgery

Professors Musselman, Chairman, R. R. Best, Bisgard, Finlayson, McLaughlin; Associate Professors Barmore, Kennedy, Waggener, Clinical Associate Professor Morton; Associate Research Professor H. L. Davis; Assistant Professors Browne, Brush, Coe, Dailey, J. B. Davis, G. N. Johnson, Kleitsch, McMurtrey, D. M. Miller, Neis, Pester, Potter, Rasmussen, Swenson, Therien, D. H. Thompson, C. Wilson; Clinical Assistant Professors Cherry, Davies, Robert Garlinghouse, Gogela, Hilton, W. W. Webster; Associates L. L. Anderson, Braun, Cochrane, Frank, Latenser, Rees, L. W. Thompson; Clinical Associate Cole; Instructors Bruce, Carter, Hachiya, Kimball, Kutler, Landry, Porter, Stroy, Watland; Clinical Instructors Ehrlich, Hillyer, L. Worthy, McKeen, Moesner, Wiedman; Assistant Instructor Karver; Clinical Assistant Brinkman.

The courses in surgery are given in the junior and senior years. However, the student is introduced to surgery in his freshman year in the Correlation Hour of the Department of Anatomy. The student has further work in surgery in the sophomore year as a part of the courses in Physical Diagnosis. In the clinical years the student is encouraged by direction and by precept to review the basic sciences as related to each disease which he encounters and to apply this knowledge in learning and understanding the principles of surgery.

The courses in surgery are planned to give the student a thorough understanding of the principles of surgical pathalogy, surgical diagnosis and surgical treatment. The undergraduate courses do not include instruction in major operative technic. Minor operative technic is taught in the Clinical Clerkship and Dispensary and includes practical exercises. The technic for performing such major operations as would come to the practitioner in the course of general work or as emergencies is taught during the internship. Preparation for the practice of surgery requires additional postgraduate training as a resident in surgery. Surgery includes a section of general surgery, a section of thoracurology, a section of thoracic and cardiac surgery, a section of plastic, maxillo-facial and dental surgery, and a section of anesthesiology.

Surgery——-

330. Fundamentals of Surgery for Juniors (2 hrs per wk I and III; 1 hr per wk II, total 68 hrs)
   A presentation of the principles of surgery by assigned reading and by lectures, demonstrations and quizzes supplementary to the text.
335. Clinical Clerkship for Juniors (12 wks, total 360 hrs, I, II, III)
   Students spend eight weeks on surgery, during which time they are assigned patients in the University Hospital or affiliated hospitals. They follow these patients under close supervision. The students have responsibility for the history, physical examination, routine laboratory work, differential diagnosis, progress notes, operative report, pathology report and case summary on patients assigned to them. Progress notes include discussion of pathogenesis, explanation of symptoms, rationale of treatment and prognosis. Instructors review the cases with the students individually and on ward rounds. The students receive training and practical experience in asepsis and operating room technic, and in gross surgical pathalogy by assisting at operations on their own patients. Total hours include clerkship in anesthesiology and urology. Students spend four weeks on anesthesiology, during which time they are assigned to the University Hospital or affiliated hospitals. They participate with their instructors in the administration of anesthetics to patients in these hospitals. The students are assigned case reports which are reviewed for all of the clerks on anesthesiology at daily conferences. Pertinent topics related to the patients are discussed by the staff at these conferences. Also, the students have lectures and demonstrations in the theory and practice of anesthesiology.
340. Neuro-Surgery (10 wks, 1 hr per wk, I)
Lectures in fundamentals of neuro-surgery.

341. Clinical Clerkship for Seniors (4 wks, 140 hrs, SS, I, II, III)
Students are assigned as clinical clerks to the several hospitals affiliated with the Medical College. The students serve on general surgery. Senior clerks work under the close supervision of members of the faculty. The course includes teaching conferences but no didactic work. Senior clerks have similar but greater responsibilities than those described for junior clerks.

342. Clinical Clerkship for Seniors in Neurosurgery (4 wks, 70 hrs, SS, I, II, III)
Students are assigned as clinical clerks to affiliated hospitals where they serve concurrently as clerks in Orthopedics 341.

343. Dispensary Clerkship for Seniors (4 wks, 140 hrs, SS, I, II, III)
Students are given practical experience in diagnosis and treatment of ambulant patients and experience in "office operations" and local anesthesia.

344. Anesthesiology Clerkship for Seniors (4 wks, 140 hrs, SS)
A practical experience in the administration of all types of anesthetic agents with emphasis on fundamentals. By arrangement only.

345. Research in Surgery (4 wks, 140 hrs, SS)
A supervised experience in laboratory or clinical research expected to be suitable for publication. By arrangement only.

Surgery, General Exercises.—

Introduction to Clinical Medicine (Total 12 hrs, III)
This course for sophomores is held weekly, jointly with the Department of Medicine. A member of each department is present, and together they discuss such subjects as Ageing and Involution, Diseases of Medical Progress, Shock, Fever, Reaction to Injury and Stress.

Medical-Surgical Conference (First Tuesday each month, September through June, 8:00 to 9:15 a.m., Medical Amphitheater)
A joint presentation of the Departments of Medicine and Surgery, at which patients with problems of common interest are presented and discussed by members of basic science and clinical departments. This conference is directed to both undergraduate and postgraduate students and is attended by junior students, senior students and the faculties of the Departments of Surgery and Medicine. Physicians in practice are cordially invited to attend.

Surgery Grand Rounds (Every Thursday 8:00-10:00 a.m., surgical wards and Staffs Dining Room)
All patients on the surgical service are presented and their problems discussed. The patients are then seen on the wards. These rounds are attended by junior students, senior students and the attending staff of surgeons. Physicians in practice are cordially invited to attend.

Surgery Seminar (Thursday 7:15 p.m., September through June, Conference Room)
Presentation and discussion of subjects and articles related to Surgery. Staff, residents, interns and senior students.

Urology

Professors L. W. Lee, Chairman, P. S. Adams; Assistant Professors H. Kammandel, Malashock; Clinical Assistant Professor Munger; Clinical Instructors Gilbert, Pfeifer; Instructor N. Davis.

The fundamental principles of this surgical specialty are taught in close coordination with the general surgical teaching program. The educational experience is geared to the type of knowledge which is of value to the general physician. Proficiency in a general knowledge of urology is accomplished by coordinated study, including lectures, clinical clerkship, dispensary and operative clinics. Emphasis at all times is on methods of diagnosis and management of the patient with urological disease.
Aside from the undergraduate teaching, the members of this department provide instruction to interns, surgical residents and nurses. They also provide specialized urological care to patients in the University Hospital and conduct investigative research in various subjects of urological interest.

330. Fundamentals of Urology (1 hr weekly, total 16 hrs, I)
Lectures on diseases of the urogenital system.
Ward Clinics (2 hrs weekly when on Surgery Clerkship)
Students are given ward clinics using patients at the University Hospital to illustrate major disease entities encountered in the medical practice.

341. Dispensary (3 hrs weekly, total 12 hrs, SS, I, II, III)
One clinic is held each week to which students are assigned for practical experience in the diagnosis and treatment of urogenital diseases.

Senior Preceptorship Program

This extramural teaching program which permits the senior student to serve with an experienced practitioner of medicine has recently been changed. It is now an elective course available only during the three-month summer period. The student is permitted to choose a 4, 8 or 12 week period with the preceptor. It affords the student an opportunity to learn much of the art and science of medical practice. Preceptors have been selected by a Preceptorship Committee of the Faculty of the College, and are outstanding leaders in medical practice in the rural communities of Nebraska. Preceptors are regularly appointed members of the College of Medicine faculty, subject to the same rules and regulations as all other faculty members.

The student is assigned a preceptor whom he closely follows in all of his medical activities, including hospital work, office practice and home calls. Students are allowed to participate in the various aspects of medical practice as the preceptor feels they are capable of handling the work. The various aspects of general practice and community life are made known to the student during his preceptorship.
TRAINING COURSE FOR RADIOLOGICAL TECHNOLOGISTS

HOWARD B. HUNT, M.A., M.D.
Professor of Radiology and Chairman of Department

RICHARD A. BUNTING, B.Sc., M.D.
Assistant Professor of Radiology

JANET P. NIESS, B.Sc., R.T.
Assistant Instructor in Radiologic Technology

CONNIE JOHNSON, R.T.
Radiotherapy Technician

DOROTHY D. SAVAGE, R.T.
Chief Radiographic Technician

Organization.—The course for radiological technologists has been established by authority of the Board of Regents in connection with the Department of Radiology, College of Medicine, and extends over a two-year period. The first year consists of lectures and demonstrations with supervised experience. The second year consists of an apprenticeship in an accredited Department of Radiology. The course has been approved by the American Registry of X-ray Technicians which is sponsored by the American College of Radiology.

Students who have satisfactorily completed the course of training in radiological technology at the University of Nebraska, College of Medicine, including at least a second year of experience in an accredited department of radiology for which they are usually paid a salary, are accepted for examination by the American Registry of X-ray Technicians. A certificate in X-ray Technique is issued by the American Registry of X-ray Technicians upon successful completion of the examination.

Facilities for Instruction.—Ample opportunity for experience in making roentgenograms of patients is provided. During a period of 12 months about 15,000 X-ray examinations are done at the University of Nebraska Hospital, including all usual and most special procedures. The radiographic work is supervised by the radiologists and the senior radiological technicians. Facilities are provided for experience in X-ray therapy, loading of radium applicators and radioisotopic procedures. All students and staff members are carefully protected against exposure to radiation. The library of the College of Medicine is maintained in the hospital.

Requirements for Admission.—An applicant for admission to the course in radiological technology may be between 18 and 35 years of age and must be a graduate from an accredited high school. It is recommended that the preparatory work include English, chemistry, physics, zoology, typing and secretarial work, although applicants are considered who do not present credits in all these subjects. One year of collegiate study including English, physics, biology, chemistry, typing, shorthand and secretarial work is recommended. In the case of those students who have satisfactorily completed 90 semester hours of college work, including English 6 hours, physics 8 hours, chemistry 12 hours and biology 8 hours, the University of Nebraska College of Medicine will grant the degree of Bachelor of Science in Radiological Technology upon completion of the
prescribed course including physiology, biochemistry and intermediate radioisotopic technology and the additional year of approved preceptor training with special permission of the Director. Students with college credit of 75 semester hours who have completed all requirements in physics, chemistry and biology may be registered as candidates for the B.Sc. in radiologic technology with a 15 hour deficiency in electives. Applicants must be in good health with no disabilities. The application should be accompanied by a complete transcript of high school and college credits, a photograph and the names of two people from whom references can be obtained. Admission is allowed in January, July and September, and only six students can be accepted annually. Applications should be sent to the Chairman of the Department of Radiology, University of Nebraska College of Medicine, 42nd and Dewey Avenue, Omaha 5, Nebraska. Application forms will be provided upon request.

**Fees and Expenses.**—A tuition fee of $120.00 for a resident student and $200.00 for a nonresident is charged at the time of enrollment. This fee covers tuition, registration, student health and diploma fees. Students must maintain themselves and provide their own uniforms. The cost of textbooks is about $15. Board may be obtained for about $10 a week in the vicinity of the hospital and rooms for approximately $7 to $10 a week. A student may elect to spend the required second year in training at the University of Nebraska Hospital for which no tuition is charged.

Through the generosity of the W. K. Kellogg Foundation there are loan funds available for students taking training as technicians. Information concerning loans can be secured by applying to the Director.

**General Information.**—The course of study covers a period of one year. Students are accepted on a probationary basis during the first month. Students are in class or on duty in the Department of Radiology from 8 a.m. until 5 p.m. with a free hour for lunch. Students are not on duty during Saturday afternoon or Sunday. A vacation of two weeks is allowed at the Christmas holiday or in the summer. Immunization against diphtheria, typhoid fever and smallpox is advised.

**Curriculum.**—The course of training for students in radiological technology consists primarily of an apprenticeship and demonstrations under the technician and of conferences with the radiologist. The apprenticeship comprises 90 per cent of the period of training. The student works with the technician in the making of all types of X-ray studies. Gradually increasing independent responsibilities are given over to the student as experience increases. The student must become familiar with transcription of the reports of the radiologist covering the X-ray studies made of patients and his reports on patients treated with X-ray and radioactive agents.

The following courses are required of students in radiological technology. The courses in Anatomy and Medical Science are provided through the courtesy of the School of Nursing by the College of Medicine. Credits are expressed in semester hours.

1. **ANATOMY.**—Lectures, class recitations, demonstrations and laboratory work dealing with the structure of the human body. Preserved specimens and fresh animal specimens are used for study. 3 cr. hr.
2. **PHYSIOLOGY.**—Lectures, demonstrations and laboratory dealing with the functions of the human body. Required of B.Sc. candidates only. 3 cr. hr.
(2) **Medical Science.**—Causes and general features of disease processes. Lectures. 1 cr. hr.

(3) **Principles of Radiology.**—The general principles of radiation, technique, contrast media and various diagnostic procedures are presented together with the basic principles of X-ray and radium therapy. Lectures include professional ethics. 1 cr. hr.

(4) **Secretarial Office Practice.**—Supervised experience covering filing, cross indexing of diagnoses according to the Standard Nomenclature of Disease, vocabulary training and transcription of radiological reports. 2 cr. hr.

(5) **Radiation Physics.**—The production, characteristics and control of X-rays applicable to radiographic technique, radiotherapy and protection of personnel. Lectures. 2 cr. hr.

(6) a. **Elementary Radiographic Technology.**—Demonstration of anatomical positioning and adaptation of radiographic exposure to the more common radiographic examinations. 6 cr. hr.

   b. **Intermediate Radiographic Technology.**—Supervised application of above principles by the student in the conduct of routine radiographic procedures. 6 cr. hr.

(7) **Radiotherapeutic Technology.**—Demonstration of types of diseases to which radiotherapy is applicable and of their treatment by X-ray and radioactive agents. 3 cr. hr.

(8) **Elementary Radioisotopic Technology.**—Supervised experience in instrumentation and laboratory procedure. 3 cr. hr.

(9) **Intermediate Radioisotopic Technology.**—Conduct of radioassay, monitoring and special laboratory determinations. Required of all candidates for B.Sc. in Radiological Technology. 9 cr. hrs.

(10) **First Aid.**—A course in first aid as prescribed by The American Red Cross with award of First Aid Certificate by The American Red Cross upon satisfactory completion of course.

(11) a. **Chemistry.**—Principles of inorganic and organic chemistry as applied to physiology, nutrition and pharmacology. Required only of B.Sc. candidates who have had less than 12 hrs. collegiate chemistry. 4 cr. hr.

   b. **Biochemistry.**—A study of chemical reactions occurring in the human body with consideration of laboratory tests of bodily functions. Required of B.Sc. candidates only. 4 cr. hr.

**Opportunities.**—There is an increasing demand for qualified technicians. These opportunities are primarily in the departments of radiology in hospitals and in the offices of doctors specializing in radiology. There is no opportunity for independent operation of a laboratory by the technologist since the use of X-ray in the diagnosis and treatment of diseases is legally the practice of medicine and in the interest of public welfare and safety must be carried out under the supervision of a licensed physician.
Knowledge in the fields of biochemistry, hematology, serology, parasitology, bacteriology, immunology, and mycology has been increased greatly during the last twenty or thirty years. This knowledge is now being routinely applied in medical science by means of laboratory tests in the diagnosis and treatment of all patients, both those who enter hospitals and those who are cared for in physicians' offices.

Performing these laboratory tests and interpreting their results have become so important and complicated that this is now a special field of medicine in itself. The volume of laboratory work has led to the training of medical technologists for the assistance of the physicians in this and other specialties, and in the general practice of medicine.

The demand for well-trained medical technologists has been increasing steadily. Most technologists are employed in hospital laboratories, although many of them work in physicians' offices and in clinics. There are some openings for medical technologists in research laboratories, and a number of opportunities have appeared in industrial laboratories with work related to or similar to medical techniques.

Organization.—The course for medical technologists has been established by authority of The Board of Regents, in connection with the Department of Pathology, College of Medicine. It has been accredited by the Council on Medical Education and Hospitals of the American Medical Association and the American Society of Clinical Pathologists as being equipped and organized to furnish adequate training in laboratory technic. Graduates of the Training Course for Medical Technologists are expected to take the examination for certification by the Registry of Medical Technologists maintained by the American Society of Clinical Pathologists.

Facilities for Instruction.—The course is given in the University Hospital, and facilities of the University of Nebraska College of Medicine are available for instruction.

The University Hospital is organized primarily for teaching and is under the control of The Board of Regents, through the administration of the College of Medicine. It has a capacity of 202 beds, and patients are accepted from all over the state. All types of diseases are treated. More than 4,000 patients are admitted each year.

The laboratory of the University Dispensary is also used for instruction. More than 35,000 visits are made each year by patients of the University Dispensary. The treatment of patients in the hospital and dispensary is directed by the faculty of the College of Medicine. The laboratory work that is done includes all routine procedures, and many specialized tests that are required for unusual diseases.

The Library of the College of Medicine is maintained in the hospital. These books and periodicals are available for study, and for keeping in touch with current work in the field of laboratory diagnosis.
REQUIREMENTS FOR ADMISSION

High School.—Sixteen high school units are required for admission and must include three units in English, two units in one foreign language (ancient or modern), two units in mathematics (one each of algebra and geometry or an equivalent), and one in science (biology, botany, chemistry, physics or zoology).

College or University.—To insure adequate background and training for entering a recognized course in medical technology, the following minimum requirements have been established in accordance with the Registry of Medical Technologists:

BIOLOGY.—Twelve semester hours, of which are required at least 4 semester hours of zoology, and 3 semester hours of bacteriology if offered at the college where preliminary work is taken. If bacteriology is not available other branches of biology may be substituted.

CHEMISTRY: General Inorganic Chemistry.—At least 8 semester hours including 4 semester hours of laboratory. Organic Chemistry.—A complete course, at least 4 semester hours with not less than 2 semester hours of laboratory. Quantitative Analysis.—A semester course is recommended.

PHYSICS.—A lecture and laboratory course in physics is recommended.

ENGLISH.—Six semester hours in English.

Electives.—Sufficient to give a total of 60 semester hours of college credit. Sociology and psychology are recommended for electives.

After completion of the training course in Medical Technology, those students who have at least 90 semester hours of previous college work may obtain the degree of Bachelor of Science in Medical Technology, granted by the University of Nebraska College of Medicine. Those students taking the Training Course in Medical Technology with less than 90 semester hours of previous college work may be granted the Certificate of Medical Technologist.

Effective January 1, 1962, the pre-technical educational requirements for admission will be increased from two years (60 semester or 90 quarter hours) to three years (90 semester hours or 135 quarter hours).

Under this new program, the following courses are minimum requirements:

BIOLOGIC SCIENCE.—Sixteen semester hours. This must include one full academic year (two semesters) of general biology and/or zoology, including lecture and laboratory. A minimum of three semester hours of bacteriology is required, if offered at the college where preliminary work is taken. If bacteriology is not available, other branches of biologic science may be substituted, with permission of the Director.

CHEMISTRY.—Sixteen semester hours, including lecture and laboratory. This must include at least two semesters of general inorganic chemistry, lecture and laboratory; this may also include qualitative analysis. At least four semester hours of organic chemistry, including laboratory, must be completed. A course in quantitative analysis is highly recommended.

MATHEMATICS.—A minimum of one semester (three semester hours) of college mathematics is required.
ENGLISH.—A minimum of six semester hours of English is required.

PHYSICS.—A lecture and laboratory course in physics is recommended.

ELECTIVES.—Sufficient hours to total 90 semester hours of college credit. Emphasis is placed upon obtaining as broad a general educational background as possible, in addition to the required courses listed above.

Loan funds and limited scholarships are available. The W. K. Kellogg Foundation has loan funds available through the University of Nebraska College of Medicine for students in the Training Course for Medical Technologists. The Frieda M. Oltmanns Loan Fund for Student Medical Technologists has funds for students at or beyond the second year at the University of Nebraska in Lincoln or in the Training Course in Omaha. This fund is administered by the Nebraska Society of Medical Technologists. Further information regarding loans and scholarships can be obtained from the Director of the Training Course for Medical Technologists.

Starting Dates.—Students begin their training during the summer months on a somewhat staggered schedule.

Applications.—Forms for application may be obtained from the Director. These forms, with transcripts of both high school and college work, accompanied by a small recent photograph or snapshot, should be submitted several months prior to the date for which application is being made.

Fees and Expenses.—A tuition fee of $120.00 a year for a resident student and $200.00 a year for a non-resident student is charged at the time of enrollment. This fee covers tuition, registration, student health and diploma fees. Other than uniform laundry, students are responsible for their own maintenance, uniforms, laundry, etc. Housing facilities are available on the campus. Adequate facilities for lodging and/or board are available near the campus. Allowance should be made for the purchase of books.

Plan of Instruction.—The course of training is 12 months in length. No part of the course is offered separately. Lectures covering background material are taken with the students of the College of Medicine. Other lectures are designed especially for the needs of the medical technologists. Conferences are held at frequent intervals for consideration of technics, their relation to disease processes and possible sources of error. Oral and written examinations are given at intervals. Demonstrations are used to introduce new subject matter, to emphasize important points and to familiarize the student with unusual problems.

The hours credit are arranged as follows:

The following formally arranged lecture courses are given:

INTRODUCTION TO MEDICAL SCIENCE.—This course covers a general survey of disease processes and their effect upon the individual. The relation of laboratory determinations and alterations in these tests associated with disease states is stressed.

MEDICAL MICROBIOLOGY.—This course is taken with the students of the College of Medicine. The medical aspects of bacteriology, immunology, mycology and parasitology are discussed.
Bacteriology and Serology Laboratory Problems.—Particular attention is given to laboratory technics, their control and interpretation.

Histologic Technic.—A series of lectures covering the basic principles of processing tissue and other materials for microscopic examination is given.

Biochemistry.—This course embodies a study of the chemical reactions occurring within the human body. Particular attention is given to the way in which laboratory tests can give information about normal and abnormal chemical functions in the body.

Hematology and Clinical Laboratory Techniques.—This course covers the general principles of blood examination for alterations in the cellular elements, including a discussion of abnormal conditions which are reflected in the laboratory results. In addition, the general aspects of urinalysis, gastric analysis, basal metabolic rates and electrocardiography are discussed.

Seminars.—Periodic seminars are held during which time pertinent problems regarding the laboratory are discussed. Periodic reviews of the recent literature are conducted.

In addition to the formal lecture material, the student is assigned to various services, as follows:

Chemistry—three months. This service includes examination of blood and other body materials for chemical constituents. Such tests usually are quantitative. The student learns the use of proper equipment and the application of careful technics to the performance of a wide variety of tests. More than 25,000 tests in the chemistry section are performed annually, allowing thorough training in this field.

Hematology—three months. The various tests for enumeration and detection of abnormality of the formed elements of the blood, and the tests for alterations in the coagulation mechanism of the blood are done. Over 45,000 such tests are performed in the hospital laboratory yearly.

Bacteriology, Serology and Parasitology—three months. The identification of microorganisms, particularly pathogenic, by morphologic and cultural characteristics is undertaken in bacteriology. Serology involves primarily immunologic procedures in laboratory tests. Parasitology includes the study of technics for isolation and identification of small animal forms capable of causing disease in man. Adequate demonstration material is maintained in the laboratory. This section of training is under the direction and supervision of the bacteriology staff of the College of Medicine. Over 55,000 procedures are done yearly in this field.

Blood Bank Technic—one month. Here the student is instructed in methods for handling and storage of blood, as well as preparation of blood for transfusion. Methods for detection of incompatibilities between bloods are emphasized. Over 8,000 tests are made in this section yearly.

Histologic Technic—one month. The student becomes familiar with the methods for processing tissues for microscopic examination. A variety of methods is presented, and there are approximately 13,000 tissue sections made yearly.

Miscellaneous—one month. On this service, the student performs routine examinations of urine, gastric contents and other body fluids. In addition, the performance of basal metabolic rate determinations is accomplished. Approximately 12,000 such tests are made yearly.
