

<http://www.rsc.org/journals-books-databases/journal-authors-reviewers/licences-copyright-permissions/#reuse-permission-requests>

The screenshot shows the top navigation bar of the Royal Society of Chemistry website. The logo is on the left, and navigation links include 'About us', 'Membership & professional community', 'Campaigning & outreach', 'Journals, books & databases' (highlighted), 'Resources & tools', 'News & events', and 'Locations & contacts'. A search bar with 'Google Custom Search' is on the right. Below the navigation is a breadcrumb trail: 'Home > Journals, books & databases > Journal author & reviewer guidelines > Licences, copyright & permissions'. The main header features the title 'Licences, copyright & permissions' and a subtitle: 'Information about copyright, our licence to publish and your deposition and sharing rights'. The background image shows the pages of an open book.

The sidebar menu is titled 'Journals, books & databases'. It contains the following items: 'Our journals', 'Journal author & reviewer guidelines' (highlighted), '→ Prepare your article', '→ Submit your article', '→ Article templates & services', '→ Our processes & policies', '→ Author responsibilities', and '→ Reviewer responsibilities'.

When you publish in a Royal Society of Chemistry journal, you keep the copyright of the manuscript. On this page you can learn more about our Licence to Publish and the rights you retain as an author. We also explain where you can deposit and share your article, and how to request permission to re-use other people's work.

The following details apply only to authors accepting the standard Licence to Publish. Authors who are interested in publishing open access should visit our open access pages for more information about our [open access licences](#) and deposition rights.

[Re-use permission requests](#)

Rights retained by authors

When the author accepts the exclusive licence to publish for a journal article, he/she retains certain rights that may be exercised without reference to the Royal Society of Chemistry.

Reproduce/republish portions of the article (including the abstract).

Photocopy the article and distribute such photocopies and distribute copies of the PDF of the article for personal or professional use only (the Royal Society of Chemistry makes this PDF available to the corresponding author of the article upon publication. Any such copies should not be offered for sale. Persons who receive or access the PDF mentioned above must be notified that this may not be made available further or distributed.).

Adapt the article and reproduce adaptations of the article for any purpose other than the commercial exploitation of a work similar to the original.

Reproduce, perform, transmit and otherwise communicate the article to the public in spoken presentations (including those that are accompanied by visual material such as slides, overheads and computer projections).

The author(s) must submit a written request to the Royal Society of Chemistry for any use other than those specified above.

All cases of republication/reproduction must be accompanied by an [acknowledgement](#) of first publication of the work by the Royal Society of Chemistry, the wording of which depends on the journal in which the article was published originally. The acknowledgement should also include a hyperlink to the article on the Royal Society of Chemistry website.

The author also has some rights concerning the deposition of the whole article.

Re-use permission requests

Material published by the Royal Society of Chemistry and other publishers is subject to all applicable copyright, database protection, and other rights. Therefore, for any publication, whether printed or electronic, permission must be obtained to use material for which the author(s) does not already own the copyright. This material may be, for example, a figure, diagram, table, photo or some other image.

Author reusing their own work published by the Royal Society of Chemistry

You do not need to request permission to reuse your own figures, diagrams, etc, that were originally published in a Royal Society of Chemistry publication. However, permission should be requested for use of the whole article or chapter except if reusing it in a thesis. If you are including an article or book chapter published by us in your thesis please ensure that your co-authors are aware of this.
