**Recommended Citation**  

This Conference Proceeding is brought to you for free and open access by the College of Allied Health Professions at DigitalCommons@UNMC. It has been accepted for inclusion in Posters and Presentations: College of Allied Health Professions by an authorized administrator of DigitalCommons@UNMC. For more information, please contact digitalcommons@unmc.edu.
Chart a Course for Holistic Admissions Transformation Using an Interprofessional Model

Educational Leadership Conference
Bellevue, WA
October 20, 2019

Kyle Meyer, PT, PhD, MS
Dean, College of Allied Health Professions
Association of Schools of Allied Health Professions Fellow

Sara Bills, PT, DPT
Admissions Chair, Division of Physical Therapy Education
Admissions Committee Chair,
College of Allied Health Professions
Objectives

1. Describe the purpose and evidence-based rationale for use of comprehensive holistic admissions

2. Identify potential barriers to the development and implementation of holistic admissions

3. Identify strategies for addressing barriers in the transition to holistic admissions

4. Create a “holistic” plan for introducing holistic admissions practices at your institution
Purpose & Rationale
Holistic Admission Review (HAR)

AAMC Definition

“Holistic review is a flexible, individualized way of assessing an applicant’s capabilities, by which balanced consideration is given to experiences, attributes, and academic metrics (EAM) and, when considered in combination, how the individual might contribute value as a student and future practitioner.”
Holistic principles (AAMC)

1. Selection criteria are broad-based, are clearly linked to the school’s mission/vision/goals and promote diversity as an essential element of achieving institutional excellence.

2. A balance of experiences, attributes, and academic metrics are used, and applied equitably across the entire candidate pool.

3. Individualized consideration is given to how each applicant may contribute to the school and the profession.

4. Where permitted by law: race and ethnicity may be considered as factors when making admission related decisions only when such consideration is narrowly tailored to achieve mission-related educational interests and goals associated with student diversity, and when considered as part of a broader mix of factors, which may include personal attributes, experiential factors, demographics, or other considerations.

Adapted from AAMC Roadmap to Diversity Publications
Holistic Admission Review (HAR)

ADEA Definition

Holistic review—a flexible, individualized applicant assessment tool—provides admissions committees a balanced means of considering candidates’ personal experiences, attributes and academic credentials, along with qualities and characteristics that would prove valuable in both dental school and the oral health profession.
Holistic Admission Review (HAR)

Pharmacy

Holistic review in admissions is a flexible, highly-individualized process by which balanced consideration is given to the multiple ways in which applicants may prepare for and demonstrate suitability as student pharmacists and future pharmacists. Under a holistic review framework, candidates are evaluated by criteria that are institution-specific, broad-based, and mission-driven and that are applied equitably across the entire applicant pool.
Holistic Admission Review (HAR)

AACN

Holistic review is a university admissions strategy that assesses an applicant’s unique experiences alongside traditional measures of academic achievement such as grades and test scores. It is designed to help universities consider a broad range of factors reflecting the applicant’s academic readiness, contribution to the incoming class, and potential for success both in school and later as a professional.

Holistic review, when used in combination with a variety of other mission-based practices, constitutes a “holistic admission” process.
Holism in assessment is a school of thought or belief system rather than a specific technique. It is based on the notion that assessment of future success requires taking into account the whole person.

Purpose of Holistic Admissions

• Educate a diverse allied health workforce
• Improve learning experience for all students
• Admit students that advance the school’s mission
  • Mission alignment promotes retention and success
• Confirm procedural equity for all qualified applicants
2019-21 APTA Strategic Plan

FOSTER LONG-TERM SUSTAINABILITY OF THE PHYSICAL THERAPY PROFESSION

Champion student and early-career issues including debt burden and career-earning potential

Make APTA an inclusive organization that reflects the diversity of the society the profession serves

From: http://www.apta.org/StrategicPlan/Plan/
Supporting Evidence

1. Schools that implement many elements of holistic review are more likely to see an increase in diversity than schools that implement fewer practices.
   
   Urban Universities for HEALTH (2014).

2. Using mission-driven, holistic admissions criteria comprised of applicant attributes and experiences in addition to academic metrics resulted in a more diverse interview pool than using academic metrics alone.
   
   Grabowski, C. J. (2018).

3. Increasing the relative weight of noncognitive admissions criteria improves URM admission rates.
   
   Ballejos et. al (2015)
### TABLE 3. HOLISTIC REVIEW: IMPACT ON DIVERSITY

Change in diversity for schools self-identified as using holistic review, by holistic review score

<td>0.24</td>
<td>0-1</td>
</tr>
</tbody>
</table>
Supporting Evidence

1. Diversity in the classroom/workforce is associated with:
   • Improved access to care for racial ethnic minority patients
   • Greater patient choice and satisfaction
   • Better educational experiences for health professions students

Institute of Medicine (2014)
Gurin et. al (2002)
Luo et. al (2009)
Page (2007)
Saha et. al (2008)
Call for comprehensive change

• A multi-pronged, interprofessional approach to increasing student and healthcare workforce diversity is described.
• Changes in support of diversity to university mission, admissions practices, diversity monitoring; engagement of leaders.
• Partnering with community groups to strengthen outreach to URE students and diversity practices in healthcare institutions.
• Resulted in increased applications from pipeline schools, larger number of URE admissions, increased faculty diversity.

Glazer et. al (2017)
“The AAMC is pleased that the U.S. district court has ruled in favor of Harvard University, concluding that its admissions process meets constitutional standards. The court’s decision re-affirms the educational benefits of diversity in the classroom and defers to the good-faith judgments of educators who strive to achieve those benefits for their students and for society as a whole. The decision bolsters the use of individualized, holistic review in admissions, based on each school’s mission and circumstances. The decision bolsters the use of individualized, holistic review in admissions, based on each school’s mission and circumstances.”
Identifying Barriers
Culture & Assumptions

• Continuum of Perceived Value/Responsibility
  • Understand – Comply – Consent – Commit
    • "I agree – I'm glad other universities are doing it."

• Beliefs about current admissions practices
  • You have to be one to pick one
  • "It's working, why change?"
  • "We're already doing that"
Culture & Assumptions

- Threat to program autonomy
- Unconscious Bias
  - Profession
  - Admissions Process – Confirmation Bias
The "Quality" Question

- Lowering the standard(s)
- Identity of program may be challenged
  - Keepers of the program (unconscious bias)
  - Perceived threat to current metrics of success
"I am on the record in support of repealing provisions of I-200, which would allow us to take race and gender into account, as one of many other factors, when admitting students and hiring faculty and staff … At this time when we are beginning to learn more about the advantages that legacy status, monetary donations, participation in elite sports or being the child of a faculty member can provide in gaining admission to some of our most elite institutions, allowing some consideration for race seems benign by comparison," she wrote. "The intent is to level the field, not advantage one group over another."
How do you evaluate attributes?

- Essays
- Short Answer Questions
- Questionnaires and surveys
- Interviews – which method?
- Portfolios
- LOR
Time & Resource-Intensive

- Time
- Staff
- Faculty / Reviewers
- Other Resources (consultants, software)
Data

- Incomplete, unanalyzed or anecdotal
- No comprehensive review of admission practices across programs
Mitigating Strategies
Strategy 1: System Review
Strategy 1: System Review
Applicant/Matriculant Data

• Who applies? Why or why not?
• Who do we interview? Why or why not?
• Who do we admit? Why or why not?
• Who succeeds? Why or why not?
• What structures, P & P do we use to foster retention, promote progression, and ensure success?
• What admission & performance data do we need to collect to evaluate success?
Strategy 1: System Review
Applicant/Matriculant Data

- Data that UNMC routinely collects
  - NE residence status
  - Gender*
  - Racial/ethnic minority status*  
    (* protected groups)
- Added three variables not previously analyzed
  - Precise geographic distribution in Nebraska and the U.S.
  - Area-based SES
  - Status as a first generation college student
Strategy 1: System Review
Applicant/Matriculant Data

Why those new variables?

Geographic data to help determine whether processes support mission to provide “care… for all patients” and “outreach to underserved populations”.

Lower socioeconomic status and first generation college attendance both correlate with:

• lower performance on standardized exams and other academic metrics
• much lower rates of enrollment in medical schools (60% medical students in U.S. from households in upper quintile)
Applicant/Matriculant Data

2014-2015
2015-2016
2016-2017

2,709 unique applicant records (SES data for 2,570)
81% of Nebraska resident applicants’ median household income was above $55,000 (the approximate US and NE values)
Strategy 1: System Review

Data Analysis Summary

- Majority enrollees were NE residents (proportional distribution w/ gaps in N. & S. Omaha)
- Majority enrollees were female (applicant pool & those accepted)
- Small % of applicant pool and enrollees self identified as URM compared to NE & US populations
- Lower household incomes correlated with lower performance on standardized exams & other academic metrics
Strategy 1: System Review
Data Analysis Summary

- Greater household income of applicants & enrollees suggests applicant pool differences play a much larger role than enrollment rate differences
- First generation college applicants enrolled at significantly lower rate
- Male & URM applicant & enrollment % less due to smaller percentages of each in applicant pool
CAHP admission policies and procedures were not resulting in the outcomes that we desired.

When we examined the practices in detail and in a broader context we determined to comprehensively redesign **the system**
Strategy 2: Provide Consistency & Clarity in Messaging
Strategy 2: Messaging
Clear and Consistent Message

• Charge from Dean for Comprehensive (all college) Review
• Identified as a 5-year initiative
• Multiple stakeholder meetings, invited concerns
• Articulated clear goals of admissions transformation
• Developed conceptual models for shared understanding
Goals of Comprehensive Admissions Transformation

• Admit students to advance university mission & values
• Increase broad-based diversity in order to improve the learning experience for all students
• Provide procedural equity & access for all qualified applicants
• Adopt uniform admission policies & procedures across programs
  • Quantify
  • Standardize
  • Validate (Assess)
  • Use and apply evidence-based data & practices
• Align holistic admissions across the educational continuum (recruitment, admissions, retention, graduation)
• Graduate a diverse allied health workforce
Conceptual Model: Elements of Holistic Review

- Culture
- Polices & Procedures
- Finances
- Student Support
- Assessment
- Training
- Recruitment
American Council on Education (ACE) Roadmap

ELEMENTS OF A DIVERSE STUDENT SUCCESS INFRASTRUCTURE

- Planning
- Decision-Making & Governance
- Info. & Instit. Research
- Finances/Resources
- Policies
- Facilities & IT
- Incentives & Rewards
- HR & Development

Conceptual Model: Goals for Admissions Changes

NCVs, Attributes, Experiences
Mission Alignment

GPA

Scores
Metrics
Strategy 3: Creation of a College-Wide Admissions Committee
Strategy 3: Creation of a... 
College-Wide Admissions Committee

- Chair – faculty member
- Defined committee’s role in college
- Explored literature
- Helped to craft the message
- Align admission practices with the institution’s mission and values
  - Created an Admissions Mission Statement
Strategy 3: Creation of a…
College-Wide Admissions Committee

- Helped develop Admissions P&P
  - AdMISSION Bio – screening essay
  - Uniform Remediation & Progression policies
- Created Guiding Documents
  - EB-Recommendations for Interviews
- Created an accountability structure
University of Nebraska Diversity & Inclusion Goals & Priorities

• Increase the percentage of Nebraska high school graduates who enroll at and graduate from the university.

• Increase the diversity of those who enroll at and graduate from the university, employing measures permitted by state and federal law.

UNMC Diversity, Equity & Inclusivity Goals & Strategies

Advance the programs and culture of UNMC as an exemplary culturally sensitive, diverse & inclusive organization in its mission of transforming lives through premier education, innovative research, and extraordinary patient care.

• Increase retention, recruitment, engagement and mentorship of all faculty, students and staff to enhance diversity and inclusivity across all UNMC and Nebraska Medicine programs and sites.

• Enrich the environment of inclusivity and collaboration for all faculty, staff, and students in the communities we serve through coordination of programs that eliminate unconscious bias and promote and sustain exemplary inclusivity in the learning and working environment.

• Develop, coordinate, evaluate and measure Inclusivity, Diversity, and Equity (IDE) efforts within UNMC and the University of Nebraska programs to develop an exemplary and inclusive IDE infrastructure.
UNMC Mission Statement & Values

Our mission is to lead the world in transforming lives to create a healthy future for all individuals and communities through premier educational programs, innovative research and extraordinary patient care.

OUR VALUES

reflect who we are and why we’re here.

ITEACH

Innovation
Search for a better way. Seek and implement ideas and approaches to create change in the way we work, approach, teach and heal. Drive transformational change.

Teamwork
Respect diversity and see another. Communicate effectively and listen well. Be approachable and courteous. There is no limit to what we can achieve when we work together.

Excellence
Strive for the highest standards of safety and quality in all that we do. Work to achieve exceptional results.

Accountability
Commit. Take ownership. Be resilient, transparent and honest. Always do the right thing and continuously learn.

Courage
Make the tough decisions. Have no fear of failure in the pursuit of excellence. Admit mistakes and learn from them.

Healing
Stew the empathy you feel. Be selfless in caring for patients, one another and the community.
The mission of the Division of Physical Therapy Education at the University of Nebraska Medical Center is to improve the health of Nebraska by:

• Preparing physical therapists and other healthcare professionals to deliver evidence-based, patient-centered care as members of an interprofessional team.
• Conducting scholarly activities that contribute to the evidence and influence change in clinical and educational practice.
• Providing professional service including outreach to underserved populations.
The mission of admissions in the College of Allied Health Professions is to advance evidence-based recruitment and admissions practices that are inclusive, equitable and balanced with respect to experiences, attributes and metrics, to recruit and admit applicants for the purpose of preparing highly competent, collaborative, and compassionate professionals dedicated to improving the health and healthcare of all individuals and communities.
Development of Holistic Screening

William Sedlacek's Non-cognitive variables (NCV)

1. Positive Self-Concept
2. Realistic Self-Appraisal
3. Understand how to navigate the system
4. Prefers long range goals to short term or immediate needs
5. Availability of a strong support person
6. Successful leadership experience
7. Demonstrated community service
8. Knowledge acquired in or about a field
Development of Holistic Screening

KEY: Used in screening phase of admissions process
Large portion of pre-interview assessment

- Named UNMC’s AdMISSION Bio

- Variables assessed via 8 short answer questions
  - 1000 total words (125 words max each question)

- 44 readers trained on rubric
  - Two readers per essay, third if required, can recuse
  - Blinded to name or any other data
  - Readers from inside/outside the college, academy of educators, library

NCVs Measure Different Construct

NCV Score & Cumulative GPA $r=0.01$

Graph showing the relationship between NCV Score and Overall GPA with a correlation coefficient of $r=0.01$. The graph indicates a weak positive correlation between the two variables.
Development of Holistic Interview Practices

The Admissions Committee provided evidence-based recommendations to the 14 programs:

1. **Structured interviews**: Standardization of questions and scheduled activities for every applicant.

2. **Involvement of 2 or more interviewers**: Evaluation by more than one interviewer.

3. **Use of rubrics**: Evaluation by the same methods, such as a rubric or rating scale.

4. **Training of Interviewers**: Inclusion of diversity learning, bias awareness learning, and rubric use.

5. **Maximization of reliability**: Adjustment for variability between interviewers, potential bias, and need for additional interviewer training.
Holistic Interview Practices

Multiple Mini-Interviews (MMI)

- Structured interview (task/situation) stations
  - Each with own evaluator
  - Each for specific attribute(s)
  - Assessed with a rubric
  - Normalization

- Minimizes opportunities for bias
CAHP Programs & MMI

Multiple Mini-Interviews (MMI) were written by PA Program faculty. Many programs incorporated modified scenarios and used in combination with traditional-style interviews.

- Physician Assistant
  - Full MMI, 8 stations, no traditional interviews
- Physical Therapy
  - Hybrid traditional-MMI, 3 stations, also included portfolio review
- Genetic Counseling
  - MMI and traditional stations, 3 traditional stations and 5 MMI stations
- Radiation Therapy
  - MMI, traditional, and VERT/Anatomage stations, 6 total stations
PA Applicant Feedback

- Several IRBs to evaluate MMI in various capacities
- Preliminary applicant survey data:
  - 120 Respondents (64% response rate)

<table>
<thead>
