Omaha Medical College

Announcement

In the fall of 1880 there was inaugurated in Omaha a preparatory school under the name of the "Nebraska School of Medicine." Instruction was given for five months with a complete course of lectures in the different departments of medicine and surgery. The success of the school far exceeded the most sanguine expectations of its founders and convinced them that a well equipped medical college is actually demanded by the rapidly increasing population of Nebraska and contiguous states and territories. With this experience the faculty in May 1881 organized and incorporated under the law of Nebraska the Omaha Medical College. In sending forth this the 2nd annual announcement it is with pleasure they can assure the profession and students of medicine in the territory tributary to Omaha

that all arrangements have been completed to conduct a college, with advantages 2nd to none in the western states.

The new college building on grounds owned by the college association, has been completed, and provides ample room and facilities for a large class of students.

The faculty strongly recommend the gradis course of lectures, but will grant diplomas to deserving students after they have had 3 years study including 2 full courses of lectures the first of which must have been either in this or some other respectable U.S., and the last in this institution.

College building.

11 and Mason adjoining St. for hospital. 2 stories high - 2 lecture rooms, Laboratory - Library and museum Patient's room, Dissecting & anatomical room.
