Figure S3. A) Growth curves of *S. aureus* JE2 and Δopp3 in CDM, CDM-PRE, and CDM-PRE supplemented with 13 μM of following peptides: 9-mer (SSSPRESS), 10-mer (SSSSPRESSS), 11-mer (SSSSPRESSSS), 12-mer (SSSSSPRESSSS), 13-mer (SSSSSSPRESSSS). Data are represented by the mean ± SEM, n=3. B) Growth curves of *S. aureus* JE2 pLI50 (empty vector), Δopp3 pLI50, and Δopp3 pNF374 (pLI50::opp3) in CDM or CDM-PRE supplemented with 13 μM of the 3-mer (PRE) or 8-mer (SSSPRESS). Data are represented by the mean ± SEM, n=3.
