Submitting Copyrighted or  
Proprietary Content

## Content License

**The following policy applies to all of PLOS journals, unless otherwise noted.**

PLOS applies the Creative Commons Attribution (CC BY) license to works we developed to facilitate open access – namely, free immediate access to, and to works of all types.

Under this license, authors agree to make articles legally available for reuse, in virtually any purpose. Anyone may copy, distribute or reuse these articles, as long as the original source are properly cited.

### Using PLOS Content

No permission is required from the authors or the publishers to reuse or republish the original article is cited. In most cases, appropriate attribution can be provided for the original article.

### Example citation:

Kaltenbach LS et al. (2007) Huntingtin Interacting Proteins Are Genetic Modifiers of Neurodegeneration. *PLoS Genet* 3(10): e100082. doi:10.1371/journal.pgen.0030082.

If the item you plan to reuse is not part of a published article (e.g., a featured image), you must credit the originator of the work, and the volume, issue, and date of the journal in which it was published.

For any reuse or redistribution of a work, you must also make clear the license under which the work was published.

### Figures, Tables, and Images

Figures, tables, and images are published under the Creative Commons Attribution (CC BY) license.

### Data

If any relevant accompanying data is submitted to repositories with stated licenses, the license should not be more restrictive than CC BY.

### Submitting Copyrighted or Proprietary Content

Do not submit any figures, photos, tables, or other works that have been previously published or contain proprietary data unless you have and can supply written permission for the reuse of that content. This includes:

- maps and satellite images
- slogans and logos
- social media content.
